District totals and commodity entries may not equal their respective subtotals and grand totals because of rounding.

Dash (—) denotes values less than \$50,000 and percentages less than 0.05%.

FOOTNOTES

¹ Beginning in 1967 special category (military) shipments to individual countries were included by the Census Bureau in that country's annual export total. Previously, such shipments were not broken down as to country of destination, but were included in the total of U. S. exports to all countries. Special category shipments are not identified by commodity types nor assigned to specific Customs Districts. The Grand Total for Japan also includes \$95 thousand of ves-

sels under their own power or afloat, \$3,507 thousand of low value (under \$100) shipments and \$4,863 thousand of mail shipments, which are not assigned to specific Customs Districts.

² Customs Districts totaling less than \$65,000 are not individually shown on the main table. The values of these districts are, however, included in the regional total. The total shipments and principal commodities of these Customs Districts are given below with value figures (in thousands of dollars). Included in Region I Total: St. Albans, Vermont (56)—crude minerals (56); Buffalo, New York (62)—pulp and waste paper (22); machinery (14); hides and skins, undressed (13); chemicals (12).

There were no U. S. exports to Japan in 1967 from the following Customs Districts: Portland, Maine; Nogales, Arizona; Great Falls, Montana; Pembina, North Dakota; and St. Louis, Missouri.
