LEGAL AND FACTUAL NARRATIVE

PREFACE

The purpose of this submission is to set forth the methodology and legal arguments supporting the proposed settlement submitted to the Court in this matter on October 26, 1984. It is respectfully submitted that the various components of this submission demonstrate that the proposed settlement is not only fair to the parties to this litigation; but, also satisfies the principles of Mount Laurel II and the constitutional obligations of the Township.

It is believed to be important to emphasize at this juncture that the court is being remediated. GO accept that which is proposed herein in the context of a settlement and not in the context of litigation. As, hopefully, will be demonstrated to the court hereafter, Freehold Township is in a posture different from that of many other municipalities which have steadfastly resisted even the most modest attempts at the providing of affordable housing. Even though this movement by the Township toward the ultimate goal of voluntary compliance takes place after suit has been filed, the initial movement toward full compliance commenced much earlier with Affordable Living Corporation represented by Carl Bisgaier, Esq. (see pages 5 & 6» infra.) Additionally, cooperation with this Plaintiff and by this Plaintiff has been full, complete and honest once conciliatory efforts began.

In presenting the materials herein, every effort has been made to substantiate thoroughly the data presented, to note the source of the data so that it can be verified, to only make assumptions where concrete data was not available, to make any assumptions conservatively and to present the materials and conclusions as objectively as possible. That which is proposed, is proposed sincerely, giving full regard to the preparers' responsibilities as officers of the court. It is hoped that in evaluating the materials, the court will evaluate them as being proposed as a settlement which will bring about as rapidly as possible the actual construction of lower income housing. It is also hoped that in evaluating the materials, the court will give due regard to the fact that this municipality has worked diligently toward settlement of this matter although it has a motion pending which it strongly believes is meritorious and has a good likelihood of success. Notwithstanding the foregoing, the Township well realizes the responsibility placed upon it by South Burlington County NAACP v. Mount Laurel Tp., 92 N[^]J. 158 (1983) (hereafter Mount Laurel II) and, by this proposed settlement demonstrates its resolve to shoulder that responsibility - not merely to pay it lip service - but to get the job done.

FREEHOLD TOWNSHIP'S HISTORY OF ZONING FOR LOW COST HOUSING

Unlike the multitude of defendant municipalities presently before the various Mount Laurel II judges, the Township of Freehold

and its Township Committee have acted responsibly and in accordance with the constitutional mandates pronounced in Mount Laurel II before the initial actions in those cases were filed. As early as the 1960's, the Township began zoning for low cost multi-family housing and provided the only multi-family garden apartments in western Monmouth County outside the Borough of Freehold - Stonehurst. Thereafter, the Township continued to provide realistic opportunities for the construction of low cost housing including additional garden apartments, townhouses and mobile homes.

Although plagued by a sewer moratorium in the 1970's, the Township continued to permit construction of low cost housing which today is still affordable to the same classes of people Mount Laurel II seeks to protect. In 1975, the Township adopted a rent control ordinance to preserve its low cost housing during the shortage of units. Until 1983, the Township monitored and set rents for all multiple dwelling units containing four or more units. It expended vast sums of money to implement, as well as to defend, its ordinance until gutted by the courts. In fact, in 1981, the Superior Court (Honorable Patrick McGann) reversed the Township Rent Control Board and ruled that a Landlord could figure his rate of return on the market value of his property on the day he filed his application, without regard to the actual equity he might have in the property or the investment he had made. The resulting decision allowed the Landlord a greater

increase than that which he had requested; an increase which approached and in some cases exceeded 100%. The Township, along with the Public Advocate's Office, recognized that the decision emaciated rent control and, therefore, appealed the decision to the Appellate Division and to the New Jersey Supreme Court^f no relief was granted on the appeals. Today, the Township still maintains rent control on all rents for the mobile home parks.

In contrast to the Township's efforts at providing a variety of housing, its neighboring municipalities created no opportunity for the building of any lower cost housing prior to Mount Laurel II with the exception of some senior citizen housing. In fact, Freehold Borough and the Township, whose historical and socio-economic pasts have been inseparably intertwined, still provide the bulk of lower cost housing in western Monmouth County. Young singles and young families from western Monmouth County traditionally inhabit the units of Stonehurst and Chesterfield as they begin to climb up the economic ladder. In fact, each partner in this law firm, in addition to the vast majority of their contemporaries, although residents of neighboring municipalities lived in either Chesterfield or Stonehurst apartments in Freehold Township while attending law school and while definitely falling within the low income classification.

The Township, unlike Manalapan, Marlboro, Colts Neck, Holmdel and others, provided realistic opportunities for the construction of lower cost housing when Mount Laurel was still just a municipality in Burlington County and not a constitutional doctrine. The Township continued its tradition of planned growth and sound planning beyond the years since Mount Laurel I and as the Mount Laurel II doctrine unfolded. Nevertheless, after Mount Laurel II was decided the Township still carried out its program of non-exclusionary practices. In December 1983, the Township embarked on the road to compliance with the increased obligations of municipalities required under Mount Laurel II.

In late December 1983, Carl Bisgaier, Esq., an attorney for Affordable Living Corporation (hereinafter "ALC") sent a letter to the Mayor of the Township requesting a meeting to discuss plans to build Mount Laurel housing in the Township. In late December or early January 1984, Thomas A. Thomas, the Planning Consultant for the Township of Freehold, was instructed to consider the ALC property for possible Mount Laurel construction. After various meetings with the principals of ALC, its planning consultant and its attorney and the various professionals on behalf of the Township, the Township and ALC agreed to changes in the Township's zoning ordinance that would permit Mount Laurel housing to be built on ALC's property. The reaction of the Township to the proposals of ALC were unprecedented in the experience of

Bisgaier, the attorney for ALC. (For more detailed information, see Affidavit of Thomas A. Thomas in support of Defendant's Motion to Bar Builder's Remedy, paragraphs 12-16, and Affidavit of Kenneth S_e Schuman, President of ALC.)

The past and present efforts of the Township cannot be ignored. Beyond all the philisophical, jurisprudential and socialogical arguments of Mount Laurel II, there remains certain basic goals. The intention of Mount Laurel II is to streamline a process that became a litigious nightmare, failing to produce any lower income housing. Since it is the expressed "first" intention of the Mount Laurel II decision "to encourage voluntary compliance" the constitutional obligations espoused in Mount Laurel I, past efforts and voluntary compliance by the Township cannot be discounted. See, Mount Laurel II at 214 wherein the court held:

"[W]e intend to encourage voluntary compliance with the constitutional obligation by defining it more clearly.... We hope to achieve all of these purposes while preserving the fundamental legitimate control of municipalities over their own zoning and, indeed, their destiny."

CREDITS AGAINST FAIR SHARE FOR EXISTING HOUSING

The concept of giving credits to a municipality against its fair share number, in the context of a settlement is compelling where, as in the case of the Township of Freehold, fulfillment

of the constitutional obligations of the Mount Laurel doctrine resulted in actual construction of low cost housing in the past and will result in additional units in the future. See, AMG Realty Company v. Township of Warren, Docket Nos. L-23277-80 P.W. and L-67820-80 P.W. (hereinafter "AMG"), slip opinion at 28 (July 16, 1984), wherein the ultimate goal is recognized to "be the satisfaction of the constitutional obligation under Mount Laurel.

The concept of credits and rewards for voluntary compliance and settlement of Mount Laurel litigation is key to the doctrine of Mount Laurel II which seeks to limit the legal gyrations that block the actual production of lower income housing. It is respectfully submitted that it is the Township's success at satisfying a portion of its fair share, as set forth in this submission, that entitles it to disparate treatment in contrast to other municipalities. (1)

A favored treatment of the municipalities who have made inclusionary efforts was recognized in AMG. See, AMG at 77. In AMG, the court acknowledged that its methodology was not to be "blindly rigid". Ibid. Where an inclusionary effort has been made and it has produced lower income housing, direct credits are appropriate and the municipalities obligation must be reduced.

(1.) Prior to the court's decision in AMG, no municipality in this State was able to calculate its fair share with any degree of certainty. Thus, while many municipalities chose to do nothing, others, like the Township of Freehold made certain efforts that have both resulted in the construction of lower income housing in the past and plans for actual construction of lower income housing in the future.

Ibid, at 46, 77. Certainly, this method of credits is consistent with the Supreme Court's intentions of producing voluntary compliance and reducing litigation while providing realistic opportunities for the construction of lower income housing.

In determining the Mount Laurel fair share obligation of the Township of Freehold, this submission is made with the various assumptions justified by the Mount Laurel II and AMG opinions. Those assumptions are made and noted on the footnotes to the submission calculations.

CREDITS AGAINST PRESENT NEED AND AGAINST A PORTION OF
1980 PROSPECTIVE NEED WHICH HAS BECOME PRESENT NEED IN 1984

The Township has proposed various credits against its fair share number. Not* only have the credits been proposed to offset the 1980 present need number, but credits_j|re_j^o^sed against
a portion of..the prospective need as well.

Analysis of the meaning of present and prospective need indicates that in 1984 a substantial portion of the prospective need must have, by necessity, become present need. Present need is defined as the indigenous need of the municipality and its fair share of the reallocated excess need of its present need region. AMG at 14. See, also, Mount Laurel II at 243-244. The term prospective need refers to household formations expected to statistically occur between 1980 and 1990- Needless to say, by 1984 some of those households have formed.

In Mount Laurel II, the Supreme Court recognized that in order for a municipality to satisfy its Mount Laurel obligations as to the prospective need, that need must be met "year after year, throughout the years of that particular projection used in calculating the prospective need." Mount Laurel II at 218-219. Thus, the portion of the prospective need projected for the Township of Freehold for the years 1980, 1981, 1982, 1983 and a portion of 1984 must be considered to have become present need as of the date of this submission. To hold otherwise, would be to deny the statistical growth and need from 1980 to 1984. ✓

Accordingly, credits against a portion of the prospective need fair share that has become present need should be provided on the same basis as credits against present need. Allowing such credits is even more compelling in the case of the Township of Freehold where it attempted to satisfy the constitutional obligations of Mount Laurel I while other municipalities sat back without even the most modest response to those constitutional obligations. Based on the foregoing, it is respectfully submitted that in evaluating the credits proposed, the court should consider that 45% of the prospective need is now present need. (2)

(2) 1980 prospective need is based on 1980 census, dated April 1980, April 1980 to October 1984 equals 4.5 years. When measured against the 10 year projection (1980 - 1990) 45% of time has elapsed.

CREDITS FOR CONSTRUCTION BEFORE 1980

While the majority of the credits calculated by the Township of Freehold were "built before 1980, the condominium conversion of the Stonehurst Apartments began after 1980 resulting in the availability of the purchase of these units. An additional 100 units were constructed at Silvermead after 1980. Moreover, an addition accommodating 180 additional persons was made to the John L. Montgomery Home which was completed within the last several months. As to the credits for construction prior to 1980, the inclusionary practices of the Township of Freehold prior to 1980 should be permitted to the extent that the Township satisfied both its own needs and the regional needs including those of delinquent municipalities prior to 1980. One might argue that if the Township had fulfilled its fair share^obligations for its present need prior to 1980, it would have no present need number; however, it must be recognized that a substantial number of dwellings constructed in the Township of Freehold that are considered to be substandard were constructed many decades ago; and no matter the availability of suitable housing, there will always be some who would prefer to live in the less populated areas in a home which has, perhaps, been in the family for a number of generations and is, by today's standards, inadequate housing. The remainder of the present need number for the Township of Freehold is a portion of the reallocated pool which has been caused by the delinquency of other municipalities,

rather than by any past performance on the part of the
B Township of Freehold. It is respectfully submitted that if during
m the past, while under no compulsion to do so, the Township
I recognized and allowed for a variety of housing for many segments
^ on the economic scale, it should now be allowed credit for that
* housing which was constructed so as to be available for low and
M moderate income persons, and has remained, through the workings
f of the free market available to lower income households. To do
otherwise would be to impose upon Freehold Township a burden or
standard of responsibility no different than is imposed upon
m municipalities which have intentionally sought to set themselves
up as the enclaves of the rich and elite.

While the AMG formula purports to give credit for
inclusionary efforts prior to 1980 by utilizing the median income
ratio in the calculation, the relief given by using the ratio
in the fair share formula is inadequate in the circumstance of
Freehold Township. Consider, for example, that if the Township's
median income was lower and equaled that of its region, so that
the median income ratio was 1.000, the Township's total fair share
obligation would decrease by only 58 units. On the other hand,
assume that the Township's median income equaled Colts Neck's
at \$38,077 and was 167% of the region's median income, the fair
share number would only increase by 131 units. Therefore,
although using the median income ratio does give some reward for
past inclusionary efforts, AMG at 53, a municipality which has, :

>>

through enlightened zoning, encouraged and allowed nearly 20%⁽³⁾ of its existing housing units to be either garden apartments or mobile homes will not receive the credits it deserves. It is for this reason that direct credits should be allowed.

Another reason to award credit for pre 1980 construction is that since before 1980 and until October, 1983 the Township was under a sewer moratorium imposed by the New Jersey Department of Environmental Protection. During that period, not only were housing developments unable to begin construction; but, one major condominium development, initially known as "Wemrock" and now known as "Raintree", was stopped in midstream. Many of the units, although finished, could not be inhabited. Therefore, large scale development in Freehold Township was impossible.

To this writer's knowledge, the only court decision touching directly on credits against a municipality's fair share number was Countryside Properties, Inc. v. Ringwood, Superior Court of New Jersey, Law Division, Docket No. L-42095-81 (July 25, 1984, decided by Honorable Stephan Skillman, J.S.C.) (hereafter "Ringwood"). Ringwood Borough is located entirely outside the "growth area" designated on the S.D.G.P. and, therefore, had only to satisfy its present indigenous need which is comprised of substandard housing within its municipal borders. Ringwood sought credit against its present indigenous need for rehabilitation efforts it had undertaken during the 1970's as to some of its

Ringwood
W.M.B.

1 (3) 519 apartments (Stonemhurst) + 171 apartments (Chesterfield) + 400 mobile homes (Silvermead) = 1090 units of 5,565 dwelling units (AMG at 107) = 19.6%.

substandard housing, Judge Skillman rejected the requested credits pointing out that if the housing had been rehabilitated and brought up to standard prior to the 1980 census, those units would not have then appeared in the 1980 census as substandard. In this way Ringwood already received credit for its efforts. Had the Borough not undertaken the 1970's rehabilitation of some of its housing stock, the number of deficient housing units reflected in the 1980 census would have been greater; therefore, Ringwood¹'s present indigenous need number would have been higher.

In contrast to the Ringwood case, Freehold Township seeks no credits for rehabilitation efforts prior to 1980 which would have been credited directly in the fair share number under the AMG formula. Instead, the Township seeks credit for a portion of it's inclusionary zoning efforts prior to 1980 which resulted in construction of lower income housing. It is respectfully submitted that only by giving such credits may the efforts of a conscientious municipality be given any direct reward.

In the final analysis, the Township has always been ahead of its time in satisfying its constitutional obligations without judicial proscriptions and prior to the creation of the radical programs of Mount Laurel II. The Township allowed for a variety

of housing, not because of compulsion, but because it zoned from a sense of equity. Even after the Supreme Court's doctrines announced in Mount Laurel II, most municipalities have remained

resistant and intransigent; in contrast, the Township of Freehold, when approached by a Mount Laurel developer responded responsibly and cooperated in passing an ordinance allowing for the realistic construction of Mount Laurel housing.

It is respectfully noted that the requirement to provide for construction of lower income housing did not begin with Mount Laurel II. Rather, it began in 1975 with the Supreme Court's decision in Mount Laurel I. Prior to 1975 and thereafter, the Township has provided a realistic opportunity for the construction of lower income housing and should receive direct credit for doing so.

LACK OF PRICE AND RESALE CONTROLS OF SOME UNITS

While the Township did not initiate any programs for placing price ceilings on housing or restrictions on resales, it must be recognized that such novel restrictions probably would not have passed judicial muster prior to the Supreme Court's decision in Mount Laurel II. To understand the judicial rancor with which a price control situation would have been met, one need only look at Freehold Township's experience in the area of rent control.

As to the units for which the Township is requesting credits, it is conceded that many of the units are not presently price controlled with the exception of rents at the mobile home park, those units at the Stonehurst Apartment and Condominium Complex that are subject to the Senior Citizens Disabled Protective Tenancy Act, N.J.S.A. 2A:18-61.22, et. seq. and the housing provided at

the John L. Montgomery Home. While it might be argued that the lack of price controls on a portion of the credit units prohibits the use of such units as credits, a close examination of the price control language of Mount Laurel II clearly demonstrates that price controls are not mandatory for all Mount Laurel II housing. In discussing mandatory set asides, the Supreme court noted that such programs have inherent problems that must be overcome to deliver new lower income housing, Mount Laurel II at 268-269.

Chief among the problems discussed by the Court was the maintaining of lower income units at prices affordable to lower income people where the units have been put on the market at artificially suppressed prices. Mount Laurel II at 269. However, the court recognized that such controls were not necessary where lower income units were delivered to the market place at their true market values. Ibid.

In the present submission, all of the credit units requested are affordable at 1984 market values even though uncontrolled. Despite the lack of controls, these units are equivalent in price to the new units delivered to the market place at or near full market value and require no artificial control mechanisms.

Moreover, it is unlikely that the prices of these units will rise to the point that they will be priced outside the affordable range of lower income families for three reasons. First, the units are now uncontrolled, are at market value and are affordable

to lower income families. As inflation increases the price, there will, presumably, be a shift upwards in the entire economic picture including the income levels of low and moderate income people. Therefore, as the prices go up, so do the incomes of the persons sought to be accommodated. Secondly, since 1980 there has been constructed and continues to be constructed a large number of condominium units whose prices are just beyond the moderate range. (4) This situation assures that those who are beyond moderate incomes will have housing affordable to them and will not have to "invade" the low and moderate housing, thereby leaving that housing to accommodate low and moderate income people. Thirdly, with a substantial number of new low and moderate income units coming into the market place as a result of the settlement of this matter, it is even more likely that these units will not exceed affordable market levels in the future. -*

SUMMARY

In summary, the Township of Freehold deserves credits because it has acted responsibly in satisfying its constitutional obligations without judicial control. In the past, the Township has enacted rent control, has provided a variety of affordable

(4) See Appendix C which sets forth the condominium projects and the current selling prices.

(5) See Proposal for Compliance, Schedule X. -p. HU>-

housing and allowed apartments and mobile homes when all other municipalities in the area excluded such usage. After the pronouncement of ~~Mount Laurel II~~ and before the filing of any suit, the Township of Freehold worked with Affordable Living Corporation to satisfy any additional obligations it may have had under ~~Mount Laurel II~~. The Township did so regardless of political pressure, the indefiniteness of fair share calculations and the indefiniteness of potential credits. Prior to the ~~AMC~~ opinion in July 1984, it was virtually impossible for any municipality to determine its fair share in order to satisfy the ~~Mount Laurel II~~ goal of voluntary compliance. Nevertheless, the Township of Freehold worked with ALC in order to attempt to provide for and actually construct ~~Mount Laurel II~~ units.

Having established by this submission the fair share obligation of the Township of Freehold, the Township has already contacted developers and designated certain property to fulfill any and all ~~Mount Laurel II~~ obligations through 1990. In so doing, the Township has not chosen property located in a farm area to be zoned with no realistic prospect of development. On the contrary, it has prepared a plan for compliance that will result in the ~~actual~~ construction of ~~Mount Laurel II~~ housing units in numbers in excess of its fair share. ⁽⁶⁾

$$\frac{1.0819+1.6899+1.8689}{3} = 1.5469\% \times 1.2287 = 1.9007\%$$

$$\frac{1.0819+1.6899+1.8689+1.9007}{4} = 1.6354\% \times 65,422 = \underline{1070} \quad 1069.8787 \\ (\text{Prospective Need})$$

II-F Summary of Municipal Gross Mount Laurel II Calculations

Prospective Need:	1070
Incl. add'l. reallocation:	$1070 \times 1.20 = 1284$
Incl. allow, for vacancies:	$1284 \times 1.03 = 1322.52$
Total Prospective Need:	1323
Total Present Need by 1990:	<u>142</u>
Total Municipal Gross Pair Share: (Total Present Need + Total Prospective Need)	<u>1465</u> *,

(5) If this number were reduced per Ringwood case, see f.n. 3> supra., and because of large area of land devoted to County use and State historical parks, see f.n. 2, supra., resulting gross fair share number would be 1349 to 1367.

NARRATIVE TO SCHEDULE I

ENVIRONMENTALLY SENSITIVE LANDS WITHIN THE STATE
DEVELOPMENT GUIDE PLAN DESIGNATED GROWTH AREA OF FREEHOLD TOWNSHIP

Freehold Township is geographically located along the dividing line which defines the outer coastal plain and inner coastal plain physiographic regions. North of the line, which generally parallels Elton Adelphia Road from Manalapan Township north of Smithburg northeasterly to Howell Township at Route 9, Freehold Township is the southern limit of the inner coastal plain which extends north to the foothills of the Watchung Mountains in Somerset County. South of the line, Freehold Township is the northern limit of the outer coastal plain which encompasses most of southern New Jersey. The latter area is dominated by the New Jersey Pine Barrens which extend into the southern portion of Freehold Township.

The northern portion of the Township is composed of gently to moderately rolling topography. This area was historically a prime agricultural area and large tracts of active farmland still exist in this portion of the Township. The northwestern portion of the Township is the headwaters of major tributaries of the Millstone River complex which extends into Mercer and Somerset counties, while the northeastern portion of the Township is the headwaters of the Swimming River which extends through Colts Neck, Middletown and Tinton Falls.

The southern portion of the Township is relatively flat and is physiographically the northern edge of the Pine Barrens. This area is located within the Cohansey geological formation and is comprised of sandy, well-drained soils typical of the Pine Barrens including

Atsion, Berryland, Lakehurst and Lakewood soils. These and other Pine Barren soils have shallow depth to water table (0 inches - 18 inches) and extremely rapid percolation rates which severely restricts development with on-site septic systems. The soils within the southeastern portion of Freehold Township and their suitability for septic disposal systems are presented in the Table appearing on page .

The southeastern portion of Freehold Township is dominated by the extensive New Jersey State Turkey Swamp Fish and Wildlife Management Area (1,569 acres), Monmouth County Turkey Swamp Park (506 acres) and Camp Nomoco, a Girl Scout Camp (245 acres). All three areas, particularly the Fish and Wildlife Management Area, have been expanding during recent years. In addition, several large parcels of land have been acquired by the Township due to tax liens and/or abandonment. The southern and east central portions of the Township are the headwaters for the Toms, Metedeconk and Manasquan Rivers and is a major regional aquifer recharge area.

As a result of natural constraints, development has occurred predominately in the northern portion of the Township within the inner coastal plain physiographic region. Only scattered, rural development, typical of Pine Barrens development, has occurred in the southern portion of the Township along the ridgelines which separate the riverine drainage areas.

Freehold Township planning and zoning programs have been cognizant of the historical development patterns and environmentally sensitive lands within the Township. In 1974, a Natural Resources Inventory prepared by Dames and Moore of Cranford, New Jersey, indexed the sensitive environmental features of the Township including

soils, hydrology, vegetation, flood plains, septic suitability, average depth of water table, foundation limitations and geology.

Based on these factors and on current state, federal and county development policies and regulations, Freehold Township zoned the sensitive environmental areas in the southern portion of the Township as Rural Residential (RR) with a minimum lot size of 5 acres when developed with on-site septic systems. Upland areas were identified and zoned as R-4.0 for 1 acre development. In addition, the Township developed a Groundwater Resources Protection Ordinance which requires special environmental analyses as part of subdivision and site plan reviews. This ordinance was modeled on the Pinelands Commission environmental regulations and also reflects New Jersey Department of Environmental Protection and United States Environmental Protection Agency policies relative to development reviews in environmentally sensitive areas including aquifer recharge areas.

Due to the extent of the sensitive environmental area, the natural physiographic constraints on development, and N.J.D.E.P. and U.S.E.P.A. regulations pertaining to sanitary sewer extensions, the Township Master Plan for sanitary sewers sets forth no proposals to extend sanitary sewers or water service to the southern portion of the Township. The southern portion of the Township is an area which is planned for rural, large lot development in accordance with the physical and environmental development constraints which exist.

New Jersey State Development Guide Plan

The New Jersey State Development Guide Plan (SDGP) includes

Freehold Township in three generalized land use areas: agriculture, limited growth and growth. The "agricultural area" is designated for the west central portion of the Township along the Manalapan border due to the orchards and active farming which occurred within the area in 1980. This portion of the Township drains to the Millstone River, is located within the Western Monmouth Utilities Authority service area and until 1983 had no available public water or sewerage service.

The "limited growth area" encompasses the bulk of the southcentral and southwestern portion of the Township. This is the major portion of the outer coastal plain area of the Township and includes the State Turkey Swamp Fish and Wildlife Management Area, the Monmouth County Turkey Swamp Park and the Girl Scout Camp.

The "growth area" includes the northern, eastcentral and southeastern portions of the Township. The growth area designation is generally consistent with existing and projected development areas within the northern and eastcentral portion of the Township. These areas of the Township have suburban development patterns and can generally be serviced with public sewer and water. (exceptions occur along the Marlboro Township border in the northcentral portion of Freehold Township due to drainage patterns, steep slopes and low-intensity development patterns)

The northern and eastcentral portions of the Township contrast dramatically with the southeastern portion of the Township which has scattered large lot rural residential development. The southeastern area of the Township included within the growth area consists of 1,602 acres. This area contains only 75 single family homes and one church. Other uses include one historic structure (Georgia School), a private camp ground (Pine Cone) and a private grass

landing strip. The area is heavily wooded and has only limited agricultural use due to the sandy, acidic soils and extreme wetness.

In terms of development characteristics and future development, the 1,602 acre southeastern portion of Freehold Township is comparable to and consistent with the characteristics of the "limited growth" area of the Township and the definitions contained in the S.D.G.P. It is an area which can sustain only limited growth due to the physiographic and environmental constraints of the area. For these reasons and to the extent that the area delineated as "environmentally sensitive" on Plate 1- is not a growth area at present and cannot physically be developed as a growth area in the future it should be excluded in calculating the Township's fair share obligations under the AMG formula. AMG at 50. See also, Mt. Laurel II at 224..

TABLE OF SOILS AND SEPTIC SUITABILITY

Southeastern Freehold Township

FREEHOLD TOWNSHIP
MOKMOUTM COUNTY NEW JERSS7

PARKS, OPEN SPACE & FACILITIES

JOHN L. MONTGOMERY HOME⁽¹⁾

The John L. Montgomery Home is located on Dutch Lane Road in the northern portion of the Township. The Home is operated by the County of Monmouth and by Spring, 1985 will house 236 persons. It is a dormitory style home operated for destitute, chronically ill county inhabitants 18 years of age or older.

The Home restricts its housing primarily to Monmouth County residents, although on rare occasion, residents from surrounding counties may be granted residence. The income level for the residents cannot exceed \$882.00 per month - \$10,584.00 annually; thereby, qualifying all residents as "low income". Additionally, no one is granted residency if assets exceed \$7,200.00. Any resident whose assets total between \$1,500.00 and \$7,200.00 must pay fees to the County for their housing until their assets have been reduced to the \$1,500.00 level. Thereafter, residents are not charged for housing. Generally, a resident does not move out of the Home, but continues as a resident until death. Dora Kirby, Home Administrator indicated that very rarely does a resident move elsewhere. Almost always their residency is terminated by death or transfer to Freehold Area Hospital.

- (1) The information set forth herein was supplied by the following:
 - (a) Romeo Cascaes, Freehold Township Clerk,
 - (b) Frederick Jahn, Freehold Township Administrator
 - (c) John T. Allen, Freehold Township Zoning Official and Construction Code Official.
 - (d) Dora Kirby, Administrator of John L. Montgomery Home.
 - (e) Susan Wood, Placement Officer and Social Worker at John L. Montgomery Home.

The residents of the Home are permanent residents of Freehold Township and are eligible to vote in Freehold Township, some of whom are registered and vote by absentee ballot. Although the original Home preexisted zoning regulations in Freehold Township, recently the Township amended its zoning ordinance to allow for an expansion of the facility to house 180 additional persons, which expansion was completed within the last several months. By Spring, 1985 an additional 56 persons will be housed at the

Home on a permanent basis.

The Township, although collecting no real estate taxes on the facility, provides services to it such as police, first aid, fire protection, trash collection, utilities and street lighting. Hospital services are provided to the Home at Freehold Area Hospital located in Freehold Township.

Last year, the Township sought the cooperation of the **Borough of Freehold to share the cost of constructing a water interconnection in the area of Hance Boulevard, a street within a residential subdivision located in both Freehold Township and Freehold Borough. When the Borough declined to appropriate the necessary funding, the entire project was financed by the Township primarily to assure adequate water pressure for fire fighting purposes at the site of the Home's new multi-story facility.**

When questioned regarding information about the type of facility the residents of the Home come from, the Home's social worker and placement director advised that no statistics were available. She indicated that only on one occasion, four years ago, did a husband and wife both reside in the Home; thereby indicating that household units consist of one person.

It should be noted that Freehold Township does have nursing homes within its borders, specifically, Springview Nursing Home on Route 9 and Freehold Conva-Center adjacent to Freehold Area Hospital. Additionally, there are three group homes for the developmentally disabled located within Freehold Township. No credit is sought for any of those facilities because they either are unavailable to low and moderate income persons or the term of residency is indefinite and perhaps not of a permanent nature.

It is respectfully submitted that there is equal, if not more reason to give low income housing credit for the county Home as there would be to give credit for low income housing built by a private developer. In both cases, the funds for construction do not come from the Township, but, from the private developer in the case of a Mount Laurel development, or from the County in the case of the Home. In both cases, the Township must amend its zoning ordinance to allow the construction of the housing. In both cases the Township would be providing services; however, with a Mount Laurel development the revenue would be received

by the Township to offset the cost. In the case, of the County Home no tax revenue is received; therefore, to the extent of the services provided, the Township is subsidizing this housing for low income persons. In both cases, the residents are permanent citizens of Freehold Township eligible to vote in the Township. The housing facility of the home differs by necessity from conventional low income housing which would be built by a developer, because these low income people have the added handicap of being chronically ill. Surely that characteristic does not mean that they should not be counted or that housing to meet their special needs should not be constructed. If these persons did not live in the Home, they would have to be accommodated in housing units somewhere. In short, the county Home fulfills a need for a segment of the State's low income population that a private Mount Laurel housing development could never fulfill.

In summary, the county Home provides all elements of housing exclusively to low income persons on a permanent basis whereby they become residents, eligible to vote in Freehold Township.

The Township has specifically zoned for the facility and provides it with full services while receiving no revenue. It is, therefore, respectfully submitted that the Township should receive full credit for the past 1980 addition to the Home which provides housing for 180 persons.

Schedule II
REGIONAL MEDIAN HOUSEHOLD INCOME; OCTOBER, 1984

	Household Size									
	1		2		3		4		5	
	<u>Low</u>	<u>Moderate</u>	<u>Low</u>	<u>Moderate</u>	<u>Low</u>	<u>Moderate</u>	<u>Low</u>	<u>Moderate</u>	<u>Low</u>	<u>Moderate</u>
HUD Region (Monmouth/Ocean) Section 8 "lower income"(1) - March 1, 1984	\$11,050.	\$17,700.	\$12,650.	\$20,250.	\$14,200.	\$22,750.	\$15,800.	\$25,300.	\$17,050.	\$26,900.
Adjustment to Median Income to Reflect October, ig84:										
CPI ⁽²⁾ October, 1984	302.7* ⁽³⁾ *									
CPI February, 1984	290.5									
Increase factor (302.7*290.5)	1.042	x 1.042	x 1.042	x 1.042	x 1.042	x 1.042	x 1.042	x 1.042	x 1.042	x 1.042
REGIONAL MEDIAN HOUSEHOLD INCOME: OCTOBER, 1984	\$11,514. ⁽⁴⁾	\$18,443. ⁽⁴⁾	\$13,181. ⁽⁴⁾	\$21,101 ⁽⁴⁾	\$14,796 ⁽⁴⁾	\$23,706. ⁽⁴⁾	\$16,464. ⁽⁴⁾	\$26,363 ⁽⁴⁾	\$17,766. ⁽⁴⁾	\$2b,030. ⁽⁴⁾

(1) HUD terminology of "lower income", 42 U.S.C. 1437a(b)(2), corresponds to Mt. Laurel II term "moderate income families," see So. Burlington County v. Mount laurel Tp., 92 N.J. 158, 221, f.n. 8 (1983).

(2) Urban Wage Earners & Clerical Workers - Northeastern, N.J. See 114 N.J.L.J. 451 (Nov. 1, 1984).

(3) Represents extrapolation, i.e. Aug. '84 = 297.1; Sept. '84 = 299.9; difference = 2.8. Therefore, Sept. '84 CPI of 299.9 + 2.8 = extrapolated CPI for October '84 of 302.7.

(4) Posted to Schedule III, -p. 3^

Schedule IIIAFFORDABILITY OF HOUSING BY HOUSEHOLD SIZE; FREEHOLD TOWNSHIP - OCTOBER, 1984

<u>Household Size.</u>	<u>Moderate 80%</u>	<u>Low 50%</u>	<u>Moderate Rent Level</u>	<u>Low Rent Level</u>	<u>Moderate Sales Level</u>	<u>Low Sales Level</u>
1	\$18,443.	\$11,514.	\$461.	\$288.	\$34,120.	\$18,998.
2	21,101.	13,181.	528.	330.	39,037.	21,749.
3	23,706.	14,796.	593.	370.	43,856.	24,413.
4	26,363.	16,464.	659.	412.	48,772.	27,187.
5	28,030.	17,766.	701.	444.	51,856.	29,314.

(1) From Schedule II, p-3&c.

(2) Moderate Income x 30%, see CUPR @ pp. 378-382, discussing abandonment of 25\$ "rule of thumb".

(3) Low Income x 30%.

(4) Moderate Income x I.85. This factor works very well for determining affordable housing for moderate income household. The factor assumes 10% downpayment, 30 years payout, 12% interest, payment of taxes at current rate (\$2.64 per hundred dollars of valuation @ 91% average ratio), payment of monthly condominium maintenance charge (\$60), payment of mortgage insurance (\$b). Assumes 28% of income being earmarked for shelter.. The factor is very conservative, see CUPR @ p.382,, which discusses factor of 2 to 2.5 x income as being acceptable.

(5) Low Income x I.65. Assumes same as above; however, factor is lower than for moderate income because larger proportion of income is needed to pay for other basic necessities.

Schedule IVCHESTERFIELD APARTMENTS - ANALYSIS OF RENTALS; OCTOBER, 1984

TOTAL # OF UNITS - 171

Type of Unit	# of Units	Current Mkt. Rental ⁽¹⁾	Sales Prices ⁽²⁾	Household Size	Affordable to Low (L) ⁽³⁾ Moderate (M), Neither (N)

- (1) Per conversation with Seymour Silver, corporate secretary and managing officer of Silver Enterprises, Inc., owner of Silvermead Mobile Home Park & Sales. Advised that single wide units currently sell for prices ranging from \$11,000 to \$19,000 with the median selling price being \$15,000 to \$16,000. The double wide units currently sell for prices ranging from \$28,000 to \$42,000 with the median selling price being \$35,000 to \$37,000. An independent check was made of the foregoing information by contacting Michael Castoro, President of the Mobile Home Owners' Association in Silvermead.
- (2) 10% of purchase price.
- (3) Purchase price less down payment.
- (4) 13% interest, 20 year payout. See CUPR @ p.359, paragraph 2 and at pp.360-361, f.n. 21.

Schedule VIII

SUMMARY OF LOWER INCOME HOUSING CREDITS

		<u>Low</u>	<u>Moderate</u>
John L. Montgomery Home (1)		180	
Uneufcerfield Apartments (2)	171 units x 60% (3)		103
Stonehurst Apartments & Condominiums (4)	518 units x 60% (3)		311
Silvermead, Section I (single wide units) (5)	203 units x 60% (6)		122
Silvermead, Section II (double wide units) (7)	142 units x 33% (8) x 60% (6)	28	
		<u>180</u>	<u>564</u>

(1) See pages 32 to 35.

(2) See Schedule IV, p. 38.

(3) Factor of 60# is used, assuming 40% of the occupants of the lower income units are above the lower income levels. This factor is believed to be conservative for several reasons. First, the units were rent controlled from 1975 until 1983*. During that 8 year period, those who could not afford housing elsewhere would have gained occupancy in the rent controlled housing. Upon expiration of rent control, the protection of tenants under the condominium conversion legislation and Protected Tenancy Act secured their occupancy. Second, because of the multitude of housing available just above the moderate price range, see Appendix C, persons whose incomes are above moderate, but below the level to enable them to afford single family residences on larger lots will not have to "invade" the low and moderate housing, leaving it for persons of low and moderate income.

(4) See Schedule V, p. 39-

(5) See Schedule VI, p. 41.

(6) See f.n. 3. Silvermead is still rent controlled. It is an adult park; therefore, by reason of the fixed Income of seniors the actual percentage of low and moderate occupied, especially In Section I, is probably greater than 60%. Finally, because seniors generally have had an opportunity to save, many of the mobile homes may be purchased rather than financed; therefore, the total monthly cost may be much less than portrayed on Schedule VI, pp. 41 and 42.

(7) See Schedule VI, p. 41.

(8) The 142 moderate units in Section II are decreased by 2/3rds because those lots would only be available to low and moderate persons if the least costly of the double wide units were located on those lots. See Schedule VI. By reason of the range of prices for double wide units, see Schedule VII, it is estimated that that will occur only 1/3rd of the time.

Schedule IX

				<u>4,274</u>	<u>454</u>	<u>397</u>	<u>851</u>	<u>3,423</u>

- (1) It is realized that if the court approves of the settlement as explained in this submission, it does not necessarily mean that court approves of this particular plan for compliance which will have to be submitted to the court for approval before the 90 day repose period allowed by Order dated October 26, 1984 expires.
- (2) See Plate 4, p. 48 for location of properties.
- (3) Based on settlement reached with Plaintiff.
- (4) Affordable Living Corporation, represented by Carl Bisgaier, Esq. Developer approached Township requesting Mount Laurel zoning. After numerous conferences, Township passed an ordinance creating an "ML II" zone and included Affordable Living Corporation's property within that zone.
- (5) There have been numerous conferences with developer who originally proposed high density in accordance with zoning. When advised that property would be changed to "ML II" developer advised Township that even though zoning would allow 12 units per acre, they could not, in accordance with proper planning, place more than 488 units on the property. Developer requested less than a 20% set aside; however, Township has required the set aside of 10% low and 10% moderate.

Schedule X (con't.) (Page 2 of 2)

- (6) Property is currently zoned R-40. Developer requested high density zoning. Township has informed developer that zoning would probably be "ML II". Recent conversations with developer's representatives indicate their interest to build 12 units per acre in conjunction with the development of the rest of their tract in Howell Township.
- (7) See Letter from developer dated July 12, 1984, included as Appendix D. Environmental Sensitivity of a portion of the area prevents development at full 12 units per acre. Loura is a local builder/developer.
- (8) Per Dora Kirby, Home Administrator, facilities for 56 more persons will be opened in Spring, 1985.

Schedule XIRECAPITULATION OF LOW/MODERATE UNITS: 1990 - OVERZONING

	(A)	(B)	(C)
<u>Low/Moderate Units: 1990</u>	<u>Low</u>	<u>Moderate</u>	<u>Total</u>
Credits (See Schedule VIII, p. ^4)	180		744
Proposal for Compliance (See Schedule X, P. 46)	<u>454</u>	<u>397</u>	<u>851</u>
	<u>634</u>	<u>961</u>	<u>1,595</u>

Overzoning⁽¹⁾

Total of Low/Moderate Units (Column C above)	<u>1,595</u>
Less: Gross Fair Share (Schedule I, p. IB)	<u>1,465</u>
Overzoning In Number of Units	<u>130</u>

- (1) It is respectfully submitted that there is really no need to overzone for Mount Laurel housing because as revealed by Schedule X, p. 46, the properties to be zoned for Mount Laurel housing are those of developers who have approached the Township regarding the development of these tracts. Additionally, the number of units set forth on Schedule X, p. 46, are not the "optimum" number of units which could be "squeezed" out of the property, but are the realistic buildout numbers that the developers indicate that they can construct.

rf

APPENDIX

EXHIBIT A

PRESENT NEED CALCULATION UTILIZING
COUNTRYSIDE PROPERTIES v. RINGWOOD METHODOLOGY

Countryside Properties, Inc. v. Borough of Ringwood (7/25/84 -- Docket No. L-42095-81) (hereinafter "Countryside") addressed a "basic issue for calculating the "preesnt need" for low and moderate income housing in accordance with the requirements of the Mount Laurel II doctrine.

The court specifically reviewed the methodology utilized in the Urban League (Middlesex County) Mount Laurel litigation and report prepared by Rutgers - the State University of New Jersey Center for Urban Policy Research entitled Mount Laurel II: Challenge and Delivery of Low Cost Housing (1983).

The methodology utilized in the Urban League case is essentially the same methodology utilized in AMG Realty Company v. Township of Warren (hereinafter "AMG"). The Urban League methodology utilizes three surrogates of housing deficiencies; lack of complete plumbing, overcrowding (1.01 or more occupants per room) and lack of central heating. A calculation to eliminate any overlap was included.

Utilizing the data from AMG would produce the following for Freehold Township and its present need region (Monmouth and Ocean Counties). The total present need for Freehold Township,

according to AMG, is 114 units and the Freehold Township present need ratio to the region is 0.008724.

PRESENT INDIGENOUS NEED - PER URBAN LEAGUE METHODOLOGY

<u>Overcrowded Units</u>	Lack Complete Plumbing Not <u>Overcrowded</u>	Units Lacking Adequate Heating	Total Present Need
Freehold Township	57	30	27
Monmouth County	3947	1537	2295
Ocean County	<u>2519</u>	<u>523</u>	<u>2254</u>
Present Need Region	6466	2060	4549
			13068

Freehold Township Present Need Ratio of Region = 114 * 13068 = 0.008724

Source: AMG @ 107 and 109.

According to the Rutgers¹ Study, the Mount Laurel Eligible Households occupying deficient housing within the East Central Region (Monmouth and Ocean Counties) is 4,960 (Exhibit 2A-1, page 142, Rutgers Study and Ringwood @ 6-9). Utilizing the Rutgers Study and Ringwood methodologies and applying the "total present need" ratios from Table 1 above to the Rutgers Study total of 4,960 would produce a "present need" of 43 units for Freehold Township.

, Ringwood also determined that Mount Laurel Eligible Households occupying deficient housing equaled 54.3% rather than the 82% utilized in the Urban League methodology (derived from Tri-State

Regional Planning Commission Study).

Application of the Ringwood percentage to the 114 total present need identified in Table 1 above would result in 62 units rather than 93 units based upon the Q2% adjustment factor used in AMG. In effect, utilization of the Ringwood methodology would result in a present need of 43 units and an adjusted present need of 62 units based upon the present indigenous need ratio for Monmouth and Ocean Counties.

Exhibit C

CONDOMINIUM UNITS SLIGHTLY ABOVE MODERATE SALES PRICE

<u>Development</u>	<u>Property</u>	<u>Lot</u>	<u>Block</u>	<u>Year of Construction</u>	<u># of Units</u>	<u>Sales Price</u>
Deerbrook (1)		21.011 <u>et seq.</u>	83	1982-1983	168	\$49,725. - \$62,500. (2)
Raintree (J ^Q)		1.01 <u>et seq.</u>	86.03 <u>et seq.</u>	1983-1984	1234	\$49,900. - \$83,000. (4)
Briarwood (5)		5A	41	1984	96	\$51,900. - \$63,900. (6)
					1498	

(1) Located on Route 9, North of Howell Township border. Built by Hovbilt, Inc.

(2) See four pages of sales records following this Exhibit.

(3) Commenced as "Wemrock Farms" in 1974, never occupied because of sewer moratorium and financial difficulty of original developer. In 1983, developer Michael Kaplan revitalized project finishing those units which had been partially completed and finishing balance of project.

(4) See three pages of sales records following this Exhibit.

(5) Located adjacent to Chesterfield garden apartments. Builder is Leon Kleiner, who also built the garden apartments.

(6) Per conversation with Leon Kleiner, builder. No sales have been closed.

RE: Strickland Tract
Block 83, Lot 16
Our File #5064

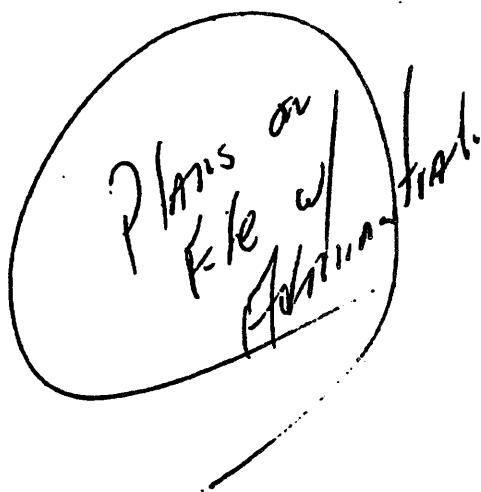

Dear Governing Body and Planning Board Members:

On September 27, 1983 Joseph Louro and I requested re-zoning of the Strickland Tract from R 40 zone to HD (high density), a copy of that letter being attached.

Subsequent to our letter submission, two areas of concern were noted by the Township Committee and Planning Board:

1. The New Jersey Department of Environmental Protection indicated that no further water diversion rights would be granted to the Municipality. Therefore, there was great concern on the part of the Municipality that no future approvals, re-zoning*, etc. should take place until there was an understanding and direction for a solution to this condition.
2. The second problem concerned Mt. Laurel II litigation, wherein the Municipality must consider the inclusion of low and moderate housing in their municipal zoning ordinance.

Because of these two conditions, we understood that our request would be held in abeyance.

Page 2

In the interim we have had meetings with several Township Committee members, the Township Planner, Administrator and Attorney. We were asked to consider, among other things, use of the Strickland Tract in its entirety for low-moderate income housing and also to project acceptable (to us) limits for low-moderate housing. In the spring of this year we presented to Township representatives a report entitled "Economic Analysis for Multi-Family Residential Tract in Freehold Township, New Jersey Which Provides Low-Moderate Housing Under Mt. Laurel". The report indicated that zoning of the Strickland Tract solely for low-moderate housing would be economically unfeasible. It would result in a net loss of more than 2.5 million dollars to the developers.

It is my understanding that the Municipality is now considering revising the zoning of various locations and will consider the re-zoning of the Strickland Tract. I am therefore submitting this application to the Township Committee and Planning Board for the revision of the Strickland Tract in accordance with the attached seven copies of each of two proposed plans for the Township Committee and twelve copies of the same for the Planning Board. The first plan includes a total of 600 units, of which twenty percent (20%), or 120 units, will be low-moderate income dwellings in accordance with the provisions of Mt. Laurel II. The remaining 480 units will be conventional condo units similar to the Deer Brook project immediately adjacent to the site along Passaquaque Brook. The second plan is comprised of 400 conventional condo units with no provisions for low-moderate income dwellings.

Obviously after re-zoning of the tract the necessary construction plans—site plans—sub-division plans will be submitted to the Municipality. However, they cannot be prepared or submitted at this time since the zoning is not yet in place. With respect to the plans, the 600 L-M plan has an overall density of approximately eight (8) units per acre and we would seek some relief in terms of certain improvement specifications to enable us to provide units consistent with Mt. Laurel II. With respect to the 400 unit plan, it is our intent do design and construct the project consistent with improvement requirements.

I realize the time pressure that the Municipality is under but would point out that almost a year has elapsed since we began initial discussions. I would appreciate a prompt response and resolution of the re-zoning of the Strickland Tract.

~~Respectfully submitted.~~
