

Colonel SEIDEL. Not in this area. We do occasionally at low water periods along the east coast. As I mentioned, however, we have control structures which assist us in this respect.

Mr. JONES. This is a project authorized some years ago. This is an extension of a going scheme. Is the \$77 million required for the total completion, or is it the partial?

Colonel SEIDEL. The \$78 million, sir, is for the completion of this increment. We are only 55 percent complete on the authorized existing project to date.

Mr. JONES. The total cost of the project is estimated at \$269 million. Present authorizations, \$171 million. The appropriation through June of 1968 is \$160 million.

You have a deficit now of, 1970, \$32 million. Now, that deficit of \$32 million—how much—if the authorization were made for \$32 million, what additional amount would be made by local contribution?

If we authorized \$32 million, how much would be forthcoming in non-Federal contributions to these projects?

Mr. CRAMER. Mr. Chairman, I understand that \$32 million is the Federal share for the next 2 years, is it not? It is a question how much in addition to that will be local.

Colonel SEIDEL. Sir, the cost sharing principal here is a special one of 80 to 20—80 percent Federal, 20 percent non-Federal. Twenty percent of cash contribution on the part of the local interests, plus all lands that are required, plus operation and maintenance costs. It figures out roughly 30 percent.

Mr. JONES. You have a requirement then of \$38½ million authorization. That is what you need. That is, to carry you through Calendar Year 1970.

General NOBLE. Are you adding, sir, the local participation to the amount that we needed for our basin authorization? Is that where that figure came from?

Mr. JONES. Calendar Year 1970, you have a monetary deficit of \$32 million.

General NOBLE. Yes, sir. That is what we would need to cover our appropriations.

Mr. JONES. Cover your appropriations.

General NOBLE. Yes, sir. Actual and estimated.

Mr. CRAMER. Does that represent the 80 percent?

General NOBLE. It represents just the Federal part—because we do not need basin authorization to cover us for the local. The local people have to come up with their share whenever it is time.

Mr. JONES. The only need you have at the moment to carry you through 1970 is an authorization of \$32 million?

General NOBLE. Yes, sir, that is right.

Mr. JONES. Why did you present a request for authorization of \$58 million?

General NOBLE. I do not have my papers, sir. I thought you were reading from—

Mr. JONES. I understand. In other words, the \$58 million is a modification adding an additional project.

General NOBLE. Yes, sir. It is not necessarily to be in the next 2 years.

Mr. JONES. Well, the figures that you gave, \$32 million, are based upon the authorization without the modification, is that correct?
