

Army and the present flight training program at Fort Wolters will be expanded.

To support the larger flight training programs, the revised fiscal year 1967 budget and fiscal year 1968 budget requests provide 582 trainer aircraft for the Army, 269 for the Navy, and 458 for the Air Force.

Service Academies. As you know, we have been increasing the level of enrollment at the Military Academy over the past few years toward an ultimate goal of over 4,000. In fiscal year 1968, enrollment will average about 3,300 cadets. To help accommodate the larger student body, the fiscal year 1968 budget includes funds for a new 66-classroom academic building at West Point and for personnel facilities and utilities.

Enrollment at the Naval Academy (currently the largest of the three service Academies) in fiscal year 1968 will remain constant at about 4,100. Construction funds, totaling \$3 million, are requested for the modernization of an academic building at Annapolis, and for additional personnel facilities.

The Air Force Academy, which has also been gradually building up the size of its student body to an ultimate level of 4,000, will reach a total of 3,100 cadets in fiscal year 1968. In addition, a cadet pilot indoctrination program, designed to encourage all physically qualified cadets to consider flight training upon graduation, will be instituted. About \$5 million is included in the fiscal year 1968 budget for construction of medical, training, and other facilities at the Air Force Academy in fiscal year 1968.

Medical services

Medical services include those costs for medical and dental services not directly associated with military units in our other major programs, the costs of medical care for military dependents at non-military facilities, the costs of providing veterinary services, and the cost of operating various health service activities such as the Armed Forces Institute of Pathology.

The fiscal year 1968 construction program for medical facilities totals \$161 million—the largest ever. It includes 27 new hospitals or additions to existing hospitals, together with a large number of other medical facilities.
