

APPENDIX

GUIDELINES FOR PARTICIPATION IN THE INTERNATIONAL BIOLOGICAL PROGRAM

1. Individual scientists, national societies, or other scientific groups who wish to participate in the IBP should—
 - a. become thoroughly familiar with the nature, objectives, and general scope of the IBP as outlined herein;
 - b. define precisely the relation between the project they wish to propose and those objectives;
 - c. establish that the projects will benefit through international cooperation; and
 - d. submit the proposal to a granting agency and a copy to the Executive Secretary, U.S. National Committee, International Biological Program, Division of Biology and Agriculture, National Research Council, 2101 Constitution Avenue, Washington, D.C. 20418.
2. U.S. scientists are encouraged to review ongoing research in biology and determine projects that would contribute to and benefit from inclusion in the IBP. Ideas, suggestions, criticisms, and comments on the program should be sent to the IBP office (see 1-d above).
3. The USNC/IBP is not a granting agency; therefore, it can only review and evaluate proposals from the point of view of appropriateness for the IBP.
4. Proposals recommended by the USNC/IBP will compete for funds with other proposals. Final judgment as to provision of funds for a proposal rests with the granting agency.
5. Proposals are to be prepared in accordance with guidelines provided by granting agencies.

ORGANIZATION OF THE IBP IN THE UNITED STATES
