

substances that are employed or handled in its operations in sufficiently large amounts as to constitute a hazard in case of an accidental spill and discharge into a public stream:

- (a) Potential toxicity in water to man, animals and aquatic life,
  - (b) Details on analytical procedures for the quantitative estimation of such substances in water,
  - (c) Suggestions on safeguards or other precautionary measures to nullify the toxic effects of a substance once it has gotten into a stream;
4. A written verification of such report shall be submitted upon request of the state agency;
  5. Whenever any such spill or discharge may affect interstate waters which are within the jurisdiction of the Ohio River Valley Water Sanitation Commission, the state agency receiving the notification to be given as above provided shall promptly relay the information contained therein to the Ohio River Valley Water Sanitation Commission by telephone in order to permit it to alert downstream state agencies and water users which are or who may be adversely affected by such spill or discharge;
  6. Nothing herein shall relieve any municipality, corporation, person or other entity from responsibility for complying with the terms, provisions and conditions of the Ohio River Valley Water Sanitation Compact or with treatment standards and other regulations promulgated under authority thereof or from responsibility for complying with any federal, regional, state or local statutes, ordinances or regulations which may be applicable.
