

12252 COMPETITIVE PROBLEMS IN THE DRUG INDUSTRY

(2) In developing the system the Committee shall consider logistic responsibilities of wholesale system managers including requirements determination, purchasing assignments, specifications and standards, quality assurance, processing customer orders, distribution, logistic data management (including item identification and item entry control) and financial management.

(3) The Committee shall establish task groups as necessary to perform specific tasks in the development of the system. Specific task orders will be prepared by the Committee and work plans developed by the task groups. Each work plan will provide for a schedule for accomplishment of specific objectives. Ad hoc task teams may also be established to assist the task groups in carrying out the Committee assignments.

(4) The Committee will make management improvement recommendations to the Administrator of General Services through the Associate Administrator for Federal Management Policy, GSA.

(5) In the event the Committee does not achieve consensus in its recommendations for management improvement, the recommendations together with any dissents will be submitted to the Administrator of General Services through the Associate Administrator, GSA for resolution.
