

TABLE 1.—PERFORMANCE OF U.S. MANMADE FIBER AND MANMADE TEXTILE AND APPAREL INDUSTRIES, 1961 AND 1967 COMPARED

	1961	1967	Percent increase
Manmade fibers (million pounds):			
Capacity.....	2,765.0	5,340.0	93.1
Production total.....	1,995.4	4,030.6	101.9
Cellulosic.....	1,095.2	1,388.1	22.2
Noncellulosic.....	750.9	2,333.7	210.8
Glass fiber.....	149.3	308.8	106.8
Mill consumption total.....	2,060.7	4,246.4	105.8
Cellulosic.....	1,155.6	1,520.4	31.6
Noncellulosic.....	757.9	2,417.3	218.9
Glass fiber.....	147.2	302.7	105.6
Domestic consumption.....	1,997.8	4,239.2	112.2
End-use consumption.....	2,105.0	4,044.0	92.1
Manmade fiber spun yards (million pounds):			
Production total.....	631.6	1,465.7	132.1
Cellulosic.....	390.2	1,611.8	56.8
Noncellulosic.....	241.4	1,853.9	253.7
Manmade fiber broad woven fabrics (million linear yards): Production..	2,373.5	4,213.5	77.5
Manmade fiber end-use consumption for apparel (million pounds):			
Consumption.....	702.0	1,303.0	85.6

TABLE 2.—MANMADE FIBERS, INDEX OF INDUSTRIAL PRODUCTION, 1961-68 (NOT SEASONALLY ADJUSTED)
[1957-59=100]

	1961	1962	1963	1964	1965	1966	1967	1968
January.....					219.4	249.8	265.5	337.5
February.....					226.6	258.3	267.6	345.6
March.....					232.5	269.8	258.9	350.5
April.....					233.3	269.0	252.1	351.8
May.....					235.6	269.4	260.5	
June.....					241.5	282.6	268.0	
July.....					237.6	265.6	242.3	
August.....					243.4	265.0	268.1	
September.....					244.9	272.2	291.8	
October.....					238.3	250.2	306.1	
November.....					247.0	260.4	324.4	
December.....					249.9	264.9	333.9	
Year.....	119.8	150.6	170.0	198.2	237.4	264.8	278.3
