

Dr. FROST. Yes, ma'am.

Mrs. GREEN. Do you have any arrangements with junior colleges, technical institutes or vocational schools?

Dr. FROST. No, we do not and this is a very active subject within the agency. We have not yet been able to fund the 4-year colleges that applied. We are rejecting a large number of them. There is a solid discussion in OEO, Mrs. Green, that either we or somebody in OEO or somebody in OE ought to be thinking of programs like this in the junior college structure.

Mrs. GREEN. Your programs are only in residential schools, is that what you are saying?

Dr. FROST. No; we funded about 18 nonresidential ones to see whether it made any difference. At Berkeley we have a nonresidential program. At Harvard we have a nonresidential program but the great majority are residential. I would like to see someone engineer a program like this directed to the junior college.

Mrs. GREEN. Do you have authority to do that under the law?

Dr. FROST. I don't know. Upward Bound is not mentioned in the OEO statute.

Mrs. GREEN. I don't see why this has not been explored. I think it would be almost more important in terms of junior colleges and technical schools.

Dr. FROST. I know the section 207 people are now working up some demonstration with junior colleges. I could not give you the details.

Mrs. GREEN. Do you give any money to foundations?

Dr. FROST. No, ma'am.

Mrs. GREEN. Do you know of any money in OEO that is given directly to foundations?

Dr. FROST. I don't know the answer to that. Not a penny of Upward Bound goes to a foundation as far as I know. As you know when you make a grant to the State University of New York, you do it to the "Research Foundation of the State of New York" but that is a mechanism, I believe, all of it goes to the university. Ostensibly it goes to a foundation but it actually goes to the university.

Mrs. GREEN. Mr. Gibbons.

Mr. GIBBONS. As you know, when this program first came out, I was quite critical and we had many discussions of it and you talked me around to a position where I have not been quite so critical and, since I have had opportunity to visit a number of campuses where you have programs, I think you are doing a good job.

There is certainly a lot of room for this upreach or outreach. I agree it would probably be good to get students into a junior college setup. As you remember I wrote you about that in connection with some of our Florida colleges. I want to assure you under the law you can do it. There is no problem there. It is just a matter of money.

Thank you.

Mrs. GREEN. Congressman Burton.

Mr. BURTON. No questions.

Mrs. GREEN. Thank you both very much.

Dr. FROST. Thank you, Madam Chairman.

Mrs. GREEN. We will now have representatives from the National University Extension Association, Dr. Goerke, from the Florida State Board of Regents.
