

Mr. W. MAY. Are those steel beams?

Mr. LINKO. Yes, sir, 8-inch or 6-inch. This probably is 8-inch from the size of this sign.

And here also you can see a 1-mile sign. It will not make any difference if you back these up behind that guardrail. You can put it at three-quarters of a mile rather than 1 mile, when that creates an unnecessary hazard.
