

Mr. BLATNIK. What happened here?

Mr. LINKO. Where the X is, there was a light pole.

Mr. BLATNIK. The light was where the X is?

Mr. LINKO. That is right.

Also our entrance gores are saturated. I have a marking at the upper right where I think a sign should be in advance, so you can read it ahead of time.

You should be able to read it and know what you are to do before you get to it. I marked where it should be.
