

CONTENTS

INTRODUCTION	232
THE INTERNATIONAL BIOLOGICAL PROGRAM	234
PROBLEM AREAS	237
Population dynamics	237
Dynamics of ecosystems	238
Adaptation to environment	239
Geographic description of the biosphere	242
Preservation of natural ecosystems	242
Limitations of primary production	243
Nutrition	244
Use and management of biological resources	245
Education and manpower	246
PLAN OF ACTION	247
Environmental physiology	247
Production processes	249
Productivity of marine communities	249
Human adaptability	249
Nutrition	250
Productivity of terrestrial and freshwater communities	250
Conservation of ecosystems	252
Systematics and biogeography	253
Human resources	253
APPENDIX	254
Guidelines for participation in the International Biological Program	254
Organization of the IBP in the United States	254
U.S. National Committee	255
IBP subcommittees and Biometeorology Panel	255
Alphabetical list of members of U.S./IBP organization	256
Alphabetical list of countries participating in the International Biological Program	257
