

most of them into Apollo and into Apollo Applications. For example, Mr. Kleinknecht, who was Mr. Mathews' Deputy, is now one of Dr. Shea's Deputies in Apollo.

Let me, while I have the chart, introduce also the rest of the people in this room and the rest of the people on the chart.

Special Assistant to Dr. Gilruth is Paul Purser.

Dr. Shea, the Apollo Manager, unfortunately, was not able to be with us. I believe he called you, Mr. Chairman, and told you that he could not be with us.

Dr. Faget, our Chief Engineer and Director of Engineering and Development is working on the review board for the Apollo 204 accident and is at Cape Kennedy.

Donald K. (Deke) Slayton who heads our Flight Crew Operations is at the end of the table [indicating].

Dr. Berry, Director of Medical Research and Operations.

Wesley L. Hjornevik, our Director of Administration.

Chris Kraft, who is the Director of Flight Operations.

We also have an activity at the White Sands Missile Range, our White Sands Test Facility, where we do the propulsion testing of the spacecraft engines in the Apollo program. This testing must be done at a remote site so we have a station at White Sands Missile Range headed by Martin L. Raines to take care of this effort.

Dr. Gilruth has mentioned our Gemini program activities (slide 3). Gemini was completed a month ago with a final conference.

NASA-S-67-1447

PROGRAM ACTIVITIES

- GEMINI
- APOLLO
- APOLLO APPLICATIONS
- FUTURE PROGRAMS
