

III. CONSTRUCTION AND FUND REQUIREMENTS

	H.R. 6526 grant	Hill-Harris	H.R. 6526 loan	Total Federal loans and grants
Casualty.....	\$9,579,000	\$200,000	\$8,112,000	\$17,891,000
Construction of a 200-bed extended care facility, expansion of physiotherapy and outpatient departments, and renovation of the emergency room and basement areas will fill a 10-year lag in construction in this inner city neighborhood hospital.				
Children's.....	11,016,000	177,000	11,412,000	22,998,000
Replacement of present antiquated 205-bed building with a modern structure on Washington Hospital Center grounds, plus 11 extended care beds. Private funds will be used for 45 additional beds, need demonstrated by continual high occupancy.				
Hospital for Sick Children (formerly Children's Convalescent).....	1,333,000	575,000	1,742,000	3,650,000
Replacement of 50 extended care beds and construction of an additional 60 extended care beds for a total of 110 beds for children requiring long-term treatment or rehabilitation efforts.				
Columbia Hospital for Women.....	39,000	56,000	114,000	209,000
A number of small renovation projects will modernize and improve efficiency, such as centralized air conditioning for operating and delivery rooms.				
Georgetown University.....	6,189,000	71,000	11,080,000	27,340,000
Remodeling and substantial enlargement of outpatient and medical center instruction facilities including a unit for the mentally retarded. An additional 140 beds required by demonstrated need will be constructed with funds from an experimental grant.				
George Washington University.....	4,064,000	892,000	4,976,842	12,554,000
Remodeling a 1948 building will renew its capability to serve as a modern hospital. Areas also slated for remodeling are the emergency room, premature nursery and urology. 2d floor north will be site for construction of a heart station and pulmonary function and treatment center.				
Morris Cafritz Memorial.....	289,000	578,000	433,000	1,300,000
Construction of an adjacent nursing home would increase extended care beds by 100 in the far southeast section of the city.				
Washington Hospital Center.....	4,793,000	78,000	2,705,000	7,576,000
An extended care unit of 300 beds will relieve acute beds for urgently ill—at the same time effecting a saving of roughly 50 percent for those not requiring the complicated equipment and care needed instantly in acute care areas. Funds are also needed for modernization and for an emergency electric powerplant for the entire Hospital Center complex.				
Glenn Dale.....	1,250,000	0	0	1,250,000
The number of extended care beds would be increased by 200 by remodeling existing porches. Funds are also requested for modernization of kitchen, physiotherapy and occupational therapy areas and expansion of OR suite.				
Department of Public Health.....	1,500,000	1,500,000	0	3,000,000
Comprehensive Health Center area D.				
Total.....	40,052,000	4,127,000	40,574,842	93,518,000

¹ Includes \$393,000 NIH funded project.

² \$10,000,000 direct Federal grant for experimental purposes.

³ \$2,500,000 congressional appropriation and \$121,158 NIH project.

B. SUMMARY

Eight voluntary hospitals and two D.C. Government hospitals have requested a total of \$40,052,000 in *grant* funds under HR 6526. In addition *loans* requested by these institutions under HR 6526 total approximately \$40,575,000. Hill-Harris funds required but available only in part, amount to \$4,127,000.

Total Federal loans and grants (including \$13,014,158 in other Federal monies from NIH and special appropriations) amount to \$93,518,000.
