JACK A. DAWSON, M. D.
DOCTOR'S BUILDING
NORTH WILKESBORO, N. C.

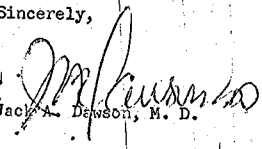

February 3, 1969

Dear Doctor Ley:

Mysteclin-F has been used extensively in my practice and on a comparative basis to the plain antibiotics has never caused a monilial overgrowth or stomatitis. I am not convinced by academic studies, but rather clinical results and therefore am of the opinion that there is absolutely no justification to remove Mysteclin-F from the market.

I have been using Mysteclin-F since 1962 and hope to continue.

Sincerely,

Jack A. Dawson, M. D.
