

CONCLUSION

It is our strong belief that legislation of Steel Import Quotas would greatly hurt our business and create a market place of arbitrary and unfair price setting. We strongly hope that the domestic producers will chose to meet international competition and increase their share of the international market. We would very much like to purchase our stainless steel materials from domestic producers should they choose to compete.

PERRY REDUCES COSTS 3 WAYS ON STAINLESS STEEL FABRICATION!

1. LOWER FIRST COST...

mass fabrication of standard design makes the difference!

2. LESS DOWNTIME...
