¹ Installation would include both conventional and reversible units.

² Net gain from redevelopment of an existing project.

³ Included as sec. 4(a)(10) in H.R. 6588.

⁴ Not available.

⁵ Oroville and Thermalito projects are under construction.

⁶ This reach includes the undeveloped Knowles project (512,000 kilowatts) which would be an alternative to the Buffalo Rapids Nos. 2 and 4 developments.

⁷ This reach of the Salmon River would extend from Riggins, Idaho, to the mouth.

⁸ Identification of this river reach is not clear. Available maps do not show a North Fork of the Snake River.

⁹ Muddy Run project is a pumped-storage development utilizing the pool of Conowingo Reservoir on the Susquehanna River for its lower pool. The project is presently under construction.

¹⁰ These 4 existing projects could be expanded by the capacity and generation shown.

FEDERAL POWER COMMISSION,
Washington, D.C.

HON. WAYNE N. ASPINALL,
Chairman, Committee on Interior and Insular Affairs,
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: On March 7 the Commission forwarded to the Committee, for inclusion in its hearing record, its report on H.R. 8416 and related House Scenic Rivers bills. As part of those reports we noted the existing and potential hydroelectric developments on each of the affected rivers. We now forward a similar tabulation with respect to S. 119 which is also pending before your Committee.
