CONTENTS

Chapter 4. ATTEMPTS TO MEASURE THE VALUE OF PATENTS
(¶131ff.)

	Par.	Page
Evaluation by corporations.....	132-5	48
Patents' importance, by kinds of inventing.....	138	50
Table 6, kinds of invention, and percent patent-motivated.....	138	51

Chapter 5. THE THEORY AND PURPOSE OF THE PATENT
SYSTEM (¶142ff.)

The older philosophy of patents.....	143-55	53
Its refutation, through duplication of invention, and the diffi- culty of secret working.....	146ff.	54
The <i>rationale</i> of hiring inventors.....	152-5	56
The economic theory of patents.....	156ff.	58
Patents are to be judged primarily by economics, not by law nor physical science.....	157	58
Patents' economic justification are:		
1. To obtain inventions more surely and soon.....	160-3	59
2. Publicity for the invention, deficient however.....	164-6	60
3. Defense against later patentees.....	167, 8	61
4. To keep an invention out of use, usually properly.....	169, 170	62
5. To control quality.....	172	63
6. To rate and honor inventors.....	173	63
7. To concentrate manufacture.....	175-7	63
Invention for circumvention of a patent.....	179-82	64
Premises of the patent system, often overlooked, often question- able.....	184-97	6

Chapter 6. PATENTS PROTECT ONLY CERTAIN TYPES OF
INVENTIVE PROGRESS (¶200ff.)

Inventions legally barred from patents.....	202ff.	69
But lack of utility is allowed by custom.....	209	71
Economic exclusions from patenting:.....	211ff.	72
Inventions too big, or custom-barred, or whose nub is social.....	214-21	72
Inventions not assessable upon their beneficiaries.....	222, 3	75
Inventions made by scientists or government.....	223	76
Inventions for our various governments.....	224-6	76
Summarizing the field for patents.....	227-9	77

Chapter 7. THE BASIC MERITS AND FAULTS OF THE PATENT
SYSTEM (¶230ff.)

A. The economic justifications recapitulated.....	231-7	79
B. The virtues of the patent system.....	238ff.	80
Uniformity; postponed and automatic valuation; their ambivalence.....	238-43	80
C. Basic faults and limitations of the patent system.....	244ff.	81
Dislocation of effort; doubtful remuneration; delayed pay-off.....	247-52	82
Laying a toll upon innovation.....	253-7	84
Excessive and insufficient rewards.....	259	85
Costs of the patent system; litigation; secrecy.....	261-80	85
Dominating patents obstructing invention.....	281-4	91
Invalid and abusive patents.....	285-91	92
Why are so many bogus patents granted?.....	292-9	95
Delayed grant.....	301-3	97
Suppression of inventions.....	304-19	98
Rewarding the promoter rather than inventor; the free- lance.....	320, 1	102
Antiquity of the patent system.....	322	102
Summary.....	323	103
