its Federal operation? The Metropolitan Police Department has only one statistical indicator of the number of altercations involved in making and maintaining arrests: the number of persons charged with assault on a police officer. Our record of arrests made in the fourteen precincts for the month of June 1968 indicates that there was a total of 4,173 arrests during this month and there were twelve incidents of assault on police officers during June. Mr. Adams' second question cannot be answered at this time since this Department does not statistically distinguish between violations of the D.C. Code and the U.S. Code. For example, certain arrests for drug law offenses can be prosecuted either under the U.S. Code or under the D.C. Code. This distinction is not drawn in recording numbers of drug law offenses.

Mr. Gude and the Committee requested information on the amount of time spent by the Metropolitan Police Department on various special functions. The statistical data relative to special functions for fiscal year 1968 is in the process of being compiled at this time. Since the overall number of hours does not vary appreciably from year to year, I am enclosing a statistical breakdown of man-

hours spent on details for fiscal year 1967.

If I can be of any further assistance, please do not hestitate to write. Sincerely yours,

JOHN B. LAYTON, Chief of Police.

Man-hours lost to details resulting from the status of the District of Columbia as the Nation's Capital: $Fiscal\ year\ 1967$

Mr. Adams. The last question I had was: Can you tell me approximately the number of vacancies that are still left on the Metropolitan Police Department?

Mr. Fletcher. Yes, sir. As of last week, 82.
