(d) In all planning for the use and development of water and related land resources, consideration shall be given by all Federal agencies involved to potential scenic river areas, and all river basin and project plan reports submitted to the Congress shall discuss any such potentials. The Secretary of the Interior and the Secretary of Agriculture shall make specific studies and investigation to determine which additional scenic river areas within the United States shall be evaluated in planning reports as potential additions to the scenic rivers system.

OTHER ADDITIONS TO THE SYSTEM

(e) The Secretary of the Interior and the Secretary of Agriculture shall submit to the President from time to time their recommendations for inclusion in the national scenic rivers system of any other river or segment thereof. The President shall submit to the Congress his recommendations for such legislation as he deems appropriate.

(f) Recommendations made under this section shall be developed in consultation with the States, those Federal agencies which normally participate in the development of recreation plans and comprehensive river basin plans, any commissions established pursuant to interstate compacts the assigned responsibilities of which would be affected, and commissions or other bodies which may be established for the purpose of developing a comprehensive plan for the river basin within which the contemplated scenic river area would be located.

Each such recommendation shall be accompanied by (1) expressions of any views which the Federal agencies and States and interstate commissions consulted pursuant to the foregoing may submit within ninety days after having been notified of the proposed recommendation, (2) a statement setting forth the probable effect of the recommended action on any comprehensive river basin plan that may have been adopted by Congress or that is serving as a guide for coordinating Federal or Federal and State programs in the basin, and (3) in the absence of such plan, a statement indicating the probable effect of the recommended action on alternative beneficial uses of the resources of the basin.

(g) Whenever it is proposed to add a river or segment hereof to the National Scenic Rivers System, and the river or segment runs through non-Federal land, recommendations with respect to its addition and with respect to whether it should be wholly or partly acquired, protected, and managed pursuant to exclusive State authority shall be made to the President by the Governor of each State concerned. Such recommendation to the President shall be accompanied by or based upon a general State plan which assures the effectuation of the purposes of this Act in perpetuity. The President shall submit to the Congress
