¹ The common external tariff has been reduced by 20 percent in the case of those products to which a 20-percent reduction may be applicable, i.e., mainly nonagricultural, nonlist G items. For goods coming under the European Coal and Steel Community, the average of rates prevailing under the ECSC has been taken.

² Negligible.

³ In Germany and Belgium, there is a tariff after duty-free quota is filled.

⁴ Arithmetic average of national tariffs of Six. (The common external tariff for petroleum products has not yet been determined.)

⁵ This is the average tariff on U.S. goods if the common external tariff were applied to U.S. exports to all 15 countries.
