

|                                            |                                                 |                                                                                                                                                                                      |                |
|--------------------------------------------|-------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Dr. Peter Bentler.....                     | University of California, Los Angeles.....      | Develop a multifactor instrument for assessment of developmental changes in children aged 0 to 6.                                                                                    | May 30, 1969   |
| Dr. Monica Holmes.....                     | Educational Testing Service.....                | 3-year study of Headstart children and their first "school" experience.                                                                                                              | Sept. 30, 1968 |
| Dr. Dorothy Adkins; Dr. Ian Reid.....      | Associate YM-YWHA's of Greater New York.....    | Study interaction pattern of Headstart children, to determine the extent to which these patterns bias teacher ratings of school readiness and intelligence.                          | Apr. 30, 1968  |
| Dr. Evan Keislar; Dr. Carolyn Stern.....   | University of Hawaii.....                       | A preliminary evaluation of a language curriculum for preschool children.                                                                                                            | Sept. 30, 1967 |
| Dr. Dorothy Adkins; Dr. Bonnie Baliff..... | University of California, Los Angeles.....      | Comparative effects of echoic and modeling procedures in language instruction with culturally disadvantaged children.                                                                | Aug. 30, 1967  |
| Dr. Stanley Sapon.....                     | University of Hawaii.....                       | To further develop an instrument to measure motivation to achieve in preschool children.                                                                                             | Sept. 30, 1967 |
| Dr. David Dennis.....                      | University of Rochester.....                    | Establishment of an experimental nursery school for the purpose of analyzing the functional aspects of verbal behavior of disadvantaged preschool children.                          | June 30, 1968  |
| Dr. Patricia Minuchin.....                 | Western New Mexico University.....              | Conduct a study of visual perceptions as related to cultural deprivation and conduct a followup program of 1966 Headstart children in the area.                                      | Dec. 31, 1968  |
| Dr. Arthur Jensen; Dr. William Rowher..... | Bank Street College of Education.....           | To develop ways of systematically describing variations in expressed curiosity and constructive exploration among preschool socially disadvantaged children.                         | Dec. 29, 1967  |
| Dr. Orval Johnson.....                     | University of California, Berkeley.....         | An experimental analysis of learning abilities in culturally disadvantaged children.                                                                                                 | Sept. 30, 1968 |
| Dr. Vera John.....                         | Southern Illinois University.....               | Provide a centralized source where researchers working with young children can obtain specialized information on measurement instruments and techniques.                             | June 30, 1967  |
| Robert Reeback.....                        | Yeshiva University.....                         | A study of language change in integrated and homogeneous classrooms.                                                                                                                 | Feb. 2, 1968   |
| Dr. Edsel Erickson.....                    | University of Rochester.....                    | An experimental analysis of generalization in first language learning.                                                                                                               | June 30, 1967  |
| Mr. Jess Cusick.....                       | Western Michigan University.....                | The effects of teacher attitude and curriculum structure on preschool disadvantaged children.                                                                                        | Aug. 15, 1969  |
| Dr. John Pierce-Jones.....                 | Kentucky Child Welfare Research Foundation..... | Research and evaluation of the rural child care project.                                                                                                                             | June 30, 1968  |
| Dr. John Cawley.....                       | University of Texas.....                        | 2 experimental studies in Summer Headstart, 1967. Changing Headstart children by upper middle class mothers. Achievement motivation and pattern reinforcement in Headstart children. | Dec. 31, 1967  |
|                                            | ENKI Corp.....                                  | Research on the evaluation of equipment for child development centers.                                                                                                               | June 30, 1968  |
|                                            | University of Connecticut.....                  | Conduct an appraisal of Headstart participants and non-Headstart participants including patterns of specific learning disability.                                                    | Do.            |

## ONGOING DEMONSTRATION PROJECTS

|                                          |                                                                |                                                                                                                                                                           |               |
|------------------------------------------|----------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| Dr. Susan Gray.....                      | George Peabody College for Teachers.....                       | Continue the regional research training demonstration center for culturally deprived children.                                                                            | Nov. 30, 1967 |
| Dr. Richard Dunham.....                  | Florida State University.....                                  | Conduct a model preschool training program for deprived children and demonstrate a method for helping the deprived family to stabilize itself and become self-sustaining. | Mar. 31, 1968 |
| Dr. Merle Karnes; Dr. Queenie Mills..... | University of Illinois.....                                    | Demonstration-training program for leaders in the field of preschool disadvantaged children.                                                                              | Aug. 31, 1968 |
| Dr. William Parker.....                  | Dependency Prevention Commission of San Bernardino County..... | Investigation to determine influence of children with American speech and language proficiency on children with bilingual language background.                            | May 31, 1968  |
