

APPENDIX TABLE A - page 2

SOURCES:

- 1 U. S. Dept. of Commerce, Bureau of the Census, *Census of Manufactures, 1958, 1963, and Annual Survey of Manufactures 1959-1966*.
- 2 U. S. Dept. of Commerce, Bureau of the Census, *Facts for Industry Series*, BSAF-375; *Current Industrial Reports*, Series BSAF-375, M32A.
- 3 *Ibid.*
- 4 Value of shipments, flat glass industry less total of shipments of sheet glass and plate, float, rolled & wire glass.
- 5 Federal Reserve Board, Index of Industrial Production.
- 6 U. S. Dept. of Labor, Bureau of Labor Statistics, Wholesale Price Index.
- 7 1958-59, U. S. Tariff Commission, Publication 158, June 1965, Table 12, adjusted for Federal tax at 52%.
- 8 1961-66, U. S. Tariff Commission, Publication 215, September 1967, Table 12, adjusted for Federal tax at 48%.
- 9 FTC-SEC, *Quarterly Financial Report for Manufacturing Corporations*.
- 10 See Methodology Note.
- 11 U. S. Dept. of Labor, Bureau of Labor Statistics, *Employment and Earnings Statistics of the United States*.
- 12 Value of Shipments + Imports (f.o.b. U. S. port basis) - Exports (f.o.b. mill basis).
- 13 U. S. Dept. of Commerce, Bureau of the Census; import data adjusted to add ocean freight and insurance at 19% per U. S. Tariff Commission Publication February 7, 1967, C. I. F. Value of Imports; and to add import duties as calculated by U. S. Dept. of Commerce, U. S. Commodity Exports, *Imports As Related to Output, 1965 and 1964* and earlier issues, 1958-1963, and at the 1965 ratio of duties to import value (26.0%) for 1966. For 1967, duties calculated at 19.8% as per U. S. Dept. of Commerce, IM 146 for flat glass (Group 503B).
- 14 U. S. Dept. of Commerce, Bureau of the Census; export data adjusted from f.a.s. to f.o.b. by factor of 10% for inland freight, mill to port.
- 15 Imports, f.o.b. U. S. port, divided by Domestic Market.

METHODOLOGY NOTE:

Value of Shipments (first line) for Industry S.I.C. 3211 for 1967 derived by projecting 1966 data by % change 1966-67, in value of shipments of flat glass as reported in sources cited note 2 above.

Gross earnings for 1967 derived by projecting Value Added by Manufacture for 1966, as reported in *Annual Survey of Manufactures* for 1966, against the % change in Value of Shipments 1966-67 (1967 = \$415.2 million), and subtracting total payroll from Value Added. Total payroll for 1967 derived by projecting 1966 payroll per *Annual Survey of Manufactures* for 1966 against the % change in average number of employees, average hourly earnings and average weekly hours for Industry S.I.C. 3211 as reported in source cited note 10 above (Payroll 1967 = \$193.3 million). Gross earnings = Value Added [sales - cost of materials] less total payroll. (Gross earnings 1967 = \$220.4 million)
