

ADVERSE REACTIONS

Hypoglycemia: See PRECAUTIONS.

Gastrointestinal Reactions: Cholestatic jaundice may occur rarely; (drug) should be discontinued if this occurs.

Gastrointestinal disturbances, e.g., nausea, epigastric fullness, and heartburn are the most common reactions, occurring in (manufacturer to supply estimate of incidence). They tend to be dose related and may disappear when dosage is reduced.

Dermatologic Reactions: Allergic skin reactions, e.g., pruritus, erythema, urticaria, and morbilliform or maculopapular eruptions occur (manufacturer to provide estimate of incidence). These may be transient and may disappear despite continued use of (drug); if skin reactions persist, the drug should be discontinued.

Porphyria cutanea tarda and photosensitivity reactions have been reported.

Hematologic Reactions: Leukopenia, agranulocytosis, thrombocytopenia, hemolytic anemia, aplastic anemia, and pancytopenia have been reported.
