

TABLE 11

Estimated Hamburger Consumption in 1963, 1966 and 1967
(By Source of Product)

	1963		1966		1967	
	Pounds per Capita	Quantity Mil. of Lbs.	Pounds per Capita	Quantity Mil. of Lbs.	Pounds per Capita	Quantity Mil. of Lbs.
Sources of Hamburger Production:						
1. Hamburger Produced from Domestic Beef Trimnings Only	21.2	3,950	24.0	4,645	25.2	4,930
2. Hamburger from Combined Fat Trimnings and Lean Manufacturing Beef						
. Domestic Fed Beef Fat Trimnings. . .	3.0	560	3.6	715	3.9	768
. Domestic Lean Cow/Bull Beef.	1.3	245	3.4	642	3.4	665
. Imported Lean Beef	3.8	707	2.8	543	3.1	602
Subtotal	8.1	1,512	9.8	1,900	10.4	2,035
Total Hamburger Consumption.	29.3	5,462	33.8	6,545	35.6	6,965
Percent of Total Beef Consumption Per Capita . . .	30.8%		32.9%		33.5%	

Sources:
1963 from Exhibit No. 20 presented at Tariff Commission Hearing 332-44 on Beef and Beef Products.
1966 and 1967 computed by Theracon, Inc.

NOTE: In the preparation of this Table, it has been assumed that all lean manufacturing beef used to make hamburger was combined with 100% fat trimmings as opposed to high fat content beef trimmings.
