Food & Drug Administration
Washington
D.C.

Dear Sirs:

In regard to your investigation of the drug Mysteclin F,
I was a user of this drug, and unfortunately, had a side-
effect which affected me more than the illness.

In other words, I question Squibb's contention that the
drug is safe.

If you are continuing your investigation and would like
more information, by all means let me know.

Sincerely,

Howard B. Olson
