STEPHEN SKILLMAN,

Re: Morris County Fair Housing Council v. Boonton Township,
Docket No. L 6001-78 P.W. (Randolph Township)

Dear Judge Skillman:

Plaintiffs Morris County Fair Housing Council et al submit this letter-brief in reply to the opposition by Denville and Randolph Townships to plaintiffs' application for the imposition of conditions upon transfer of this matter to the Council on Affordable Housing. In their prior briefs plaintiffs have anticipated most of defendants' arguments and will not repeat that analysis here. A few points, however, bear further comment.

I. THE COURT HAS THE POWER TO IMPOSE
CONDITIONS ON RESOURCES NOT WITHIN
THE DIRECT CONTROL OF THE DENVILLE
AND RANDOLPH TOWNSHIP GOVERNING BODIES

This Court has the power to impose conditions upon resources which are not within the direct control of the municipal governing bodies of Denville and Randolph Townships.

The power of the Court in this matter derives from two distinct sources (1) the explicit terms of the remand by the

Supreme Court and (2) the inherent jurisdictional powers of the Law Division of Superior Court. Under either of these sources of power, the Court may impose conditions upon transfer which include conditions upon resources within the control of planning boards, boards of adjustment, and municipal utilities authorities.

We shall address each of these sources of power in turn.

The scope of the Court's power on remand must first be analyzed in light of the Supreme Court's expressed rationale for the remand. In Hills Development Corp. v. Township of Bernards, Docket No. A-122 to A-133 (N.J. Sup. Ct., Feb. 20, 1986) (hereinafter Hills Development Corp.), the Supreme Court recognized that L. 1985 c. 222 embodies a strong policy favoring the disposition of exclusionary zoning cases by an administrative agency rather than by the courts. L. 1985 c. 222 §3. In light of this strong legislative policy, the Supreme Court held that L. 1985 c. 222 §16(a) generally requires that pending exclusionary zoning litigation be transferred to the Council on Affordable Housing on the application of any party. Id. at 46, 74-76.

Notwithstanding this strong legislative policy, the Court held that one class of cases could not constitutionally be transferred to the Council on Affordable Housing - those cases in which transfer would not merely delay the municipality's satisfaction of its constitutional housing obligation, but would actually impair the municipality's ultimate ability to satisfy that constitutional obligation. Such a consequence, the Court held, "would warrant, indeed, require, denial of transfer." Hills Development Corp., slip op. at 77.

In an explicit effort to limit the extent of this constitutionally mandated exception to the general legislative policy favoring the transfer of cases to the Council on Affordable Housing, the Court ruled that the trial courts (and ultimately the Council itself, when it is fully operational) have the power to impose conditions upon municipalities that seek to invoke the jurisdiction of the Council. In recognizing this power, the Supreme Court expressed the hope that "the occurrence [of circumstances in which transfer must be denied] is made even less likely by our decision permitting the imposition of appropriate conditions on transfer." Id. at 77.

The Supreme Court did not attempt to determine for itself what conditions should be imposed on each municipal defendant, how those conditions ought to be implemented, or whether imposition of conditions would be so ineffective in preserving scarce resources that transfer must, as a matter of constitutional law, be denied. These determinations, the Court recognized, required detailed fact finding and evaluation. Id. at 87-88. The Court therefore remanded the Denville and Randolph cases back to the trial court for a determination of these issues. Id. at 88. Thus, while the remand to the trial court is limited in purpose, the Supreme Court intended that the trial court exercise the full scope of judicial power to fulfill that purpose. The trial court thus has the power to take whatever judicial actions are necessary to preserve "scarce resources" so as to "protect and assure the municipality's future ability to comply with its Mount Laurel obligations." Id. at 86-87.

The Supreme Court did not limit the power of the trial courts to preservation of resources within the direct control of a municipal governing body. To the contrary, it defined the scope of the "scarce resources" to be preserved expansively: "scarce resources" include all "those resources that will probably be essential to the satisfaction of [the municipality's] Mount Laurel obligation". Id. at 86. The Court also provided examples of the types of "scarce resources" it had in mind: vacant land, sewerage capacity, transportation facilities, water supply, and, more generally, "any one of the innumerable public improvements that are necessary to the support of housing but are limited in supply." Id. at 86-87. Thus, for example, the Court did not restrict imposition of conditions upon development of vacant land to vacant land owned by the municipality itself. Instead, the Court contemplated that trial courts might impose conditions that would restrict development of land in private ownership which is suitable for development of lower income housing. Id. at 86, 88. Similarly, the Court did not limit judicially imposed conditions to sewerage capacity within the direct control of the municipal governing body, id. at 86. Rather, it left the trial courts free to impose conditions restricting utilization of sewerage capacity from any source that might otherwise be available for lower income housing.

To reach "scarce resources," such as vacant developable land and sewerage capacity, which are beyond the direct control of the municipal governing body, the trial courts must necessarily have the power to impose conditions upon the public agencies, municipal and otherwise, which do in fact exercise control over

the development of land and the distribution of sewerage capacity. Any narrower limitation upon the power of the trial courts would render them incapable of preserving "scarce resources" and helpless to fulfill the purposes of the remand.

In the present case, the municipal planning board and board of adjustment are the agencies that control the development of vacant land, and the utilities authority is the municipal agency in Randolph Township that regulates connection with the sanitary sewage system. To preserve these scarce resources, the trial court must be able to impose conditions upon these municipal agencies.

Independent of the specific terms of this remand and the specific provisions of L. 1985 c. 222, it is well-established that whenever a court has jurisdiction over a case, it has the power to issue whatever orders are necessary to preserve the subject matter of the litigation pending ultimate resolution of the case on the merits. As the Supreme Court observed in Feraiullo v. Manno, 1 N.J. 105, 108-109 (1958), "the court, having jurisdiction, will always intervene to protect the res from destruction, loss, or impairment, so as to prevent the decree of the court, upon the merits, from becoming futile or inefficacious in operation." Accord Haines v. Burlington County Bridge Co., 1 N.J. Super. 163, 174 (App. Div. 1949); see generally Crowe v. DeGioia, 9 N.J. 126, 133-34 (1982).

In exercise of its power and duty to preserve the subject matter of the litigation, the court may grant ancillary relief against nonparties to the litigation. See Fidelity Union Trust Company v. Union Cemetary Association, aff'd 134 N.J. Eq. 539

(Ct. of Err. & App. 1944); Kitty Kelly Shoe Corp. v. United Retail Employees of Newark N.J. Local No. 108, 125 N.J. Eq. 250 (1934), cf. West Jersey Title & Guarantey Co. v. Industrial Trust Co., 27 N.J. 144, 150 (1958) (ancillary jurisdiction generally). Such relief does not depend upon a showing of wrongdoing by the nonparties. Rather, the power of the court in such cases extends "to persons who though not parties to the original action or engaged in wrongdoing are in a position to frustrate the implementation of a court order or the proper administration of justice . . . and encompass even those who have not taken any affirmative action to hinder justice." DuShane v. Conlish, 583 F. 2d 965, 967 (8 Cir. 1978) (quoting United States v. New York Telephone Co., 434 U.S. 159, 174 (1977); elipsis in original), see Mandino v. Lynn, 357 F. Supp. 169, 177 (W.D. Mo. 1973) (in suit challenging policies of the federal Department of Housing and Urban Development concerning eligibility for federally subsidized housing, court issued interlocutory relief against nonparty housing management company so as to preserve the availability of the housing unit pending disposition of the suit on the merits).

The courts may properly exercise this power even where the case is to be transferred to an administrative agency for decision. See Boss v. Rockland Electric Co., 95 N.J. 33 (1983) (in case challenging cutting of trees by utility company, the Supreme Court upheld an interlocutory injunction barring the cutting of the trees during the pendency of proceedings, even though it determined that case should be transferred to Board of Public Utilities for decision).

In sum, this Court has the power to impose conditions upon resources such as vacant developable land and sewerage capacity even when they are not within the direct control of the municipal governing body. This authority may be exercised pursuant to the explicit terms of the remand in this case or to the Court's inherent power to preserve the subject matter of the litigation.

II. VACANT DEVELOPABLE LAND IN THE SDGP
GROWTH AREA IS A SCARCE RESOURCE IN
RANDOLPH TOWNSHIP

Randolph Township suggests that the regulation proposed by the Council on Affordable Housing demonstrates that vacant land in the SDGP growth area is not a "scarce resource" in Randolph Township. On June 2, 1986, the Council on Affordable Housing did indeed publish a proposed regulation (attached to this brief as Exhibit I) concerning both the determination of municipal housing obligations and the acceptable means by which municipalities may

*

comply with such obligations. The Council has indicated that if municipal obligations are determined in accordance with this regulation, Randolph Township would have an obligation of 452 units. (Exhibit J)

At this point, however, this is merely a proposed regulation. The Council has held three public hearings since June 2, 1986, and has received extensive written comments. It cannot be assumed that this regulation will be adopted as originally

* The Council had previously promulgated procedural regulations. Those regulations are annexed as Exhibit K.

*

proposed.

Moreover, the determination by the Council upon which Randolph Township relies is by its own terms merely "illustrative" and does not purport to be the final determination by the Council of Randolph's obligation. (Exhibit J at p. 1)

Even if adopted in its present form, this regulation would only establish guidelines for determination of the municipal housing obligation. L. 1985 c. 222 §7(c). In any contested matter, a final determination of municipal housing obligation will be determined by the Council only following a full trial before the Office of Administrative Law. L. 1985 c. 222 §15. Thus any argument based either on this regulation or on predictions as to its practical effect are mere speculation. In the absence of a definitive determination by the Council as to Randolph's housing obligation, the Court must look to other sources for guidance, such as the Court's own decision in Morris County Fair Housing Council v. Boonton Township, Docket No. L 6001-78 (Jan. 14, 1985) (determination of the obligation of

* There is good reason to believe that the final regulation will differ in significant respects from the proposed regulation. For example, the Attorney General has recently represented to the Appellate Division of Superior Court that the Council on Affordable Housing will have to provide some method for assuring that any downward adjustments to the housing obligation of a municipality pursuant to L. 1985 c. 222 §7 are offset by an increase elsewhere in the region. Brief of the Attorney General, June 18, 1986, at pp. 54-55, In the Matter of Certain Amendments to the Adopted and Approved Solid Waste Management Plan of the Morris County Solid Waste Management (Docket No. A-1628 (App. Div.)) (attached as Appendix L) The proposed regulation published on June 2, 1986, does not address this issue. Such a modification might have a significant effect on the determination of Randolph Township's housing obligation.

Denville Township) and Van Dalen v. Washington Township, 205 N.J. Super. 308 (Law Div. 1984).

Even assuming that the regulation proposed by the Council on Affordable Housing is to be treated as it were law, it does not support the inference that vacant developable land in the SDGP growth area is not a "scarce resource." First, the proposed regulation indicates that to the extent that housing is provided through inclusionary zoning, the presumptive permitted density is six units per acre and the presumptive setback is 20 percent. Proposed N.J.A.C. 5:92-8.5(c). If Randolph Township satisfies its housing obligation through inclusionary development, it will

*

have to rezone 377 acres of vacant developable land, or 78 percent of the 484 acres of vacant developable land in the SDGP growth area identified by the Randolph planner, Adrian Humbert. By this measure alone, vacant developable land is an extremely scarce resource in the SDGP growth area.

Moreover, based upon the proposed regulation, the actual amount of land in the SDGP growth area in Randolph that could be rezoned for inclusionary development is less than 484 acres. The regulation requires that any land rezoned for inclusionary development be "available, suitable, developable, and approvable." Proposed N.J.A.C. 5:92-9.1(a). These terms are carefully defined in the proposed N.J.S.A. 5:92-1.3:

"Approvable site" means a site that may be developed for low and moderate income housing in a manner consistent with the regulations of all agencies with jurisdiction over the site. A site may be approvable although not currently

* 452 multiplied by 5 and then divided by 6.

zoned for low and moderate income housing.

"Available site" means a site with clear title, free of encumbrances which preclude development for low and moderate income housing, upon which the owner has expressed a willingness to build low and moderate income housing, or to convey the land for this purpose, at a reasonable price, in keeping with comparable land sales in the area.

"Developable site" means a site that has access to appropriate water and sewer infrastructure, and has received water consistency approvals from the New Jersey Department of Environmental Protection or its designated agent authorized by law to issue such approvals.

"Suitable site" means a site that is adjacent to compatible land uses, has access to appropriate streets and is consistent with the environmental policies delineated in Subchapter 8, Municipal Adjustments.

While the environmental criteria used by Mr. Humbert to delineate vacant developable land may eliminate some sites that would not be "suitable," they fail to exclude land that is not "approvable," "available," or "developable." Were Randolph's resources of vacant land in the SDGP growth area to be evaluated by these standards, there would surely be significantly less than 484 acres available.

Second, defendant suggests that it will not rely on inclusionary development, but instead will meet its obligation through other means. It cannot be assumed, however, that Randolph will be able to utilize any alternative means even if it has the desire to do so.

For example, Randolph Township asserts that it will satisfy half its housing obligation by entering into a regional

contribution agreement. This, however, is no more than speculation. To meet a portion of its housing obligation through a regional contribution agreement, a municipality must find a willing partner. Proposed N.J.A.C. 5:92-11.1. It must identify a project within that municipality that will in fact result in provision of an equivalent amount of low and moderate income housing. Proposed N.J.A.C. 5:92-11.2(f). It must be willing and able to appropriate funds to create the low and moderate units called for by the project. Under proposed N.J.A.C. 5:92-11.5(b) and (c), this figure may be between \$10,000 and \$27,500 per unit. Thus, Randolph must be willing and able to appropriate between \$2.26 million and \$6.2 million over the six-year period of substantive certification. It must secure approval both from the relevant county planning board and from the Council on Affordable Housing. Proposed N.J.A.C. 5:92-11.4; L. 1985 c. 222 §12. The Court cannot assume that Randolph Township will be able to meet all or any of these requirements.

Indeed, the Legislature itself recognized that some municipalities might propose regional contribution agreements but be unable to meet the necessary requirements. L. 1985 c. 222, §7(c) requires that a municipality that proposes a regional contribution agreement must also submit to the Council an alternative plan for meeting that portion of its housing obligation.

Randolph Township also suggests that it will meet some of its housing obligation through anticipated construction by the Morris County Housing Authority of 32 units of low income family housing. This long delayed project remains subject to the whims

of the federal budget process. In his proposed FY 1987 budget, for example, the President proposed to eliminate all funds for new construction of low income public housing, permitting only funds for 350 units of low income public housing in the entire country. See 12 Housing & Dev. Rptr. 726 (Feb. 10, 1986). The President also rescinded \$4.4 billion of the \$10.8 billion already appropriated for FY 1986 and deferred the expenditure of another \$2.3 billion. See Cong. Rec. S1055 (Feb. 5, 1986); 12 Housing & Dev. Rptr. 726 (Feb. 10, 1986). On June 24, Congress passed the Urgent Supplemental Appropriations Act of 1986 (HR 4515) which accepts the Presidential rescission for housing but rejects the deferrals. See Cong. Rec. S8579-80 (June 24, 1986). This legislation muddies the prospects for construction of additional public housing.

Moreover, the House of Representatives has recently approved an amendment to the 1986 housing authorization bill HR.1, which would redirect most remaining public housing funds from new construction to the rehabilitation of existing units. Cong. Rec. H.3382 (June 5, 1986); 12 Housing & Dev. Rptr. (June 16, 1986).

These developments make it clear that any proposed additional construction of low income family housing by the Morris Housing Authority in Randolph is speculative. Cf. Urban League of Essex County v. Township of Mahwah, 207 N.J. Super. 169, 188-89 (Law Div. 1984).

Finally, Randolph Township suggests that it will satisfy 100 units of its housing obligation through 100 units of low income senior citizen housing which are under construction. Presumably this housing, which has been under construction since last

September or earlier (Certification of Edward Buzak in Support of a Motion to Transfer, para. 31, Sept. 6, 1986), will be completed prior to July 1, 1987. Therefore, it cannot be part of Randolph's plan for meeting its needs during the period 1987 to 1993. In making reference to these units, the municipality presumably means to indicate that it intends to seek credit for this housing pursuant to L. 1985 c. 222 §7(c)(1). As this Court has previously noted, this statutory provision raises difficult issues of construction and implementation. Morris County Fair Housing Council v. Boonton Township, 209 N.J. Super. 393, 430 (L. Div. 1985) aff'd. in part, rev'd in part sub nom Hills Development Corp. v. Township of Bernards, Docket Nos. A-122 to A-133 (N. J. Sup. Ct., Feb. 20, 1986). If construction of an affordable housing unit prior to 1987 has resulted in a lower income household being deducted from the determination of unmet need, then that housing unit cannot lawfully be deducted a second time in the guise of a so-called one-for-one credit. The methodology for determining housing need proposed by the Council on Affordable Housing estimates present need as of July 1, 1987 by assuming that the stock of safe, affordable lower income housing will grow at the same rate as the low income population during the period from April 1, 1980 to July 1, 1987. Appendix A to Proposed Rules of the Council on Affordable Housing 18 N.J. Reg. 1124, 1135(b) (June 2, 1986). Thus, while the proposed N.J.A.C. 5:92-6.1(a) permits one-for-one credit for lower income units created between April 1, 1980 and July 1, 1987, it is unclear how this provision will be implemented to avoid illegal

double counting of low income units added to the stock during that period.

Hence, it is unclear, at best, what credit, if any, Randolph Township, will receive for these units. It is speculative to assume that Randolph will be able to use such credits to meet or reduce its housing obligation.

In sum, it is not appropriate in determining whether land is a scarce resource to assume that Randolph will be able to satisfy any of its housing obligation through means other than inclusionary development.

Third, it cannot be assumed that Randolph's fair share will in fact be 452 units even if the proposed regulation is adopted in its present form. For example, the evidence at trial may well show that the 74 unit credit which Randolph receives for units to be produced by downward filtration of multifamily units now not affordable to lower income households has no basis in fact. This conclusion is supported by the fact that as of 1980, virtually none of Randolph Township's rental housing was affordable to lower income persons and that, during the most recent period for which data is available (1970 to 1980), rents have increased at a

*

rate much higher than the statewide increase in incomes.

Similarly, testimony at trial may well show that Randolph's systematic program to eliminate summer bungalows which often

* In 1980, all the low income households and 78% of the moderate income households in Randolph were obliged to pay more than 25% of their household income for gross rent. (Exhibit L) Between 1970 and 1980, the median contract rent in Randolph Township rose by 132.4%, while statewide median family incomes rose only by 108.2%. (Exhibit M)

provided (illegal) year-round residences for lower income persons (Exhibit N) has both increased its housing need as of 1987 and diminished the likelihood that "spontaneous rehabilitation" will satisfy any portion of that need. As a result, Randolph's housing obligation as ultimately determined by the Council pursuant to this regulation may be substantially higher than 452 units.

For all these reasons, Randolph Township's reliance upon the proposed regulation of the Council on Affordable Housing to refute plaintiffs' evidence that land in the SDGP growth area is not a scarce resource is unjustified.

III. SEWERAGE CAPACITY IN RANDOLPH TOWNSHIP IS A SCARCE RESOURCE

As set forth in plaintiffs' prior briefs, sewerage capacity in Randolph is finite and limited. Even if the Randolph housing obligation were only 452 units and Randolph were to receive full credit for 132 units of low public income housing -- both of which are questionable assumptions for the reasons set forth in the previous section of this brief -- Randolph would need sufficient sewerage capacity for 1600 households. Under Judge Gascoyne's decision of May 9, 1986, in Department of Health v. City of Jersey City, sufficient sewerage capacity will be available for only approximately 1450 additional households.

(Pbl6 n. 6)

Randolph suggests that there will be no real demand for this sewerage capacity in the next two years since the number of applications for connection to the sewage system was not great during the past five years. This analysis, however, ignores the

fact, well documented in Randolph's recent Master Plan Revisions (attached to plaintiffs' supplemental brief), that new construction was artificially depressed during that period as a result of the court-imposed sewer connection ban and is likely to accelerate rapidly after the ban is lifted.

Randolph also suggests that sewerage capacity for lower income housing could be provided through small private on-site sewage treatment systems, known as package treatment plants. Such systems are indeed technologically feasible, as indicated in Dr. Keenan's report. New Jersey's regulatory agencies, however, continue to be adverse to the construction of such systems.

Current regulations of the New Jersey DEP permit construction of package treatment plants only as temporary measures to be abandoned as soon as permanent treatment facilities are constructed. N.J.A.C. 7:9-1.102(b). This precludes private construction of such facilities, for only public agencies can afford to build multimillion dollar facilities whose economic life span cannot be predicted and might be five years in length or fifty. Package treatment plants must also be consistent with both waste water treatment facility plans, known as §201 plans, and basin wide water quality plans, known as §208 plans. N.J.A.C. 7:14-12.14(a)(5), 7:15-3.1. Where either the §201 plan covering treatment in the relevant area or the §208 plan does not provide for package treatment plants, construction of such a plant is forbidden. Neither the Rockaway Valley Regional Sewerage Authority §201 plan nor the Upper Raritan §208 plan makes any provision for package treatment plants. Finally, the operator of such a plant must secure the endorsement of the

municipality and the regional sewerage authority. N.J.A.C. 7:9-2.1(i) In the present instance, Judge Gascoyne has refused to order the RVRSA to cooperate with parties seeking to construct package treatment plants. (Transcript of Opinion, Dept. of Health v. Jersey City, at pp. 14-15.)

In addition, Randolph Township's suggestion is inconsistent with the proposed policies of the Council on Affordable Housing. Recognizing the general unwillingness of the DEP to approve package treatment plants, the Council expressly treats the absence of public infrastructure as grounds for deferring or reducing a municipality's housing obligation in its proposed regulation. Proposed N.J.A.C. 5:92:8.6(a). Hence Randolph cannot both rely on the proposed regulations to assert that its housing obligation will be diminished and also assert that the availability of public sewage treatment capacity is not an issue.

Thus, neither the theoretical possibility that private package plants might be constructed, nor the relatively low level of the recent demand for connections to the public sewage system, has no bearing on the scarcity of sewerage capacity in Randolph Township.

IV. TWO ACRES IS AN APPROPRIATE MINIMUM
AREA TO BE SUBJECT TO RESTRAINTS ON
DEVELOPMENT

Denville argues that two acres is too small a minimum size lot to be subject to restraints on development. It should be noted first that Denville's May 1985 compliance plan was based on the premise that there is no lower limit to the size of a tract on which inclusionary development is feasible. It is therefore

quite inconsistent for Denville to argue now that properties of more than 2 acres in an area should not be treated as available for lower income housing.

Additionally, the experience of plaintiffs is that it is feasible to construct inclusionary developments on sites of two acres or more with intermediate densities of 15 units per acre. Indeed, this Court approved inclusionary zoning of sites of 37,000 square feet and 54,000 square feet as part of the compliance plan of Morris Township. It is appropriate for the court to take judicial notice of its decision in that matter. Evid. R. 9.

Finally, the Council on Affordable Housing in its proposed regulation, N.J.A.C. 5:92-1.4, defines "vacant land" to mean, inter alia, "residential areas with lot sizes in excess of two acres where environmental factors permit higher densities." The two acre minimum proposed by plaintiffs is thus consistent with standards proposed by the Council on Affordable Housing.

V. AN INTERLOCUTORY RESTRAINT ON DEVELOPMENT OF LAND DOES NOT CONSTITUTE A TAKING

Denville suggests that a temporary restraint on the development pending final disposition of this matter by the Council on Affordable Housing would be a unconstitutional taking without just compensation. It is, however, now well established that a temporary moratorium may be imposed on development to enable governmental agencies to set a new regulatory system into operation and that such a temporary moratorium does not represent an unconstitutional taking without just compensation. See Deal Gardens, Inc. v. Loch Arbor Board of Trustees, 48 N.J. 492, 499

(1967); New York Shore Builders v. Township of Ocean, 128 N.J. Super. 135, 137 (App. Div.), certif. denied, 65 N.J. 292 (1974). This line of precedent has recently been reaffirmed in dictum by the New Jersey Supreme Court. Hills Development Corporation v. Township of Bernards, Docket No. A-122 to A-133 (Feb. 20, 1986), slip op. at 56.

CONCLUSION

For all the reasons set forth in this brief as well as plaintiffs' prior briefs, the Court should impose conditions upon transfer of the cases involving Denville Township and Randolph Township to the Council on Affordable Housing, as requested by plaintiffs.

Trenton, New Jersey 08618

Date: May 5, 1986

The agency proposal follows:

SUMMARY

The Fair Housing Act, N.J.S.A. 52:27D-301 et seq., enacted by the New Jersey Legislature in 1985, establishes a nine member Council on Affordable Housing. The Council is directed to prepare a comprehensive planning and implementation response to the constitutional obligation to provide, through municipal land use regulations, a realistic opportunity for a fair share of regional present and prospective needs for housing for low and moderate income households. The law specifies that the Council will estimate state and regional fair share and establish guidelines and criteria.

Officials at the municipal level shall determine fair share need and prepare a municipal housing element that incorporates that need. The Council is directed to review the local fair share need and housing element and is empowered to certify the housing element.

The proposed new rules implement the intent of the legislature to provide for timely achievement of an appropriate fair share of the regional need for low and moderate income housing.

The Council has assembled various background studies and data that are provided in a Technical Appendix to this rule. These studies and data are illustrative of the rule and are published as a matter of public information.

The Technical Appendix includes the following:

- A. Approach: 1987-1993 Low and Moderate Income Housing Need Estimates;
- B. Exhibit 1 - Base Data, Municipal Determination of Pre-Credited Need; Exhibit 2 - Base Data by Housing Region;
- C. Growth Area Allocation Index Totals;
- D. Section 8 Income Limits
- E. Average Cost of Replacing Major Systems for Housing Rehabilitation
- F. County Review Checklists

- (a) *Year Structure Built.* A distinction is made between units built before and after 1940. This pre-War cutoff is the classic differentiation point of new versus old housing in the literature.¹⁰
- (1) *Persons per Room.* 1.01 or more persons per room is an index of overcrowding.
 - (2) *Access to Unit.* A unit is unacceptable if one must pass through another dwelling to enter it. This is a measure of privacy.
 - (3) *Plumbing Facilities.* A household must have exclusive use of complete plumbing facilities.
 - (4) *Kitchen Facilities.* Adequate kitchen facilities include a sink with piped water, a stove, and a refrigerator.
 - (5) *Heating Facilities.* The existence of central heat is used as a measure of adequacy.
 - (6) *Elevator.* Buildings of four stories or more are considered inadequate if they do not have an elevator.

A unit has to have at least two characteristics to be isolated as deficient once it qualifies as housing a low- or moderate-income family. Since age is so highly correlated with structure deterioration and loss, if in 1980 the unit was more than forty years old and had at least one other negative housing characteristic, it is selected as deficient. If, on the other hand, it was a newer unit in 1980, in the absence of the unit-age qualification, two or more negative structural characteristics signal housing deficiency.

Multiple deficient characteristics in a single housing unit is an important concept. Using multiple indicators results in a high probability of isolating bad housing, yet a very low probability of classifying good housing as bad.¹¹

This procedure of establishing housing deficiency is: (1) drawn from the literature of the field; (2) encompasses a broad array of physical insufficiency including such items as indirect access, incomplete kitchen, burdensome walk-ups, etc., (3) ensures against erroneous inclusion of good units, and (4) provides a very high probability that the housing identified, at least in relative terms, is clearly less than adequate.

Due to confidentiality protection and data availability, the procedure to specify indigenous need can be estimated only to each of 52 subregions of the state.¹² It is taken down to the community level by three housing quality variables available at both the subregional level and the community level. These are:¹³

- (1) Plumbing Facilities — non-exclusive use of complete plumbing;
- (2) Heating Facilities — non-presence of central heat or vented room heaters; and
- (3) Persons per Room — space inadequacy, i.e., 1.01 or more persons per room.

The pool of low- and moderate-income families living in deficient housing once calculated at the subregional level is distributed to individual communities on the basis of the share of three indices of deficient housing at the local level to the total at the regional level. At the local level, these latter variables cannot be cross-tabulated with age or income in the same way as information at the subregional level can. Thus, the best available information and the most rigorous procedures are used to isolate deficient housing at the subregional level, and this is taken to the

municipal level through other housing quality variables less complete in terms of isolating housing deficiency but found at a variety of geographic levels.¹⁴

In order to address present need with some lead time appropriate for planning and implementation, present need is actually projected to be estimated as if July 1, 1987 were the current period and the sample of housing deficiencies was taking place at this time. This is done by reproducing the incidence rates of deterioration associated with certain age groups and household types in 1980, and projecting these households and their associated housing conditions to the 1987 period. The new array and number of households in 1987 carry with them the deterioration noted in 1980.

As noted earlier, for communities with severe housing deficiencies, their deficiencies are capped at the regional average percentage of deficiencies as a proportion of total occupied housing. The excess over this regional percentage is distributed to all communities in the growth area of the region.* This is covered below.

Municipal surveys to determine indigenous need may be presented to the Council as an alternative method to this procedure. (See Section 10 — Fair Housing Act.) The Council will provide guidance as to the appropriate form and scale of such surveys.

INDIGENOUS NEED BY REGION¹

Northeast	34,227
Northwest	22,894

South-Southwest	6,627
STATE TOTAL	85,134

¹See the following figure for mapped display of regions

Reallocated Present Need

Reallocated present need is the share of excess deterioration in a region transferred to all communities in the growth area of the region with the exception of selected Urban Aid Cities. (See Attachment.) Urban Aid Cities, almost all of which are densely populated and have a higher-than-average proportion of low-and-moderate income families living in deteriorated housing, are not expected to have this regional burden reinforced by future low- and moderate-income housing requirements.¹⁵ Therefore, when the reallocated present need pool for the region is computed from an average deficiency percentage for the entire region, Urban Aid

*Communities which originally contributed to the pool due to excess deficiency, if not selected Urban Aid Cities, can receive additional units from the pool via the reallocation formula.

INTRODUCTION

The information which follows details the procedures and data resources employed to calculate low- and moderate-income housing need in the State of New Jersey. These procedures have evolved primarily since *Mount Laurel II*¹ and have been heavily influenced both by the provisions of the Fair Housing Act and *Mount Laurel III*.² The report incorporates the methodology adopted by the Council on Affordable Housing³ — the agency charged with effecting the Fair Housing Act and bringing about statewide compliance with the *Mount Laurel* mandate.

The procedures specified here draw upon contributions by numerous groups to evolving fair housing implementation. These include efforts on the part of the *Mount Laurel II* judges, the Urban League group, Rutgers University, the appointed masters, the Department of the Public Advocate, the Governor's Office, New Jersey Department of Community Affairs, New Jersey Department of Environmental Protection (Division of Coastal Resources), New Jersey Pinelands Commission, New Jersey Housing and Mortgage Finance Agency, New Jersey Federation of Planning Officials, Land Use Section of the New Jersey Bar, New Jersey Builders Association, New Jersey State League of Municipalities, attorneys/planners for litigating developers/municipalities, and other individuals/groups too numerous to mention.

These groups have crafted a body of knowledge and procedure which has been drawn upon and refined in the production of this document. A clear effort has been made here to take into account varying points of view and above all, as the name of the Fair Housing Act implies, be fair: fair to those who need housing, to municipalities and their residents who must accommodate this housing, and finally, to the builders/developers who must provide it. The procedures contained here are an effort to move forward on a broad and unified front in meeting the charge of the Fair Housing Act.

To this end, the report begins with methods used to qualify the low- and moderate-income populations and subsequently deals with the calculation, distribution, and refinement of present and prospective low- and moderate-income housing need.

INCOME QUALIFICATION OF THE LOW- AND MODERATE-INCOME POPULATION

Data from the 1980 New Jersey Public Use Sample⁴ (a five percent sample of all households in New Jersey taken by the U.S. Census Bureau) is used to qualify a household according to HUD Section 8⁵ family-income requirements. The Sample is comprised of computer tapes which contain records for a sample of housing units with information on the characteristics of each unit as well as the people who reside in these units. Information from this file makes it possible to initially eliminate all individuals living in institutions, group quarters, or as boarders/lodgers from potential low- and moderate-income housing demand. This removes from direct count those people who comprise prison/sanitarium, college, nursing home, boarders/boarding home, and other related populations.⁶

Sub-households and sub-families are not separately distinguished as this would double count existing housing deterioration and no information is available on how or if sub-families/sub-households would choose to separate in the future. Thus, one household per unit is counted. Current applications for low- and moderate-income housing built under the

Mount Laurel II *as-is* indicate shares or parts of families and unrelated individuals seeking to reside together. This partially confirms continued, shared or unrelated household use of new low- and moderate-income housing units.

Once these selection procedures are undertaken, the Public Use Sample may be employed to array all households by size and income status. HUD median family income for a region is determined, and 80 percent and 50 percent assigned to household sizes of four for the upper limits of moderate and low incomes, respectively. Each household size of more or less than four is allowed a positive or negative adjustment of the 80 percent or 50 percent of median figure to qualify for moderate- or low-income designation.⁷ (This is based on the philosophy that if you have more children/dependents or household members you can earn slightly more and qualify for moderate/low income; in reverse fashion, if you have fewer dependents or members, it is more difficult to qualify by establishing a lower income for qualification.)

The procedure spelled out above separates low- and moderate-income households, adjusting for household size, from all other households in the region. This relative selection of a population qualifying for housing need forms the basis of all need estimates. In subsequent steps, the housing units occupied by these households are initially checked for deterioration to determine present need. The number of income-defined households is then projected into the future to determine prospective need. The detailing of these steps is explained below.

PRESENT NEED

Indigenous Need

Indigenous need is a component of present need which is the total deficient housing signaled by surrogates unique to each community. Where communities' deficient housing as a percentage of all occupied housing units exceeds the regional average, their excess need is sent to a housing pool for subsequent distribution in the region. Housing from the pool is reallocated to all communities in the growth area of the region with the exception of designated Urban Aid Cities. The indigenous need for communities below the regional average of housing deficiency is their tabulated deficient units. For those above the regional average, their indigenous need is their deficient housing capped by the regional average percent deterioration.

Recognizing the evolution of the concept of deteriorated housing from 1960 and earlier where enumerators attempted to physically identify bad housing from field survey, to the current period where deficient housing is isolated through housing quality surrogates, information provided by the 1980 Census is used to signal housing deficiency via surrogates.⁸

Surrogates do not themselves confirm that a unit is deficient. They indicate that if a unit has these characteristics, it most likely would be independently found via field survey as deficient. Surrogates are developed by listing the characteristics of units found as deficient and viewing which characteristics consistently are associated with field-confirmed deficiency. Six housing quality surrogates are used with structure age to signal housing deficiency. These indices represent the culmination of numerous empirical studies on factors indicative of superior versus inferior housing quality.⁹ They represent the full range of information available on housing quality from the 1980 Census. No index is slighted, and all are simultaneously employed. They include:

* The Council on Affordable Housing is prepared to adjust municipal housing need such that precredited final need will not exceed twenty percent of a municipality's occupied housing units in 1987. This adjustment is to prevent a municipality from experiencing a drastically altered development pattern as per Section 7 of the Fair Housing Act. The adjustment, if pursued by all municipalities who qualify, will not diminish statewide need by more than 1421 housing units. See subsequent section on Capped Need.

APPENDIX A

Approach: 1987-1993 Low and Moderate Income Housing Need Estimates

5:92 - 12.10 Excess proceeds upon foreclosure

In the event of a foreclosure sale, the owner of the affordable housing unit shall be personally obligated to pay to the municipal entity responsible for assuring affordability, any surplus funds, but only to the extent that such surplus funds exceed the difference between the maximum price permitted at the time of foreclosure and the amount necessary to redeem the debt to the financial institution including costs of foreclosure.

5:92 - 12.5 Annual indexed increases

The price of an owner-occupied housing unit and the rents of affordable housing units may increase annually based on the percentage increase in median income for each housing region as determined from the uncapped Section 8 income limits, published by HUD, as defined in Subchapter 1 (see Technical Appendix, infra.) or other recognized standard adopted by the Council that applies to the rental housing unit.

5:92 - 12.6 Subsidy to ensure affordability

If the use of median income data adopted by the Council to index the cost of housing renders a unit unaffordable to a low or moderate income household at the time of resale, a municipality shall not lose credit for the housing unit, provided that adequate controls on affordability remain in place, but the municipality may subsidize the housing unit to maintain affordability.

5:92 - 12.7 Procedures of resale

Persons wishing to sell affordable units shall notify the municipal entity responsible for assuring affordability of the intent to sell. If no eligible buyer enters a contract of sale for the unit within 60 days of notification, the municipal entity shall have the option to purchase the unit for the maximum price permitted based on the regional increase in median income as defined by HUD or other recognized standard adopted by the Council. If the municipal entity does not purchase the unit, the seller may apply for permission to offer

the unit to a non-income eligible household at the maximum price permitted. The seller shall document efforts to sell the unit to an income eligible household as part of this application. If the request is granted, the seller may offer low income housing units to moderate income households and moderate income housing units to households earning in excess of 80 percent of median. In no case shall the seller be permitted to receive more than the maximum price permitted.

5:92 - 12.8 Eligible capital improvements

Property owners of single family, owner-occupied housing may apply to the municipal entity responsible for permission to increase the maximum price for eligible capital improvements. Eligible capital improvements shall be those that render the unit suitable for a larger household. In no event shall the maximum price of an improved housing unit exceed the limits of affordability for the larger household. Property owners shall apply to the municipal entity if an increase in the maximum sales price is sought.

5:92 - 12.9 Impact of foreclosure on resale

An action of foreclosure by a financial institution regulated by state and/or federal law shall extinguish controls on affordable housing units. Notice of foreclosure shall allow the municipal entity to purchase the affordable housing unit at the maximum permitted sale price. Failure of the municipal entity to purchase the affordable housing unit shall result in the Council adding that unit to the municipal present and prospective fair share obligation.

1. Rehabilitated owner-occupied single family housing units that are improved to code standard shall be subject to affordability controls for at least six years;

2. Rehabilitated renter-occupied housing units that are improved to code standard shall be subject to affordability controls for at least ten years; and

3. Housing units created through conversion of a non-residential structure or through new construction in municipalities receiving State Aid pursuant to P.L. 1978, L.14 (N.J.S.A. 52:270-178 et. seq.) at the time of substantive certification shall be subject to affordability controls for at least ten years.

5:92 - 12.3 Administrative mechanism

Municipalities shall establish an appropriate administrative mechanism or entity responsible for assuring that low and moderate income housing units remain affordable to low and moderate income households; or they shall enter into a contractual agreement with the Agency to administer these responsibilities.

5:92 - 12.4 Initial pricing

(a) Municipalities shall consider requiring that the initial price of a low and moderate income owner-occupied single family housing unit be established

so that after a downpayment of ten percent, the monthly principal, interest, taxes, insurance and condominium fees do not exceed 28 percent of an eligible gross monthly income. Municipalities shall consider requiring that rents, excluding utilities, be set so as not to exceed 30 percent of the gross monthly income of the appropriate household size. Maximum rent shall be calculated as a percentage of the uncapped Section 8 income limit (as contained in the Technical Appendix, infra.) or other recognized standard adopted by the Council that applies to the rental housing unit. The following criteria shall be considered in determining rents and sale prices:

1. Efficiency units shall be affordable to one person households;
2. One bedroom units shall be affordable to two person households;
3. Two bedroom units shall be affordable to three person households;
4. Three bedroom units shall be affordable to five person households; and
5. Four bedroom units shall be affordable to seven person households.

(b) Housing units that satisfy the criteria in (a) 1. through 5. above shall be considered affordable.

(c) Median income by household size shall be established by the uncapped Section 8 income limits, published by HUD, as defined in Subchapter 1 (see Technical Appendix, infra.) or other recognized standard adopted by the Council that applies to the rental housing unit.

represents the current average, internal subsidization required to provide a moderate income housing unit in an inclusionary development, and constitutes 22 percent of the unit's total cost. The Council establishes \$27,500 as the current average, internal subsidization required to provide a low income housing unit in an inclusionary development, and constitutes 48 percent of the unit's total cost. These internal subsidization guidelines shall be regarded as illustrative and may be adjusted on a case by case basis.

- (d) RCAs shall run concurrent with the sending municipality's period of substantive certification, not to exceed six years; contributions may be prorated in municipal appropriations concurrent with the certification period not to exceed six years.

5:92 - 11.6 Enforcement

- (a) The Council shall take such actions as may be necessary to enforce a RCA with respect to the timely implementation of a project by the receiving municipality. In implementing its enforcement responsibilities, the Council may:

1. Initiate or join a lawsuit to enforce a RCA; and/or
2. Bar a delinquent receiving municipality from entering into further RCAs for a specified period of time; and/or

3. Recommend that the Agency and the Department of Community Affairs withhold further assistance available under the Act; and/or

4. Take such other actions as the Council may determine necessary.

SUBCHAPTER 12. CONTROLS ON AFFORDABILITY

5:92 - 12.1 General provisions

In developing housing elements, municipalities shall determine measures to assure that low and moderate income units remain affordable to low and moderate income households for an appropriate period of not less than 20 years which may be adjusted as provided pursuant to N.J.A.C. 5:92-12.2. In determining these measures, municipalities may propose alternative methods for assuring continued affordability which shall be reviewed by the Agency for feasibility prior to an award of substantive certification.

5:92 - 12.2 Length of controls on affordability

- (a) Municipalities shall consider imposing controls on rents and resales of low and moderate income units, as set forth in this Subchapter, that extend for a period of 20 years with the following exceptions:

5:92 - 11.4 Review by county planning board or other county
designated agency

- (a) RCAs shall be reviewed by the county planning board or other county designated agency in which the receiving municipality is located, as set forth in N.J.A.C. 5:91-12.2. Such review shall be completed within 30 days after the agreement has been referred to the county planning board or other county designated agency. The Council may grant a timely request for an extension of this time period for a period not to exceed 15 days.
- (b) In conducting the review required under this section and N.J.A.C. 5:91-12.2, the county planning board or other county designated agency shall consider the master plan and zoning ordinance of the sending and receiving municipalities, its own county master plan and the SDRP. In the event that the SDRP is not completed, the county planning board or other county designated agency shall consider the SDGP and other appropriate regional plans in conducting its review.
- (c) County planning boards or other county designated agency undertaking the review provided in this section shall, in forwarding the results of such review to the Council, include a completed checklist for this purpose provided by the Council. (see: Technical Appendix, infra).

5:92 - 11.5 Amount and duration of contributions

- (a) In negotiating RCAs, cosmetic improvements may be included in determining the negotiated price of rehabilitating a housing unit; but cosmetic improvements alone shall not constitute an eligible improvement for purposes of a RCA. In general, eligible rehabilitation may vary in degree from gutting and extensive reconstruction to repairs for damage caused by inadequate maintenance. Rehabilitation may also include the repair or replacement of major building systems or components in danger of failure (including roof, electrical, plumbing, heating, structural and foundation defects). To be an eligible improvement under a RCA, the housing unit must meet the municipal or other relevant housing code after rehabilitation.
- (b) The cost of rehabilitating a low and moderate income housing unit may vary from unit to unit and from municipality to municipality. The Council establishes \$10,000 as the minimum per unit cost necessary for rehabilitation as may be adjusted by the Council on a case by case basis. (see Technical Appendix, infra, for average costs of replacing major systems for various types of housing). This minimum amount includes the actual capital cost of substantive rehabilitation and the necessary operating costs to insure compliance with related code standards. This minimum amount shall be regarded as illustrative.
- (c) The internal cost of subsidizing a low and a moderate income housing unit in an inclusionary development may vary from project to project and from municipality to municipality. The Council establishes that \$12,500

SUBCHAPTER 11. REGIONAL CONTRIBUTION AGREEMENTS (RCAs)

5:92 - 11.1 General provisions

- (a) A municipality may propose the transfer of up to 50 percent of its fair share to another municipality within its housing region by means of a contractual agreement into which two municipalities voluntarily enter.
- (b) The Council shall maintain current lists of municipalities which have stated an intent to enter into RCAs as receiving municipalities and shall provide copies of such lists to potential sending municipalities as requested.

5:92 - 11.2 Terms

- (a) At least 50 percent of the units accepted by a receiving municipality shall be affordable to low income households. The Council may modify this requirement if it determines that the sending municipality has adequately provided for its low income housing obligation elsewhere in its housing element.
- (b) Housing provided pursuant to a RCA may include new construction, rehabilitation, residential conversion of existing units, conversion of other uses for housing, or a combination of these methods. To qualify as an appropriate component of a RCA, a rehabilitated or converted unit must meet the code standard of a municipality or other applicable housing code.

(c) Housing provided pursuant to a RCA may include the creation of alternative living arrangements, including, but not limited to, congregate housing, Class C and D boarding homes regulated by the Department of Community Affairs and residential health care facilities regulated by the Department of Health. To qualify as an appropriate component of a RCA, such facilities must be subject to controls on affordability acceptable to the Council.

(d) All RCAs shall specify payment schedules which conform to a construction or rehabilitation schedule and which relate to the receiving municipality's ability to deliver housing units in a timely fashion.

(e) All RCAs shall require receiving municipalities to file annual reports with the Agency setting forth the progress in implementing the project to be produced under a RCA. This report shall be in such form as the Council and the Agency may from time to time require.

(f) All RCAs shall require that a receiving municipality submit a proposed project plan which shall be in such form and contain such information as the Agency may require.

5:92 - 11.3 Credits

No receiving municipality shall receive credit towards its fair share obligation for units provided pursuant to a RCA where credit for such units has been awarded to a sending municipality.

3. The next 500 units, 1,500 up to 1,999 units, may be phased in from the eleventh through fifteenth year;
4. An amount in excess of 2,000 units may be phased in over a period of 16 to at least 20 years.

(b) At least one-half and no less than 200 units of the municipal obligation shall be phased in during the first three years.

(c) Within the phasing schedule, market conditions shall prevail.

5:92 - 10.3 Commencement date of phasing schedule

The commencement date of the phasing schedule shall be January 1, 1987.

5:92 - 10.4 General provisions

(a) The phase-in schedule shall provide for the grant of preliminary approvals to a developer subject to the phase-in schedule for final approvals in accordance with time periods set forth in sections 34, 36 and 48 of P.L. 1975, c.291 (N.J.S.A. 40:55D-46, 48 and 61), provided that such preliminary approvals shall confer vested rights as defined in subsection a. of section 37 of P.L. 1975, c.291 (N.J.S.A. 40:55D-49) for the period until the developer has the ability to proceed to final approval pursuant to the phase-in schedule. In any phase-in schedule for a development, all final approvals and the rights to final approvals shall be cumulative.

(b) Phasing of present and prospective need shall not extend the period of substantive certification. Municipalities shall be responsible for an additional present and prospective need in addition to the phased need when the period of substantive certification expires.

(c) Developers of inclusionary developments shall be entitled to final approval of at least four market housing units per each low and moderate income housing unit.

5:92 - 10.5 Priority of sites

In developing a phasing plan, municipalities shall give priority to those vacant sites that are available, suitable, developable and approvable as defined in Subchapter 1. The phasing plan shall be consistent with a municipal plan for infrastructure expansion and rehabilitation.

5:92 - 10.6 Adjustments to phasing schedule

The Council may adjust phasing schedules by 20 percent for the first three years of the phasing period. An adjustment for the first half of the phasing period shall result in a proportionate adjustment during the second half of the phasing period. Such adjustments shall be based on the factors presented in section 23 of the Act or the effect of economic conditions on specific developments.

Department of Environmental Protection or its designated agent approves a proposal to provide affordable infrastructure to a site other than those designated for the development of low and moderate income housing in the housing element, the municipality shall amend its housing element and fair share housing ordinance to permit development of such site for low and moderate income housing. The amended housing element and fair share housing ordinance shall be submitted to the Council within 90 days of the site's approval by the New Jersey Department of Environmental Protection or its agent.

SUBCHAPTER 9. PRIORITIZING

5:92 - 9.1 Prioritizing vacant and developable sites

- (a) Municipalities shall establish priorities for low and moderate income sites. Sites should be available, suitable, developable and approvable as defined in N.J.A.C. 5:92-1.3.
- (b) All sites designated for low and moderate income housing shall receive approval for consistency review, as set forth in Section 208 of the Clean Water Act, 33 U.S.C. §1251, et. seq. prior to substantive certification. Where a site is denied consistency review, the municipality shall apply for an amendment to its Section 208 plan to incorporate the denied site.
- (c) Agricultural lands within agricultural development districts as certified by the State Agricultural Development Board that do not conform to the

policies set forth in N.J.A.C. 5:92-8.2 (b) 2. may be excluded initially in establishing priorities for low and moderate income sites. Where no other sites are either appropriate and/or sufficient to accommodate fully the municipality's low and moderate income housing obligation, the municipality or the Council may request the respective county agricultural development board to establish priorities for the development of unrestricted land within the county's agricultural development district.

SUBCHAPTER 10. PHASING OF PRESENT AND PROSPECTIVE NEED

5:92 - 10.1 Phasing plans

Municipalities shall be allowed to submit a phase-in plan for low and moderate income units within inclusionary developments as defined in the Act. Phasing plans shall indicate a proposed sequence for site-specific inclusionary developments.

5:92 - 10.2 Phasing schedules

- (a) Municipalities may phase-in inclusionary developments pursuant to the following schedule:
1. Inclusionary developments of less than 999 units may be phased in over a period of six years;
 2. The next 500 units, 1,000 units up to 1,499 units, may be phased in seventh through tenth year;

for the development of low and moderate income housing in the housing element, the municipality shall amend its housing element and fair share housing ordinance to permit development of such site for low and moderate income housing. The amended housing element and fair share housing ordinance shall be submitted to the Council within 90 days of the site's approval by the New Jersey Department of Environmental Protection or its agent.

5:92 - 8.6 Prohibitive costs of infrastructure

- (a) The Council shall make an adjustment to the municipal present and prospective need due to prohibitive costs associated with providing public facilities and infrastructure. This adjustment shall remain totally or partially in effect until adequate, affordable infrastructure facilities are provided.
- (b) Notwithstanding the prohibitive cost of adequate public facilities and infrastructure, the municipality shall nonetheless designate and zone appropriate sites to accommodate its fair share obligation. The lack of adequate capacity, in and of itself, shall constitute a durational adjustment of the municipal obligation and that obligation shall be deferred until adequate infrastructure is made available as set forth in (c) through (h) below.
- (c) Notwithstanding the prohibitive cost of adequate public facilities and infrastructure at the time a municipality petitions for substantive certification, the municipality shall reserve and set aside new

infrastructure capacity, when it becomes available for low and moderate income housing on a priority basis.

- (d) Municipalities seeking an adjustment of their fair share due to prohibitive costs of infrastructure to the public shall complete "The Costs of Providing Infrastructure" application provided by the Council and submit it to the Council for its review.
- (e) The Council shall forward "The Costs of Providing Infrastructure" application to the New Jersey Department of Community Affairs Division of Local Government Services for review. The Council shall consider the report of the Division of Local Government Services in determining whether to permit an adjustment due to prohibitive costs associated with providing public facilities and infrastructure.
- (f) Municipal officials shall endorse all applications to the New Jersey Department of Environmental Protection or its agent to provide affordable infrastructure. Such endorsements shall be simultaneously submitted to the Council.
- (g) Where the New Jersey Department of Environmental Protection or its designated agent approves a proposal to provide affordable infrastructure to a site for the development of low and moderate income housing in the housing element, the municipality shall permit such development.
- (h) Where a municipality has designated sites for low and moderate income housing that lack adequate infrastructure and where the New Jersey

historic and architecturally important sites, agricultural lands, environmentally sensitive lands and recreation, conservation and open space shall be considered vacant and developable sites.

- (b) The Council may, within its discretion and upon its own initiative, eliminate additional sites from consideration when the Council determines that such action is consistent with the public's general welfare.
- (c) The Council shall determine the municipality's ability to absorb its fair share obligation through inclusionary developments. The Council shall presumptively require a 20 percent maximum set-aside and a minimum gross density of six units per acre on vacant and developable sites. The Council may modify this minimum gross density based on factors, including but not limited to, appraised land values, improvement costs, site conditions and municipal subsidy of project costs. The Council may also modify this density when required to satisfy the municipal present and prospective need or when the municipality and developer agree to a modification on a specific site or when the Council's minimum gross density policy conflicts with the land use policies adopted within the Pinelands, Coastal Zone or Hackensack Meadowlands.

5:92 - 8.5 Adequate public facilities and infrastructure capacities

- (a) The Council shall make durational adjustments to defer a municipality's fair share obligation due to the lack of adequate public facilities and infrastructure capacity. This adjustment shall remain totally or partially in effect until adequate infrastructure facilities are provided.

- (b) Notwithstanding the lack of adequate public facilities and infrastructure, the municipality shall nonetheless designate and zone appropriate sites to accommodate its fair share obligation. The lack of adequate capacity, in and of itself, shall constitute a durational adjustment of the municipal obligation and that obligation shall be deferred until adequate infrastructure is made available as set forth in (c) through (f) below.

- (c) Notwithstanding the lack of adequate public facilities and infrastructure in extant at the time a municipality petitions for substantive certification, the municipality shall reserve and set aside new infrastructure capacity, when it becomes available, for low and moderate income housing, on a priority basis.

- (d) Municipal officials shall endorse all applications to the New Jersey Department of Environmental Protection or its agent to provide affordable infrastructure. Such endorsements shall be simultaneously submitted to the Council.

- (e) Where the New Jersey Department of Environmental Protection or its designated agent approves a proposal to provide infrastructure to a site for the development of low and moderate income housing identified in the housing element, the municipality shall permit such development

- (f) Where a municipality has designated sites for low and moderate income housing that lack adequate infrastructure and where the New Jersey Department of Environmental Protection or its designated agent approves a proposal to provide infrastructure to a site other than those designated

iii. Where the legislature adopts legislation that requires the mapping of other natural resources and provides a mechanism for their regulation, the Council shall include such resources in its criteria and guidelines for municipal adjustment.

5:92 - 8.3 Adequate recreation, conservation and open space

(a) Municipalities may reserve three percent of their total developed and developable acreage for active municipal recreation and exclude this acreage from consideration as potential sites for low and moderate income housing. In determining developable acreage, municipalities shall calculate their total vacant and undeveloped lands and deduct from that total number the lands excluded by the Council's policy regarding historic and architecturally important sites, agricultural lands and environmentally sensitive lands. Municipalities shall also exclude from this calculation of total vacant and undevelopable lands, those owned by nonprofit organizations, counties to the state or federal government and when such lands are precluded from development at the time of substantive certification. Municipalities shall submit appropriate documentation demonstrating that such lands are precluded from development. Existing active municipal recreation areas shall be subtracted from the three percent calculation of total developed and developable acreage to determine additional land that may be reserved for active municipal recreation.

(b) Municipalities may exclude further recreation, conservation and open space areas, beyond those calculated in (a) above, when such lands have been designated in an adopted county master plan and:

1. The county has adopted appropriate language in its ordinances to secure specific areas for recreation, conservation or open space as part of the subdivision and site plan review process; or
2. The county has included specific areas for acquisition in a capital improvement program; or
3. The county has applied to the New Jersey Department of Environmental Protection Green Acres Program or other appropriate programs to acquire or otherwise permanently set aside specified areas.

(c) Municipalities shall submit a transparent overlay drawn to the same scale as the existing land use map depicting eligible county and municipal recreation, conservation and open space sites to be eliminated from consideration for low and moderate income housing.

5:92 - 8.4 Vacant and developable sites

(a) Vacant sites not specifically excluded from consideration for low and moderate income housing as a result of the Council's policies regarding

(b) The Council shall determine the amount and location of vacant and undeveloped land within a municipality. Specific parcels of vacant and developable lands shall be excluded as potential sites for low and moderate income housing based on the following criteria:

1. Historic and architecturally important sites shall be excluded if listed on the State Register of Historic Places prior to substantive certification. All land within a 100-foot buffer area of an eligible historic site as described herein shall similarly be excluded.

2. Agricultural lands shall be excluded when the development rights to these lands have been purchased or restricted by covenant or when such lands are subject to restrictions as set forth in the "Right to Farm Act," P.L. 1983 c.31 (N.J.S.A. 4:1 C-1 et. seq.) and the "Agriculture Retention and Development Act," N.J.S.A. 32 (N.J.A.C.4:1C-11 et. seq.).

3. Environmentally sensitive lands shall be excluded as follows:

i. Within the areas of the State regulated by the Pinelands Commission, Division of Coastal Resources and the Hackensack Meadowlands Development Commission, the Council shall adhere to the policies delineated in The Pinelands Comprehensive Management Plan, N.J.A.C. 7:50; the Coastal Permit Program Rules, N.J.A.C.:7-1; Coastal Resource and Development Rules, N.J.A.C. 7E-1; and the Zoning Regulations of the Hackensack Meadowlands District N.J.A.C. 19:4.

ii. In areas of the State not regulated by the Pinelands Commission, the Division of Coastal Resources and the Hackensack Meadowlands Development Commission, the Council shall exclude as potential sites for low and moderate income housing: inland wetlands as delineated by the U.S. Army Corps of Engineers or New Jersey Department of Environmental Protection, whichever agency has jurisdiction; flood hazard areas as defined in N.J.A.C. 7:13; and sites with slopes in excess of 15 percent as determined from the U.S.G.S. Topographic Quadrangles which render a site unsuitable for low and moderate income housing.

implemented adequate assurances for continued affordability consistent with Subchapter 12, Controls on Affordability.

SUBCHAPTER 7. DRASTIC ALTERATION OF THE ESTABLISHED
PATTERN OF DEVELOPMENT

5:92 - 7.1 Drastic alteration

After receiving the crediting provided in Subchapter 6, Credits, where a municipality's present and prospective fair share exceeds 20 percent of its total occupied housing stock as estimated as of July 1, 1987, the municipality may adjust its fair share to 20 percent of its estimated 1987 occupied housing stock.

SUBCHAPTER 8. MUNICIPAL ADJUSTMENTS

5:92 - 8.1 General

This subchapter provides the criteria by which a municipal fair share may be adjusted. Adjustments shall be made to eliminate specific parcels of vacant land from consideration as sites for low and moderate income housing. Adjustments shall yield vacant, suitable, developable, available and approvable land within each municipality requesting and demonstrating that such adjustments to its fair share are in keeping with these criteria. Adjustments shall be made to municipal fair share when the Council determines that such adjustments are required due to available land capacity, public facilities or infrastructure. All municipalities requesting adjustments of present and prospective need shall submit an existing land use map at an appropriate scale to display the land uses of each parcel within the municipality. Such map shall display the following land uses: single family, two-to four-family, other multifamily, commercial, industrial, agricultural, parkland, other public uses, semipublic uses and vacant land. Municipalities seeking an adjustment based on historic sites, agricultural lands or environmentally sensitive areas shall submit transparent overlays drawn to the same scale as the existing land use map depicting eligible sites as delineated herein.

5:92 - 8.2 Adjustment process

- (a) The Council shall only adjust reallocated present and prospective need which the municipality proposes to address through inclusionary developments.

housing stock when such survey is deemed adequate and accepted by the Council for identifying deficient housing units occupied by low or moderate income households.

2. Modify the number calculated in 1. above as instructed in N.J.A.C. 5:92- 5.8, 5.9, 5.10, and 5.11 (demolitions, filtering, residential conversions and spontaneous rehabilitation).
3. Perform the calculation required in N.J.A.C. 5:92-5.2(a)4.
4. Municipal indigenous need shall be the smaller number resulting from the calculations in 2. and 3. above.
5. If the calculation in 2. above is larger than 3. above the difference between the two shall be distributed throughout the housing region as reallocated present need (see Technical Appendix, infra.).
6. This calculation of indigenous need for selected urban aid cities performed in 4. above is also the pre-credited need for these cities. No additional calculations need be made by these cities.

5:92 - 5.14 Low and moderate income split

Municipal pre-credited final need obligation shall be divided equally between low and moderate income households. Example:

Johnsonville's total obligation includes 299 low income units and 300 moderate income units.

SUBCHAPTER 6. CREDITS

5:92 - 6.1 Credits

- (a). Municipal present and prospective fair share shall be determined after crediting, on a one to one basis, those housing units created or rehabilitated after April 1, 1980. Credits are applicable when a unit's occupancy is restricted to low or moderate income households and when the municipality has implemented adequate assurances for continued affordability consistent with Subchapter 12, Controls on Affordability.
- (b) Low and moderate income housing units created within a municipality in excess of the municipal 1987-1993 present and prospective fair share, as calculated in Subchapter 5 shall be credited on a one to one basis against its future fair share. This credit shall take place upon request during the substantive certification process, provided that such units have been restricted to low or moderate income households and the municipality has

2. Multiply this number by the estimated municipal population as of 1984 as published in 1984 Population Estimates for New Jersey (published by the New Jersey Department of Labor, September 1985). This yields municipal 1983/1984 aggregate per capita income. Example: Johnsonville's estimated population was 21,453. Calculation:

$$\$12,975 \times 21,453 = \$278,352,675$$

3. Divide 1983/1984 municipal aggregate per capita income by the 1983/1984 aggregate per capita income for the housing region in which the municipality is located (see Column I) to obtain the municipal share of aggregate per capita income.

Example:

<u>Johnsonville's 1983/1984 Aggregate Per Capita Income</u>	÷	<u>Region 5 1984 Aggregate Per Capita Income (Column I)</u>	=	<u>Johnsonville's Share of Aggregate Per Capita Income</u>
\$278,352,675	÷	\$14,201,442,966	=	.01960

4. Multiply the share of regional aggregate per capita income by the spontaneous rehabilitation projections for the housing region in which the municipality is located (see Column H in (a) above) to yield the reduction to municipal total need due to spontaneous rehabilitation. Example:

Johnsonville's Share of
1983/1984 Aggregate
Per Capita Income

.01960

1987-1993
Region 5 Spontaneous
Rehabilitation Estimate

542

= 11

5:92 - 5.12 Pre-credited need

Municipal pre-credited need is the sum of total need and demolitions minus reductions for filtering, conversion and spontaneous rehabilitation (see Technical Appendix, infra). Example:

Total Need + Demolitions - (Filtering + Residential Conversion + Spontaneous Rehabilitation)

$$660 + 31 - (70 + 11 + 11) = 599$$

5:92 - 5.13 Calculation of indigenous need: selected urban aid cities

(a) Selected municipalities receiving state aid (urban aid cities) pursuant to P.L. 1978, C.14 (N.J.S.A. 52:27D-178 et. seq.) that are exempt from the distribution of reallocated present need and prospective need as described in N.J.A.C. 5:92-5.3 (see Appendix A to Technical Appendix, infra) shall determine their indigenous need as indicated below:

1. Follow the procedures delineated in N.J.A.C. 5:92-5.2(a) 1 through 3. These calculations yield the count of actual low and moderate income deficient units in the selected urban aid city. This estimate of low and moderate income deficient units may also be determined through a survey of the municipality's

3. Multiply this percentage by the conversion projection in Column F for the region in which the municipality is located to yield the reduction to municipal total need due to conversion. Example:

<u>Johnsonville's Share of 2-4 Family Housing Units</u>									
.00721	X	1,478	=	11					

5.92 - 5.11 Spontaneous rehabilitation

(a) Spontaneous rehabilitation measures the private market's ability to rehabilitate deficient low and moderate income housing units up to code standard; and shall cause a reduction to municipal total need (see Technical Appendix, infra.). Spontaneous rehabilitation is highly correlated with aggregate per capita income. The following Column H displays spontaneous rehabilitation projections by housing region. The following Column I displays total 1983/1984 per capita regional aggregate income for each housing region. Per capita regional aggregate income for 1983/1984 is obtained by multiplying 1983 regional per capita income estimates by 1984 estimated population in the housing region. (see Technical Appendix, infra.)

COLUMN H	COLUMN I
1987-1993	1983/1984
Spontaneous	Aggregate
Rehabilitation	Per Capita
<u>Estimates</u>	<u>Income (\$)</u>

	<u>Region</u>		
1.	Northeast	1,884	21,112,820,558
2.	Northwest	1,194	22,029,857,240
3.	West Central	384	12,235,480,836
4.	East Central	243	9,830,614,791
5.	Southwest	542	14,201,442,966
6.	South-Southwest	<u>431</u>	<u>4,592,475,839</u>
	New Jersey	4,678	84,002,692,230

(b) To determine the impact of spontaneous rehabilitation on municipal total need:

1. Determine the municipal estimate of per capita income in 1983 from the 1986 New Jersey Legislative District Data Book (published by the Rutgers University Bureau of Government Research, April 1986). Example: Johnsonville's 1983 per capita income was \$12,975.

5:92 - 5.10 Residential conversion

(a) Residential conversion is the creation of dwelling units from already existing residential structures. Residential conversion is a significant source of housing supply to low and moderate income households and it shall cause a reduction to municipal total need (see Technical Appendix, infra). Residential conversion is highly correlated with the presence of two-to four-family housing units. The following Column F displays projections of conversions for each housing region. The following Column G displays the total of two-to four-family housing units in each housing region in 1980.

<u>Region</u>	COLUMN F	COLUMN G
	1987-1993 Conversion <u>Estimates</u>	1980 2-4 Family <u>Unit Totals</u>
1. Northeast	5,138	224,294
2. Northwest	3,257	165,631
3. West Central	1,048	50,697
4. East Central	662	29,269
5. Southwest	1,478	42,692
6. South-Southwest	<u>1,174</u>	<u>27,873</u>
New Jersey	12,757	540,456

(b) To determine the impact of conversions on municipal total need:

1. Determine the municipal number of year-round two-to four-family housing units in 1980 as reported in the U.S. Census of Housing (Detailed Housing Characteristics Part 32-New Jersey). Example: Johnsonville had 308 two-to four-family units.
2. Divide this number by the year-round total two-to four-family housing units for the region in which the municipality is located to obtain the municipal share of two-to four-family housing units in the housing region.

Example:

<u>Johnsonville's Total 2-4 Family Housing Units</u>		<u>Total 2-4 Family Housing Units (Region 5)</u>		<u>Johnsonville's Share of 2-4 Family Housing Units</u>
308	÷	42,692	=	.00721

(a) Filtering causes a reduction in total need based on the recognition that the housing needs of low and moderate income households are partially met by sound housing units formerly occupied by higher income sectors of the housing market (see Technical Appendix, *infra.*). Filtering is highly correlated with the presence of multi-family housing units. The following Column D displays regional filtering projections. The following Column E displays the total number of multifamily housing units in each region in 1980.

Region	COLUMN D	COLUMN E
	1987-1993 <u>Filtering Projection</u>	1980 <u>Multifamily Unit Totals</u>
1. Northeast	12,202	410,972
2. Northwest	12,678	334,839
3. West Central	7,222	104,428
4. East Central	6,706	73,799
5. Southwest	9,587	121,352
6. South-Southwest	<u>3,494</u>	<u>57,287</u>
New Jersey	51,889	1,102,677

(b) To determine the impact of filtering on municipal total need:

1. Determine the municipal number of year-round multifamily units in 1980 as reported in the U.S. Census of Housing (Detailed Housing Characteristics Part 32 - New Jersey).
Example:

Johnsonville had 892 multifamily units.

2. Divide this number by the total of year-round multifamily units for the region (Column E) in which the municipality is located. This yields the municipality's share of multifamily housing units in the housing region. Example:

Johnsonville's Multifamily Units, 1980	÷	Total Multifamily Units in 1980 (Region 5)	=	Johnsonville's Share of Multifamily Units
892	÷	121,352	=	.00735

3. Multiply this percentage by the filtering estimates in Column D for the region in which the municipality is located to yield the reduction to municipal total need due to filtering. Example:

Johnsonville's Share of Region 5 Multifamily Units	X	Filtering Projection Region 5	=	70
.00735	X	9,587	=	70

5:92-5.5) and prospective need (as calculated in N.J.A.C. 5:92-5.6.).

Example:

$$\text{Johnsonville's total need} = \text{present need (150)} + \text{prospective need (510)} = 660$$

5:92 - 5.8 Demolitions

(a) Demolition is a factor that eliminates housing opportunities for low and moderate income households. Therefore, a number representing demolitions affecting low and moderate income households shall be added to total need (see Technical Appendix, infra.). To determine this number:

1. Average 1983 and 1984 municipal demolitions as reported in New Jersey Residential Building Permits (1984 Summary). Example:

Johnsonville averaged 15 demolitions.

2. Multiply the average by six to project 1987-1993 demolitions.

Example:

<u>Johnsonville Average Demolitions</u>	X	<u>Number of Years Projected</u>	=	
15	X	6	=	90

3. To determine the percentage of demolitions affecting low and moderate income households, divide the percentage of low and moderate income households living in the census subregion in which the municipality is located (displayed in Exhibit 1, Column 11 in the Technical Appendix, infra) by 100 and multiply the resulting quotient by 1.5. The percentage of demolitions affecting low and moderate income households shall be the result of this product or 95 percent, whichever is lower.
Example:

Subregional Low and Moderate Income Percentage

$$\frac{23.3}{100} \times 1.5 = .3495$$

4. Multiply the percentage of demolitions affecting low and moderate income households (calculated in 3. above) by the projected municipal demolitions (calculated in 2. above). The resulting number shall be added to total need. Example:

Percentage Demolition's Impacting Low and Moderate Income Households

X

Johnsonville's Projected Demolitions

$$.3495 \times 90 = 31$$

5:92 - 5.5 Present need (as of 1987)

Present need is the sum of indigenous need and reallocated present need. To determine municipal present need add indigenous need (as calculated in N.J.A.C. 5:92-5.2) and reallocated present need (as calculated in N.J.A.C. 5:92-5.4). Example:

Johnsonville's present need = indigenous need (47) +
reallocated present need (103) = 150

5:92 - 5.6 Prospective need: 1987-1993

(a) Prospective need is the share of future households that are low and moderate income and as such require affordable housing (see Technical Appendix, infra.). Prospective need for each housing region is projected in the following Column C.

COLUMN C 1993 Prospective Need	
Region	Prospective Need
1. Northeast	5,509
2. Northwest	9,759
3. West Central	13,661
4. East Central	23,752
5. Southwest	18,179
6. South-Southwest	<u>9,561</u>
 New Jersey	 80,421

(b) To calculate municipal prospective need, divide the municipal number in Column 10, Exhibit 1 in the Technical Appendix, infra. by 100 and multiply the resulting quotient by the prospective need for the housing region in which the municipality is located to yield municipal prospective need. Example:

<u>1993 Prospective Need (Region 5)</u>	X	<u>Average of Johnsonville's Prospective Need Allocation Factors (Column 10)</u>	
18,179	X	<u>2.806 100</u>	= 510

5:92 - 5.7 Total need

Total need is the sum of present and prospective need. To determine municipal total need, add present need (as calculated in N.J.A.C.

2. A population density in excess of 10,000 persons per square mile; or

3. A density of 6,000 to 10,000 per square mile and less than five percent of vacant, non-farm municipal land as measured by the average percentage of vacant land valuation and parcels in the 1984 Statement of Financial Condition of Counties and Municipalities (Trenton, N.J.: New Jersey Department of Community Affairs, 1985).

(c) Only those municipalities designated herein to receive reallocated present need and prospective need shall be included in the housing region totals of growth area, covered employment, per capita aggregate income and covered employment change for purposes of distributing need.

5:92 - 5.4 Reallocated present need

(a) Reallocated present need is the share of excess deficient housing which must be distributed to municipalities designated in whole or in part as growth area as delineated in N.J.A.C. 5:92-5.3. The following Column B displays the reallocated present need by housing region.

COLUMN B
1987 Regional Pool of
Excess Deficient Housing Units

<u>Region</u>	<u>Excess Deficient Housing Units</u>
1. Northeast	17,676
2. Northwest	8,829
3. West Central	1,631
4. East Central	750
5. Southwest	4,060
6. South-Southwest	<u>1,465</u>
New Jersey	34,411

(b) Divide the municipal number in Column 9, Exhibit 1 in the Technical Appendix, infra, by 100 and multiply the resulting quotient by the total reallocated present need for the housing region in which the municipality is located to yield municipal reallocated present need. Example:

<u>Regional Pool of Excess Deficient Units (Region 5)</u>	X	<u>Average of Johnsonville's Present Need Allocation Factors (column 9)</u>	=	
4,060	X	$\frac{2,549}{100}$	=	103

Multiply this percentage by the municipal projection of 1987 occupied housing stock in Exhibit 1, Column 4. Example:

<u>Johnsonville Total Occupied Housing Estimate</u>	X	<u>Region 5 Percentage of Low and and Moderate Income Deficiency</u>	=	
8,922		.026		232

5. Municipal indigenous need shall be the smaller number resulting from the calculations in 3. and 4. above.
Example: Johnsonville's indigenous need = 47.

6. If the calculation in 3. above is larger than 4. above, the difference between the two shall be distributed throughout the housing region as reallocated present need as per N.J.A.C. 5:92-5.3 and 5:92-5.4. The results of this calculation are displayed for each housing region in Column B.

(b) Municipal indigenous need may also be determined through a survey of the municipality's housing stock when such survey is deemed adequate and accepted by the Council for identifying deficient housing units occupied by low or moderate income households.

5:92 - 5.3 Distribution of need

(a) The distribution of each housing region's reallocated present need and prospective need shall be accomplished through use of economic and land use factors expressed as a percentage representing the municipal share of the housing region's total for each factor as displayed in Exhibit 1 of the Technical Appendix, infra. The factors employed to distribute the housing region's need are growth area (Column 5), covered employment (Column 6), aggregate per capita income (Column 7) and covered employment change (Column 8). All but covered employment change are summed, averaged and displayed in Column 9. This is the average of the present need allocation factors. All four economic and land use factors are summed, averaged and displayed in Column 10. This is the average of the prospective need allocation factors.

(b) Reallocated present need and prospective need shall be distributed to municipalities designated in whole or in part as growth areas unless the municipality receives state aid pursuant to P.L. 1978, C.14 (C.52:27D-178 et. seq.) at the time of substantive certification and exhibits one of the following (see attachment in Appendix A, Technical Appendix, infra for a listing of current selected urban aid cities that meet the following):

1. A percentage of actual housing deficiency to total occupied housing stock in excess of the same percentage for the region in which the municipality is located; or

(a) Indigenous need in a municipality is actual or capped deficient housing occupied by low and moderate income households as further defined in 5:92-1.3. Municipal indigenous need shall be determined from the total of deficient housing units occupied by low and moderate income households for the census subregion in which the municipality is located. The data, derived from a multiple-index approach, are not available at the municipal level. To determine the municipal share of need from the census subregion total, it is necessary to use a single-index approach using surrogates of deficient housing available at both the municipal and census subregion level. To calculate municipal indigenous need:

1. Locate the appropriate municipality in Exhibit 1 in the Technical Appendix, *infra*. Example: Johnsonville in Region 5 (Southwest).
2. Divide Column 2 (municipal single-index need) by Column 3 (subregional single-index need). The resulting percentage yields the municipal share of the census subregion's total of deficient housing units occupied by low and moderate income households. Example:

$$\frac{\text{Johnsonville single index need}}{\text{Subregional single index need}} = 144/984 = .146.$$

3. Multiply the result of the quotient obtained in 2. above by the number in Column 1 (subregional multiple index need). Example:

<u>Subregional Multiple Index Need</u>		X		<u>Municipal Share of Need</u>		=		47
323				.146				

This is the count of actual low and moderate income deficient units in a municipality.

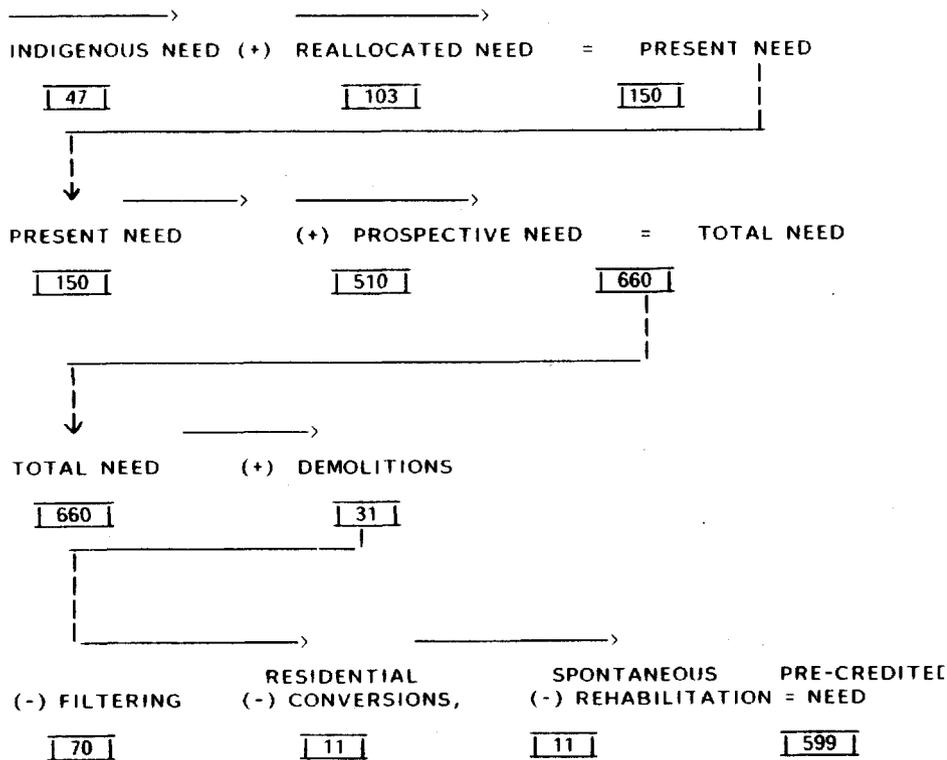

4. Column A, below, displays the percentage for each housing region that is obtained by dividing the actual deficient housing units occupied by low and moderate income households in the region by the estimated total of 1987 occupied housing units in the region.

<u>COLUMN A 1987 Regional Average Percent Deficiency</u>	
<u>Region</u>	<u>Percent Deficiency</u>
1. Northeast	.075
2. Northwest	.047
3. West Central	.025
4. East Central	.015
5. Southwest	.026
6. South-Southwest	.042

An example for Johnsonville is provided to illustrate each of the specified calculations. The following flow diagram summarizes the sequence of calculations enroute to the determination of pre-credited need.

FLOW DIAGRAM FOR THE CALCULATION OF
LOW- AND MODERATE-INCOME HOUSING NEED

Using The Johnsonville Example

(b) Exhibit 1 in the Technical Appendix, infra, provides municipal-specific base data that may be employed to determine municipal present and prospective need. Data for a hypothetical municipality, "Johnsonville," precedes the municipal base data for illustrative purposes. Exhibit 2 in the Technical Appendix, infra, duplicates the base data for each housing region that is presented in Columns A through I in this subchapter.

(c) The data contained in Exhibit 1 shall be used by parties appearing before the Council unless it can be shown that more appropriate data exist that justify a substitution. The Council shall determine, based on the documentation presented, which data shall be used to determine municipal present and prospective need.

(d) Selected municipalities receiving state aid (urban aid cities) pursuant to P.L. 1978, C.14 (N.J.S.A. 52:27D-178 et. seq.) as defined in N.J.A.C. 5:92-5.3 (b) shall calculate municipal pre-credited need as per the procedures delineated in N.J.A.C. 5:92-5.13.

(e) Filtering, residential conversions and spontaneous rehabilitation estimates by housing region as expressed in this subchapter differ slightly from those presented in the Technical Appendix, infra. This is because a municipality's total pre-credited need cannot be reduced below zero. Therefore, if the reduction to pre-credited need due to filtering, residential conversions and/or spontaneous rehabilitation reduces municipal pre-credited need to less than zero, the need for this municipality is maintained at zero.

Households

1987-1993 Present and Prospective Need

(Statewide and by Region)

SUBCHAPTER 5. MUNICIPAL DETERMINATION OF PRESENT AND PROSPECTIVE NEED

SUBCHAPTER 4. ESTIMATED PRESENT AND PROSPECTIVE NEED

5:92 - 4.1 Need

The Council establishes the following estimation of present and prospective need for low and moderate income housing at the State and regional levels:

5:92 - 5.1 General

- (a) Municipal present and prospective need shall be calculated by summing municipal indigenous need and the municipal share of the appropriate housing region's reallocated present need and prospective need. The resulting total shall be modified for secondary sources of supply/demand as described in this subchapter (see Technical Appendix, infra.) The result of this process is the determination of municipal pre-credited need. This is the figure municipalities shall address in their housing elements.

SUBCHAPTER 3. POPULATION AND HOUSEHOLDS

5:92 - 3.1 Purpose

This subchapter establishes population and household projections for the State and housing regions. These projections are drawn from the historical migration model, New Jersey Department of Labor, Division of Planning and Research, Office of Demographic and Economic Analysis, "Population Projections for New Jersey and Counties: 1990 to 2020, Volume 1, November 1985;" see: Technical Appendix, infra.

5:92 - 3.2 Population and household estimates
and projections

The Council establishes the following population and household estimates and projections for the State and housing regions:

<u>Region</u>	<u>Population</u>		
	<u>April 1</u>	<u>July 1</u>	
	<u>1980</u>	<u>1987</u>	<u>1993</u>
1. Northeast	1,849,900	1,845,841	1,820,525
2. Northwest	1,879,100	1,880,134	1,880,199
3. West Central	971,700	1,021,999	1,057,058
4. East Central	849,400	945,499	1,046,059
5. Southwest	1,342,000	1,418,557	1,484,565
6. <u>South-Southwest</u>	<u>473,900</u>	<u>507,749</u>	<u>542,858</u>
New Jersey	7,366,000	7,619,779	7,831,264

5:92: - 1.5 Substantive certification

Any grant of substantive certification may contain such conditions and terms as the Council considers necessary and which makes the achievement of a municipality's fair share obligation realistically possible.

SUBCHAPTER 2. HOUSING REGIONS

5:92 - 2.1 Regions defined

The housing regions of the State shall be composed of the following counties:

<u>Region</u>	<u>Constituent Counties</u>
1. Northeast	Bergen; Hudson; Passaic
2. Northwest	Essex; Morris; Sussex; Union
3. West Central	Hunterdon; Middlesex; Somerset; Warren
4. East Central	Monmouth; Ocean
5. Southwest	Burlington; Camden; Gloucester; Mercer
6. South Southwest	Atlantic; Cape May; Cumberland; Salem

5:92 - 2.2 Uses of regions

(a) The housing regions as set forth in N.J.A.C. 5:92-2.1 provide a definitive geographic base for the following uses:

1. The regions provide a housing market framework for determining population and household estimates and projections, as set forth in N.J.A.C. 5:92-3; and
2. The regions provide a framework within which estimates of the present and prospective need for low and moderate income housing may be made, as set forth in N.J.A.C. 5:92-4; and
3. The regions provide a structure for the allocation of fair share to the municipal level, as set forth in N.J.A.C. 5:92-5; and
4. The regions provide a basis for the negotiation of RCAs, as set forth in N.J.A.C. 5:92-11; and
5. The regions provide a framework for the appropriation of State funds made available under section 20 of the Act.

(a) A municipality's housing element shall be designed to achieve the goal of access to affordable housing to meet present and prospective housing needs, with particular attention to low and moderate income housing, and shall contain at least:

1. An inventory of the municipality's housing stock by age, condition, purchase or rental value, occupancy characteristics and type, including the number of units affordable to low and moderate income households and substandard housing capable of being rehabilitated;

2. A projection of the municipality's housing stock, including the probable future construction of low and moderate income housing, for the next six years, taking into account, but not necessarily limited to, construction permits issued, approvals of applications for development and probable residential development of lands;

3. An analysis of the municipality's demographic characteristics, including but not limited to, household size, income level and age;

4. An analysis of the existing and probable future employment characteristics of the municipality;

5. A determination of the municipality's present and prospective fair share for low and moderate income housing and its capacity to accommodate its

present and prospective housing needs, including its fair share for low and moderate income housing;

6. A consideration of the lands that are most appropriate for construction of low and moderate income housing and of the existing structures most appropriate for conversion to, or rehabilitation for, low and moderate income housing, including a consideration of lands of developers who have expressed a commitment to provide low and moderate income housing;

7. The location and capacities of existing and proposed water and sewer lines and facilities relevant to the designated sites;

8. Copies of necessary applications for sewer service and water quality management plans submitted pursuant to Sections 201 and 208 of the Federal Clean Water Act, 33 U.S.C. §1251, et. seq.;

9. A copy of the most recently adopted municipal master plan and the immediately preceding, adopted master plan;

10. A copy of appropriate National Wetlands Inventory maps provided by U.S. Fish and Wildlife Service for designated sites;

11. A copy of appropriate U.S.G.S. Topographic Quadrangles for designated sites; and

12. Any other documentation as may be required by the Council.

"Set-aside" means the percentage of housing units devoted to low and moderate income households within an inclusionary development.

"State Development Guide Plan (SDGP)" means the officially recognized State plan for development, dated 1980, and promulgated by the New Jersey Department of Community Affairs pursuant to P.L. 1961 c.47(C.13:1B-15.52.).

"State Development/Redevelopment Plan (SDRP)" means the State plan for development promulgated by the State Planning Commission pursuant to P.L. 1985 c.398 (C.52:18A-196 et. seq.).

"Statement of intent" means a resolution adopted by a municipal governing body expressing an intent to enter into a RCA.

"Substantive certification" means a determination by the Council approving a municipality's housing element and fair share plan in accordance with the provisions of the Act and the rules and criteria as set forth herein. A grant of substantive certification shall be valid for a period of six years in accordance with the terms and conditions contained therein.

"Suitable site" means a site that is adjacent to compatible land uses, has access to appropriate streets and is consistent with the environmental policies delineated in Subchapter 8, Municipal Adjustments.

"Surrogate" means a census indicator of deficient housing used in the calculation of present need as defined in Subchapter 5, Municipal Determination of Present and Prospective Need.

"Survey" means that independent determination of need undertaken by a municipality in preparing its housing element, which is developed and produced in a manner and in such form as is acceptable to the Council.

"Vacant land" means: 1. Undeveloped and unused land area; 2. Any non-residential areas with significant amounts of land not covered by impervious surfaces on site, as determined by the Council; 3. Land suitable for redevelopment or infill at higher densities; and 4. Residential areas with lot sizes in excess of two acres where environmental factors permit higher densities.

the tract, including the open-space, roadways, parking areas and common facilities devoted exclusively to that portion of the tract. The result is expressed as dwelling units per acre.

"Open-space" means any parcel or area of water or land essentially unimproved and set aside, dedicated, designated or reserved for public or private use or enjoyment or for the use and enjoyment of owners and occupants of land adjoining or neighboring such open space; provided that such areas may be improved with only those buildings, structures, streets and offstreet parking and other improvements that are designed to be incidental to the natural openness of the land.

"Petition for substantive certification" means that petition which a municipality files, or is deemed to have filed, which engages the Council's mediation and review process.

"Present need" means the total number of deficient housing units occupied by low or moderate income households as of July 1, 1987. "Present need" is the sum of indigenous need and reallocated present need.

"Prospective need" means a projection of low and moderate housing needs based on development and growth which is reasonably likely to occur in a region or a municipality, as the case may be, as determined and further described in Subchapter 4, Estimated Present and Prospective Need and Subchapter 5, Municipal Determination of Present and Prospective Need. In determining prospective need, consideration shall be given to approvals of development applications, real property transfers and economic projections

prepared by the State Planning Commission established by P.L. 1985, c.398 (N.J.S.A.52:18A-196 et. seq.).

"Reallocated present need" means that portion of a housing region's present need that is redistributed to designated growth areas.

"Receiving municipality" means, for purposes of a RCA, a municipality which agrees to assume a portion of another municipality's fair share obligation.

"Rehabilitated unit" means a previously deficient housing unit which has undergone significant renovation to meet municipal or other applicable housing code standards as further described in Subchapter 11, Regional Contribution Agreements (RCAs).

"Resolution of participation" means a resolution adopted by a municipality in which the municipality chooses to prepare a fair share plan and housing element in accordance with the Act.

"Section 8 income limits" means a schedule of income limits that define 50 percent and 80 percent of median income by household size. When used herein, Section 8 income limits shall refer to the "uncapped" schedule as contained in the Technical Appendix, infra.

"Sending municipality" means for purposes of a RCA, a municipality which transfers a portion of its fair share obligation to another willing municipality.

"Housing element" means that portion of a municipality's master plan consisting of reports, statements, proposals, maps, diagrams and text designed to meet the municipality's fair share of its region's present and prospective housing needs, particularly with regard to low and moderate income housing and which contains at least those items identified in section 10 of the Act.

"Housing region" means a geographic area, determined by the Council, of no less than two nor more than four contiguous, whole counties which exhibit significant social, economic and income similarities and which constitute, to the greatest extent practicable, the Primary Metropolitan Statistical Areas (PMSA) as last defined by the United States Census Bureau prior to July 2, 1985.

"Inclusionary development" means a residential housing development in which a substantial percentage of the housing units is provided for a reasonable income range of low and moderate income households.

"Indigenous need" means deficient housing units occupied by low and moderate income households within a municipality and is a component of present need. Municipal indigenous need, as a percentage of the total 1987 occupied housing stock, shall not exceed the percentage derived from dividing the deficient housing units occupied by low and moderate income households by the total 1987 occupied housing stock for the housing region in which the municipality is located.

"Inventory" means that calculation undertaken by a municipality in developing its housing element which accounts for its housing stock by age, condition, purchase or rental value, occupancy characteristics and type, including the

number of units affordable to low and moderate income households in substandard housing capable of being rehabilitated, as provided for in section 10a of the Act.

"Low income housing" means housing affordable according to federal Department of Housing and Urban Development or other recognized standards for home ownership and rental costs, and occupied or reserved for occupancy by households with a gross household income equal to 50 percent or less of the median gross household income for households of the same size within the housing region in which the housing is located, and is subject to affordability controls.

"Moderate income housing" means housing affordable according to federal Department of Housing and Urban Development or other recognized standards for home ownership and rental costs, and occupied or reserved for occupancy by households with a gross household income equal to or more than 50 percent but less than 80 percent of the median gross household income for households of the same size within the housing region in which the housing is located, and is subject to affordability controls.

"Multifamily unit" means a structure containing two or more dwelling units.

"Municipal present need" means the sum of indigenous need and the municipal share of reallocated present need.

"Net density" means the total number of dwelling units within a designated portion of a tract divided by the total land area of the designated portion of

"Census subregion" means a geographic subdivision of the State by the United States Bureau of the Census.

"Conversion" means the conversion of existing commercial, industrial or residential structures for low and moderate income housing purposes where a substantial percentage of the housing units is provided for a reasonable income range of low and moderate income households.

"Council" means the New Jersey Council on Affordable Housing established under the Act and which has primary jurisdiction for the administration of housing obligations in accordance with sound regional planning considerations in this State.

"Covered employment" means those employees covered by the New Jersey Unemployment Compensation Law, P.L. 1936, c.270, as amended, (C.43; 21-1, et. seq.), and as further described in New Jersey Covered Employment Trends, December 1985, New Jersey Department of Labor, Division of Planning and Research, Office of Demographic and Economic Analysis.

"Covered employment change" means the yearly change in covered employment from 1977 through 1984 as measured by a linear regression equation.

"Deficient unit" means a housing unit that is not decent, safe or sanitary as further determined through census surrogates or on-site inspection and does not comply with local codes or other housing standards and is determined pursuant to the method described in N.J.A.C. 5:92-5.2.

"Developable site" means a site that has access to appropriate water and sewer infrastructure, and has received water consistency approvals from the New Jersey Department of Environmental Protection or its designated agent authorized by law to issue such approvals.

"Fair share plan" means that plan or proposal, which is in a form that may readily be converted into an ordinance, by which a municipality proposes to satisfy its obligation to create a realistic opportunity to meet its fair share of low and moderate income housing needs of its region and which details the affirmative measures the municipality proposes to undertake to achieve its fair share of low and moderate income housing, as provided in sections 9 and 14 of the Act.

"Gross density" means the total number of dwelling units existing or permitted on a housing site divided by the total area of the tract. The result is expressed as dwelling units per acre.

"Growth area" means the lands so designated by the 1980 State Development Guide Plan as updated by the State Development and Redevelopment Plan.

"Growth area" shall also refer to lands designated as Regional Growth Areas and Pinelands Towns by the Pinelands Commission and areas designated as Development Regions and Extension Regions (including Central Corridor Barrier Islands) by the Division of Coastal Resources.

"Household" means the person or persons occupying a housing unit.

CHAPTER 92
SUBSTANTIVE RULES OF THE NEW JERSEY
COUNCIL ON AFFORDABLE HOUSING

SUBCHAPTER 1. GENERAL PROVISIONS

5:92 - 1.1 Short title

The provisions of this chapter will be known as "the substantive rules and regulations of the New Jersey Council on Affordable Housing."

5:92 - 1.2 Severability clause

If any part of this chapter shall be held invalid, the holding shall not affect the validity of remaining parts of these rules. If a part of these rules is held invalid in one or more of their applications, the rules shall remain in effect in all valid applications that are severable from the invalid application.

5:92 - 1.3 Definitions

The following words and terms, when used in this chapter, shall have the following meaning unless the context clearly indicates otherwise.

"Act" means the Fair Housing Act of 1985, L. 1985, c.222 (C.52:27D-301 et seq.).

"Adjustment" means a reduction and/or deferral of the municipal law and moderate income housing obligation.

"Agency" means the New Jersey Housing and Mortgage Finance Agency established by P.L. 1983, c.530 (C.55:14K-1 et seq.).

"Affordable" means a sales price or rent within the means of a low or moderate income household as defined in Subchapter 12, Controls on Affordability.

"Alternative living arrangement" means a structure in which households maintain private rooms yet share kitchen and plumbing facilities, central heat and common areas. Alternative living arrangement includes but is not limited to Class C boarding houses as regulated by the New Jersey Department of Community Affairs, residential health care facilities as regulated by the New Jersey Department of Health, and congregate living arrangements.

"Approvable site" means a site that may be developed for low and moderate income housing in a manner consistent with the regulations of all agencies with jurisdiction over the site. A site may be approvable although not currently zoned for low and moderate income housing.

"Available site" means a site with clear title, free of encumbrances which preclude development for low and moderate income housing, upon which the owner has expressed a willingness to build low and moderate income housing, or to convey the land for this purpose, at a reasonable price, in keeping with comparable land sales in the area.

TABLE OF CONTENTS

Subchapter 1 - General Provisions

- 5:92-1.1 Short Title
- 5:92-1.2 Severability Clause
- 5:92-1.3 Definitions
- 5:92-1.4 Housing Element
- 5:92-1.5 Substantive Certification

Subchapter 2 - Housing Regions

- 5:92-2.1 Regions Defined
- 5:92-2.2 Use of Regions

Subchapter 3 - Population and Households

- 5:92-3.1 Purpose
- 5:92-3.2 Population and Household Estimates and Projections

Subchapter 4 - Estimated Present and Prospective Need

- 5:92-4.1 Need

Subchapter 5 - Municipal Determination of Present and Prospective Need

- 5:92-5.1 General
- 5:92-5.2 Indigenous Need (as of 1987)
- 5:92-5.3 Distribution of Need
- 5:92-5.4 Reallocated Present Need
- 5:92-5.5 Present Need (as of 1987)
- 5:92-5.6 Prospective Need 1987-1993
- 5:92-5.7 Total Need
- 5:92-5.8 Demolitions
- 5:92-5.9 Filtering
- 5:92-5.10 Residential Conversion
- 5:92-5.11 Spontaneous Rehabilitation
- 5:92-5.12 Pre-Credited Need
- 5:92-5.13 Calculation of Indigenous Need:
Selected Urban Aid Cities
- 5:92-5.14 Low and Moderate Income Split

Subchapter 6 - Credits

- 5:92-6.1 Credits

Subchapter 7 - Drastic Alteration of the Established Pattern of Development

- 5:92-7.1 Drastic Alteration

Subchapter 8 - Municipal Adjustments

- 5:92-8.1 General Instructions
- 5:92-8.2 Adjustment Process
- 5:92-8.3 Adequate Recreation, Conservation and Open Space
- 5:92-8.4 Vacant and Developable Sites
- 5:92-8.5 Adequate Public Facilities and Infrastructure Capacities
- 5:92-8.6 Prohibitive Costs of Infrastructure

Subchapter 9 - Prioritizing

- 5:92-9.1 Prioritizing Vacant and Developable Sites

Subchapter 10 - Phasing of Present and Prospective Need

- 5:92-10.1 Phasing Plans
- 5:92-10.2 Phasing Schedules
- 5:92-10.3 Commencement Date of Phasing Schedule
- 5:92-10.4 General Provisions
- 5:92-10.5 Priority of Sites
- 5:92-10.6 Adjustments to Phasing Schedule

Subchapter 11 - Regional Contribution Agreements

- 5:92-11.1 General Provisions
- 5:92-11.2 Terms
- 5:92-11.3 Credits
- 5:92-11.4 Review by County Planning Board Or Other County Designated Agency
- 5:92-11.5 Amount and Duration of Contributions
- 5:92-11.6 Enforcement

Subchapter 12 - Controls on Affordability

- 5:92-12.1 General Provisions
- 5:92-12.2 Length of Controls on Affordability
- 5:92-12.3 Administrative Mechanism
- 5:92-12.4 Initial Pricing
- 5:92-12.5 Annual Indexed Increases
- 5:92-12.6 Subsidy To Insure Affordability
- 5:92-12.7 Procedures of Resale
- 5:92-12.8 Eligible Capital Improvements
- 5:92-12.9 Impact Of Foreclosure On Resale
- 5:92-12.10 Excess Proceeds Upon Foreclosure

Technical Appendix

ECONOMIC IMPACT

Creation of housing units affordable to low and moderate income households will provide them access to sound shelter within their means. Location of such housing at many sites may, with the option to reserve such housing for local employees who are nonresidents, reduce commuting distances. Reduced distances will lower individuals' commuting cost and help conserve the State's costly and scarce highway network including many roads reaching or exceeding design capacity. In-fill housing and rehabilitation may reduce expenditures on sewer and water extensions by utilizing existing systems with excess capacity.

SOCIAL IMPACT

The public will benefit since the rules will be the basis for creation of additional housing affordable to low and moderate income households. The existence of a variety of housing types in all municipalities will increase consumer choice. Hardship conditions due to high housing costs or housing unavailability in some areas will be lessened. Residents in deficient housing will particularly benefit from increased housing choice. This may exacerbate long-term trends of urban out-migration and decline. However, Regional Contribution Agreements (RCAs) are possible. RCAs are intended to provide municipalities that exhibit extensive deficient housing and limited financial resources with additional means to upgrade or otherwise provide sound housing opportunities within their existing neighborhoods and community.

ENVIRONMENTAL IMPACT

The environmental impact of higher density inclusionary developments affordable to low and moderate income households will be less if located under a comprehensive and consistent local housing element and master plan, and, if located with reference to applicable county, regional and State plans. The regulations provide for consistency with applicable policies, plans and/or programs of the New Jersey Department of Environmental Protection including Green Acres, Coastal Zone Management, the Pinelands Commission and the Hackensack Meadowlands.

Full Text of the proposed new rules follows.

Salem

Cities are not expected to share in that pool. Instead, *the excess of deficient units over the regional percentage of deficiencies is redistributed* to all municipalities with any growth area in the region. The exact procedure for redistribution is covered under Distribution of Low- and Moderate-Income Housing Need.

REALLOCATED PRESENT NEED BY REGION

Northeast	17,676
Northwest	8,829
West Central	1,631
East Central	750
Southwest	4,060
South-Southwest	1,465
STATE TOTAL	34,411

PRESENT NEED

Present need is the sum of indigenous and reallocated present need in a municipality. It represents individual municipal housing responsibility reflective of its own housing inadequacy/deficiency (except where it is regionally excessive) and regional responsibilities in terms of its share of the pool of housing replacement/repair that must be undertaken by growth area communities due to excess deterioration in the region.

PRESENT NEED BY REGION

Northeast	51,903
Northwest	31,723
West Central	9,117
East Central	5,442
Southwest	13,268
South-Southwest	8,092
STATE TOTAL	119,545

PROSPECTIVE NEED

Prospective need is the share of the total projected population that will qualify for low- and moderate-income housing. It is obtained by projecting the population by age cohort from 1987 to 1993 through the following steps:

Source: RUTGERS UNIVERSITY Center for Urban Policy Research, Winter, 1983

- (1) A 1987 base is established by bounding it at one end by the age cohort distributions of the *1984 Population Estimates for New Jersey*¹⁶ from the New Jersey Department of Labor.* The other end is bounded by the distribution of the projected population for 1990 by age cohort under the New Jersey Department of Labor's Historical Migration Model.¹⁸ These two population distributions by each age cohort are added together and divided by two to obtain the age distribution of the base population for the mid-period 1987.
- (2) A July 1, 1993 projection-year end is also arrayed by age distribution. This is done in the following way:
- (a) 1990 and 1995 age distributions for the New Jersey Department of Labor's Historical Migration Model are distributed by their respective eight age cohorts and three-fifths of the distance between 1990 and 1995 is used for each age cohort for 1993. The age cohorts are as follows:

AGE COHORT

Less than 25 years
 25-29 years
 30-34 years
 35-44 years
 45-54 years
 55-64 years
 65-74 years
 75 years and over

- (3) Both the population age cohorts for the base year (1987) and the projection-end year (1993) are multiplied by 1980 New Jersey county-specific headship rates by age cohort.¹⁹ Two distributions of total households emerge.
- (4) Total households for each period are converted to low- and moderate-income households by carrying forward the income characteristics of all households in 1980 to 1987 and 1993 by age cohort. Low- and moderate-income households are sorted by applying the Section 8 household size/income qualification criteria that were used in 1980 to a different number of households that exist in each cohort in 1987 and 1993. Thus, to the degree that age cohorts are differently composed and growing differently, the low- and moderate-income population will also change as it ages into the future.

*These are available by county from the New Jersey Department of Health.¹⁷

- (5) Low- and moderate-income households for 1987 are subtracted from low- and moderate-income households in 1993 to obtain the change in low- and moderate-income households from 1987 to 1993. This is done for eight age cohorts specific to each of 21 counties. The result is prospective low- and moderate-income housing need.

PROSPECTIVE NEED BY REGION

Northeast	5,509
Northwest	9,759
West Central	13,661
East Central	23,752
Southwest	18,179
South-Southwest	9,561
STATE TOTAL	86,421

DISTRIBUTION OF LOW- AND MODERATE-INCOME HOUSING NEED

Low- and moderate-income housing need is distributed to each community using the economic and land-use factors listed below. These factors in the first two cases represent measures of *responsibility*, i.e., the labor force drawn to the municipality needing housing. In the second two cases, they represent measures of *capacity*, i.e., the physical and fiscal capacity to absorb and provide for such housing.²⁰ The first three factors are used to distribute excess *present* need (reallocated present need); the full four factors are used to distribute prospective need. The first three factors are identical for present and prospective need. All factors operate individually, are equally weighted, and involve only those municipalities in the growth area of the region.

- (1) Covered employment growth within a municipality over the period 1977-84, as a percentage of regional covered employment growth for the same period (this is the most stable period to measure change in employment)²¹
- (2) Covered employment in a municipality as a percentage of regional covered employment (1984)
- (3) Municipal area in the growth area as a percentage of growth area in the region as included on the official State Department Guide Plan (SDGP).²² Pinlands and Coastal Zone areas are added to the SDGP Growth Area according to the following designations:²³

- (a) Pinelands — All areas in Regional Growth Areas and Pinelands Towns.
- (b) Coastal Zone — All areas in Development Regions and Extension Regions, the latter including Central Corridor Barrier Islands
- (4) Municipal 1983/1984 aggregate per capita income as a percentage of 1983/1984 regional aggregate per capita income²⁴

Neither prospective need nor reallocated present need are directed to Urban Aid municipalities which have the characteristics of older core areas to avoid reconcentrations of low- and moderate-income families in these fiscally/economically stressed locations.²⁵

The criteria for determining the Urban Aid municipalities to be exempt from any housing need beyond indigenous need are summarized as follows:²⁶

- (a) Designated "Urban Aid" by the State for funding year 1986. In addition, they must meet *one* of the following:
 - (1) Level of existing low- and moderate-income housing deficiency, according to the six housing deficiency criteria, that exceeds average regional low- and moderate-income housing deficiency for the region in which the Urban Aid municipality is located
 - (2) Population density of greater than 10,000 persons per square mile or 14.1 per acre
 - (3) Population density of 6,000 to 10,000 persons per square mile or 9.4 to 14.1 per acre *plus* less than five per cent of vacant, non-farm, municipal land as measured by the average of the percentage of vacant land valuation and vacant land parcels of all local land valuation/parcels in the 1984 *Statement of Financial Condition of Counties and Municipalities* (Trenton, NJ: New Jersey Department of Community Affairs, 1985).²⁷

TOTAL NEED

Total need 1987 to 1993 is composed of indigenous need, reallocated present need, and prospective need. It is the total municipal need number before demand increases for demolitions and demand reductions for secondary sources of supply are introduced. In a very few cases, negative prospective need in a community, reflective of reduced housing demand due to employment loss, lessens present need demand and, as such, reduces total need.

²⁴1983/1984 aggregate per capita income is obtained by multiplying 1983 per capita income by the 1984 Population Estimates for the growth area municipality and all municipalities in the growth area of the region.

TOTAL NEED (PRESENT AND PROSPECTIVE) BY REGION

Northeast	57,412
Northwest	41,482
West Central	22,778
East Central	29,194
Southwest	31,447
South-Southwest	17,653
STATE TOTAL	199,966

SECONDARY SOURCES OF HOUSING SUPPLY/DEMAND

Background

Secondary sources of housing supply/demand reflect the adjustments of the housing market to the unevenness and spontaneity of primary supply/demand. As housing ages or as it falls prey to accident, natural disasters, or publicly/privately initiated changes in land use, it may become obsolete and be removed from the stock. The term for this selective pruning is *demolition*. Demolitions occur regularly and affect various markets differently. In strong markets, demolitions are low; in weaker markets, they are proportionally higher. In both situations, demolitions add to future housing demand.

As housing is added by private developers to the upper and middle price categories of the stock, a large share of consumers who already occupy housing within the market are attracted to this housing. When they occupy the new housing through purchase or rental agreements, they release housing within the local market that is inferior to the new housing that has been built. This causes housing to be available to a lower round of consumers, often at a reduced price. The process is termed *filtering*. Filtering reduces future demand as a greater proportion of formerly higher priced housing is now available at potentially lower prices. Filtering takes place in active housing markets, especially those receiving a significant influx of new housing.

In selected submarkets, a demand may exist for smaller units, and this need may not be responded to by normal market operations. The market adjusts to this need by creating additional smaller units from larger ones. This is termed *residential conversion* and most often occurs in housing stocks containing larger structures that can be adapted to smaller units yet not destroy or significantly alter the value of adjacent units in the process. The older, urban two- to four-family home is an ideal conversion unit. Four or six units may be created where only one-half this number may have existed in this type of structure previously. Often these units are termed illegal conversions, not because they are not safe, sound housing, but rather because the enlarged structure no longer conforms to the unit restrictions of the zoning ordinance.

Another characteristic of the housing market is for deficient units to be upgraded privately. This also lessens housing demand as a deficient unit is replaced by a sound unit. This happens usually because a market exists for the renovated structure, usually at a higher occupancy cost than when the structure fell into disrepair. *Spontaneous rehabilitation*, as it is called, occurs in stronger, growing markets and affects only a small proportion of the low- and moderate-income housing stock.

Procedures

In the earlier-discussed allocation and reallocation procedures, only those municipalities in the growth area participated. In the reductions or increases to housing need due to secondary supply and demand, all locations participate. This is true because all municipalities have some type of need, and reductions apply to housing need no matter how the need is generated. Thus, when demand reductions due to filtering are calculated, the reduction for a particular location is based on the share of all multifamily units in the region.

For Urban Aid Cities, the demand reductions are taken before these areas send excess need to the reallocation pool; for all other locations, demand reductions are taken after this point. This is to prevent other less-dense, less-deteriorated, inner-ring cities from receiving a large share of reallocated need without an equivalent chance to participate in secondary demand reductions due to specific characteristics of their housing stock.

Demolitions

Demolitions are a secondary source of housing demand in that demand is created by households requiring housing because units are lost from the stock. Housing units are lost due to fire, structure abandonment, road improvements, community renewal, land-use change, and other reasons.²⁸ It is estimated that units lost from the low- and moderate-income stock (both reported and unreported demolitions) are on a par with those added to the stock due to conversion. For the entire housing stock, the ratio of demolitions to conversions may be even higher.²⁹ It is also true that the level of demolitions is falling in New Jersey. At the beginning of the decade, total reported demolitions for New Jersey municipalities were 4,000-5,000 per year; towards mid-decade the total is closer to 3,000 annually.³⁰

In order to estimate the scale of demolitions, reported demolitions for each municipality for the years 1983 and 1984 are averaged and multiplied by six to obtain a six-year demolition estimate by municipality. These are representative years which catch the most recent aspects of the trend in demolitions.³¹ Demolitions are adjusted for each municipality to the share of all demolitions that affect the low- and moderate-income housing sector by 150 percent of the subregional share of low- and moderate-income housing. This percentage share of all demolitions that affect low- and moderate-income families is capped at 95 percent. Total demolitions are thus tallied by individual community, and the share affecting low- and moderate-income housing is estimated by a multiple of the subregional low- and moderate-income housing deficiency percentage. This latter factor recognizes that demolitions take place at a much higher rate in the low- and moderate-income housing sector than for all housing locally. Demolitions at a statewide level are essentially offset by conversions for low- and moderate-income households. This latter relationship is covered more fully in a subsequent section.

DEMOLITION HOUSING NEED BY REGION

STATE TOTAL	13,367

Filtering

Filtering is a downward adjustment of housing which recognizes that the housing requirements of lower-income groups can be served by supply additions to the higher-income sectors of the housing market.³² During the course of normal market operations, middle- and upper-income households vacate existing housing for new, more desirable units, leaving their units vacant for households of lesser income. Filtering is predicated on the existence of housing surpluses which cause housing prices to drop because of the excess of housing supply over demand.

Filtering is measured using *The American (Annual) Housing Survey* over the nine-year period 1974-1983. *The American (Annual) Housing Survey* sponsored jointly by the U.S. Department of Housing and Urban Development and the U.S. Department of Commerce is particularly useful in that the same unit is measured at various intervals.³³ By specifying Section 8 income eligibility by household size for the years in question, two components of the household population can be specified: those households that meet the *Mount Laurel II* income requirements, and those households whose incomes are above the *Mount Laurel II* income requirements for each observation period.

Viewing the same housing units, it is found that the net filtering (units moving down minus units moving up) to the lower-income population in New Jersey is about 6.5 percent over the course of the observation period.³⁴ About 18.8 percent of the stock moves down, and 12.3 percent moves up. The figure used for six-year net filtering is 3.25 percent of the non-deteriorated, non-low- and moderate-income housing stock. The 3.25 percent figure is derived by multiplying the actual 4.32 percent six-year rate by 0.75. The latter accounts for those units which filtered down over the period and do not have the same range of affordability as those units that were continuously occupied by low- and moderate-income families. Further, by using the non-deteriorated portion of the housing stock, the units that are counted as moving downward are assumed to be of adequate housing quality. Thus, both affordability and housing condition are controlled for in the filtering estimate.

Through cross-tabulation analysis, and taking into account the dominance of single-family homes in New Jersey, filtering is found to be more active in those locations which have higher percentages of multifamily units, and much less active in locations where there are small percentages of multifamily units.³⁵ Even though filtering takes place to some degree in all locations, it is much more of an urban than suburban housing phenomenon.

Filtering for the period 1987 to 1993 is estimated by taking 3.25 percent of the 1987 non-deteriorated, non-low- and moderate-income housing stock by region and assigning this need reduction to communities within the region according to their share of multifamily housing units (two or more units) of the regions' total multifamily units. A community receives a filtering adjustment to the degree that it contains multifamily housing,* i.e., the most likely type of housing to filter down.

Residential Conversion

Conversion is the creation of dwelling units from already existing structures. Almost all conversion consists of additional dwelling units being created from other residential units, and very rarely from nonresidential units. This type, termed residential conversion, is a significant and recognized source of housing supply to low- and moderate-income families. According to the U.S. Department of Housing and Urban Development, as family size has decreased over the past two decades, residential conversion creating multiple smaller units from larger units has also increased.³⁶

Converted units are measured through the *American (Annual) Housing Survey* and the *Decennial Census*. Conversions are the difference between the net change in total housing units (end minus beginning of period), minus the net of housing units constructed and demolitions lost over the period. Residential conversion is easily equivalent to 30 percent of all new units constructed, and orders of magnitude higher than the percentage of low- and moderate-income units actually constructed.³⁷ It is assumed that units made available through conversion will reduce indigenous need by 18 percent during the six-year projection period. Residential conversion is closely related and distributed to municipalities on the basis of their percentage of two- to four-family structures.³⁸ Residential conversions influence housing supply at the regional level according to an observed share of indigenous need. They are distributed to municipalities within regions according to the presence of structure types conducive to conversion, i.e., two- to four-family units.*

*1980 instead of 1987 is used as a base to tabulate the share of multifamily units as demolitions over the period 1980-1985 are not available by structure type. It is possible to estimate total 1987 occupied housing units, but the distribution by structure type cannot be accurately determined without demolition information by structure type.

Residential conversions to low- and moderate-income housing in normal markets are often on a par with demolitions for this income sector. In stronger markets, conversions are more than demolitions; in weaker markets, less. A statewide control of demolitions pairs this variable in approximate magnitude with that of total demolitions.

Spontaneous Rehabilitation

Spontaneous rehabilitation is the unsolicited private market reduction of housing need by structure rehabilitation sufficient to render the unit free of deficiencies.³⁹ Via the *American (Annual) Housing Survey*, over five interim years between 1974 and 1980, spontaneous rehabilitation can be measured by using as a surrogate more than \$200 spent on each of three of four categories of additions, alterations, replacements, or repairs during the course of a single year.⁴⁰ This spontaneous rehabilitation happens to about 1.1 percent of the deficient units occupied by low- and moderate-income households annually. For a six-year period, the figure is estimated to be 6.6 percent applied to indigenous need at the regional level.

The key factor associated with rehabilitation of deteriorated units is wealth of the area as interpreted through aggregate income. Reductions for spontaneous rehabilitation are given to each municipality according to the municipality's share of regional aggregate income.* Larger, less wealthy — and smaller, more affluent — communities will get some measure of a larger relative credit for potential rehabilitation because in the first case, there is more opportunity for rehabilitation to happen, and in the second, there is more money to support it.⁴¹

Spontaneous rehabilitation at this juncture should not be confused with rehabilitation as a meliorative housing strategy once final need is determined. Spontaneous rehabilitation is a reduction before final need is calculated due to the workings of the private market. Public, publicly assisted, or private rehabilitation as a housing strategy once need is determined is one of several means of response to that need and has nothing to do with the need reduction determined here.

*1983/1984 aggregate per capita income is used for this ratio.

STATE TOTAL - 4,530

(includes ten units which would have made total need in a community negative. This accounting measure allows the reduction for this factor to be 4,520.)

PRE-CREDITED NEED

Pre-Credited Need is the municipality's estimated obligation under the *Mount Laurel* mandate for the period 1987 to 1993. Relative to other municipalities, and taking into account past growth, growth designation/share, and aggregate income, this is the need to which the municipality must address itself. Under Section 7 of the Fair Housing Act, municipalities may take credit for past provision of public or publicly assisted housing. Pre-Credited Need may be addressed via new construction or a level of rehabilitation to render the deteriorated units adequate. It is a need which, if it is less than 1,000, must be addressed within a six-year period; yet, if more than 1,000, may be spread out over a longer period as per subsequent phasing rules. Pre-Credited Need is solely the low- and moderate-income housing number and does not address the number of market units that might have to be built to support the development of the low- and moderate-income units locally.

PRE-CREDITED NEED BY REGION

Northeast	42,534
Northwest	28,773

South-Southwest	14,549
STATE TOTAL	145,707

CAPPED NEED

Low- and moderate-income housing need in a community is capped at 20 percent of occupied housing units in 1987. Should density bonuses be applied and the community actively pursued by developers, under the provision of the 20-percent CAP no community will be required to double over the projection period. The small reduction in need that this capping procedure provides prevents the smaller communities in a region from experiencing significant change while complying with the state's low- and moderate-income housing mandate. Capped need is not a part of a municipality's pre-credited need estimate as this credit (if applicable) may be applied for during the municipal adjustment process.

APPENDIX F

COUNTY REVIEW CHECKLIST

The Act allows a municipality to transfer up to 50% of its low and moderate income housing obligation to a willing receiving municipality. The terms of this transfer are determined by the individual negotiations between willing sending and receiving municipalities within the same housing region as adopted by the Council.

APPENDIX F

County Review Checklists

Recognizing the need for sound regional comprehensive planning, the Act permits the county of the receiving municipality to review the proposed RCA and submit its comments and recommendations to the Council. The Act indicates that this review shall be performed by the county planning board or other designated agency and that in its review, the county "shall consider the master plan and zoning ordinance of the sending and receiving municipalities, its own county master plan and the State development and redevelopment plan".

The Act permits the Council to establish time limits for county review and, since the Council views expedient review of RCAs as crucial, it shall impose a 30 day limit for the county to complete its review. The Council may provide a 15 day extension if the county requests such an extension for legitimate reasons. If the county is unable to complete its review within the allotted time, or if there is no county planning board or designated county agency, the Council shall perform the required review.

To facilitate county review, the Council has developed a four section checklist. This checklist is to be completed as part of the county review process.

COUNTY REVIEW CHECKLIST

For Sound Comprehensive Regional Planning
Of Proposed Low and Moderate Income Housing Sites
Proposed Through Regional Contribution Agreements

SECTION I: ACCESS TO EMPLOYMENT OPPORTUNITIES

A. Does the proposed agreement provide realistic housing opportunities within convenient access to employment opportunities?

Housing Site(s) Proposed	Check One	If Access Possible, Briefly Explain on Attached Sheet, By Site #		
		Yes	No	
1. Within Receiving Munic.	A. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	B. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	C. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Within Sending Munic.	A. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	B. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	C. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

B. Is the proposed housing served by available transit?

Housing Site(s) Proposed	Check Appropriate Boxes	If Transit Possible, Briefly Explain On Attached Sheet by Site #				
		Yes	Munic	Inter-Municipal County Inter-co	No	
1. Within Receiving Munic.	A. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	B. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	C. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
2. Within Sending Munic.	A. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	B. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
	C. <input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

1) These sites represent possible alternate locations of sites within the sending municipality that would be developed for housing in the absence of a successful RCA.

SECTION II: CURRENTLY ADOPTED AND/OR OFFICIAL LAND USE ELEMENT CONSISTENCY REVIEW (ATTACH RELEVANT PAGES OF DOCUMENTS CITED BELOW)

	Check One Complies In		Conflicts In Whole	Brief Explanation (Attach Additional Sheets As Necessary)
	Whole	Part(Explain)		
A.1. Receiving Munic (a) Master Plan Of: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
(b) Zoning Ordinance Of: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2. Sending Munic. (a) Master Plan Of: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
(b) Zoning Ordinance Of: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
B.1. Receiving County Land Use Element Of: _____ County; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
2. Sending County (if different from B.1) Land Use Element of: _____ County; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
C.1 Other Regional Plan Land Use Element(s) 2) Affecting; (a) Receiving Munic: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
(b) Sending Munic: _____ ; Adopted: _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
D.1 State Development Redevelopment Plan (S.D.R.P.) 3) (a) Receiving Munic. _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	
(b) Sending Munic. _____	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	

2) For example, is site(s) consistent with Hackensack Meadowland Development Commission's Adopted Land Use Element?
3) Use official State Development Guide Plan until S.D.R.P. is adopted.

SECTION III: CURRENTLY ADOPTED TRANSPORTATION PLAN AND/OR PROGRAM ELEMENT CONSISTENCY REVIEW (ATTACH RELEVANT PAGES OF DOCUMENTS CITED BELOW)

	Check Complies In Part (Explain)		Conflicts In Whole	Brief Explanation (Attach Additional Sheets As Necessary)
	Whole			
A.1. Receiving Munic.				
(a) Plan of: _____				
; Adopted: _____	/ /	/ /	/ /	
(b) Program of: _____				
; Adopted: _____	/ /	/ /	/ /	
B.1. Receiving County				
(a) Plan Of: _____				
; Adopted: _____	/ /	/ /	/ /	
(b) Program Of: _____				
; Adopted: _____	/ /	/ /	/ /	
2. Sending County (if different from B.1)				
(a) Plan of: _____				
; Adopted _____	/ /	/ /	/ /	
(b) Program of: _____				
; Adopted _____	/ /	/ /	/ /	
C. Other Regional Plan/Prog. 4)				
(a) Receiving Munic:				
(1) Plan; Adopted: _____	/ /	/ /	/ /	
(2) Program; Adopted: _____	/ /	/ /	/ /	
(b) Sending Munic.				
(1) Plan; Adopted: _____	/ /	/ /	/ /	
(2) Program; Adopted: _____	/ /	/ /	/ /	
D. State Plan/Prog. 4)				
(a) Plan; Adopted:				
(1) Receiving Munic: _____	/ /	/ /	/ /	
(2) Sending Munic: _____	/ /	/ /	/ /	
(2) Program; Adopted:				
(1) Receiving Munic _____	/ /	/ /	/ /	
(2) Sending Munic. _____	/ /	/ /	/ /	

- 4) For example, is site(s) consistent with applicable H.M.D.C. and/or N.J. Turnpike plans and programs.
- 5) Use current and official State Transportation Plan and Program as prepared by the N.J. Department of Transportation.

SECTION IV: CURRENTLY ADOPTED WATER QUALITY MANAGEMENT PLAN (208) (ATTACH RELEVANT PAGES OF DOCUMENT)

A. Is the proposed housing consistent with the 208 Plan?

	Housing Site(s) Proposed		Check One	
	Loc.	#	Yes	No
1. Within Receiving Munic.			A. / / / /	B. / / / /
			C. / / / /	
2. Within Sending Munic.			A. / / / /	B. / / / /
			C. / / / /	

This review is certified by the undersigned as representing a true and accurate statement of fact.

Based on this review, it is found that the following sites are:

	Housing Site(s) Proposed		In Keeping With Sound Regional Comprehensive Planning	Not in Keeping With Sound Regional Comprehensive Planning
	Loc.	#		
1. Within Receiving Munic.			A. / / /	/ / /
			B. / / /	/ / /
			C. / / /	/ / /
2. Within Sending Munic.			A. / / /	/ / /
			B. / / /	/ / /
			C. / / /	/ / /

**MUNICIPAL PRESENT,
PROSPECTIVE, AND
PRE-CREDITED NEED**

The following figures reflect the gross, aggregate and unadjusted fair share calculations for each municipality determined pursuant to the method outlined in Subchapter 5 of the substantive rules and related base data.

These figures are illustrative of the method described and do not account for crediting (Subchapter 6), drastic alterations (Subchapter 7) and adjustments (Subchapter 8) which may apply to individual municipalities, and which may ultimately result in a lower estimate of the municipal obligation.

From N.J. Council on
Affordable Housing

May 21, 1986

1987-1993 LOW AND MODERATE NEED ESTIMATES BY STATE AND REGION

Indigenous Need	85,134
Reallocated Present Need	34,411
Prospective Need	80,421
Total Need	199,966
Demolition	13,367
Filtering	-51,004
Residential Conversion	-12,102
Spontaneous Rehabilitation	-4,520

STATEWIDE PRE-CREDITED NEED 145,707 *

REGIONAL NEED

Northeast	42,534
Northwest	28,773
West Central	14,720
East Central	23,247
Southwest	21,884
South-Southwest	14,549

* The Council on Affordable Housing is prepared to adjust municipal housing need such that precredited final need will not exceed twenty percent of a municipality's occupied housing units in 1987. This adjustment is to prevent a municipality from expending a drastically altered development pattern as per Section 7 of the Fair Housing Act. The adjustment, if pursued by all municipalities who qualify, will not diminish statewide need by more than 1421 housing units.

1-8. (No change.)

(d) (No change.)

(e) Conditions of the annual permit:

1. The "annual permit" may be issued for building, fire protection, electrical, or plumbing work or any combination of those classifications of work, providing that the individual responsible for work done under the annual permit possesses knowledge "as" "[of]" evidenced in accordance with N.J.A.C. 5:23-2.14(c)5, in the technical work classification for which the annual permit is sought.

i. An approved copy of the annual permit application shall be kept at "[the]" "a" facilities maintenance office "within the municipality having jurisdiction" for review by the Construction Official and appropriate subcode official. "The Construction Official shall be notified of the location of the facilities maintenance office."

2-4. (No change.)

5. A permanent work log, approved by the construction official, of all work done under the "annual permit" must be maintained at "[the]" "a" facilities maintenance office "on site or must be available at the time of the inspection upon 24 hours notice of such inspection". The log must contain the date, a brief description of the work, photographs for any work which was not inspected prior to closing as set forth in 8 below, and the name of the person supervising the work. The log shall be retained for three years.

6. Architectural or engineering drawings, as required by law for work done under the annual permit, shall be prepared by a registered architect or licensed engineer as defined by the statutory requirements of the professional registration laws of this State and shall be kept permanently on file and be made available to the Construction Official and appropriate subcode official, for review upon request.

7. (No change.)

8. Work that is normally inspected prior to closing shall be ordered to be reopened by the facility upon written notice from the Construction Official or appropriate subcode official if he has reason to believe that a violation is present. A photograph shall be taken of any work intended to be enclosed without inspection.

9-11. (No change.)

12. The following work is not permitted under an annual permit:

i-vi. (No change.)

vii. Any modification work, other than routine maintenance, that affects life safety systems, such as, but not limited to:

- (1) Emergency lighting systems;
- (2) Smoke and heat detection systems;
- (3) Stand-by generator systems;
- (4) Emergency smoke evacuation systems.

viii. Any work which would disturb asbestos and require a permit to perform.

5:23-4.18 Standards for municipal fees

(a) General:

1-3. (No change.)

4. The fee to be charged for an annual construction permit shall be charged annually. This fee shall be a flat fee based upon the number of maintenance workers employed by the facility and who are primarily engaged in work that is governed by a subcode. Managers, engineers and clericals shall not be considered maintenance workers for the purposes of establishing the annual construction permit fee. Annual permits may be issued for building, fire protection, electrical and plumbing. Annual permit fees shall be non-refundable.

5. Prior to the issuance of the annual permit, a training registration fee of \$100 per subcode shall be submitted by the applicant to the municipal construction official, who shall forward the fee to the Department of Community Affairs, Bureau of Construction Code Enforcement, Training Section along with copies of the construction permit (Form F-170). Checks shall be made payable to "Treasurer, State of New Jersey".

(b)-(e) (No change.)

5:23-4.20 Department fees

(a)-(b) (No change.)

(c) Department (enforcing agency) fees:

1-11. (No change.)

12. Prior to the issuance of the annual permit, a training registration fee of \$100 per subcode shall be submitted by the applicant to the Department of Community Affairs, Bureau of Construction Code Enforcement, "T" "[i]" "raining" "S" "[s]" "ection along with a copy of the construction permit (Form F-170). Checks shall be made payable to "Treasurer, State of New Jersey".

(a)

NEW JERSEY COUNCIL ON AFFORDABLE HOUSING

Procedural Rules

Adopted New Rules: N.J.A.C. 5:91

Proposed: April 21, 1986 at 18 N.J.R. 821(a).

Adopted: May 22, 1986 by the Council on Affordable Housing, Arthur R. Kondrup, Chairman.

Filed: May 23, 1986 as R.1986 d.221, with substantive and technical changes not requiring additional public notice and comment (see N.J.A.C. 1:30-4.3).

Authority: N.J.S.A. 52:27D-301, et seq., specifically, N.J.S.A. 52:27D-308.

Effective Date: June 16, 1986.

Expiration Date: June 16, 1991.

Summary of Public Comments and Agency Responses:

COMMENT: The proposed rules refer both to the "promulgation" and "adoption" of substantive criteria and guidelines by the Council as the date which will trigger certain time periods in the procedural rules, notably the period within which a municipality must file its housing element. For purposes of consistency, the rules should refer to either the "promulgation" or "adoption" of the substantive rules, even though those terms may be considered to be equivalent.

RESPONSE: The Council agrees with this suggestion and has modified all references to the "adoption" of substantive rules to refer to the "promulgation" of those rules.

COMMENT: N.J.A.C. 5:91-3.2, regarding transferred cases, requires transferred municipalities to submit a housing element within five months from the date of transfer or promulgation of criteria and guidelines by the Council, whichever is later, but thereafter provides that all time periods will be calculated to commence from the date of transfer alone. The rules should provide that the time periods will run from the date of transfer or from the adoption of criteria and guidelines whichever is later.

RESPONSE: The published proposal erroneously omitted the phrase "or from the promulgation of substantive criteria and guidelines by the Council, whichever is later", from the final sentence of N.J.A.C. 5:91-3.2; the phrase has been added upon adoption as part of the rule.

COMMENT: The proposed rules provide that a municipality include within its housing element and fair share plan any proposed regional contribution agreement. The rules should also clarify that a municipality may negotiate or enter into such an agreement at any time, with the Council's approval, and not only upon receiving substantive certification.

RESPONSE: The Council agrees with the comment and has clarified N.J.A.C. 5:91-12.1 by adding a new subsection (d).

COMMENT: The Council should propose rules which define the responsibility of the mediator and outline the scope of mediation.

RESPONSE: Subchapter 7 of the procedural rules addresses the scope of mediation, provides for a review of the mediation process, and requires that the mediator submit a report and recommendation to the Council. Consequently, the scope of the mediation process is defined, and the Council has determined not to restrict the role of any designated mediator by regulation, but prefers to provide a wide range of latitude in the conduct of the mediation process. Moreover, the Council is advised that the Office of Administrative Law is promulgating rules and regulations to govern mediation which may be undertaken by that office; upon the promulgation of such rules the Council may incorporate the procedures contained therein or may in fact propose and adopt its own rules respecting the conduct of mediation as it may find necessary.

COMMENT: The proposed regulations provide that an interested party may participate in the administrative process before the Council, and may receive notice of submissions made by municipalities. Therefore, Subchapter 2 should provide that interested parties may request notice and copies of documents filed with the Council within two weeks of the effective date of the regulations, and that municipalities shall provide such notice within two weeks of a request therefor.

RESPONSE: Although the rule directs municipalities to provide notice to interested parties "at the time it files a resolution of participation or at the time these rules are adopted, whichever is later," the rule does not prohibit an interested party from making a request for such notice at

any time thereafter. Of course, the timeliness of any such requests may be a factor in the Council's consideration of any objections to a municipality's housing element and fair share plan. In any event, the rule simply establishes a time frame within which requests for notice should be made and does not preclude any party from making a request for such notice at any time during the administrative proceedings.

COMMENT: The filing of a municipal housing element and fair share plan should be considered a request for substantive certification in all cases, not just in transferred cases, as set forth in N.J.A.C. 5:91-3.2.

RESPONSE: The suggestion is contrary to Section 13 of the Fair Housing Act and cannot properly be included as a requirement of these rules.

COMMENT: Proposed N.J.A.C. 5:91-8.1(a) appears to give the Council some discretion in deciding whether to refer matters to the Office of Administrative Law. This would be inappropriate since Section 15 of the Fair Housing Act requires referral to the OAL whenever mediation is unsuccessful.

RESPONSE: Section 15 of the Fair Housing Act provides for the referral of cases to the Office of Administrative Law "as a contested case as defined in the Administrative Procedure Act;" thus, the Council must determine whether the matter is "contested," under the APA. Moreover, the Council may also exercise its discretion to hear the matter itself as the reviewing agency.

COMMENT: With regard to the right to file motions, set forth in Subchapter 13, who has the right to file a motion with the Council? Who must be served with the notice of motion? How will the Council decide a motion?

RESPONSE: Motions will be considered on a case by case basis; the Council will conduct itself in a manner similar to that of a court of law and will require all parties to demonstrate standing and that all interested persons or individuals which may be affected by the relief requested have been notified of the motion and given an opportunity to be heard. The Council will decide all motions by a majority vote.

COMMENT: The proposed regulations do not create any kind of priority system among municipal applications; transferred cases should have some kind of priority.

RESPONSE: The Council will implement a system for the administration of cases upon initial review of the matters which come before it, and will devise a means to address all cases in an expeditious fashion.

Summary of Changes:

The rules as adopted by the Council was modified, as reflected above, to clarify that a municipality may enter into or negotiate a regional contribution agreement at any time, not just when the municipality has petitioned for certification of its housing element. Lastly, the rules as adopted include a descriptive heading within certain subparagraphs to further clarify the scope of the rule.

Full text of the adoption follows (additions to proposal shown in boldface with asterisks *thus*; deletions from proposal shown in brackets with asterisks *[thus]*).

CHAPTER 91 PROCEDURAL RULES OF THE NEW JERSEY COUNCIL ON AFFORDABLE HOUSING

SUBCHAPTER 1. GENERAL PROVISIONS

5:91-1.1 Short title

The provisions of this chapter shall be known as "the procedural rules of the New Jersey Council on Affordable Housing."

5:91-1.2 Definitions

The following words and terms, when used in this chapter shall have the following meanings unless the context clearly indicates otherwise.

"Act" means the Fair Housing Act of 1985, L. 1985, c. 222, (C. 52:27D-301, et seq.).

"Agency" means the New Jersey Housing and Mortgage Finance Agency established by L. 1983, c. 530 (C. 55:14K-1 et seq.).

"Council" means the New Jersey Council on Affordable Housing established under the Act, and which has primary jurisdiction for the administration of housing obligations in accordance with sound regional planning considerations in this State.

"Fair Share Plan" means that plan or proposal, which is in a form that may readily be converted into an ordinance, by which a municipality proposes to satisfy its obligation to create a realistic opportunity to meet the low and moderate income housing needs of its region, and which details the affirmative measures the municipality proposes to undertake

to achieve its fair share of low and moderate income housing, as provided in sections 9 and 14 of the Act, and as further described and defined in N.J.A.C. *5:92* *[(substantive rules)]*.

"Filed" means accepted for filing by the Council.

"Housing element" means that portion of a municipality's master plan, consisting of reports, statements, proposals, maps, diagrams and text, designed to meet the municipality's fair share of its region's present and prospective housing needs, particularly with regard to low and moderate income housing, as further described and defined by N.J.A.C. *5:92* *[(substantive rules)]*.

"Housing region" means a geographic area, determined by the Council, of no less than two nor more than four contiguous, whole counties which exhibit significant social, economic and income similarities, and which constitute to the greatest extent practicable the primary metropolitan statistical areas as last defined by the United States Census Bureau prior to July 2, 1985.

"Petition for Substantive Certification" means that petition which a municipality files, or is deemed to have filed, which engages the Council's mediation and review process.

"Receiving municipality" means, for purposes of a regional contribution agreement (RCA), a municipality which agrees to assume a portion of another municipality's fair share obligation.

"Sending municipality" means, for purposes of a regional contribution agreement (RCA), a municipality which seeks to transfer a portion of its fair share obligation to another willing municipality.

SUBCHAPTER 2. RESOLUTIONS OF PARTICIPATION

5:91-2.1 Form

(a) *General:* A resolution of participation shall express the intention of the municipality to participate in the administrative procedures outlined in the Act and in these rules and shall contain such information and be in such form as the Council may from time to time prescribe.

(b) *Notice:* At the time it files a resolution of participation, or the time these rules are adopted, whichever is later, each participating municipality shall provide notice that it has submitted such a resolution to any interested party which has requested to receive such notice.

(c) *Filed:* A resolution of participation will be filed upon receipt by the Council.

5:91-2.2 Action equivalent to a resolution of participation

A municipality in an exclusionary zoning lawsuit transferred to the Council by the courts shall be considered to have filed a resolution of participation as of the date of the transfer.

SUBCHAPTER 3. HOUSING ELEMENT AND FAIR SHARE PLAN

5:91-3.1 Development of housing element

(a) *General:* A municipality which files a resolution of participation within four months after the effective date of the Act shall, within five months after the Council's *[adoption]* *promulgation* of its substantive criteria and guidelines, prepare and file with the Council a housing element and any fair share housing ordinance introduced and given first reading and second reading in a hearing pursuant to N.J.S.A. 40:49-2 which implements the housing element.

(b) *Letter of Intent:* A municipality which files a resolution of participation under this subchapter shall, within 30 days after the Council's *[adoption]* *promulgation* of its substantive criteria and guidelines, file with the Council, and serve upon any interested party which has so requested, a letter or report, in such form as the Council may from time to time determine, which contains, at a minimum, the following items:

1. The municipality's calculations of its fair share of its region's present and prospective need, as determined by a formula or methodology established by the Council; and

2. A statement of those specific adjustments to the calculation set forth in Section 7 of the Act, which the municipality intends to rely upon to alter the initial calculation, and the general reasons therefor; and

3. A proposed schedule for the preparation of a draft housing element and fair share plan, together with a description of all expert reports or studies upon which the municipality intends to rely in support of any proposed adjustments and a proposed schedule for the submission of such expert reports or studies; and

4. A description of all efforts the municipality has undertaken to provide notice to interested parties and the public that it has engaged the administrative procedures of the Act and will propose a housing element and fair share plan for the Council's review.

(c) ***Objectors:*** Within 15 days of receipt of a municipality's letter of intent, any interested party or potential objector shall file with the Council a statement of those portions of the report to which it objects, and shall state the reasons therefor.

(d) ***Draft Housing Element and Fair Share Plan:*** A municipality which files a resolution of participation under this subchapter shall, within three months after the Council's "[adoption]" ***promulgation*** of its substantive criteria and guidelines, file with the Council, and serve upon any interested party which has so requested, a draft housing element and fair share plan, which addresses in detail those items and factors identified in the municipality's letter of intent. The draft report shall be in a form as the Council may from time to time determine and shall include at least the following:

1. A statement of those factors set forth in Section 7 of the Act upon which the municipality will rely to adjust its calculated fair share of its region's present and prospective need for low and moderate income housing; and

2. A description and explanation of the expert reports and studies upon which the municipality relies and which supports its request for such adjustments; and

3. A copy of all such expert reports and studies or a status report of all such documents; and

4. Documentation of all efforts at premediation with interested parties and objectors, as well as any premediation conferences with Council staff, as well as documentation of any and all public hearings held in the development of a draft housing element and fair share plan.

(e) ***Objectors:*** Within 15 days after receipt of a municipality's draft housing element and fair share plan, any interested party or potential objector which disputes any findings or statements contained in the draft shall notify the Council and the participating municipality of its objections and a summary of the reasons therefor. Any interested party or potential objector shall also document all efforts at premediation with the participating municipality, including any participation at public hearings conducted by the municipality regarding the draft housing element and fair share plan.

(f) ***Housing Element and Fair Share Plan:*** A municipality which files a resolution of participation under this subchapter shall, within five months after the Council's "[adoption]" ***promulgation*** of its substantive criteria and guidelines, file with the Council and serve upon any interested party which has so requested, the municipality's proposed housing element and fair share plan, as well as any fair share housing ordinance introduced and given first reading and second reading in a hearing pursuant to N.J.S.A. 40:49-2 which implements the housing element. The proposed housing element and fair share plan shall be in a form determined by the Council and shall include at least the following:

1. A complete description of the municipality's calculation of its fair share of its region's present and prospective need for low and moderate income housing, pursuant to a methodology or formula determined by the Council; and

2. A complete and final statement of any and all adjustments, set forth in Section 7 of the Act, which the municipality relies upon in its calculation, as well as a summary of all support documentation, expert reports, studies and technical data; and

3. Copies of all such expert reports, studies or technical data; and

4. A response to objections to the municipality's draft housing element and fair share plan; and

5. Documentation of all efforts at premediation with potential objectors or interested parties, all efforts at premediation conferences with the Council, and all public hearings undertaken in the development of the municipality's proposed housing element and fair share plan.

5:91-3.2 Transferred cases

A municipality in an exclusionary zoning lawsuit transferred to the Council by the courts pursuant to section 16 of the Act, shall within five months from the date of transfer or promulgation of substantive criteria and guidelines by the Council, whichever is later, prepare and file with the Council a housing element and fair share plan. Any such municipality shall adhere to the procedures and time constraints specified in N.J.A.C. 5:91-3.1; all time periods set forth therein shall be calculated to commence from the date of transfer, or from the promulgation of substantive criteria and guidelines by the Council, whichever is later*.

5:91-3.3 Dismissal

In the event that a municipality fails to timely submit its housing element and fair share plan, or undertake those actions required pursuant to N.J.A.C. 5:91-3.1, the Council shall no longer retain jurisdiction and shall dismiss the matter.

5:91-3.4 Municipality which does not file ***a*** resolution ***of participation*** and is not in an exclusionary zoning lawsuit

A municipality which does not file a resolution of participation within four months after the effective date of the Act, and which is not in an exclusionary zoning lawsuit, may do so at any time thereafter. Upon filing a resolution of participation, the municipality shall request the Council to establish a schedule for the submission of the municipality's housing element and fair share plan, and any proposed regional contribution agreement.

SUBCHAPTER 4. PETITIONS FOR SUBSTANTIVE CERTIFICATION

5:91-4.1 Petition

(a) A petition for substantive certification shall be in such form and shall contain such information as the Council may from time to time determine.

(b) A municipality may, at any time within six years after it has filed a housing element and fair share plan with the Council, petition for substantive certification.

5:91-4.2 Action equivalent to a petition for substantive certification

A municipality in any exclusionary zoning lawsuit transferred to the Council by the courts shall be deemed to have filed a petition for substantive certification upon the timely submission of the municipality's housing element and fair share plan as required pursuant to N.J.A.C. 5:91-3.2.

5:91-4.3 Notice

(a) A municipality which has filed a petition for substantive certification, or is deemed to have so filed, shall publish notice of this petition in a newspaper of general circulation within the municipality and the county.

(b) The Council shall publish an updated list of all petitions for substantive certification it has received monthly in newspapers of general circulation within the State.

5:91-4.4 Inspection

A municipality which has filed a petition for substantive certification and proposed housing element and fair share plan with the Council shall make available for public inspection within the municipality, during business hours, copies of the proposal and supporting documentation, and shall include in its notice made pursuant to N.J.A.C. 5:91-4.3 the times, and places within the municipality at which the proposal will be made available for public inspection.

SUBCHAPTER 5. OBJECTIONS TO A PROPOSED HOUSING ELEMENT AND FAIR SHARE PLAN

5:91-5.1 Objection

(a) ***General:*** Within 45 days of publication of the notice of a municipality's petition for substantive certification, any person shall file objections with the Council. These objections shall be in a form as may be determined by the Council and shall include at least:

1. A statement as to each and every aspect of the municipality's proposed final housing element and fair share plan with which the person disputes; and

2. An explanation of the basis for each and every such dispute or objection, including, where appropriate, citations to expert reports, studies, or other data relied upon; and

3. Copies of all such expert reports, studies and data relied upon; and

4. Proposed modifications, changes, or other measures which will resolve the objection or dispute consistent with the Council's criteria and guidelines; and

5. A statement documenting all efforts at premediation, participation in conferences, or public hearings and a summary of the results of any such efforts.

(b) ***Completeness:*** An objection shall constitute as completely as possible a full statement of all issues, or matters contained in the proposed housing element and fair share plan, with which the objector is in dispute.

SUBCHAPTER 6. CONSIDERATION OF A MUNICIPALITY'S HOUSING ELEMENT AND FAIR SHARE PLAN WHERE NO OBJECTIONS ARE FILED

5:91-6.1 Council review

(a) ***General:*** Unless an objection to a municipality's proposed housing element and fair share plan is filed within 45 days of the publication of the notice of the municipality's petition for substantive certification, the Council shall review the petition and shall issue substantive certification if it shall find that:

1. The municipality's proposed housing element and fair share plan is consistent with the rules and criteria adopted by the Council and is not inconsistent with achievement of the low and moderate income housing needs of the region as adjusted pursuant to the Council's criteria and guidelines; and

2. The combination of the elimination of unnecessary housing cost generating features from the municipal land use ordinances and regulations, and the affirmative measures in the final proposed housing element and fair share plan make the achievement of the municipality's fair share of low and moderate income housing realistically possible after allowing for the implementation of any regional contribution agreement approved by the Council.

5:91-6.2 Conference

In conducting its review of a petition for substantive certification the Council may meet with the municipality.

5:91-6.3 Grant, denial or conditional denial of substantive certification

(a) Upon a review of a petition for substantive certification the Council may grant the petition, deny the petition, or condition its denial of certification upon changes in the municipality's proposed housing element or fair share plan. Any such denial or conditions for approval shall be in writing and shall set forth the reasons for the denial or the imposition of conditions.

(b) If, within 60 days of the Council's denial or conditional denial of a petition for substantive certification, the municipality refiles its petition with changes satisfactory to the Council, the Council shall issue substantive certification.

(c) Within 45 days after the Council has granted substantive certification the municipality shall adopt its fair share housing ordinance as approved by the Council.

SUBCHAPTER 7. MEDIATION

5:91-7.1 General

(a) The Council shall engage in mediation where a timely objection to a municipality's petition for substantive certification is filed. The Council may appoint a designee to conduct mediation, and the Council or its designee shall meet with the representatives of the municipality and the objectors and attempt to mediate a resolution of the dispute.

5:91-7.2 Scope of mediation

(a) Within 10 days after a matter is referred to the Council for mediation, the Council, or its designee, shall meet with representatives of the municipality and the objector and shall establish a schedule for mediation.

(b) The Council or its designee shall meet with the municipality and the objectors as often as the Council or its designee shall determine necessary and may impose such deadlines for the submission of information, reports, studies or other documentation as the Council or its designee shall find necessary.

(c) The Council or its *[mediator]* *designee* may, upon notice to the parties, during the course of any mediation, rely upon or use any interim adjudications previously entered by a trial court in the matter, or any stipulations previously entered into by the parties in any such litigation.

(d) The Council may during the mediation, determine to review itself or to refer to the Office of Administrative Law any issue which may facilitate a satisfactory conclusion to the mediation process. This review shall be conducted as an adjudication complying with all applicable due process requirements.

(e) Mediation before the Council or its designated mediator may be conducted for a period of not more than 60 days after the time for the receipt of objections to a petition for substantive certification has expired. If the Council is dissatisfied with the progress of the mediation proceedings, or determines that the parties have reached an impasse, and that mediation could not resolve the dispute, the Council may declare an end to the mediation process and refer the matter to the Office of Administrative Law for adjudication as a contested case as provided in N.J.A.C. 5:91-8. The period for mediation established in this section may be extended by the Council for good cause shown.

5:91-7.3 Review of mediation

(a) Before the conclusion of the 60-day mediation period, if such mediation was conducted by a mediator designated by the Council, the mediator shall prepare a report and recommendation to the Council, detailing the following factors:

1. The progress of the mediation proceedings; and
2. The issues in dispute between the parties; and
3. The stipulations or other agreements between the parties; and

4. A recommendation that the Council either grant, deny, or conditionally deny substantive certification, and the reasons therefor, or a recommendation that the matter be referred to the Office of Administrative Law for adjudication as a contested case.

(b) The Council shall determine whether to grant, deny or conditionally deny substantive certification, or to refer the matter to the Office of Administrative Law for adjudication as a contested case.

(c) If the matter is referred to the Office of Administrative Law, the parties shall be bound by any agreements entered into during the mediation.

SUBCHAPTER 8. REFERRAL TO OFFICE OF ADMINISTRATIVE LAW (OAL)

5:91-8.1 General

(a) In the event mediation efforts are unsuccessful the Council shall determine whether to refer the matter to the Office of Administrative Law (OAL) for resolution as a contested case. Upon determining that the matter shall be referred to the Office of Administrative Law for adjudication as a contested case, the Council shall transmit the matter to the OAL together with the mediation report, the result of any adjudication under N.J.A.C. 5:91-7.2(d), the municipality's petition for substantive certification and any objections thereto.

(b) The Office of Administrative Law shall expedite its hearing process as much as practicable in accordance with N.J.S.A. 52:27D-315(c).

(c) A written transcript of all oral testimony and copies of all exhibits introduced into evidence shall be submitted to the Council by the Office of Administrative Law simultaneously with a copy of the initial decision. The costs of the transcript shall be shared equally by the municipality and the objectors.

SUBCHAPTER 9. COUNCIL'S REVIEW OF THE INITIAL DECISION

5:91-9.1 Review

Within 45 days after the issuance of an initial decision from the Office of Administrative Law, the Council shall, upon review of the record submitted by the Administrative Law Judge, adopt, reject or modify the recommended report and decision. Unless the Council modifies or rejects the initial decision within this period of time, the decision of the Administrative Law Judge shall be deemed adopted. For good cause shown, upon certification by the Director of the Office of Administrative Law and the Council, the time limit established under this subchapter may be extended pursuant to N.J.A.C. 1:1-16.6.

SUBCHAPTER 10. GRANT, DENIAL OR CONDITIONAL DENIAL OF SUBSTANTIVE CERTIFICATION

5:91-10.1 Substantive certification

(a) Substantive certification, shall be issued if:

1. The municipality's proposed housing element and fair share plan is consistent with the rules and criteria adopted by the Council and not inconsistent with the obligation to create a realistic opportunity to meet the low and moderate income housing needs of its region as adjusted pursuant to the Council's criteria and guidelines; and

2. The combination of, the elimination of unnecessary housing cost generating features from the municipal land use ordinances and regulations, and, affirmative measures in the housing element and fair share plan make the achievement of the municipality's fair share of low and moderate income housing realistically possible after allowing for the implementation of any regional contribution agreement approved by the Council.

(b) Upon conducting the review set forth in (a) above, the Council may deny the petition for substantive certification, or condition a grant of substantive certification upon specific changes in the housing element or fair share plan. Any denial or conditions for approval shall be in writing and shall set forth the reasons for the denial or conditions. If, within 60 days of the Council's denial or conditional denial, the municipality refiles its petition with changes satisfactory to the Council, the Council shall issue substantive certification.

(c) In conducting its review set forth in this section, the Council may meet with the municipality and any objector thereto.

(d) Within 45 days of the grant of substantive certification, the municipality shall adopt its fair share housing ordinance as approved by the Council. The Council's grant of certification will be void and of no force and effect in the event that any municipality fails to timely adopt its fair share ordinance.

SUBCHAPTER 11. GENERAL POWERS**5:91-11.1 Restraining Orders**

At any time, upon its own determination, or upon the application of any interested party, and after a hearing and opportunity to be heard, the Council may issue such orders as may be necessary to require that a participating municipality take appropriate measures to preserve scarce resources that may be essential to the satisfaction of the municipality's obligation to provide for its fair share of its region's present and prospective need for low and moderate income housing.

5:91-11.2 Accelerated denial of substantive certification

At any time, upon its own determination, or upon the application of any interested party, and after a hearing and opportunity to be heard, the Council may deny substantive certification without proceeding further with the mediation and review process.

SUBCHAPTER 12. REGIONAL CONTRIBUTION AGREEMENTS (RCAs)**5:91-12.1 Terms of agreement**

(a) ***General:** A municipality may propose to transfer up to 50 percent of its fair share to another municipality within its housing region by means of a contractual agreement into which two municipalities voluntarily enter. A sending municipality which is required to submit its housing element and fair share plan within five months, as provided in N.J.A.C. 5:91-3.1, shall include in its letter of intent and draft housing element and fair share plan the following:

1. ***Letter of Intent:** A sending municipality which proposes to transfer a portion of its fair share to another receiving municipality shall include within its letter of intent:

- i. A statement of reasons for the proposed regional contribution agreement; and
- ii. A summary of the proposed agreement, including an estimation of the number of units to be transferred, and an explanation or description of any proposed compensation for the acceptance of such units by a receiving municipality; and

2. **Draft Housing Element and Fair Share Plan:** A sending municipality shall include within its draft report a detailed statement of the terms and conditions of a proposed regional contribution agreement which shall include specific information regarding the factors enumerated in 1. above, and which shall further specify the range of costs associated with such a proposed agreement and the source of any funds or resources upon which the sending municipality will rely. The draft shall also contain an alternative plan by which the municipality will achieve its fair share in the event the municipality fails to enter into its proposed regional contribution agreement.

(b) ***Housing Element and Fair Share Plan:** A municipality which proposes to enter into a regional contribution agreement shall include within its proposed housing element and fair share plan a statement of the terms and conditions of any proposed agreement, including:

1. The number of units to be transferred; and
2. The amount of compensation to be paid in return for such a transfer, the nature of such compensation, and the source of such compensation; and

3. A draft or final form of contract which includes all terms and conditions of the regional contribution agreement; and

4. A memorandum of understanding with a receiving municipality that such receiving municipality will enter into the proposed regional contribution agreement with the sending municipality and will execute an agreement substantially embodying the terms and conditions set forth above, and which includes a schedule for the submission of a project plan by the receiving municipality to the Agency for review, as set forth in section 12(e) of the Act.

(c) A regional contribution agreement, the substance of which has been approved by the Council in granting a petition for substantive certification, may be entered into upon the Council awarding substantive certification or thereafter.

(d) Nothing in this subchapter shall be construed to prohibit any municipality from negotiating or proposing to enter into a regional contribution agreement at any time.

5:91-12.2 Review by county planning boards or agencies

(a) Regional contribution agreements shall be reviewed by the county planning board or agency of the county in which the receiving municipality is located. The county planning board or agency shall consider whether or not the transfer agreement is in accordance with sound comprehensive regional planning, in accordance with the terms of the master

plan and zoning ordinance of both sending and receiving municipalities, its own county master plan, and the State Development and Redevelopment Plan (SDRP) or State Development Guide Plan (SDGP) if the SDRP is not completed.

1. In the event that there is no county planning board or agency in the county in which the receiving municipality is located, the Council shall determine whether or not the agreement is in accordance with sound comprehensive regional planning.

(b) All determinations of a county planning board or agency shall be in writing and shall be made within such time limits as the Council may prescribe, beyond which the Council shall make those determinations. No fee shall be paid to the county planning board or agency for its review pursuant to this subsection.

5:91-12.3 Review by the Council

(a) Upon review of a proposed regional contribution agreement, by the county planning board or agency in which the receiving municipality is located, and which has been approved in substance by the Council in granting substantive certification of a municipality's petition, the Council shall determine whether or not the proposed agreement creates a realistic opportunity for the provision of low and moderate income housing, within convenient access to employment opportunities, as set forth in the municipality's petition.

(b) Upon the recommendation of the Agency, the Council may approve as part of the regional contribution agreement a provision that the time limitations for contractual guarantees or resale controls for low and moderate income units included in the proposed project be for less than 30 years if the Agency determines that modification is necessary to assure the economic viability of the project.

(c) The Council shall approve a proposed regional contribution agreement upon a finding that:

1. The agreement provides a realistic opportunity for low and moderate income housing within convenient access to employment opportunities; and
2. That the agreement is consistent with sound comprehensive regional planning; and

3. That the receiving municipality's project plan is a feasible and viable means of achieving the purposes of the agreement, as determined by the Agency.

(d) The Council shall approve all regional contribution agreements by resolution; the Council shall set forth in its resolution a schedule of the contributions to be appropriated annually by the sending municipality. A copy of the adopted resolution shall be filed promptly with the Division of Local Government Services in the Department of Community Affairs and the Director shall thereafter not approve an annual budget of a sending municipality if it does not include appropriations necessary to meet the terms of the resolution.

5:91-12.4 Receiving municipalities

(a) ***Statements of intent:** Municipalities which may intend to enter into a regional contribution agreement as a receiving municipality shall notify the Council of their interest and of any proposed conditions or requirements for their participation.

1. Statements of intent submitted under this section shall be in the form of a resolution adopted by the municipality.

2. Statements of intent filed with the Council pursuant to this section shall not preclude any receiving municipality from negotiating with any potential sending municipality.

3. No receiving municipality shall be required to accept a greater number of low and moderate income units through an agreement than it has expressed a willingness to accept in its statement, but the number stated shall not be less than a reasonable minimal number of units, as determined by the Council, not to exceed 100.

(b) ***Memorandum of understanding:** A municipality which intends to enter into a regional contribution agreement as a receiving municipality shall, before a sending municipality submits its proposed housing element and fair share plan to the Council, enter into a memorandum ***[or]** ***of** understanding with the sending municipality which:

1. Outlines the terms and conditions of the proposed regional contribution agreement; and

2. Includes a schedule of when the project plan will be submitted to the Agency for review as required by (c), below.

(c) ***Project Plan:** A receiving municipality shall submit a proposed project plan, which shall be in such form and contain such information as the Agency may require, to the Agency pursuant to the schedule contained in the municipality's memorandum of understanding with the

sending municipality. The Council or the Agency may impose time limitations for the submission of a project plan, or any updates or additions thereto.

(d) *Feasibility review by the Agency:* The Agency may undertake such review as is necessary, including scheduling meetings or hearings and requiring further information, studies or reports, in order to render a timely feasibility analysis of a proposed project for the Council's review. Failure of the receiving municipality to promptly or properly comply with the requirements of the Agency may result in the Agency's refusal to certify the feasibility of the proposed project.

5:91-12.5 Enforcement of a regional contribution agreement

The Council shall take such actions as may be necessary to enforce a regional contribution agreement.

SUBCHAPTER 13. MOTIONS

5:91-13.1 Form of motion

An application to the Council for an order shall be by motion. A motion shall be by notice of motion in writing, unless the Council permits it to be made orally. Every motion shall state the time and place when it is to be presented to the Council, the grounds upon which it is made, the nature of the relief sought, and shall be accompanied by a proposed form of order. When a matter becomes a contested case, motions shall be pursuant to N.J.A.C. 1:1-9.

5:91-13.2 Oral argument

A movant's request for oral argument shall be made either in his moving papers or reply. A respondent's request for oral argument shall be made in his answering papers. All requests for oral argument shall state the reasons therefor*(e)*.

5:91-13.3 Affidavits, briefs and supporting statements

Motions and answering papers shall be accompanied by all necessary supporting affidavits and briefs or supporting statements. All motions and answering papers shall be supported by affidavits for facts relied upon which are not of record or which are not the subject of official notice. Such affidavits shall set forth only facts to which the affiants are competent to testify. Properly verified copies of all papers or parts of papers referred to in such affidavits may be annexed thereto.

5:91-13.4 Time for serving and filing motions and affidavits or briefs

A notice of motion shall be served and filed not later than 20 days before the time specified for the return date unless otherwise ordered by the Council. If a motion is supported by affidavit or brief, the affidavit or brief shall be served and filed with the motion. Any opposing affidavits or briefs, or any cross-motions, shall be served and filed not later than 10 days before the return date. Answers or responses to any opposing affidavits or briefs, or to any cross-motions, shall be served and filed not later than five days before the return date unless the Council otherwise orders.

5:91-13.5 Orders

The Council shall render a decision on the motion by issuing the proposed order filed with the motion or by instructing the prevailing party to prepare and submit an appropriate order. If the Council has made findings of fact and conclusions of law explaining its disposition of the motion, the order shall so indicate.

ENVIRONMENTAL PROTECTION

OFFICE OF THE COMMISSIONER

Hazardous Substance Discharges: Reports and Notices

Adopted New Rule: N.J.A.C. 7:1-7

Proposed: August 5, 1985 at 17 N.J.R. 1826(a).

Adopted: May 22, 1986 by Richard T. Dewling, Commissioner, Department of Environmental Protection.

Filed: May 23, 1986 as R.1986 d.229, with technical and substantive changes not requiring additional public notice or comment (N.J.A.C. 1:30-4.3).

Authority: N.J.S.A. 13:1K-15 et seq. (P.L. 1984, c.210).

Effective Date: June 16, 1986.

Expiration date: September 16, 1990.

DEP Docket No. 037-85-06.

Summary of Public Comments and Agency Responses:

On August 5, 1985 the New Jersey Department of Environmental Protection ("NJDEP" or "Department") proposed a new rule to implement the provisions of N.J.S.A. 13:1K-15 et seq. (P.L. 1984, c. 210), commonly known as the "Hazardous Substance Discharge—Reports and Notices Act" ("Act"). NJDEP held open a public comment period for written comments until September 4, 1985. Four written comments and one oral comment by telephone were received on the proposed new rule during the public comment period.

The Department's changes to the rules upon adoption consist of clarification of text and format. For example, N.J.A.C. 7:1-7.5(b) 9 has been revised pursuant to several comments informing NJDEP that the submittal of a Discharge Prevention Containment and Countermeasure Plan ("DPCC") for a company should not be required unless a DPCC plan has not been previously submitted to the Department. NJDEP has clarified the various reporting requirements for all interested parties at N.J.A.C. 7:1-7.5, 7.7 and 7.8. Also, the telephone number and mailing address for NJDEP's Field Operations, Compliance and Enforcement in Yardville, New Jersey has been updated in N.J.A.C. 7:1-7.4 and 7.5(c) and (d). NJDEP summarizes and responds to the comments received and explains the revisions upon adoption to N.J.A.C. 7:1-7 as follows:

COMMENT: One commenter felt that the definition of an industrial establishment was too broad and requested clarification of the exemption process for industrial establishments detailed in N.J.A.C. 7:1-7.9(c). This commenter felt that the definition of an industrial establishment should be limited to only those locations where employees are stationed during normal working hours.

RESPONSE: The regulatory definition of "industrial establishment" at N.J.A.C. 7:1-3 is identical to the statutory definition at N.J.S.A. 13:1K-15(c). The Department does not have the authority to either limit or expand the scope of the definition of industrial establishment inconsistent with the provisions of the Act. However, N.J.A.C. 7:1-7.9, titled "Procedure for Inclusions or Exemption of Groups Within SIC Codes from the Definition of an Industrial Establishment," does provide at N.J.A.C. 7:1-7.9(c) through (g) a process for exempting Standard Industrial Classification ("SIC") codes from the scope of the definition of industrial establishments. The Department believes that the exemption process at N.J.A.C. 7:1-7.9 does not require any further clarification. Interested parties should prepare an SIC exemption request, including all appropriate documentation, evidence and other proofs available, for submission to the Department at the address specified in the "General Program Information" section at N.J.A.C. 7:1-7.4.

COMMENT: Most commenters questioned the definition of a reportable hazardous discharge and suggested the inclusion of de minimis requirements.

RESPONSE: The statutory definition of "hazardous discharge" specified in the Act has been incorporated into N.J.A.C. 7:1-7.3. Both the Act and N.J.A.C. 7:1-7 derive a definition of "hazardous discharge" from any discharge required to be reported pursuant to the Spill Compensation and Control Act, N.J.S.A. 58:10-23.11 et seq. ("Spill Act"), and any regulations promulgated thereto but not reported to NJDEP prior to the Act's December 10, 1984 effective date. N.J.S.A. 58:10-23.11(b) defines "discharge" broadly without de minimis criteria except the requirements that said discharge may result in damages to the lands, waters or natural resource of New Jersey. A "reportable discharge" for Spill Act purposes pursuant to N.J.A.C. 7:1E-2.1(a) is "any discharge of a hazardous substance which is in such quantity or concentration as may be harmful or which poses a foreseeable risk of harm to public health or welfare, or to natural resources". The Department cannot unilaterally change the definition of hazardous discharge, including the addition of de minimis criteria, without appropriate statutory amendments to the Spill Act. The lack of de minimis criteria for hazardous discharges in both the Act and the Spill Act reflect the reality that even small quantities of certain hazardous contaminants can pose a substantial risk to the public health, safety and environment.

COMMENT: Several commenters felt that the reporting process of N.J.A.C. 7:1-7 was cumbersome and duplicative. These commenters feel that the information requested under the Act and N.J.A.C. 7:1-7 is already required to be submitted under the Spill Act and Spill Act Regulations, N.J.A.C. 7:1E.

RESPONSE: The Department recognizes that the Act and the Spill Act cover the same universe of hazardous discharges. The purpose of this Act and N.J.A.C. 7:1-7 is not to create duplicative hazardous discharge reporting requirements. The Act and N.J.A.C. 7:1-7 were created to enhance the communications between the industrial community, local officials and NJDEP regarding hazardous discharges. The Department

Q You mean subsidized under the Section 8 existing housing program?

A Yes.

Q And so if you were doing the plan now you would make a further adjustment and subtract out those units also?

A Yes, I would also adjust the bungalow conversions year-round that have been made.

Q Tell me about them.

A There have been two. One was through an approval by the Planning Board to subdivide a former bungalow colony with small lots. There are 14 units that are available there. And another approval which was granted to the Diocese of Paterson for another 12 units by the Board of Adjustment, total of 26.

Q These were both done by variances?

A Yes, one was done by use variance, Board of Adjustment. The other was done by variance and bulk and set back variances in the case of Planning Board approval.

Q The Diocese of Paterson is Board of Adjustment? That's a use variance?

A That was a use variance, yes. And then

1
2 the other bungalow approval was a subdivision,
3 preliminary subdivision application and multiple
4 bulk variance, lot size and so forth. That was
5 Planning Board approval.

6 Q Now, looking first at the Diocese of
7 Paterson, when was that variance granted?

8 A Most recent one was '82 or '83, and it
9 was approval of a 5-year variance that had been
10 given on a temporary basis, I think, in '78 or '79.
11 It maybe in our previous discussions on this case.

12 Q Let me understand exactly what the
13 status of these units were. These were preexisting
14 summer bungalows?

15 A Yes.

16 Q Which in '78 or '79 or thereabouts were
17 converted to year around use?

18 A Correct, for moderate, low moderate
19 income housing by people -- the program is called
20 Campus Ministry. I don't know that much about it.
21 It was for low priced units to be rented and
22 occupied by these people.

23 Q This is administered by?

24 A By the Diocese of Paterson.

25 Q So in '82 or '83 this variance that

had been previously approved was continued
definitely or for another fixed period?

A Yes, it was, I'm not sure.

Q The other project, the 14 units, does
that have a name or something we can call it by?

A The area is called Green Hunt Park.
The man who did it is Michael Liclowski.

Q Green Hunt Park, those 14 units were
also preexisting units that were used as summer
units?

A Yes.

Q And they were converted to year-round
units?

A Yes.

Q Have they actually been converted at
this point?

A He has converted most of the units.
Physically, he could not occupy them. He still
can't. He does not have final approval. He has
preliminary approval.

He is in the process of completing a
water line and other items, and he has a preliminary
approval which is good for 3 years.

Q What makes this low or moderate income

housing?

A The size of the units and the people who would use them. He's been renting them and his intention, I guess, is to keep renting them, but he now has the ability to sell them when he gets final approval or to continue to use them for rental units as he has been.

Q Has he been renting them illegally on a year-round basis?

A Well, he's rented them beyond the time whether he had to have them vacated as seasonal for several years.

Q Do you know what rents he's charging?

A No.

Q Let's just talk about bungalows generally. How many bungalows are there in Randolph?

A Now?

Q Yes.

A Excluding these?

Q Excluding these.

A Probably 30 to 50 left.

Q Excluding these, are they all at this point restricted to seasonal use?

A The ones that are physically able to be

1
2 occupied at this time are not in such horrendous
3 condition that they are totally dilapidated.

4 Yes, they are subject --

5 Q Approximately what proportion are
6 sufficiently not dilapidated that they could be used?

7 A Maybe 30.

8 Q To your knowledge, are any of these
9 units being illegally used for year-round housing?

10 A One is, one area, maybe 20 units.

11 Q Are there any plans to legitimize?

12 A There have been a couple of attempts by
13 this particular party to legitimize, but they have
14 not been.

15 He hasn't provided plans in a
16 reviewable form that any Board could deal with as
17 the other two applicants have done. So he's been in
18 municipal court for the violations and he's been
19 advised to prepare plans and submit them to the
20 appropriate board, as the other two applicants have
21 done. He's somewhere in this process now and I
22 don't know exactly where.

23 Q Has he actually filed an application at
24 this point?

25 A He did file an application with the

1
2 Board of Adjustment at one time, and then he came
3 back in and the court had already heard this
4 application, so they dismissed the second one.

5 Q So he has nothing pending at the
6 present time?

7 A Not as far as I know.

8 Q Now, you mentioned before that there
9 had been a Bungalow Task Force?

10 A Yes.

11 Q Did the Bungalow Task Force make any
12 recommendations on the subject?

13 A Yes, in fact the one that, the Green
14 Hunt Park application, this man essentially followed
15 the recommendations of the Task Force.

16 The other matter that has been approved
17 was both before and after the Bungalow Task Force
18 Report, essentially that one went along with it, too.

19 Q Now, has anybody actually been evicted
20 from any of the bungalows now restricted to seasonal
21 use?

22 A I think so.

23 Q Do you know if that's happened in the
24 past 3 years?

25 A I believe it has.
