

But here we swing around and take a look at the median pier problem, in terms of where that rail is placed. This shot, of course, was taken perhaps a couple of hundred feet away and it is not too difficult to visualize someone getting into the bottom of this bowling alley gutter here that the chairman referred to a little while ago, and ending up in difficulty with that pier.

As you look to the right-hand side, you have about the same situation as a couple of hundred feet away. There is not an awful lot of protection here. You have a steep slope here which can turn you back
