GRAND TOTAL																				
Horizontal boring, Drilling & milling; table type, rotary table type, floor type and all other horizontal boring																				
Vertical boring & turning mills (including vertical turret lathes)																				
Precision boring																				
Jig boring																				
Cylinder, car wheel, trepanning boring, automotive cylinder rebaring and all other boring machines, M.E.C.																				

1 Includes boring machines of all kinds imported from countries other than West Germany, Italy, United Kingdom, Japan, Switzerland, Czechoslovakia and East Germany.

Source:

Shipments and exports, Current Industrial Reports, Metalworking Machinery (Series M-35-U). Import units estimated by the Metalworking Equipment Division based on data published by the Bureau of Census, official trade reports of foreign countries and data obtained from industry and government sources.

Note:

These data were prepared by the Metalworking Equipment Division, Business and Defense Services Administration, on the basis of Current Industrial Reports, Metalworking Machinery (Series M-35-U). Import values estimated by the Metalworking Equipment Division based on data published by the Bureau of the Census, Official Trade Reports of Foreign Countries, and data obtained from industry and government sources.

The National Machine Tool Builders' Association and various member companies assisted in the development of these data and verified them to the extent possible from information available to the Association.
