

WILLIAM C. FIPPIN, M. D.
1114 SO. LIMESTONE
SPRINGFIELD, OHIO
TELEPHONE FA 5-9021

January 21, 1969.

Mysteclin-F has had a definite useful place among the antibiotics prescribed in my practice, particularly for those types of patients prone to candidal infections (women with a history of candidases, elderly patients, debilitated patients, diabetics, patients on corticosteroids, etc.).

I have used this since 1960 and would not want to stop using it now.

Sincerely,

William C. Fippin
