

BIBLIOGRAPHY

We are also supplying to you for your background information a bibliography compilation entitled "Hematologic Aspects of Chloromycetin" which provides references and brief abstract of the contents of virtually all publications which have appeared beginning in 1948, in which there are references to hematologic aspects of Chloromycetin therapy. This compilation was prepared by the Department of Clinical Investigation by a staff under the direction of Miss Margaret Hanser. We expect to provide additional detailed bibliographic material of this sort as rapidly as it can be prepared.
