GRAND TOTAL

Manufacturing and toolrooms
lathes up to and including
16" swing over cross slide
Turret, bench and floor, light
duty type, saddle and ram
type
Automatic chucking, single
and multiple spindle
Screw (bar) machines
All other lathes, including
manufacturing and toolroom
lathes 17" and over, auto-
matic between center, T-
lathes, etc.

1 Excludes imports from all countries other than Brazil, Czechoslovakia, France, Italy, Japan, United Kingdom and West Germany. In 1967, the "excluded imports" amounted to 6,996 units valued at \$7.5 million with an average unit value of \$1,100.

2 Includes imports from Brazil, Czechoslovakia, France, Italy, Japan, United Kingdom and West Germany of "all other types" and some 16" and under engine lathes, automatic chucking lathes, etc. - Imports where available information did not permit identification and classification by specific types. Excludes imports from all other countries - see footnote 1

SOURCE:

Shipments and exports, Current Industrial Reports, Metalworking Machinery (series M-35-4), Import units estimated by the Metalworking Equipment Division based on data published by the Bureau of Census, Official trade reports of foreign countries and data obtained from industry and government sources.

NOTE:

These data were prepared by the Metalworking Equipment Division, Business and Defense Services Administration, on the basis of Current Industrial Reports, Metalworking Machinery (Series M-35-4). Import values estimated by the Metalworking Equipment Division based on data published by the Bureau of the Census, Official Trade Reports of Foreign Countries, and data obtained from industry and government sources.

The National Machine Tool Builders' Association and various member companies assisted in the development of these data and verified them to the extent possible from information available to the Association.
