Source: U.S.: Department of Agriculture, Cotton Situation, Wool Statistics. EEC, EFTA, JAPAN: United Nations and OECD Export Trade Data Aggregate for SITC 65 and 841 above represents all published export data available at all three and four digit SITC grouping levels. Data published for EFTA SITC 841 consistently excludes quantity data for the United Kingdom and Norway. Also, SITC 65 for the United Kingdom includes only STIC 651, 652 and 657. Aggregate for both SITC 65 and 841 does not include exports of various commodities at the 4-digit level for which no quantity data is published These movements generally represent movements of less than $1,000,000 in value and would therefore represent relatively insignificant quantity movements.
