

International Biological Program (SCIBP). Costs of the national programs are not available. The names and institutions of scientists participating in the international structure of the IBP are listed in Appendix VII.

8. a. What is, and will be, the role of the USSR and Communist bloc nations in Phase I?

Answer: Discussion in Appendix VIII.

Abstract:

a. The USSR has an established national committee and a description of its national position in enclosure 1 to Appendix VIII indicates that it is well developed along advanced scientific principles.

b. Representatives from the USSR, Poland and Czechoslovakia are on the international structure of the IBP.

c. Bulgaria, Czechoslovakia, Yugoslavia, the German Democratic Republic, Hungary, Poland and the USSR have organized their National Committees, and, with exception of Hungary, completed their subcommittee organizations with IBP plans.

b. What is, and will be, the role of the developing nations in Phase I?

Answer: Discussion in Appendix VIII.

Abstract: Several developing countries in Asia and Africa are participating in the IBP. Mutual hemispheric interests in the IBP enhance the importance of participation of all nations of the Americas. Argentina, Brazil, Chile and Mexico have established national committees. Scientists from Peru and Venezuela have participated in IBP working groups. The U.S. National Committee has particularly fostered participation on a basis of equal respect by all nations of the Americas. All countries including those developing will benefit through accelerated development and application of biological information sponsored in this program.

9. a. Describe manpower and facilities in International Training Centers, collections and holding facilities and field stations.

Answer: Discussion in Appendix IX-A.
