Finances, oil-shale program [1]

[In thousands of dollars]

	Fiscal year										Total
	1968	1969	1970	1971	1972	1973	1974	1975	1976	1977	
Oil shale mining methods research	1,248	2,194	2,304	4,234	5,279	3,809	3,744	3,544	3,044	2,354	31,754
Oil shale in situ retorting [2]	1,036	2,327	1,895	2,098	2,365	1,448	1,371	1,281	739	491	15,051
Oil shale composition, surface retorting, and shale-oil utilization	759	1,305	1,557	1,509	1,263	1,239	1,241	1,303	1,368	1,436	12,980
Minerals associated with oil shale	300	310	370	490	500	1,060	870	890	600	510	5,900
Resource appraisal studies (oil shale and minerals)	2,000	2,500	2,500	3,000	3,000	3,000	2,500	2,500	1,500	1,500	24,000
Resources-development planning	300	375	474	500	500	500	500	400	400	400	4,350
Impact of an oil-shale industry on the environment	200	250	300	525	550	450	450	350	275	150	3,500
Oil shale economic studies	125	125	125	125	125	125	125	125	125	125	1,250
Oil shale research facility	350	2,150									2,500
Annual total	6,318	11,536	9,526	12,481	13,582	11,631	10,801	10,393	8,051	6,966	101,285

[1] Estimated total costs, including both Government and industry funding.

[2] Fiscal year 1968 includes simulated nuclear experiment. Fiscal year 1969 through 1973 includes Bronco, nuclear-explosive, in situ retorting experiment, as well as other in situ retorting research, exclusive of Atomic Energy Commission nuclear-explosive and health and safety costs.
