

C. Numbers of cases

Controlled studies: Vol. 3.1 (p. 236, et seq)	Fenfluramine			Placebo			Age	Total
	M	F	NS	M	F	NS		
2002: Owen, J. (DBRX)	2	10	-----	2	10	-----	Adults	12
2009: Fisch, S. (DBR):								
20 mg	12	2	-----	14	1	-----	Adults	60
40 mg	15	0	-----					
2016: Rosenberg, B. (DBRX)	3	22	4	5	23	5	Adults	62
2020: Anderson, R. (DBRX)	3	17	-----	3	17	-----	Adults	20
2025: Hollingsworth, D.	32	3	1	32	3	1	Adults	36
2050B: Roginsky, M.	1	23	4	1	24	3	Adults	113
	2	22	3					
	1	24	5					
2055-B: Bacon, G.	6	14	-----	6	14	-----	Children	20
2060: Stern, Sol.	2	18	-----	0	20	-----	Adults	60
Total	79	155	17	63	112	9	-----	383

D. Dose:

Investigator:	Milligrams per day
Owen	40
Fisch:	
(1)	60
(2)	120
Rosenberg:	
(1)	60
(2)	120
Anderson	90
Hollingsworth	120
Roginsky:	
(1)	40
(2)	60
(3)	80
Bacon:	
(1)	20
(2)	40
(3)	60
Stern	80

E. Onset of action

Probably within an hour.

F. Duration of treatment

I am unable to locate protocols for the following investigators: Fisch, Rosenberg, Anderson and Hollingsworth. It is very difficult to determine the duration of treatment by looking at case report forms because of the large number of dropouts and other irregularities. As best as I can piece it together, the proposed duration of therapy by investigator was as follows:

	Number of weeks
Roginsky	12
Hollingsworth	8
Stern	8
Rosenberg	6-8
Bacon	4
Fisch	4
Anderson	¹ 3
Owen	¹ 2

¹ Not sure.
