

[illegible]

There are two additional things to know about the oil  
production function and costs. First, the cost  
function is U-shaped, and the marginal cost curve is  
U-shaped and intersects the average cost curve at its  
minimum point.

7. The above information was obtained from the records of the  
Department of the Interior, Bureau of Land Management, and is  
being furnished to you for your information.
