

COMPETITIVE PROBLEMS IN THE DRUG INDUSTRY 12207

21 January 1975

NON-PERISHABLE SUBSISTENCE, DoD/VA

(3) VA and DoD jointly review and determine the type of "Quality Assurance" support considered essential to carry out the provisions of this program.

IV. SUMMARY

It is the finding of the Task Group that the complexity of data collection indicated in Proposal No. 1 will require considerable review and involvement on the part of the VA and DoD representatives and, until such time as the extent of such involvement can be accurately determined, no attempt should be made to schedule the requirements outlined in Proposal No. 2.

END.
