

IV. PROGRAM

A. *Standards*: Standards are to be developed by the Department of Education (secondary public and private schools, on anything approaching a universal scale, are entirely new here). Inventories are to be taken and quantitative standards developed as a result.

B. *Book selection*: Standard selection tools and reviewing media are to be used.

C. *Distribution*: School library resources will be made available from a central location to be designated by the Educational Administration of each of the six districts, by loan to the schools—primarily to the teachers and students in those schools lacking libraries. Title is to be retained by the Department of Education.
