

with
Vibramycin
doxycycline

the lowest effective dose
 the key:
efficient absorption

...as reflected in high blood levels
 even in the critical first hour

After 45 minutes, Vibramycin blood levels are higher than those provided by
 I.M. injection of tetracycline in 15 human subjects.¹

doxycycline 100 mg. (oral) mcg./ml.

tetracycline 100 mg. (I.M.) mcg./ml.
