

2. *Educational television*.—Television broadcast stations operated by nonprofit organizations primarily for educational programming.

3. *Instructional fixed television (in-school)*.—Instructional television fixed stations used exclusively for in-school instruction.

4. *Planning, studies, and developmental activities*.—General program planning activities and economic/technical or other studies associated with noncommercial mass communications media. Also, experimental and developmental activities intended for noncommercial applications.

III. *Intercommunications by wire and radio.*

Radio and wire transmission between and among individuals or individual entities either by private facilities or through public facilities provided by a communications common carrier. Regulatory activities include: administration; policy and rulemaking; authorization of service and facilities; regulation of rates, services, and accounting practices of common carriers; economic and technical studies; enforcement; preparation for and participation in international conferences and treaty negotiations; adjudication and litigation.

A. *Non-Government public facilities*

Regulating rates, services, and practices of communications common carriers which furnish interstate or foreign telephone or telegraph service for hire to the public by wire, radio, or satellite.

1. *Domestic rate regulation*.—Establishment and maintenance of reasonable and nondiscriminatory rates for interstate communications services.

2. *Domestic services and facilities*.—Provision and maintenance of efficient and adequate interstate voice and record communications services and facilities.

3. *International rate regulation*.—Establishment and maintenance of reasonable and nondiscriminatory rates for international telephone and telegraph communications services, including communication between the continental United States and its territories and possessions, between the latter places, and between the United States, its territories and possessions and ships at sea.

4. *International services and facilities*.—Provision and maintenance of efficient and adequate international voice and record communications, services and facilities.

5. *Planning and studies*.—Studies and proceedings regarding formulation and revision of common carrier regulatory policies, programs and rules and special projects in furtherance of the various program objectives.

B. *Private facilities*

Regulating radio communication systems for use by persons, businesses, State and local governments, and other organizations licensed to operate their own systems as an adjunct to their primary business or other activities.

1. *Protection of life and property*.—Radio systems licensed for the primary purpose of facilitating the protection of life and public and private property.

2. *Air, sea, and land transportation*.—Use of radio systems to provide navigational aids and safety and operational communications for air, sea, and land transportation. This program includes use of radio for safety at sea purposes and public fixed radio operations in the State of Alaska.

3. *Commercial and nonbusiness operations*.—Use of radio to facilitate the operations of all forms of industry and business enterprises and many non-commercial activities.

4. *Amateur and personal communications*.—Radio systems licensed for amateur radio operations, and for personal radio communications, radio signaling, and control of remote objects or devices.

5. *Planning, studies, and developmental programs*.—Research and studies, analysis and planning, including radio communications systems licensed on a developmental basis, looking toward more effective and new uses of radio in the public interest for private intercommunications.

IV. *Commission and support activities*

Activities of the FCC which are related to or support the basic program categories but are not conveniently allocable to these categories.

A. *Commission*

Activities of the seven commissioners and their staffs.
