

TABLE II.—Emissions of contaminants into the Los Angeles County atmosphere from stationary sources, 1948 and 1966
[Average daily emissions of air contaminants, in tons per day]

	Hydrocarbons, other organic gases		Oxides of nitrogen		Oxides of sulfur		Carbon monoxide		Aerosols	
	1948	1966	1948	1966	1948	1966	1948	1966	1948	1966
Petroleum:										
Refining	450	55	7	25						
Marketing	155	100		11	30	38	570	90	8	4
Production	270	60		9						
Organic solvent uses:										
Surface coating	170	265								
Dry cleaning	30	30							2	7
Degreasing	35	100								
Others	75	95								
Chemical:										
Sulfur plants						35				
Sulfuric acid plants					15	30				
Others	25	60			1	1				
Incineration:										
Metals	100	1	20	1	20	1	145	1	12	8
Minerals							325	3	185	1
Combustion of fuels:									25	8
Rule 62									4	7
Rule 62.1										
Miscellaneous	115	11	1 220	165	1 520	24	172	1	135	16
Totals:				275		375				48
Rule 62										2
Rule 62.1										55
	11,325	810	1 255	330	1 585	130	11,040	95	1 270	85

¹ In 1948, Rules 62 and 62.1 were not in effect. The losses indicated are daily averages for the year.
