

and he is even accepting of the barbarous methods of his society for handling his behavior.

"Remedying this situation is the function that is missing in the mental health center outline and it is the function to which the Alcoholism Information Center addresses itself. Thus the Alcoholism Information Center fits into the general plan as a necessary adjunct at least until such time as the community changes and undertakes this therapeutic function as it does in other illnesses—which I presume will be some time from now."

¹ Selected statistical tables on the consumption of alcohol, 1850-1962, and on alcoholism from 1930-1960. Prepared by Vera Efron and Mark Keller. Published by Rutgers Center of Alcohol Studies, New Brunswick, N.J.

Note: These estimates are derived by the original Jellinek formula; the rates (on which the numbers are based) are those of the year 1945, with R=5, applied to 1960 populations. The formula may be less reliable in units with smaller populations. These estimates should be considered as very rough approximations. Numbers are rounded to nearest hundred.

"MODEL" HALF-WAY HOUSE

The surveyed half-way houses give the impression that there is a good deal of variety in the operations of these houses. Nonetheless, even with these differences in approach, all of the half-way houses have had some success. We would
