

Table V — Honey: Export and Import Prices 1953-1967

Source: Official figures, Bureau of Census

Mr. BURKE. Thank you.

Are there any questions?

I noticed here in the figures that we have from the Department of Commerce that the ratio of imports to production in 1961 was 3.5 percent, and then it was increased up to 1967 to 7.5 percent.

The ratio of imports to consumption went from 3.5 percent in 1961 to 7.3 percent in 1967.

I was wondering, have you any figures about the first quarter of this year, as to increasing or holding, or what?

Mr. GIBSON. None on the consumption. No, sir.

Mr. BURKE. Thank you very much for your testimony.

Our next witness is Mr. Robert B. Willson.

We welcome you to the committee, and if you will identify yourself, you may proceed.

STATEMENT OF ROBERT B. WILLSON, PRESIDENT, R. B. WILLSON CO., INC., ACCOMPANIED BY HARRY J. LAMBETH, COUNSEL

Mr. WILLSON. My name is Robert B. Willson, and I would like to present our Washington attorney, Mr. Harry Lambeth.

Mr. BURKE. We welcome Mr. Lambeth here.
