

APPENDIX III

[From McCall's Magazine, March 1969]

Who needs a cold?

Colds are difficult to avoid—but Neo-Synephrine Nasal Spray can make them less inconvenient by helping to restore free breathing in seconds—an advantage over slower-acting medicine taken by mouth. Swollen nasal passages shrink on contact with Neo-Synephrine, permitting drainage and easing that stopped-up feeling. By promoting adequate drainage during a cold, Neo-Synephrine helps prevent lingering sinus congestion after the cold.

Ask your druggist for Neo-Synephrine Nasal Spray or Nose Drops. He will recommend the proper strength Neo-Synephrine for adults, children, or infants.
