

TABLE 2

THERAPEUTIC ANTI-INFECTIVE AGENTSANTI-BACTERIAL AGENTSGRAM POSITIVE BACTERIATHE PENICILLINS

Penicillin G
Methicillin
Oxacillin
Cloxacillin
Nafcillin
Ampicillin

Semisynthetic

THE CEPHALOSPORINS

Cephalothin
Cephaloridin
Cephaloglycine

THE MACROLIDES

Erythromycin
Novobiocin
Oleandomycin
Triacetyloleandomycin
Carbomycin

OTHERS

Lincomycin
Vancomycin

GRAM NEGATIVE (& Positive) BACTERIA

Streptomycin
Dihydrostreptomycin
Neomycin
Kanamycin
Paromomycin

THE TETRACYCLINES

Tetracycline
Oxytetracycline
Chlortetracycline
Demeclocycline
Methacycline
Doxycycline
Rolitetracycline
Demethylchlortetracycline

CHLORAMPHENICOLTHE POLYMYXINS

Polymyxin B
Polymyxin D (Colimycin)

OTHER AGENTS

Gramacidin
Gentamycin
Bacitracin
Sulfonamides
Nitrofurantoin
Nalidixic Acid
Methenamine

ANTI-FUNGAL AGENTS

Nystatin
Amphotericin B
Griseofulvin

ANTI-VIRAL AGENT (Systemic)

(with exception of Idoxuridine for
Herpes simplex, keratitis, there
are no clinically effective agents)

ANTI-BEDSONIAL AGENTS

Tetracyclines
Chloramphenicol

ANTI-RICKETTSIAL AGENTS

Tetracycline
Chloramphenicol

ANTI-MYCOPLASMA AGENTS

Tetracycline
Erythromycin
