

Has contracting out affected our combat potential, not only now but in the future? I can find no specific instance of loss in our combat readiness position caused by contracting out. If we had unlimited resources, we would try to keep our inhouse capabilities at a higher level. This, I believe, would enhance our combat capability.

However, within limited resources, we believe that we have the proper balance for our present situation. Our decisions to date as to what we will do inhouse and what must be done by contract, whether as a result of external directives or internal improvement, have represented our very best judgment and experience. As the missions and resources change, we must constantly go through the process of determining the best mix. This we will do.

(The annexes attached to the statement are as follows:)

Contracts for depot maintenance, fiscal year 1960—Missiles

Contractor	Location	Service contract for overhaul of components and assemblies for—	Gross amount of contract
Western Electric Co.....	Greensboro, N.C.....	Nike-Ajax.....	\$267,000
