

DHEW RESEARCH ON THE MEDICAL EFFECTS OF ORAL CONTRACEPTIVES

|                                                | Fiscal year 1969 |           |         |             | Fiscal year 1970 (estimated) |           |         |             | Fiscal year 1971 (President's budget) |           |         |             |
|------------------------------------------------|------------------|-----------|---------|-------------|------------------------------|-----------|---------|-------------|---------------------------------------|-----------|---------|-------------|
|                                                | CPR              | Other NIH | FDA     | Total, DHEW | CPR                          | Other NIH | FDA     | Total, DHEW | CPR                                   | Other NIH | FDA     | Total, DHEW |
| 1. Clinical studies.....                       | 148,955          | 73,711    | 321,206 | 543,932     | 172,315                      | 74,000    | 380,000 | 626,565     | 300,000                               | 74,000    | 380,000 | 754,250     |
| 2. Animal research.....                        | 44,623           | 70,983    | 245,064 | 360,670     | 56,480                       | 71,000    | 115,250 | 242,730     | 100,000                               | 71,000    | 115,250 | 286,250     |
| 3. Case-control surveillance.....              | 138,860          | -----     | 176,543 | 315,403     | 247,660                      | -----     | 60,000  | 307,660     | 400,000                               | -----     | 60,000  | 46,000      |
| 4. Specially designed prospective studies..... | 645,390          | -----     | -----   | 645,390     | 800,000                      | -----     | 400,000 | 1,200,000   | 1,400,000                             | -----     | 400,000 | 1,800,000   |
| 5. Metabolism of oral contraceptives.....      | -----            | -----     | -----   | -----       | 24,208                       | -----     | -----   | 24,208      | 300,000                               | -----     | -----   | 300,000     |
| 6. Dose response studies.....                  | -----            | -----     | -----   | -----       | -----                        | -----     | -----   | -----       | 250,000                               | -----     | -----   | 250,000     |
| 7. Data from family planning clinics.....      | -----            | -----     | -----   | -----       | -----                        | -----     | -----   | -----       | 250,000                               | -----     | -----   | 250,000     |
| 8. Ancillary surveys.....                      | -----            | -----     | -----   | -----       | -----                        | -----     | -----   | -----       | 200,000                               | -----     | -----   | 200,000     |
| Total.....                                     | 977,828          | 144,754   | 742,813 | 1,865,395   | 1,300,663                    | 145,000   | 955,500 | 2,401,163   | 3,200,000                             | 145,000   | 955,500 | 4,300,500   |
