| | 1 | (The meeting convenes at 7:05 |
| | 2 | p.m.) |
| | 3 | (Compliance with the Open Public |
| | 4 | Meetings Act is noted.) |
| | 5 | MR. TISCHENDORF: Here. |
| | 6 | MR. BRENNAN: Here. |
| | 7 | MR. LARKIN: Here. |
| | 8 | MR. DAHLBOM: Here. |
| | 9 | THE CHAIRMAN: Mr. Sagotsky, I |
| | 10 | believe has an announcement to make. |
| | 11 | MR. SAGOTSKY: Yes. A Motion has |
| <u>.</u> | 12 | been instituted by the Applicant for the purpose of |
| | 13 | appointing a joint planner. He uses the word "impartial |
| | 14 | planner. For my purposes, or our purposes, I would |
| | 15 | call it a joint planner. And he has represented in |
| | 16 | his Motion by Affidavit why he wants it, and has |
| | 17 | cited a brief as his authority for wanting it. |
| | 18 | There has been no official action |
| | 19 | taken by this Board on this application. |
| | 20 | Consequently, I ask for an executive session for the |
| | 21 | purpose of discussing the opinion of this Board on |
| | 22 | that application for this request for a joint planner. |
| | 23 | And then after you've decided that, then to come out |
| | 24 | to make the announcement. |
| | 25 | It has also been brought to my |
| | | |

ς.

۰.

STATE SHORTHAND REPORTING SERVICE. INC.

1 attention that the Applicant desires a copy of our 2 transcript of the proceedings and has sought to work out with me some basic charge for that. Our machine 3 has been giving us difficulty. We've been having 4 5 problems with it, according to Mrs. O'Connor, in 6 making some of the copies and completing some. It 7 apparently has come to the attention of State 8 Shorthand Reporting, the service that we're using, 9 that we are having these problems and that we have 10 been making copies for the benefit of the Board. And therefore, there has been presented to me this 11 12 evening a breakdown on the cost of these copies by 13 the State Shorthand Service. And I want to take upar 14 with the Board, also in executive session, what would 15 be a reasonable charge for an extra transcript to 16 furnish it to the Applicant so he may have the 17 benefit of what has transpired here. And I want to 18 show you that, it is a letter, and have you read it 19 and come up with some reasonable, workable solution, 20 so that those who desire and order same can have the 21 copy of the transcript at a very reasonable cost. 22 So assuming there is no objection 23 from anyone as to this executive session -- and I would also -- then, I ask you to call it; and, I ask, 24 25 of course, that our Clerk come in. And then we will

5 1 make our announcements later on in the evening as to 2 our, meaning your, decision. 3 THE CHAIRMAN: Sam, are we going to do it here? 4 5 MR. SAGOTSKY: I assume that you 6 have a special room to go into and have your 7 executive session. Based on this announcement, yes, 8 I think that room would be -- that's what I had in 9 mind, but, of course, it's up to you. 10 MR. FRIZELL: I just might note 11 that I have volunteered to borrow a copy and make my 12 own copies if you have trouble. THE CHAIRMAN: We'll be presented 13 en de la composition 14 with a breakdown of the cost. 15 An executive session is called 16 for a period of time so we can consider the 17 independent planner as well as very briefly consider 18 the costs associated with the transcripts. We will 19 return as soon as we can. 20 (Whereupon a recess is taken at 21 7:15 p.m.) 22 (Whereupon the hearing reconvenes 23 at 7:50 p.m.) 24 THE CHAIRMAN; We have finished 25 our executive session concerning the use of an ŧ

1 independent planner. And the unanimous decision is 2 that this Board does not feel that we need the 3 services of an independent planner. The basis of : that decision were really two-fold, one, the Board is 4 5 capable of analyzing the testimony of the several 6 planners that we are going to hear during this 7 testimony and capable of analyzing what they're 8 saying and come to an independent judgment as to the 9 merits or demerits of the case presented to us. 10 Number two, we believe that the testimony that we 11 have from Mr. Halsey would certainly qualify as 12 independent testimony from someone connected with ere regizer 13 neither side in this proceeding. And we also feel it's very consistent -- if I can have one second and 14 15 read from page ten of the transcript of the meeting 16 of June 17th; at which point Mr. Frizell had 17 suggested that we consider an independent planner. 18 The Chairman was Mr. Schrumpf, at that point states 19 as follows, page ten: No. Once the names are 20 suggested, we will still have to decide if indeed we 21 would use one of the offices of an independent 22 planner. 23 Within that, we came to a 24 unanimous decision that this Board does not require 25 the services of an independent planner.

6

7 1 Sam, do we have any other 2 business? 3 MR. SAGOTSKY: Well, that is your 4 decision and the application for the joint planner, 5 or independent planner, as Mr. Frizell calls it, the 6 application is based on an Affidavit of Mr. Frizell 7 and also a brief as to his view of the law. The 8 hearing is up before the judge on August the 8th at 9 nine a.m. on the matter. 10 THE CHAIRMAN: Could everybody 11 hear what I've said? 12 MR. SAGOTSKY: I talk for the 13 Applicant. Perhaps you may repeat what I have said 14 for everybody's benefit. 15 (Whereupon Mr. Sagotsky's prior 16 statement is read back by the Court Réporter.) 17 MR. SAGOTSKY: And I will ask Mr. 18 Frizell if he knows what judge is going to hear it. 19 MR. FRIZELL: No. 20 MR. SAGOTSKY: This is summertime 21 and weire not always sure what judge will hear it. 22 But it will be heard on argument and the judge will 23 have the final say on this application. This Board 24 has decided this evening, for a reason stated, they do not need or want a so-called independent planner; 25

| | 8 |
|----------------------------------|--|
| | that they have that they have had the benefit of |
| | 2 testimony; and, that their decision at this time is |
| | 3 that they do not need one nor they do not want one; |
| | and, they have the benefit of a planner that they |
| | consider independent. That's only my summary of what |
| . • | 6 was said. |
| | 7 THE CHAIRMAN: No other business |
| | B before we |
| | 9 MR. SAGOTSKY: Well, the other |
| 1 | business I have left to Mr. Frizel's offer was and |
| 1 | l we've broken it down at 50 cents a page. And I |
| 1 | |
| 1973 (ST 1 2017 (State | another procedure, borrowing a copy and going to work |
| 1 | 4 on all those pages yourself. We have spent |

| | 10 |
| 1 | WILLIAM QUEALE, a witness called on |
| 2 | behalf of the Colts Neck Township Planning Board, |
| 3 | having been duly sworn according to law, testified as |
| 4 | follows: |
| 5 | |
| 6 | THE WITNESS: William Queale, Jr., |
| 7 | Q-u-e-a-l-e, business address, 20 North Pennsylvania |
| 8 | Avenue, Morrisville, Pennsylvania; home address, 45 |
| 9 | Noreen Drive, Morrisville. |
| 10 | |
| 11 | DIRECT EXAMINATION BY MR. MARKS: |
| 12 | i i i i i i i i i i i i i i i i i i i |
| 13 | Q. Mr. Queale, are you a licensed, |
| 14 | professional planner in the State of New Jersey? |
| 15 | A. Yes. |
| 16 | Q. And will you summarize for us or in |
| 17 | particular list for us your academic and professional |
| 18 | qualifications? |
| 19 | MR. FRIZELL: Mr. Marks, I |
| 20 | wouldn't have any objection to Mr. Queale's testimony. |
| 21 | So if you want to submit these, I know he has a |
| 22 | written copy of his resume, you want to put it in for |
| 23 | the Board? |
| 24 | MR. MARKS: Fine. We will submit |
| 25 | this. |
| | |

|--|--|----|
| | | |
| 1 | MR. SAGOTSKY: I think the Board | |
| 2 | should have a general idea of his qualifications. It | |
| 3 | would be good to have on the record as well as the | |
| 4 | complete resume. | |
| 5 | THE WITNESS: I'm a graduate of | |
| 6 | Rutgers University, 1959, with a Bachelor of Arts in | |
| 7 | economics and city planning. I am licensed in New | |
| 8 | Jersey, number 47. I'm also an approved planner in | |
| 9 | charge in the State of Pennsylvania, member of the | |
| 10 | American Planning Association and a full member of | |
| 11 | the American Institute of Certified Planners, having | |
| 12 | served as the past president, past vice president, | |
| 13 | member of the executive committee of the New Jersey | |
| 14 | chapter of that professional association. I am also | |
| 15 | a member of Housing Redevelopment Officials and | |
| 16 | member of New Jersey Federation of Planning Officials, | |
| 17 | having served as former secretary of the central area | |
| 18 | and currently serving as Associate Director of the | |
| 19 | state agency I'm a member of association New Jersey | |
| 20 | Conservation Commissions; and, also our firm is a | |
| 21 | member of New Jersey Association of Consulting | |
| 22 | Planners. | |
| 23 | From 1959 till 1961, I worked | |
| 24 | with the New Jersey Division of State and Regional | |
| 25 | Planning in their local planning bureau. Prom *61 to | .7 |
| , and the second se | | |

|-----|--|
| 1 | I was a member of the firm Alvin Genshin (phonetic) |
| 2 | Associates and was responsible for supervising all |
| 3 | planning work. |
| 4 | From 1971 to present, I have been |
| 5 | associated with my own firm of Queale and Lynch, |
| 6 | Incorporated. |
| 7 | During these 20 some years I have |
| 8 | been responsible as a planner in charge for some 44 |
| 9 | municipalities, master plans and zoning ordinances, |
| 10 | all portions, for county planning in New Jersey and |
| 11 | have represented a variety of private interests such |
| 12 | as the site selection for Richard Stockton State |
| 13. | College, the Pirst Federal Savings and Loan of |
| 14 | Hammonton; advisory responsibility for 41 additional |
| 15 | towns and have been qualified as an expert on |
| 16 | numerous occasions for the courts, boards of |
| 17 | adjustment, governing bodies, planning commissions |
| 18 | and so forth. |
| 19 | I'm currently serving on the New |
| 20 | Jersey Department of Agriculture's Farmland |
| 21 | Preservation Study Steering Committee. |
| 22 | I have been a guest instructor in |
| 23 | Rutgers in planning courses as well as the Graduate |
| 24 | School of Education; and, I have been a panelist for |
| 25 | a variety of League of Municipalities and Federation |
| | |

Queale - direct 13 F unctions. I have also served and am currently 2 serving as a member of the Board of Trustees of the 3 Woods School and Residential Treatment Center and I'm 4 a member of the governing body in my own community. 5 MR. SAGOTSKY: Is that a township 6 or borough? 7 THE WITNESS: Township. 8 MR. SAGOTSKY: Township Committee? 9 THE WITNESS: Yes. 10 MR. MARKS: I would like to have 11 this marked and put this into evidence, if there is 12 no objection. I don't know if you want to start a ار در این با همهای بر از منطقه با این کار میکند. از مراجع میکنی با میکنی با این میکند از مطلق میکند از میکند میکنی میکنی میکنی میکنی میکنی میکنی میکنی میکنی می مراجع از مراجع میکنی میکنی میکنی از مطلق میکنی میکن 13 new numbering system or --1. a series and a series of the s 14 MR. FRIZELL: I have one question. 15 Mr. Queale have you ever Ł 16 represented a private developer on a given advice 17 development project of more than fifty residential 18 units? 19 THE WITNESS: No. 20 Well, I could MR. SAGOTSKY: 21 start it as PB-1. 22 MR. MARKS: PB-1 sounds fine to 23 24 MR. SAGOTSKY: 7/29/80. 25 background of Queale and Lynch by William Queale.

| | Queale - direct 14 |
|----|---|
| 1 | (Whereupon the resume of William |
| 2 | Queale, dated 7/29/80 is marked PB-1 for |
| 3 | identification.) |
| 4 | BY MR. MARKS: |
| 5 | Q. Mr. Queale, to pause one second on your |
| 6 | qualifications your qualifications and indeed of the |
| 7 | thrust of your work, is that mostly in the |
| 8 | governmental sphere? Would you qualify it as that? |
| 9 | A. Yes. |
| 10 | Q. Mr. Queale, have you worked for the |
| 11 | Township of Colts Neck and, if so, since when? |
| 12 | A. Yes, I have worked for the Township since |
| 13 | roughly 1969. I was the planner in charge of the |
| 14 | master plan in the 1971 program that culminated in |
| 15 | the zoning ordinance. I was also involved in the |
| 16 | revisions to that ordinance when the Municipal Land |
| 17 | Use Law was adopted. I've offered general consulting |
| 18 | services on selected subdivisions and site plans that |
| 19 | have been referred to me and I'm currently involved |
| 20 | in the general reevaluation of the master plan. |
| 21 | Q. Are you familiar with the plans for the |
| 22 | Colts Neck Village that have been submitted by the |
| 23 | Applicant, Orgo Farms and Greenhouses? |
| 24 | A. Yes. I point out that with respect to this |
| 25 | particular application, I have evaluated broad |
| | |

Queale - direct 15 1 external aspects of the plan as opposed to the 2 internal aspects of detailed site plan or subdivision 3 considerations. What I've been most concerned with 4 is the fact that the project is for approximately 220 5 acres, of which some 187 are proposed for residential 6 development. And on the 187 acres a little over 7 1,100 dwelling units are proposed, representing six 8 units per acre on those residential portions. Itve 9 also taken note that there is proposed to be a water 10 system and a sewer system and also the fact that, the 11 project does propose a mixture of housing types plus 12 which industrial and commercial facilities near the 13 Q. Has -- your examination and evaluation 14 15 has really been the effect of the project as opposed 16 to the internal layout of the project? 17 Α. Yes. 18 0. In your evaluation, what considerations 19 have you included or considered? 20 Well, the basic items that I was concerned, with Α. 21 included the location of the project, the acreage 22 that I just identified and the intensity in terms of 23 the project, the number of units, as well as the 24 mixture of commercial and industrial uses; the 25 location, with respect to the relationship of this

16 Queale - direct 1 tract within the Township and the region; the 2 township's existing development and agricultural patterns; and, in an effort to recognize the Mount 3 4 Laurel issues with the township's location and 5 agricultural characteristics. 6 Q. Now, in your work as a professional 7 planner, are you familiar with the requirements of 8 the Municipal Land Use Law? 9 A. Yes. 10 And within that scope as a professional Q. 11 planner, do you normally consider the requirements of 12 the Municipal Land Use Law? Yes. 13 A: ... 14 Would you outline your evaluation and Q. 15 conclusion for us, in particular applying those . 16 criteria to this project? 17 I have evaluated the project within the scope A. 18 of the requirements of the Municipal Land Use Law and what I would like to do, with the Board's permission, 19 20 is to identify those statute provisions that I was 21 concerned with and then give you my conclusions and the reasons for the conclusions as they apply to each. 22 23 First of all, the principles of the application ∞ 24 that I just outlined were done with respect to the 25 requirements for a use variance calling to a 1

Queale - direct

1

2

3

4

5

6

7

particular case and a special reason. The next, the negative criteria with respect to detriment to the public good and whether or not there is substantial impairment to the intent and purpose of the zone plan and zoning ordinance; and, next, the application's relationship to the purposes as spelled out under the Municipal Land Use Law.

8 After having reviewed these, my conclusions are 9 that, in my opinion, a use variance should not be 10 granted for this application; that there is neither 11 particular case nor special reason to warrant it; 12 that the development as proposed will impair the 13 intent and purpose of the zone plan and zone 14 ordinance; and, if developed, the development would 15 have substantial detriment to the public good and 16 would not meet several purposes of the Land Use Law. 17 And I've then taken each of these and outlined them 18 with some specific responses.

19 As far as particular case and special reasons,
20 I feel there are particular case and special reasons
21 to deny the variance. First, the size and magnitude
22 of this project inserts significant changes upon the
23 community. The issues, in my opinion, should be
24 resolved through the master planning process and
25 enacted by a legislative modification to the

STATE SHORTHAND REPORTING SERVICE, INC.

17

| | Queale - direct 18 |
|----|---|
| 1 | development regulations ordinance. This project of |
| 2 | 222 acres represents about one percent of the |
| 3 | Township's total land area. But the proposed number |
| 4 | of units adds about 58 percent. To just under 2.000 |
| 5 | units that I ve estimated would be in the Township |
| 6 | today; also the 1,137 units proposed on 187 acres, |
| 7 | coming to six units per acre, as compared to a half |
| 8 | unit per acre density that is permitted under the |
| 9 | present zoning. But the site is located in an area |
| 10 | where the actual density is 0.02 of a unit per acre, |
| 11 | as of 1977. The project itself also includes |
| 12 | industrial and commercial uses which further |
| 13 | intensify the proposal. It does propose a new water |
| 14 | and sewer system in the Township where no such |
| 15 | systems exist today. And, in my opinion, the project |
| 16 | does not have a special reason to be granted a |
| 17 | variance by virtue of attaching or proposing roughly |
| 18 | 120 subsidized units through private development; |
| 19 | that is, proposing 1,137 units in total. |
| 20 | Secondly, I feel that while the application |
| 21 | attempts to respond to some of the housing issues, it |
| 22 | falls short of addressing some of the other important |
| 23 | Township issues that are best handled and should be |
| 24 | handled through the legislative process, in that |
| 25 | these issues are interrelated issues. One would be |
| | |

an an an an Anns an Angai

المعالية المعالية - المراجع المراجع المعالية الع المراجع المعالية الع

1 coordinating development in conjunction with 2 agricultural preservation. This project does not 3 provide for any agricultural preservation within the 4 development, yet it's located in one of the six major 5 areas of the Township that has agricultural -- a 6 concentration of agricultural activities. And as of 7 1979, for example, agriculture does represent some 45 8 percent of the Township's land area as qualified. 9 farmland. To give some indication of the intensity 10 of agriculture within the community, approximately 58 11 percent,) something over half, of the qualified farmland 12 was also cropland. But, in particular, Colts Neck 13 has a very strong horse industry and we did do a 14 survey a year or so ago of some 58 farms that have 15 And, in particular, it shows that the horse horses. industry is a growing industry with about 85 percent 16 17 increase in the horse population between 1970 and 18 1979. But another indication of the strength of the 19 horse industry is that of the 58 farms, horse farms, 20 66 percent of them had made major capital 21 improvements and about 41 percent had also expanded 22 their acreage during this time period. 23 Another consideration, with respect to the need 24 for legislation and the interrelationship of land us a 25 functions and planning functions, is consideration of

19

Queale - direct

1

2

3

4

5

an expansion of a regional utilities pattern. This project is away from any of the existing utility patterns such as Monmouth Consolidated water mains on Swimming River Road and the <u>sewer system in Tinton</u> Falls.

20

Also, I think there's an legitimate question 6 7 that if the Township is to have a higher density, the 8 issue of locating that higher density with respect th drainage toward the reservoir is also a legitimate 9 10 function to be considered during the legislative and 11 planning function. Another issue would be coordinating decisions of higher density developments 12 with the state county and regional plans; and finally, 13 14 evaluating alternate locations within the Township 15 with respect to other legitimate concerns such as 16 responding to transportation needs, major job centers, 17 major shopping areas what are the existing 18 neighborhood and regional development characteristics 19 with respect to a proposal of this magnitude and 20 other locations within the Township that might or 21 might not have opportunity for this type of development with respect to the sufficient land area 22 23 being availability. Another --

Q. Just one second, Mr. Queale. I would
25 like to have this letter from the Department of ;

21 Queale - direct 1 Community Affairs dated July 23, 1980 marked for 2 identification. 3 MR. SAGOTSKY: Letter entitled, 4 State of New Jersey Department of Community Affairs 5 dated July 23, re, SDR-80-14, addressed to Mr. George Handzo, Clerk, Colts Neck Township, offered as PB-2. 6 7 (Whereupon a letter dated 7/23/80 8 is marked PB-2 for identification.) 9 MR. SAGOTSKY: And so marked. 10 THE CHAIRMAN: Should we read, 11 that, Sam? 12 MR. MARKS: I'm going to. 13 MR. FRIZELLE A copy of that 14 letter went to the Zoning Board of Adjustment, did it 15 I have not objection to putting it right in. not? 16 MR. SAGOTSKY: I don't recognize 17 it, at the moment. 18 MR. MARKS: Would you be good 19 enough to read that? 20 THE WITNESS: This is addressed 21 to Mr. George Handzo, Clerk of Colts Neck Township, 22 dated July 23, and it's in reference to SDR-80-14: 23 Dear Mr. Handzo, This office is 24 in receipt of a copy of an application for 25 development in Colts Neck Township entitled "Colts

22 Queale - direct 1 Neck Village" which has been furnished in compliance 2 NJSA 40:55D-12(q). 3 The Division of Planning has 4 prepared a State Development Guide Plan for the State 5 of New Jersey pursuant to --6 MR. FRIZELL: That indicates that 7 we sent a complete set of the plans to the DCA and 8 this is its response. 9 You had sent a full MR. MARKS: 10 set of plans? 11 MR. FRIZELL: Yes. 12 THE WITNESS: -- C. 13:1B-15.52. The purpose of this plan is to recommend general 13 14 areas where growth should be encouraged as well as 15 where it should be discouraged. The proposed Colts 16 Neck Village residential project is in a designated 17 limited the proposed "Colts Neck Village" residential 18 project is in a designated Limited Growth Area. 19 Within the context of the Guide Plan, this 20 designation reflects low-density development patterns 21 and the absence of growth-supporting infrastructure 22 or services. To maintain the character of Limited 23 Growthe Areas, the Guide Plan that public investments 24 in such areas be limited to those required to 25 maintain health, safety and general welfare standards

| | Queale - direct 23 |
|----|--|
| 1 | for existing development and not for major new growth. |
| 2 | The applicant's project would be in general |
| 3 | conformance with the Guide Plan if the development |
| 4 | does to the alter the general character of the |
| 5 | surrounding area and does not require the support of |
| 6 | new public investments. |
| 7 | We understand that the Township |
| 8 | has been ordered by Superior Court to rezone land |
| 9 | within its jurisdiction to provide suitable areas |
| 10 | tore variety of residential uses. It is not the |
| 11 | purpose of the Guide Plan to suggest how this order |
| 12 | is to be addressed by the Township, but rather to |
| | indicate generally where public investments over |
| 14 | which the State government exercises some control |
| 15 | should be directed to accomplish long-range, |
| 16 | statewide land use goals. Consideration of the Guide |
| 17 | Plan at the local level is encouraged, but other |
| 18 | factors, such as the relationship of the zoning |
| 19 | ordinance to the Township's overall land use plan, |
| 20 | are also important. |
| 21 | Since the proposed development |
| 22 | apparently will not require additional public |
| 23 | investments, its ultimate acceptability as currently |
| 24 | designed requires a local determination. Furthermore, |
| 25 | while the Court does not seem to require the |
| | |

ų.

| | Queale - direct 24 |
|----|---|
| 1 | acceptance of this proposal, it does require the |
| 2 | Township to provide appropriate areas where |
| 3 | developments such as this one are permitted. |
| 4 | It should be noted that an |
| 5 | in-depth review of the submitted application has not |
| 6 | been made by Division of Planning. I would |
| 7 | appreciate being informed of the Township's disposition |
| 8 | of this application as soon as official action is |
| 9 | recorded. If you have any questions regarding this |
| 10 | matter, feel free to contact me at (609) 292-2953. |
| 11 | Very truly yours, Richard A. Gindon Director. |
| 12 | BY MR. MARKS: |
| 13 | Q. Would you indicate what copies |
| 14 | A. The Planning Board Chairman, the Zoning Board |
| 15 | of Adjustment Chairman, the Monmouth County Planning |
| 16 | Director and Mr. Dave Frizell. |
| 17 | Q. Do you have any comment or thoughts on |
| 18 | this letter? |
| 19 | MR. SAGOTSKY: It has been marked |
| 20 | PB-2. |
| 21 | A. Well, I think one of the major things indicated |
| 22 | in there is that the State Guide Plan is prepared, |
| 23 | with the intent of guiding the direction of state |
| 24 | capital funds for public investments. They've |
| 25 | indicated their understanding that there would be no |
| | |

STATE SHORTHAND REPORTING SERVICE, INC.

- . .

| | Queale - direct 25 |
|----|--|
| 1 | request for public monies as far as this application |
| 2 | is concerned. It does not answer other direct |
| 3 | questions that might pertain to the specific |
| 4 | application. But I think at least my interpretation |
| 5 | of this letter comes with some background, |
| 6 | understanding, of what the plan itself calls for. |
| 7 | And that even though there are private utilities |
| 8 | proposed in this application, for example, the State |
| 9 | Guide Plan is appropriately reviewed with respect to |
| 10 | its reasonableness and its philosophy. The fact that |
| 11 | there is an effort, apparently, to discourage the |
| 12 | expenditure of public money for public utilities |
| 13 | raises the question of whether or not subsidized |
| 14 | units would get the support of DCA. But this is a |
| 15 | real an early stage, something to be reviewed at a |
| 16 | later date when I get a specific application. |
| 17 | THE CHAIRMAN: Would you give a |
| 18 | definition of what public investments mean? |
| 19 | THE WITNESS: In my view, it |
| 20 | would be major public investments, water system, |
| 21 | public sewer systems, additional monies for state |
| 22 | highway projects, mass transportation systems. |
| 23 | THE CHAIRMAN: Would this |
| 24 | THE WITNESS: Local jurisdictions |
| 25 | might, if there is state aid available for school |
| | |

1

| | Queale - direct 26 |
|----|---|
| 1 | expansion, for Federal funds where there would be |
| 2 | some a state review might involve local funds for |
| 3 | a new municipal building, public schools, things of |
| 4 | that sort. |
| 5 | THE CHAIRMAN: Would it include |
| 6 | money for highways? We had some testimony that there |
| 7 | would be public monies involved, apportioned for part |
| 8 | of the expansion. |
| 9 | MR. FRIZELL: No, no public money. |
| 10 | THE CHAIRMAN: No public money? |
| 11 | Excuse me. |
| 12 | MR. BRENNAN: Well, you only |
| 13 | address the issue of the county road, isn't that |
| 14 | correct, 537? Nothing was ever said about 520. , |
| 15 | MR. FRIZELL: 5207 |
| 16 | MR. BRENNAN: I mean State Route |
| 17 | 34. The changes wouldn't be on 537? |
| 18 | MR. FRIZELL: I'm sorry. What |
| 19 | about it? In other words, there's no public |
| 20 | investment money anticipated as a result of this |
| 21 | project. I don't know how else to answer that. |
| 22 | MR. BRENNAN: Well that's what |
| 23 | I'm saying, the state was not involved, the only |
| 24 | change would be made to 537? |
| 25 | MR. FRIZELL: Yes, you're right. |
| | |

``.

| · · · | | |
|------------|------|---|
| | | Queale - direct 27 |
| 1 | 1 | If there were any changes that were directly could |
| | 2 | be found to be a direct result of this, including 537 |
| | 3 | or the other improvements, we would anticipate that |
| ۱ ۱ | 4 | the Township would use or assess the developer. |
| | 5 | We're not seeking any state funds. |
| ì | б | MR. SAGOTSKY: If I may dd, the |
| | 7 | implication I get is that the DCA would consider, |
| | 8 | with reference to the expenditure of public funds, |
| | 9 | anything that would have to do or also have to do |
| | 10 | with the development of highways or additional widths |
| | 11 | /or other improvements to highways that might have to |
| | 12 | be brought about as a result of a development? |
| | 13 | That's the impression I get. Am E |
| | 14 | THE WITNESS: The expenditure of |
| | 15 | public money for highways is one of public |
| | 16 | expenditures that they would attempt to address by |
| | 17 | implementing their Guide Plan. But the basic thrust |
| ¢ | 18 | of the Guide Plan in terms of the planned use, |
| , | 19 | intensities they have developed, growth corridors and |
| | 20 | urban centers; they have also identified their |
| | 21 | agriculture areas and things like the Pinelands areas |
| | 22 | where no development is recommended. And basically |
| | , 23 | in between these areas they have what they call "limite |
| | 24 | growth areas", which they look forward to a future |
| A . | 25 | land reserve; but, in the meantime, trying to put |

7

STATE SHORTHAND REPORTING SERVICE, INC.

•

28 Queale - direct 1 their public monies into improving systems in the 2 higher density areas rather than putting their money into continued suburban sprawl. That's my general 3 4 impression of the plan and, I think, a reasonable 5 interpretation of that. 6 MR. SAGOTSKY: I have nothing 7 further. 8 BY MR. MARKS: 9 Mr. Queale, do you have any opinion Q. 10 whether the granting of the variance for this 11 application would substantially impair the intent and 12 purpose of the present zone plan and the present zoning ordinance? 13 14 As I indicated earlier, I reviewed the Yes. Α. 15 other conditions of the statute. In my opinion, this 16 variance could substantially impair the intent and 17 purpose of the plan and the ordinance; basically 18 recognizing that in order to offer 120 subsidized 19 units and approximately 400 additional units 20 identified as least cost units, the Applicant proposes. 21 to increase the density in this area approximately 12 22 times the allowed density. 23 I ve put this however in the context of the 24 litigation that has been ongoing related to this, 25 that should the Township not prevail in its appeal to

| | Queale - direct 29 |
|-----|--|
| 1 | the Supreme Court, the implications that I've |
| 2 | outlined above are proper legislative considerations |
| 3 | in the development of a new land use element and new |
| 4 | zoning regulations. On the other hand, should the |
| 5 | Township prevail at the Supreme Court level, the |
| 6 | approval of this project would be a substantial |
| 7 | deviation from the intent of the present zone plan |
| 8 | and zoning ordinance, in view of the size and |
| 9 | intensity of the use. |
| 10 | I then also looked at the other negative |
| 11 | criteria with respect to this variance and, in my |
| 12 | opinion, it could have the potential to cause |
| .13 | substantial detriment to the public good; that while |
| 14 | the project itself is generally well designed, my |
| 15 | concern falls into two general areas, that the |
| 16 | implication to possible agricultural preservation |
| 17 | efforts would be substantially impacted by the |
| 18 | approval of this variance; and, secondly, the |
| 19 | application locates this project where it recommends |
| 20 | a leap frog pattern into the center of the Township |
| 21 | away from the coastal corridor of development within |
| 22 | the region. I ve also taken into it that during the |
| 23 | presentation of the various documents that have been |
| 24 | submitted, that there are numerous considerations |
| 25 | offered. And these are certainly worthwhile |
| | |

 $\mathbf{\tilde{}}$

/

Queale - direct

1 considerations and valid municipal concerns. But 2 that a number of these considerations, such as tax 3 consequences, the smaller household sizes, the 4 reduced population impact because of declining family 5 sizes and small sizes of some of these units, school 6 enrollment, mixed housing types cluster design 7 techniques, the staging proposals in creating the 8 housing with the recreation and open space plan, 9 having bicycle and pedestrian paths as an internal 10 circulation plan, having a landscaping plan and 11 proposing an open space management program are not 12 unique to this site or any other site. And they do 13 not represent either a particular case or a special 14 reason as applied to this site. They are procedural 15 and design techniques, as I indicated, that are 16 important in evaluating a plan, either a subdivision 17 or a site plan; and, in anticipating the Township's 18 future responsibilities in preparing an ordinance. 19 But they are not in my opinion justifiable reasons for granting a use variance. 20

30

Q. Mr. Queale, do you have an opinion
whether the application before this Board does or
does not meet the special reasons test and whether or
not it satisfies the negative criteria tests? And if
you could, could you relate that to the purposes as

| | · | <u> </u> | |
|----|------------------------------------|---------------|----------|
| | Queale - direct | | 31 |
| 1 | stated in the Municipal Land Use L | aw? | |
| 2 | MR. PRIZELL: | I'm going to |) object |
| 3 | to that. I don't think anything i | in Mr. Queale |)'S |
| 4 | background qualifies him to tell u | s or tell th | e Board |
| 5 | what special reasons is or is not. | . If Mr. Que | ale, |
| 6 | would tell us what his concept of | it is, if he | e can |
| 7 | define it in 50 words or less, he' | s better that | an I am. |
| 8 | But to simply come to a conclusion | a on a legal | concept, |
| 9 | to have a planner testify on the c | conclusion of | fa. |
| 10 | legal concept called special reaso | ons, I think, | , is |
| 11 | requesting something of Mr. Queale | that is bey | yond his |
| 12 | capability. | | |
| 13 | MR. BRENNAN; | Itm sympathe | tic to |
| 14 | your comment because when the ques | stion was be | ing |
| 15 | asked, I thought it was asking an | opinion of 2 | Law. |
| 16 | And probably the only thing that a | cept me from | making |
| 17 | that observation was that probably | y Counsel for | r the |
| 18 | Applicant has given us a lot of pl | lanning advi | ce over |
| 19 | the last two months. | | |
| 20 | touché MR. FRIZELL: | To put it i | nto |
| 21 | context, to say to put it in co | ontext, my | |
| 22 | understanding of the law and I | m not sayin | g it's |
| 23 | the only one is that special re | easons can b | e found |
| 24 | where a given development fulfills | s any one of | the |
| 25 | purposes of zoning. Now, if Mr. (| Dueale will | testify |

| | Queale - direct 32 |
|--------|--|
| 1 | that it doesn't fulfill any of the purposes of zoning, |
| 2 | this particular application, then I guess we can |
| 3 | continue. But then we'll go on from there. But |
| 4 | that's my understanding of the law. And I have Bill |
| 5 | Cox's famous treatise on it with me. But rather to |
| 6 | get to a conclusion, maybe we can ask some more |
| 7 | specific, planning type questions. |
| 8 | MR. SAGOTSKY: May I suggest, |
| 9 | perhaps, the time has come and I leave it to you |
| 10 | for a ruling and bear in mind that you are not held |
| 11 | 100 percent strictly to evidence and you can |
| 12 | ascertain if the witness can give us his version. |
| - 13 - | And then it's up to the Board to make the decision as |
| 14 | to what weight to give to the evidence. I think that |
| 15 | might short cut a great many arguments. |
| 16 | MR. MARKS: I would agree with |
| 17 | that. I would just ask if I could respond to Mr. |
| 18 | Frizell's initial argument. |
| 19 | I know Mr. Frizell is fond of |
| 20 | referring to Judge Lane's opinion and I happen to |
| 21 | have an older opinion of Judge Lane in a case |
| 22 | involving Marlboro Township. As far as I know, it's |
| 23 | an unreported decision. It's a lower court case. |
| 24 | MR. SAGOTSKY: Superior Court |
| 25 | case? |
| | |

.

STATE SHORTHAND REPORTING SERVICE, INC.

.

.

.

. .

Queale - direct

33 1 MR. MARKS: Yes, a Superior Court 2 case, a trial case. And Judge Lane pretty much, in 3 his decision, takes a broad view. And I would just like to read half of a paragraph. In fact, Judge 4 5 Lane says that: Special reasons is a flexible 6 concept. Broadly speaking, it might be defined by 7 the purposes of zoning as set forth in the -- the 8 then statute, NJSA 40:55-32, namely, to lessen 9 congestion in the streets; secure safety from fire, 10 flood, panic and other dangers; promote the health, 11 morals or the general welfare; provide adequate light 12 and air; prevent the overcrowding of land and buildings; 13avoid undue concentration of population -- and Judgeen elle elle construction de la 14 Lane refers to other cases. 15 MR. FRIZELL: Well, I don't want 16 to compliment myself but I think that's what I just 17 said. Ask Mr. Queale whether or not this particular 18 application can be said to further none of the 19 purposes of zoning and we'll continue. 20 MR. MARKS: I think the question 21 MR. FRIZELL: Don't ask him to 22 comment or to make an opinion on the ultimate -- on 23 whether or not -- well, on the ultimate fact of the 24 case, which is supposed to be the function of the 25 Zoning Board of Adjustment.

| | Queale - direct 34 |
|-----|--|
| 1 | MR. MARKS: You had a planner |
| 2 | here last time, if I recall correctly, who felt that |
| 3 | he wasn't familiar with special reasons. I believe |
| - 4 | that we are presenting a planner who can discuss |
| 5 | those. |
| 6 | MR. FRIZELL: Well, Mr. Radway |
| 7 | was here because we brought him in as a fiscal |
| 8 | analyst. Whether or not he knew anything about |
| 9 | special reasons is certainly no reflection on Mr. |
| 10 | Radway. The fact that he holds a planning license |
| 11 | indicates the number of people who hold planning . That |
| 12 | licenses in this state and anything else and the |
| 13 | things that you have to have to get one. But that s |
| 14 | another matter. Can we just ask Mr. Queale more |
| 15 | pertinent questions to the issue of planning and not |
| 16 | legal issues? |
| 17 | MR. SAGOTSKY: Well, my question |
| 18 | is, why can't that be reserved for cross-examination? |
| 19 | Let the Board make a ruling. |
| 20 | MR. PRIZELL: All right. |
| 21 | MR. SAGOTSKY: Let the Board hear |
| 22 | it and save it for your cross. |
| 23 | MR. PRIZELL: Bither way. |
| 24 | THE CHAIRMAN: Any thoughts Mr. |
| 25 | Marks? |
| | • |

STATE SHORTHAND REPORTING SERVICE, INC.

| | Queale - direct 35 |
|---------------------------------------|--|
| 1 | Proceed with your question. |
| | |
| .3 | the question. |
| 4 | BY MR. MARKS: |
| , , , , , , , , , , , , , , , , , , , | Q. Mr. Queale, do you have any opinion |
| 6 | whether the Orgo application does or does not |
| 7 | constitute special reasons and whether it does or, |
| 8 | does not satisfy the negative criteria test? And if |
| g | you do, would you could you relate that to the |
| 10 | purposes behind the Municipal Land Use Law? |
| 11 | A. I can do that. |
| 12 | Q. Thank you, sir. Would you? |
| 2 13 | A. I have reviewed several all of the purposes |
| 14 | and have comments on several of them, that the |
| 15 | application, as I see it, does not meet the following |
| 16 | purposes of the Municipal Land Use Law. Number one, |
| 17 | that in the area of encouraging municipal action that |
| 18 | will guide appropriate uses or development in a |
| 19 | manner promoting the public health, safety and |
| 20 | general welfare, I feel that there are other locations |
| 2] | besides this tract capable of flexible design |
| 22 | techniques that are available through legislative |
| 23 | action; in that other locations are available that |
| 24 | don't drain toward the reservoir, other locations |
| 25 | that are also in closer proximity to major job |
| | |

· 、

Queale - direct

1 centers and shopping areas; and, as well as having 2 greater convenience for the traveling public; and, as 3 such, being in closer proximity, the issue of saving 4 fuel consumption is also included. Other locations 5 also have equal access to Route 537 and the limited 6 bus service that's provided on that highway. With 7 respect to the purpose that the application conflicts 8 with the development and general welfare of the neighboring municipalities and county and state as a 9 10 whole, I would observe that this project places 11 itself, with its size and intensity, within the midst of the agricultural area, if you take the southeast 12 13 quadrangle, 537 and 34, which I indicated, 68 14 dwelling units, 0.02 of an acre, the equivalent of 15 one unit per 50 acres. It is away from existing 16 utility corridors. It's away from the perimeter of 17 the county and state coastal corridors and as such . conflicts with the corridors shown on the county and 618 19 state plans and opposes the logical expansion of the 20 plan by leap frogging into the center of the Township Also, it does drain into the reservoir, where other 21 22 locations could avoid this, in my opinion. Also, 23 this application does not promote the establishment of appropriate population densities and concentrations 24 that will contribute to the wellbeing of persons, 25

36

Queale - direct

| 1 | neighborhoods, communities and regions, and | |
|-----------|---|--|
| 2 | preservation of the environment. The project is a ' | |
| 3 | 12-fold increase in the allowable density in this | |
| 4 | particular area. But it represents a 300-fold | |
| 5 | increase in the intensity of the development compared | |
| б | to the existing development patterns in this area. | |
| 7 | While it would provide alternate housing, I point out | |
| 8 | that it does require more travel to work and to | |
| 9 | shopping and social functions; and, again, is | |
| 10 | injected into this agricultural area. In my opinion, | |
| 11 | it is not a logical projection outward of the | |
| 12 | established regional development corridor. It's | |
| anto de c | located where it poses a greater threat to the | |
| 14 | reservoir than would a location where there would be | |
| 15 | a positive drainage away from the reservoir. | |
| 16 | Q. Have you had an opportunity to peruse or | |
| 17 | read through the testimony of Mr. Robert Halsey who | |
| 18 | was called by this Board as a witness several weeks | |
| 19 | ago? | |
| 20 | A. Yes. | |
| 21 | Q. And your opinions with regard to the | |
| 22 | logical progression of the development with respect | |
| 23 | to corridors of development being at either end of | |
| 24 | the Township, does that conflict or how does that | |
| 25 | respond to the testimony given by Mr. Halsey? | |
| | | |

STATE SHORTHAND REPORTING SERVICE, INC.

- .

37

| | Queale - direct 38 |
|-----|--|
| 1 | A. I would see it as being similar. |
| 2 | Q. You would agree with Mr. Halsey's |
| 3 | testimony that the corridors of growth are towards |
| 4 | the edge the edges of this Township? |
| 5 | A. Yes. I also reviewed the additional purposes |
| 6 | of the Municipal Land Use Law. In my opinion, the |
| 7 | application does not encourage the appropriate and |
| 8 | efficient expenditure of public funds by the |
| 9 | coordination of public development with land use |
| 10. | policies. It does result, as I indicated earlier, in |
| 11 | a new water system; whereas, other locations could |
| 12 | tap into an existing water main. |
| 13 | 9. Could I just stop you at that point? |
| 14 | We're all aware that the water system here would be |
| 15 | private. But do you have an opinion as to the costs |
| 16 | of the housing which would be produced if this |
| 17 | project was located near a municipal sewerage or |
| 18 | water system? |
| 19 | MR. FRIZELL: Wait a minute. I |
| 20 | don't think I understood that question. I don't |
| 21 | think I don't know how Mr. Queale could have |
| 22 | understood it. And third, there's no foundation for |
| 23 | that question in this record, for sure. Does Mr. |
| 24 | Queale know anything about cost of sewer systems? I |
| 25 | suspect he does not. |

STATE SHODTHAND DEDORTING SERVICE. INC.

Queale - direct

1 The testimony of MR. SAGOTSKY: 2 Mr. Halsey was with reference to the pressures that 3 would exist for expanded development in the event 4 this application was granted on the Orgo Farms. As I 5 take it to mean that once you establish a sewer 6 system or a utility system and an intensive 7 development in the center of an area where Mr. Halsey 8 thought that it shouldn't be, that that encourages 9 pressures for surrounding development, increased 10 development, more of a sprawl. And therefore, Mr. 11 Halsey was against that type of thing and said it was 12 not in accordance with the general development plan. I construe the question to mean -- of the Planning 13 ا الملح، بالمراجعين مردي من المراجعين المردي المراجع المردين المراجع المردين المراجع المراجع المردي المراجع ال مردية محمد المحمد محمد المراجع المحمد المراجع ا يىت سىيىتىيىنى . . . مىيە قەرزىيا مەھۇشىچ تەيۋىدىن 14 Board attorney -- is whether or not the utilities 15 located in that area, where Orgo is, whether or not 16 they -- that sort of thing would encourage, shall we 17 say, outward pressures of the type that I've just 18 explained and in the wrong area. And if that's not 19 what you think, then correct it. But that's the way 20 I interpret it. 21 MR. MARKS: That was not what I 22 had in mind. 23 THE CHAIRMAN: I didn't hear it 24 that way, myself. 25 I understood the MR. FRIZELL:

39

| ×. | |
|---------------------------------------|---|
| | Queale - direct 40 |
| | question to ask Mr. Queale if he thought that providing |
| 2 | sewers with public money, that is, that the public |
| 3 | can provide the those services cheaper than |
| · · · · · · · · · · · · · · · · · · · | private enterprise. |
| 5 | THE CHAIRMAN: I think I'm going |
| 6 | to offer my interpretation. I interpreted the |
| 7 | question to be if this project was located in an area |
| 8 | where it could tap into existing water and sewer |
| 9 | facilities; is that correct? |
| 10 | MR. MARKS: Yes. |
| 11 | THE CHAIRMAN: What would be the |
| 12 | cost of these services and the impact on the overall |
| 13 | cost of the development? |
| | MR. FRIZELL: My objection goes |
| 15 | to the fact that, number one, what's the basis for |
| 16 | that kind of an opinion? What is he going to base |
| 17 | that opinion on? |
| 18 | MR. MARKS: The concept of least |
| 19 | cost housing. |
| 20 | MR. FRIZELL: You're arguing the |
| 21 | relevance of the opinion. What's your cost? What |
| 22 | system are we going to tie into? What's the sewer |
| 23 | system we can tie into? What are the connection |
| (24 | charges? |
| 25 | MR. BRENNAN: I think that the |
| • | |

STATE SHORTHAND REPORTING SERVICE, INC.

. .

4 mk

.

2.

| Г | |
|----|---|
| | Queale - direct 41 |
| 1 | question might be asked of the witness. I think that |
| 2 | there was prior testimony by the Applicant that the |
| 3 | front end cost, I believe, for both the sewer and |
| 4 | water would be on the order of five million dollars; |
| 5 | that you are, roughly, talking about an average of |
| 6 | \$5,000 per unit. |
| 7 | MR. FRIZELL: Yeah, that also, |
| 8 | includes the drainage system. |
| 9 | MR. BRENNAN: Over time plus the |
| 10 | annual operating costs. So possibly the Planning |
| 11 | Board might want to bring someone from Monmouth |
| 12 | Consolidated Water Company to determine just what the |
| 13 | capital investment would be and the recovery of the |
| 14 | capital investment, over time, with interest plus the |
| 15 | annual operating cost. |
| 16 | MR. MARKS: I think we'll have |
| 17 | another witness who will get a little deeper into |
| 18 | that the next time. |
| 19 | MR. BRENNAN: Mr. Marks, you are |
| 20 | talking about sewers. Let's not get deeper into that |
| 21 | MR. MARKS: Those are murky |
| 22 | waters. |
| 23 | THE CHAIRMAN: Mr. Frizell, you |
| 24 | placed an objection? |
| 25 | MR. FRIZELL: Yes, sir. |

STATE SHORTHAND REPORTING SERVICE, INC.

| | Queale - direct 42 |
|----------|---|
| 1 | MR. DAHLBOM: Can you rephrase |
| 2 | the question? |
| 3 | MR. MARKS: Let me see if I can |
| 4 | rephrase in a different manner. |
| 5 | BY MR. MARKS: |
| 6 | Q. Mr. Queale, you are aware that there are |
| 7 | a number of quote least cost houses end quote |
| 8 | proposed by this project? |
| 9 | A. Yes. |
| 10 | Q. Specifically 520 to 550 least cost |
| 11 | houses? |
| 12 | A. Those include the subsidized as well as the |
| 13 | least cost, yes. |
| 14 14 | Q. If this project well, let me retract |
| 15 | that. |
| 16 | Are there areas in this Township where |
| 17 | public sewer and water exist or are close by? |
| 18 | A. There are areas near Swimming River Road where |
| 19 | water is available from Monmouth Consolidated. In |
| 20 | the same road, there are sewer mains serving Tinton |
| 21 | Falls which would really only offer the opportunity |
| 22 | to explore the potential use of those mains. I don't |
| 23 | know of their individual capacity, whether they could |
| 24 | accept it. But it provides another alternative to be |
| 25 | explored. They are located in that eastern end of |
| | |

 \mathbf{S}

£

| | Queale - direct 43 |
|-----|---|
| 1 | the Township which is an alternative that doesn't |
| 2 | exist in this particular site. |
| 3 | MR. FRIZELL: Excuse me. Tinton |
| 4 | Falls, you say? |
| 5 | |
| 6 | THE WITNESS: Yes. |
| | THE WITNESS: My reason for |
| 7 | identifying the water system availability in Swimming |
| 8 | River Road as far as it relates to the purpose of the |
| 9 | statute, calls for appropriate and efficient use of |
| 10 | public funds, and so forth, was the fact that I don't |
| 11 | know the specific dollar amounts and I'm not |
| 12 | pretending that I would know the impact on a specific |
| 13 | project but from an overview point of view, you |
| 14 | don't have to drill a well, you don't have to incur |
| 15 | those costs. In addition, you don't have to incur a |
| 16 | treatment plant or storage facilities; tap into the |
| 17 | main and run the same infrastructure, even if you had |
| 18 | your own storage tank, wells. So to the extent there |
| 19 | are savings there, I think there would be. I don't |
| 20 | know the magnitude. |
| 21 | With respect to the sewers in |
| 22 | that area, my main point is the alternative of |
| 23 | exploring their availability in terms of capacity of |
| 24 | the mains and pumping station, capacity of the |
| 25 | ultimate treatment facilities can be explored at the |
| - 4 | aresware freatment factifies oun de exhiated de fue |

| | Queale - direct 44 |
|-----------------|---|
| 1 | eastern end which cannot be explored here. But yet |
| 2 | the same alternatives for other sewerage treatment, |
| 3 | spray irrigation, or treatment plant, package plant. |
| 4 | pivots at the eastern end also exist here. So you we |
| 5 | gained one more alternative. But the fact that you |
| б | locate it further downstream from the headwater areas |
| 7 | and close to the larger close on Hockhockson Brook |
| 8 | before it goes into Pine Brook. That location |
| 9 | also, with respect to public expenditures and |
| 10 | coordination of public development for land use |
| 11 | policies, I think it's appropriate that that location |
| 12 | also drains away from the reservoir. And again, with |
| 13 | respect to transportation costs, there are |
| 14 | opportunities at that point to tie into the bus |
| 15 | service on Route 537. |
| 16 | THE CHAIRMAN: Mr. Frizell, does |
| 17 | this take care of your objection? |
| _c 18 | MR. FRIZELL: Well, I think he |
| 19 | answered the question that was basically it was |
| 20 | the question that was posed and he also avoided |
| 21 | points of my objection by simply offering an opinion |
| 22 | that he thinks there might be some cost savings at |
| 23 | some point in time. But I mean, if we were in formal |
| 24 | proceedings, I would ask that the opinion be stricken |
| 25 | since there is no foundation for it. We don't know |
| · · | |

. Ц

| | Queale - direct 45 |
|----|---|
| 1 | what the tie in fee to Monmouth Consolidated is. |
| 2 | THE CHAIRMAN: You still have an |
| 3 | objection? |
| 4 | MR. FRIZELL: He's stated it. I |
| 5 | can't stay anything more about it now. I no longer |
| 6 | have an objection. |
| 7 | THE CHAIRMAN: Thank you. |
| 8 | THE WITNESS: There are a couple |
| 9 | of other purposes of law that I reviewed. |
| 10 | In my opinion, while this |
| 11 | application would provide a variety of residential |
| 12 | and recreational and open space uses, it would |
| 13 | infringe upon the opportunity to preserve major |
| 14 | agricultural areas and protect environmental concerns |
| 15 | with regard to the reservoir. As I mentioned earlier |
| 16 | this site is a part of a larger agricultural area. |
| 17 | There are other locations within the Township that |
| 18 | can provide housing development opportunities with |
| 19 | less of an impact on the agricultural implications; |
| 20 | and, there are other areas that bypass the reservoir. |
| 21 | With respect to other purposes of |
| 22 | the ordinance, while this, for example, provides oper |
| 23 | space even though the residential density is six |
| 24 | units per acre, it does not promote the conservation |
| 25 | of open space and valuable open areas and prevent the |

STATE SHORTHAND REPORTING SERVICE, INC.

Queale - direct 46 1 spread of urban sprawl. This project leap frogs away 2 from the coastal corridor into the midst of the 3 community. It leap froq way from the existing water 4 and sewer service areas and the options open at the 5 eastern end of town; and also, further, the major job 6 and shopping facilities in the coastal corridor. It 7 does drain into the reservoir. 8 As far as the environmental 9 questions are concerned, it consumes an agricultural 10 tract that is part of a larger agricultural 11 neighborhood. And in contrast, there is considerable 12 acreage available elsewhere inside the Township. In my opinion, this is a 13 14 legitimate examination of alternatives that should be 15 explored through the legislative process; and, that 16 these other tracts are more directly surrounded by 17 residential developments and smaller scale, that 18 they re more under the influence of surrounding 19 developments. Therefore, their loss to some future 20 development can at least, in the broader sense, can 21 be more likely to be expected and the loss of that 22 agricultural land would not have the same impact on 23 the agricultural preservation effort as would the 24 loss of this significantly large tract 25 MR. DAHLBOM: You refer to legal

| | Queale - direct 47 |
|----|--|
| 1 | or legislative action. Do you mean the Township or |
| 2 | county or state? |
| 3 | THE WITNESS: Township. And my |
| 4 | final observation is, while this application contains |
| 5 | design techniques that encourage lessening the costs |
| 6 | of the development and an efficient use of land, in |
| 7 | my opinion, this issue will best resolved there |
| 8 | can be legislative efforts uniformly, to more than |
| 9 | a one tract program, than a variance on one tract in |
| 10 | order to encourage many public and private activities. |
| 11 | to meet lower cost and more efficient use of the land |
| 12 | through the legislative process. Other decisions can |
| | be considered, including an appropriate density for, not only development, but possible relationship with |
| 15 | respect to housing types and agricultural |
| 16 | preservation. It can consider design standards for |
| 17 | mixing housing types and specific site plan |
| 18 | considerations. There can be coordination with |
| 19 | regional development patterns. There can be |
| 20 | consideration of the availability of utility services |
| 21 | that now exist and alternate locations for higher |
| 22 | densities. Residential developments can also be |
| 23 | considered. |
| 24 | THE CHAIRMAN: I'm still I was |
| 25 | following things very well at this point but I will |
| | |

STATE SHORTHAND REPORTING SERVICE, INC.

-----.... بدا أتحجم مرداد مساحم

| | Queale - direct 48 |
|----------|---|
| 1 | try to summarize. In a sense, what you just said |
| 2 | because I think I kind of lost you are you saying |
| 3 | that a one-shot variance for this particular site |
| 4 | would not be proper planning procedures in terms of |
| 5 | coordinating this within the context of the Township |
| 6 | and the regional pattern of things? |
| 7 | THE WITNESS: Yes. |
| 8 | THE CHAIRMAN: A reasonable |
| 9 | summary of what was said? |
| 10 | THE WITNESS: Yes. And my |
| 11 | testimony prior to that indicates the considerations |
| 12 | I feel are pertinent. |
| 13 | THE CHAIRMAN: Thank you. |
| 14 | BY MR. MARKS: |
| 15 | Q. Do you feel that there is another body |
| 16 | besides the Zoning Board which should consider the |
| 17 | total impact of a population increase of the size |
| 18 | that's proposed here; and, if so, what body? |
| 19 | A. Well, what I've been referring to, the |
| 20 | legislative process, I'm thinking of the total |
| 21 | process, that's development of a development |
| 22 | regulations ordinance that includes zoning as well as |
| 23 | design standards. |
| | |
| 24 | MR. FRIZELL: Can I object to |
| 24 25 | MR. FRIZELL: Can I object to this? I'm sorry, Mr. Queale. I didn't mean to |

Queale - direct 49 1 interrupt your answer. 2 I don't know why Mr. Queale's 3 opinion on the legislative function versus 4 quasi-judicial function is important. I think you 5 ought to save that for argument. I think Mr. Queale 6 is a planner. His opinion is of no probative value. 7 The Board looks to Mr. Sagotsky and the Counsel with 8 respect to the function of different branches 9 government. This is a quasi-judicial body. That's 10 why we're here. Whether Mr. Queale agrees with the 11 fact that we should be here or not doesn't seem to be 12 probative of anything. ويقرب والمتحدة والمتركب الترجين والمتحاج وهو موجه فالعرض الأسبية المتحد بعد والمراجع الرأي الأ MR. MARKS: I think you missed 13 a A start i Conta a secondaria di Antonia di An 14 the thrust of his opinion. I think if I could 15 attempt to rephrase it --\$ 16 BY MR. MARKS: 17 What you are saying is, that the inquiry Q. 18 before this Board, you have no objection as to 19 whether it's proper or not; in fact, I would deem 20 that you would consider it proper? 21 It's certainly a proper application, yes. Α. 22 But what you are saying is, that the Q. housing proposed here is a very narrow issue; is that 23 24 correct? 25 Yes. Α.

Queale - direct

. `

(

| | Queate - direct 50 | |
|----|--|-------|
| 1 | Q. And it doesn't consider the | |
| 2 | ramifications of the effect on agriculture in the | |
| 3 | area; it doesn't consider other functions which | |
| 4 | should be combined and considered as part of the | |
| 5 | legislative process through the Township Committee? | |
| 6 | Is that what you feel? | |
| 7 | A. Not only Township Committee but the Planning | |
| 8 | Board, to develop the land use element, to be the | |
| 9 | basis for zoning changes if that, in fact, is what | |
| 10 | should have to be. | |
| 11 | MR. MARKS: Does that answer your | |
| 12 | questions, Mr. Frizell? | |
| 13 | MR. FRIZELL: Well, I think he's | |
| 14 | presuming that the Zoning Board isn't going to take | • |
| 15 | into consideration things like agriculture. But | |
| 16 | let's go. | |
| 17 | MR. SAGOTSKY: Are you saying, in | |
| 18 | effect, that the Planning Board the Adjustment | |
| 19 | Board is asked, by way of a variance, to consider a | |
| 20 | result that could best be accomplished through | |
| 21 | legislation? Is that the effect? Is that the thrust? | • |
| 22 | THE WITNESS: Yes. | |
| 23 | MR. SAGOTSKY: And that that | |
| 24 | legislation should come, in this case, from the | |
| 25 | Township Committee, who would be in charge of zoning | |
| | | |

STATE SHORTHAND REPORTING SERVICE, INC.

Queale - direct 51 1 in accordance with the land use plan and other 2 pertinent elements? 3 THE WITNESS: Well, not just the Township Committee, but the involvement of the 4 5 revision of the master plan through the Planning 6 Board's function, with recommendations to the 7 Township Committee and then their adoption of some 8 ordinance. 9 MR. SAGOTSKY: Planning Board's 10 and the legislative aspects of the Township Committee? 11 THE WITNESS: Yes, sir. 12 MR. SAGOTSKY: I have nothing. 13 -- furtherset and the second م و رو مراجع د وأبتراكم والرآبة الإلاي وأوارد والمحجم المحمد فللتكري الخماد الإرقاق الالا ىغ مىلەر بىلەر ب 14 THE CHAIRMAN: Do you still have 15 an objection, Mr. Frizell? 16 MR. FRIZELL: I don't think 17 anyone addressed my objection. I don't have any 18 problem with the issue. The problem I have is that 19 Mr. Queale is not the proper party. He's a planner. 20 He shouldn't be talking about governmental action. 21 I'll withdraw the objection. Let's go. 22 THE CHAIRMAN: Thank you. 23 BY MR. MARKS: 24 Would you comment on the relationship of Q. 25 this project to the regional plans, both of the state

| | Queale - direct 52 |
|----|---|
| 1 | and of the Tri-county Regional Planning Commission? |
| 2 | A. Well, the county, the state and Tri-state plans |
| 3 | are, in their broadest thrust, in concert with one |
| 4 | another, in that Colts Neck is shown as a very low |
| 5 | density, agricultural density level with the |
| 6 | development corridors shown generally along the coast |
| 7 | parallelling and east of the Parkway; and, into the |
| 8 | west, down Route 9 into the Freehold center. So that |
| 9 | the southern part of Holmdel, all of Colts Neck and, |
| 10 | I believe, the north portions of Howell are shown at |
| 11 | this lower density. |
| 12 | Q. Do you feel that the do you have any |
| 13 | feelings with respect to this project in terms of |
| 14 | urban sprawl and would you define that? |
| 15 | A. Well, in my opinion, there really are two kinds |
| 16 | of urban sprawl that you might be able to envision. |
| 17 | One would be the specific design of the of a site |
| 18 | or a small region of the town, a strip along the |
| 19 | highway or something of that sort where individual |
| 20 | lots are stripped along a highway, uncoordinated and |
| 21 | so forth. The second is the broader aspect. If you |
| 22 | look at, say, the north portion of the State of New |
| 23 | Jersey and compare growth rates, starting back in |
| 24 | 1930 or 1940 and how development has pushed out along |
| 25 | major transportation routes and utility corridors in |
| | |

STATE SHORTHAND REPORTING SERVICE, INC.

| | Queale - direct |
|----|---|
| 1 | a general sprawl development. And in my opi |
| 2 | this project in this location would foster th |
| 3 | sprawl of a latter type. Designing a project this |
| 4 | is a very good design so that the controlled |
| 5 | circulation patterns and placement of units and so |
| 6 | forth would not be of a sprawl pattern such as my |
| 7 | first description. 4 |
| 8 | Q. You were talking before about |
| 9 | agriculture. Do you feel that this project poses a |
| 10 | threat to existing agriculture in the Township? |
| 11 | A. Yes, I do. |
| 12 | Q. Do you feel that also at the same time, |
| 13 | to use your phrase, it will promote leap frogging because of its location? |
| 15 | A. Yes. |
| 16 | Q. Would you be a little more specific on |
| 17 | what you mean by leap frogging and perhaps relate |
| 18 | that to the testimony of Mr. Halsey relating to the |
| 19 | pressures of development? |
| 20 | A. Well, I'm not sure I recall specifically what |
| 21 | Mr. Halsey said. My own opinion is that the the |
| 22 | jumping of this facility to almost the geographic |
| 23 | center of the Township is a leap out from the |
| 24 | perimeter; whereas, the perimeter of the Township |
| 25 | would be a more logical extension of the regional |
| | • |

STATE SHORTHAND REPORTING SERVICE, INC.

1

Queale - direct

54 1 growth patterns tying in with utilities and highways 2 and jobs and shopping and so forth. I would concur 3 with Mr. Halsey that the general pattern has been 4 that where you have developments pushing out, it can 5 be expected, reasonably expected, that would entice 6 additional developments. It's never guaranteed and 7 there are certainly bound to be exceptions around the 8 state. But I think with the extension of utility 9 systems and the intensity of the development, it then 10 becomes -- this project, for example, would be the 11 rationale for a similar project next door, down the 12 street and so forth. MR. MARKS: I have no further 13 n an the state of 14 questions at this time. 15 MR. BRENNAN: Precisely what 16 would be wrong if it led to another project of such 17 scope down the street? 18 THE WITNESS: There may not be 19 anything inherently wrong with such a project other 20 th**an** -- my point here is that the implications of the 21 intensity of this development really should be a 🐋 22 policy determination after a careful evaluation of 23 all the alternatives for the Township as a whole. If 24 a system is going to be put in for water and sewer in

this location, should it be oversized so the

25

55 Queale - direct 1 municipality can make a decision that it, in fact, 2 may or may not want to take over the water system or 3 the sewer system so it would be expanded into the 4 site next door. I think it's a fair decision. 5 Also, after a variety of 6 alternatives can be discussed with the public at 7 large as to whether an agricultural preservation issue should be pursued and adopted through local 8 9 legislation. Right now it seems that the abilities 10 to farm, the pressure for horse farming and so forth have kept a lot of the agricultural areas on the 11 12 market as agriculture rather than development. But I think it's an issue that deserves some public 13 والمقاد المراجع 14 discussion. The same thing with the -- on the 15 alternatives, with respect to where should you place 16 it, is to best get the location, if it's scattered 17 around the Township in four or five parts. This site 18 is that the wishes of the Township as opposed to say 19 three or four projects next to each other in one 20 concentrated area with one utility system? These are 21 issues and there are others as you cut through the 22 myriad land use considerations, traffic uses, 23 utilities, recreation, placement of school facilities 24 and so forth that have to be interrelated; that which 25 you can do when you take a master plan approach as

STATE SHORTHAND REPORTING SERVICE, INC.

• . . •

Queale - direct 56 1 opposed to the isolated issue of one project. 2 MR. BRENNAN: If we approve the 3 Colts Neck Village application, we are planning by 4 variance as opposed to planning with thought? 5 THE WITNESS: I think that distinction is a good -б 7 MR. TISCHENDORF: Mr. Queale, you 8 said, I believe, that you agreed with Halsey that 9 corridors of growth are near the edges of our town. 10 And alluded a few times to the eastern end of town in 11 proximity to water and sewers in Tinton Falls. Is 12 there another edge of town where you conceive where 13 you could say this would be a better location, other 14 than the implied one near the eastern end of town? 15 THE WITNESS: I had considered 16 the western end nearer the Route 18 interchange with 17 537. But, at least to this date, have been somewhat 18 dissuaded from that because it's my current 19 understanding that utility hook ups, particularly 20 sewers, are not available at that end through the 21 Freehold area. In addition, that area does 22 ultimately drain into the reservoir, whereas the 23 eastern end, if an alternate system has to be done 24 and higher density development is required, it seems 25 to me that the reservoir itself is to be a major

Queale - direct

1 concern. We have the opportunity to provide the 2 different housing choices in the Township in a 3 location where we can avoid potential threat that some feel is more important than others. 4 But 5 nevertheless, it is an issue before the Township. 6 Now if at the time when we ever get to the area where 7 the total area away from the reservoir gets to its 8 capacity, we have -- may have the luxury to know 9 other design techniques of how to protect the 10 reservoir that we don't now know of. 11 MR. TISCHENDORF: So you are 12 saying that area near 537 and 18 does drain into the 13 reservoir? والمساجع فلاحاد الميد بالتقيم جياتك والانتهام والمتكافية THE WITNESS: Yes. But in answer 14 15 to your question, yes, I have given consideration to 16 that periphery of the Township because of the 17 densities of the development pushing out from 18 Freehold and location of the Route 18 interchange. 19 And the north MR. TISCHENDORF: 20 boundary? 21 THE WITNESS: (NO. the north 22 boundary much of it is already taken up in major 23 tracts of single family development, so that -- and 24 the in between parcels are favorably influenced by 25 the type of single family residential development

57

Queale - direct 58 1 there. There are a couple of sizable areas that I 2 think could be considered agricultural in nature, 3 which would then leave open the question of an 4 agricultural preservation policy. But that end also 5 is directly or rather closely tied into the north leg of the reservoir. 6 7 MR. TISCHENDORF: I have no more. 8 THE CHAIRMAN: Sam? 9 MR. SAGOTSKY: No questions. 10 MR. MARKS: I just have one other 11 question. 12 BY MR. MARKS: 13 You've referred several times to 0. ەت بىر سەرەملىدىيىد بولسلارچە ئەر بولىلىد لىراغ شىلىدانلىرى 1000 - بولچارى 1000 - 100 قاراخ المەتىچە ئەرسەرمە ۋالىراغاندە بىلىمىدىسىرىكا سىلەر بالىرى 1000 - يەر 14 agricultural preservation. And I noticed in your 15 qualifications, credentials, you indicated that you 16 served on several bodies relating to agriculture. Is 17 it that simple, just to say "agricultural 18 preservation", or is there something deeper in this 19 issue? 20 It's very deep and it's very complex. And Α. 21 there are numerous alternatives being discussed from 22 legislation for the transfer of the development 23 rights to the application -- or broader application 24 of the concept that we introduced in Chesterfield, 25 called "transfer of development credit".

| | Queale - direct 59 |
|------|---|
| 1 | Q. Could you explain that for a second? |
| 2 | A. Well, the transfer of development rights is |
| 3 | where someone |
| 4 | MR. FRIZELL: Wait a minute. I'm |
| 5 | going to object. What's that got to do with anything? |
| 6 | MR. MARKS: I think it's germane |
| 7 | to his testimony that agricultural preservation is |
| 8 | important; that your project is located in a |
| 9 | significant agricultural area of the Township and |
| 10 | that's going to impair it. |
| 11 | MR. FRIZELL: Mr. Marks, what has |
| 12 | transfer development rights got to do with the |
| 13 | agricultural issue? There is no such thing in New |
| 14 | Jersey. If there was, maybe we would have a |
| 15 | different case. It was tried in Burlington County |
| / 16 | and found to be a miserable failure. |
| 17 | MR. MARKS: That's a state |
| 18 | procedure. We're talking about zoning where sections |
| 19 | of the Township would be designated as agricultural |
| 20 | preservation zones where only farming use would be |
| 21 | continued. |
| 22 | MR. FRIZELL: Well, wait a minute |
| 23 | MR. MARKS: Development credit |
| 24 | would be transferred to other areas of the Township. |
| 25 | MR. FRIZELL: Is it authorized or |
| | |

Ē

STATE SHORTHAND REPORTING SERVICE, INC.

| | Queale - direct 60 |
|------|---|
| | not authorized under present New Jersey statutes? I |
| | can assure you |
| | THE WITNESS: I think you should |
| 4 | rephrase that and say it has not been tried. |
| 5 | Certainly there have been significant discussions |
| 6 | about |
| 7 | BY MR. MARKS: |
| 8 | Q. You mentioned transfer of development |
| S | credits. Is that in effect in Chesterfield Township? |
| 10 | A. Yes. |
| 11 | Q. Could you explain that? |
| 12 | A. I didn't mean that transfer of development |
| 13 | rights was legislation implemented in New Jersey, |
| 14 | because it is not. But it is a concept which is |
| 19 | being discussed, that the Department of Agriculture, |
| . 16 | in their broader view of having to come up with |
| 17 | agricultural preservation methods. So that |
| 18 | ultimately they hope through the cooperation of |
| 19 | various farm organizations, municipalities and |
| 20 | assessors and so forth to develop an agricultural |
| 21 | preservation program that will be meaningful. Some |
| 22 | of the issues that are being discussed will need |
| 23 | legislation. Others may not. The transfer of |
| 1 24 | development credits is, in its simplest form, cluster |
| 2: | zoning for non-contiguous properties so that the |
| | |

STATE SHORTHAND REPORTING SERVICE, INC.

.

. . .

.

.

| | | Queale - direct 61 |
|----|----|---|
| | 1 | owner of two separate parcels can develop the number |
| | 2 | of units generate, you know, the zoning ordinance on |
| | 3 | one of those parcels, dedicating the other parcel for |
| | 4 | agricultural use. |
| | 5 | But there are other techniques |
| | б | going on, as far as this committee that I'm currently |
| | 7 | serving on, at the state level where they hope to |
| | 8 | have an agricultural preservation program, I imagine, |
| | 9 | over the next several months. |
| | 10 | THE CHAIRMAN: Mr. Frizell, do we |
| | 11 | need a ruling on your objection? |
| | 12 | MR. FRIZELL: Well, I'll save it |
| | 13 | for argument. It's totally irrelevant, this whole |
| | 14 | line. Rather than belabor the record with objections. |
| | 15 | I would rather continue. |
| | 16 | MR. SAGOTSKY: My question would |
| | 17 | be directed to Mr. Marks. Is he in testifying to |
| | 18 | show that if the Orgo site were approved for a Colts |
| | 19 | Neck Village, might that subsequently interfere with |
| | 20 | some legislative program designed for the use of the |
| | 21 | program of development rights or development credits? |
| | 22 | Would that be the thrust of your question? |
| | 23 | MR. MARKS: Yes, that it would |
| ۶Ţ | 24 | imperil one of, I believe, the six agricultural areas |
| | 25 | of concentration within the Township. |
| | | |

مشتر مصب ورارين

STATE SHORTHAND REPORTING SERVICE, INC.

a a sua sua su su

| ́ Г | |

| | Queale - direct 62 |
| 1 | Is six the correct number, Mr. |
| 2 | Queale? |
| 3 | THE WITNESS: Yes. |
| 4 | MR. BRENNAN: You had suggested |
| 5 | that a development of this intensity and density with |
| 6 | all its implications might be better suited to the |
| 7 | edge of the Township along 537; is that correct? |
| 8 | THE WITNESS: Yes. |
| 9 | MR. BRENNAN: But isn't that land |
| LO . | along 537 over towards Tinton Falls also agricultural |
| 11 | and horse farming? |
| 12 | THE WITNESS: Yes, it is. |
| 3 | MR. BRENNAN: So If you seek to |
| 4 | preserve use at the Orgo site, you would consume |
| .5 | agricultural use over on the Tinton Falls |
| .6 | THE WITNESS: That's correct. |
| .7 | What we're attempting to address is the issue that |
| 8 | should the Township be required, as a result of the |
| 9 | application, to make provision for alternate housing |
| 20 | types, higher density development basically, with |
| 1 | the remaining land that can be developed in the |
| 22 | Township, you are talking a very high proportion of |
| 3 | it being agricultural. So we know at the outset, any |
| | |
| 4 | development of the Township is going to consume that |

25

becomes one of trying to establish densities and zoning concepts that would minimize that impact; and secondly, making or selecting a location or multiple locations that would adhere better to other planning concepts, such as, access utilities, reservoir and so forth.

MR. BRENNAN: My point is the fact that Orgo Farms is now agricultural land is not critical because you would consume other agricultural land. Therefore, that argument of yours is not a very strong argument in that the Board really should focus more upon the other arguments that you've 13 presented. الرواق الماد فرار فأقفر بالراسخ سمارسات والم

THE WITNESS: Well, I think you

63

15 should focus on both of them because the -- and 16 perhaps you are correct in the sense of total acreage 17 consumed may be a wash, the same acreage here as 18 opposed to someplace else. And the other issues are 19 also important. But it just is my opinion that the 20 destruction of agriculture at this location where you 21 are then talking about new utility infrastructures 22 and things of that sort and different than this 23 locations on the periphery.

MR. BRENNAN: Which are your

other arguments?

Queale - direct 64 1 THE WITNESS: Yes, that's right. 2 THE CHAIRMAN: Any other 3 questions from the Board? 4 I have questions. 5 MR. BRENNAN: Are you going to 6 ask questions, Mr. Frizell? 7 (Whereupon a recess is taken at 8 9:15 p.m.) 9 (The hearing reconvenes at 9:20 10 p.m.) 11 THE CHAIRMAN: Mr. Frizell, I 12 believe you've got the floor. a a standard fan te ster en ser en sjoer en sjoe Solar - Analysis and an analysis of the second s Second secon second sec 1.3 است. در این ماهند بالای با در این مرکز این ماهند. این مرکز این میشوند این کرد این محمد میکند بیشند و میکند این در این میکند. این میکند میکند این میکند این میکند این میکند این میکند این میکند. 14 CROSS-EXAMINATION BY MR. FRIZELL: 15 16 Q. Mr. Queale, did you bring a copy of 17 Township master plan with you? 18 No, I didn't. A. 19 Now, you have a pencil, Mr. Queale? Q. 20 Α. Yes, sir. 21 Let me ask you in terms of locating a Q. 22 housing project which would have a variety and choice 23 of housing in it, including townhouses, patio homes, 24 et cetera, garden apartments, do you have any 25 difficulty, Mr. Queale, with using the following

| | Queale - cross 65 |
|----|---|
| 1 | criteria? And I'm going to give you five: Number |
| 2 | one, access to community and commercial facilities; |
| 3 | number two, development suitability of the tract, of |
| 4 | the area; number three, access to major |
| 5 | transportation routes, number four, potential of the |
| 6 | site for the installation of water and sewer |
| 7 | utilities; number five, land ownership patterns |
| 8 | within the site or within the area which make the |
| 9 | assemblage of large tracts of developable land |
| 10 | feasible. |
| 11 | MR. MARKS: I'm going to object |
| 12 | to the last portion of that on the basis that this |
| 13 | witness has not been called as someone who has |
| 14 | examined tax maps, who has determined ownership in |
| 15 | the Township. And to that extent, I'd object to item |
| 16 | number five. |
| 17 | MR. FRIZELL: Mr. Marks, I merely |
| 18 | asked him if he has any difficulty with the criteria. |
| 19 | I didn't ask if he examined tax ownership. |
| 20 | THE CHAIRMAN: Mr. Marks, does |
| 21 | your objection still stand? |
| 22 | MR. MARKS: My objection still |
| 23 | stands. |
| 24 | THE CHAIRMAN: Sam, any thoughts |
| 25 | here? |

66 Queale - cross 1 MR. SAGOTSKY: My opinion would 2 be the question is beyond, shall we say, the scope of 3 the cross-examination. 4 THE CHAIRMAN: All the points Mr. 5 Frizell raised or just the last one? 6 MR. SAGOTSKY: The last point is 7 beyond the scope and Mr. Frizell apparently -- if he 8 wants to produce his own witness, that would be up to 9 him. 10 MR. FRIZELL: Mr. Sagotsky, the 11 rules of evidence about not cross examining witnesses 12 except about things that they testified about was 13 changed about 1962. It's an issue in the case. The 14 witness is here and I've asked him a question and 15 that is, what criteria. It seems to me the primary 16 question here, what criteria should be used in 17 locating a project of this type, if Mr. Queale has a 18 problem with that particular criterion, he can tell 19 us that. But all I've asked Mr. Queale at this point 20 is, does he have any difficulty with those five 21 criteria. 22 THE CHAIRMAN: Maybe it would 23 help, Mr. Frizell, if you would define a little bit 24 more what you mean by large tracts and feasibility. 25 Five hundred acres, 100 acres, 50 acres? What do you

| | | <u> </u> |
|---|----|--|
| | | Queale - cross 67 |
| | 1 | mean by I believe your question, if you rephrase |
| | 2 | it, is or restate again? |
| | 3 | MR. FRIZELL: I mean other than, |
| | 4 | for instance, where you have in order to obtain a |
| | 5 | site large enough to make a feasible development |
| | 6 | possible you have to sell more than three parcels of |
| | 7 | land. |
| | 8 | THE CHAIRMAN: So, the definition |
| | 9 | that you are asking there would be where you would |
| | 10 | have to acquire more than one plot of land in order |
| | 11 | to create a large enough area to make it feasible? |
| | 12 | MR. FRIZELL: More than two or |
| 6 | 13 | three. In other words, if you only have to put |
| | 14 | together two I'm not saying that. If we look at |
| | 15 | ownership patterns and they are basically half acre |
| | 16 | lots, undeveloped, that rules it out. Ownership |
| | 17 | patterns that would lend to assemblage of two or |
| | 18 | three. |
| | 19 | THE CHAIRMAN: Totally, in the |
| , | 20 | approximate number of acres you are talking about |
| - | 21 | here? |
| | 22 | MR. FRIZELL: Yes. |
| | 23 | THE CHAIRMAN: I think we can ask |
| | 24 | the witness to answer. If he has some problems with |
| | 25 | that last part, let me qualify it. |
| | | |

STATE SHORTHAND REPORTING SERVICE, INC.

a a a a a a a a a a a a

- -

Queale - cross 68 1 MR. BRENNAN: Where did the 2 criteria come from? 3 I'll tell you in a MR. FRIZELL: 4 minute. 5 MR. SAGOTSKY: Your minute is up. б MR. FRIZELL: I'm waiting for an 7 answer first, too. 8 THE WITNESS: Am I to answer? Is 9 that the decision? 10 MR. MARKS: Yes. 11 THE WITNESS: I have no problem 12 with those criteria. I think there are additional 13 items that can be added to the list. ا به محمد به ماشید با همینه به مصفحات میشود. از نام از معینه با میشود با از معنیه با از معام از معام از این از میده ایران با دست از این محمد است مجتوع به محمد از این محمد میشود. از محمد میشود با در این از این از معارف از ا 14 BY MR. FRIZELL: 15 Which items would you add to the list, Q. 16 Mr. Queale? 17 I think when you are talking about an issue of Α. 18 this type, where you have a strong agricultural 19 community, I think ag' preservation issues are also a 20 consideration. I think in addition to the potential 21 for water and sewer installation, while that's 22 important, I also think the availability of utilities 23 should also be a consideration; in today's planning world, a comparison with the compatibility with 24 25 adjoining community and regional plans/is also a

Queale - cross 69 1 consideration. 2 As compared with other local and Q. 3 regional plans? 4 Α. Yes. And I think also Colts Neck is somewhat 5 unique in that it is a community with a major 6 reservoir. So I think in this instance that becomes 7 that would be a concern, too. It would not appear in 8 other communities. And I think with respect to 9 future plans it's legitimate to select locations for 10 issues such as this with an eye toward the reasonable 11 location of future public utilities and public 12 facilities, schools, parks and playgrounds, things of 제품 문제 동네 가슴이 다. i de la comprecióne à président. 13 that sort. 14 I'm not sure you've added anything to 0. 15 this last few; that is, anticipated access to 16 facilities to include potential future -- and I also 17 considered development suitability. 18 I interpreted to soil, topo, physical A. 19 characteristics. 20 All right. Q. £ 21 MR. MARKS: Excuse me. So that I 22 understand, are we adding these five to the original 23 five --24 MR. FRIZELL: Mr. Queale added 25 them.

70 Queale - cross 1 MR. MARKS: -- in terms of 2 whatever inquiry you are getting into? You have no 3 objection to that? 4 MR. FRIZELL: Well, let's go to 5 one question at a time. I'm not here to be б cross-examined. I'm here to ask questions. Mr. 7 Queale is here to answer them. 1 8 MR. MARKS: I have a problem. I 9 would like to intelligently understand what's going 10 on and I would like to know if all ten are to apply. 11 THE CHAIRMAN: The intent was to 12 have, I believe --والميوجا والأراب المتحر والمحادثان MR. FRIZELL: If it's any help, 13 14 we'll deal with them all. 15 MR. MARKS: Okay. 16 THE CHAIRMAN: I think though you 17 were going to answer one question from a Board member 18 as to what was the basis of these criteria. Is that 19 appropriate now? 20 MR. FRIZELL: Where does the criteria come from? The first five criteria were 21 22 given by the planner who testified in our behalf in 23 the Orgo farms litigation. I asked Mr. Queale if he 24 had any difficulty at that time and he testified that 25 he did not.

71 Queale - cross 1 BY MR. PRIZELL: 2 Now, Mr. Queale, in terms of Township of 0. 3 Colts Neck, major transportation routes in the 4 Township of Colts Neck, will you agree that Route 18, 5 Route 34 and Route 537 are the major transportation 6 routes in the Township of Colts Neck? 7 Yes. Α. 8 Q. Now, do you know how many acres of the 9 Orgo farm are presently being used for agriculture? 10 Α. No. 11 Q. Mr. Queale, do you know where the major 12 concentration of horse farms is in Colts Neck? A. Well, not in terms of specific numbers; in 13 الروائدية ومسترشيون terms of generalized areas, yes. 14 They're 15 concentrated in six general areas. 16 Is one of those areas the eastern Q. 17 section of the Township along 537? 18 There are some facilities at the eastern end, A. 19 yes 20 Are there major horse installations at Q. 21 that end of the Township along Route 537? 22 Yes. Α. 23 Do those major installations include the Q. large lots at the end of Route 537 on either side of 24 25 the highway? I.

Oueale - cross 72 1 I know the furthest one is but I don't recall A. 2 the others. 3 Now, can you tell me generally, Mr. 0. 4 Queale, from your own knowledge, since we don't have læ a physical characteristic map within your master. 5 6 about what your master plan says about the physical 7 characteristics of the area in the southeastern 8 portion of the town in the vicinity of the 9 Hockhockson Brook? 10 Which portion now, the whole stream corridor? Α. 11 The whole stream corridor shows up as being wet. The 12 closer you get to it, the more problems you would 13 have with development. As you go away from the more serious, wetness problems, you get into an area that 14 15 I believe the master plan or subsequent updating of 16 the physical characteristics study of areas that are 17 developable but would need sewers. 18 Q. Does that generally apply across the 19 whole southeastern sector of the town, south of Rqute 20 537 and east of the Earle railroad right-of-way? 21 The major drainage problems, of course, follow Α. 22 the brook. The wetness problems, I believe, do 23 expand in that area but as you get up to 537, they 24 disappear. I don't recall the extent to which they 25 cover that far eastern corner.

~

| | Queale - cross 73 |
|----|---|
| 1 | Q. Let's explore that just a little further. |
| 2 | You indicated that the availability of sewers from |
| 3 | the Borough of Tinton Falls should be explored. Do |
| 4 | you know what the availability of capacity of sewer |
| 5 | in Tinton Falls is across the line? |
| 6 | A. We did the master plan there and I would say as |
| 7 | of four or five years ago they did have a contractual |
| 8 | limitation as to the amount of flow that they could |
| 9 | contribute to the regional system. And within their |
| 10 | collection system, there were locations where the |
| 11 | pipes themselves had capacity problems. We did not |
| 12 | identify specific segments of the system that had |
| 13 | capacity problems, so I'm unable to, you know, |
| 14 | identify them specifically. Other locations possibly |
| 15 | could be explored as tie in locations, metered as |
| 16 | they flow through the system, pass through and picked |
| 17 | up at the outflow. |
| 18 | Q. You testified before Judge Lane, didn't |
| 19 | you? So you know when that decision came down? |
| 20 | A, Which one? |
| 21 | Q. The original Court decision. |
| 22 | A. Yes. |
| 23 | Q. Have you explored the availability of |
| 24 | sewer capacity in Tinton Falls since July of 1979 and |
| 25 | today? |
| | |

``

| | Queale - cross 74 |
|----------------|--|
| 1 | MR. MARKS: Objection. The |
| 2 | question was answered by the witness. |
| 3 | MR. FRIZELL: He told me what he |
| 4 | did in 1977. I want to know if he's done anything |
| 5 | what has he done for us lately? |
| 6 | THE WITNESS: I have not explored |
| 7 | that issue. |
| 8 | Q. Isn't it true that there's no capacity |
| 9 | in Tinton Falls? |
| 10 | A. I can't say that. |
| 11 | Q. Cause you don't know? |
| 12 | A. That's right. |
| 13 14 | Q. Now, you talk about the compatibility of neighboring master plans. You know what the Borough |
| 15 | of Tinton Falls has planned for this area immediately |
| 16 | east of the Township of Colts Neck, don't you? |
| 17 | A. Roughly one and a half per acre. At the |
| 18 | southern end, it might be three. |
| 19 | Q. They also have a designated historic |
| | |
| 20 | district in that region, don't they? |
| | district in that region, don't they? A. Very small. |
| 20 | |
| 20 21 | A. Very small. |
| 20 21 22 | A. Very small. Q. How big is small? |

Queale - cross 75 1 three houses on the south side of 537 and half a 2 dozen on the north side and then spreads out on 3 Sycamore Avenue and goes up to the school, as you 4 continue toward the ECOM building. 5 All right. The planning in that area is Q. 6 for large lot, single family housing, is it not? 7 λ. It's one and a half units per acre with cluster 8 provisions. 9 Which is approximately one house every Q. 10 30,000 square feet? 11 Well, that would be the average lot size if you Α. 12 sejuste tooksits in the streets as spreaked and the streets of the street state of the street streets and the street streets and the street street streets and the streets and the streets and the street streets and the st 0. I understand that. 13 14 A. One and a half per acre. 15 But it could be clustered to something Q. 16 small? 17 Α. Yes. 18 What do your clients at the Planning Q. 19 Board of Tinton Falls think about your suggestion to 20 MR. MARKS: Objection. That's 21 not relevant and --22 MR. FRIZELL: -- put townhouses 23 and apartments in that zone? 24 MR. SAGOTSKY: The objection is, 25 what would those people think?

| г | |
|----|---|
| | Queale - cross 76 |
| 1 | MR. FRIZELL: I'll withdraw the |
| 2 | question. |
| 3 | MR. SAGOTSKY: That is |
| 4 | objectionable. |
| 5 | BY MR. FRIZELL: |
| 6 | Q. Mr. Queale, acting as a planner for |
| 7 | Tinton Falls, would you recommend that they send a |
| 8 | correspondence to the Township of Colts Neck |
| 9 | encouraging the Township of Colts Neck to fulfill its |
| 10 | obligations under Mount Laurel on the border of |
| 11 | Tinton Falls? |
| 12 | MR. MARKS: I object to that |
| 13 | question. I think it's speculative and also think |
| 14 | that there hasn't been any sort of foundation laid to |
| 15 | this as to what's going on in Tinton Falls. |
| 16 | THE CHAIRMAN: Sam? |
| 17 | MR. FRIZELL: I'll restate the |
| 18 | question, Mr. Sagotsky. |
| 19 | BY MR. FRIZELL: |
| 20 | Q. Mr. Queale, would the provision for the |
| 21 | variety and choice in housing contemplated by the |
| 22 | Order that's entered in this case on the border of |
| 23 | Tinton Falls be compatible with the master plan of |
| 24 | Tinton Palls? |
| 25 | A. In my opinion, it could be. |

Queale - cross

| 1 | Q. What do you mean it could be? |
|----|--|
| 2 | A. The <u>density</u> was one of the issues that I |
| 3 | specifically addressed in my direct testimony as |
| 4 | being a policy determination that I felt is better |
| 5 | handled through the legislative process. We have not |
| б | indicated what that density would be. We have not |
| 7 | assumed that it would be six units per acre as you |
| .8 | have proposed. It could be something less than that |
| 9 | with different types of options or more options than |
| 10 | what you've proposed. |
| 11 | Q. What density do you think is a minimal |
| 12 | density for providing townhouses, garden apartments |
| 13 | and patio homes in an area where the where those |
| 14 | and small lot single family homes where they can |
| 15 | be mixed and commercial adjuncts can be placed with |
| 16 | them, Mr. Queale? |
| 17 | A. Well, in Chesterfield, it's one unit per acre |
| 18 | and that's being done. |
| 19 | Q. Is that least cost development? |
| 20 | A. According to Mr. Rahenkamp. |
| 21 | Q. Mr. Queale, the Chesterfield case is a |
| 22 | settlement between the township and the developer? |
| 23 | A. Yes. |
| 24 | Q. Let's don't argue since there is a |
| 25 | settlement in that case that obviously the developer |
| | |

77

| | Queale - cross 78 |
|----|---|
| 1 | made the exceptions? |
| 2 | A. There are townhouses and apartments and 5,000 |
| 3 | square foot lots. |
| 4 | Q. Within the development? |
| 5 | A. Yes. |
| 6 | Q. Now, is there anything else, Mr. Queale, |
| 7 | in terms of the potential for water in that area of |
| 8 | the Township? Is that within the Monmouth |
| 9 | Consolidated franchise area? |
| 10 | A. To my knowledge, it is. |
| 11 | Q. It is? |
| 12 | A. Yes, sir. |
| 13 | Q. You mean there is areas within the |
| 14 | Township of Colts Neck which are within the Monmouth |
| 15 | Consolidated franchise area? |
| 16 | A. With the exception of the Borough, which I'm |
| 17 | not certain of, it's my understanding that Colts Neck |
| 18 | is entirely within the franchise area. |
| 19 | Q. How long have you been the planner in |
| 20 | Colts Neck? |
| 21 | A. Since '69. |
| 22 | Q. Now, you indicated several times in your |
| 23 | testimony that there were there were areas |
| 24 | elsewhere in the Township. Other than this area, in |
| 25 | the vicinity of 537, were there any other areas you |
| | |

| | Queale - cross 79 |
|-------------|---|
| 1 | were alluding to or are you consistently alluding to |
| 2 | that area? |
| 3 | A. It was primarily consistent, in my reference, |
| 4 | to that southeast portion; but again, depending on |
| 5 | the overall approach on how to resolve the housing |
| 6 | question. There could be the question of small sites |
| 7 | and other options scattered around the Township. |
| 8 | Q. Is it possible to develop not say: |
| 9 | possible but from a practical standpoint, is it |
| 10 | possible to develop garden apartments, townhouses, |
| 11 | patio homes, et cetera, without the installation of |
| 12 | utilities, sewer and water? |
| 13 | |
| 14 | Q. Whether it was possible. |
| 15 | A. Clustered to one to the acre? |
| 16 | Q. My question, was it possible to provide |
| 17 | those housing types without providing sewer and water |
| 18 | Perhaps a better question, is it |
| 19 | rational and intelligent planning to plan for those |
| 20 | kinds of uses without also planning for sewer and |
| 21 . | water? |
| 22 | A. Now you are going to make me sound like it |
| 23 | would be irrational or not intelligent. We have |
| 24 | provided a development option in one of our |
| 25 | agricultural towns where small clusters of townhouses |

ر و میکند. د محمد میکند و

.

×.,

80 Queale - cross 1 and clustered lots would be available on water on individual wells and septics. But there would be 2 3 limited numbers and specific design criteria. And 4 it's merely an option. So in the narrow sense. I 5 would have to say, yes, it is possible to do without 6 the central water and sewer systems. I think in the 7 broader sense, where you are talking about smaller 8 lot sizes, townhouses and apartments, generally you Car are talking about water and sewer systems. 9 10 Now, in your opinion, Mr. Queale, what **Q**. 11 is the minimal density for providing least cost 12 development given current development standards, current standards within the planning profession. 13 14 MR. MARKS: Objection. 15 0. If you are going to plan, Mr. Queale, 16 for least cost development what density, would you 17 designate an area for? 18 MR. MARKS: Objection. There 19 hasn't been a sufficient foundation laid. We've had 20 testimony from your own witness that it's relative. 21 What are you talking about, talking about Colts Neck, 22 Kalamazoo or where? 23 MR. FRIZELL: Colts Neck. 24 THE WITNESS: Dhd you say what is 25 the least density?

| | Queale - cross 81 |
|----|---|
| 1 | BY MR. FRIZELL: |
| 2 | Q. What is the highest density? |
| 3 | A. Highest? |
| 4 | Q. Excuse me, lowest. |
| 5 | MR. SAGOTSKY: For least cost |
| 6 | housing? |
| 7 | MR. FRIZELL: For least cost |
| 8 | housing, reasonably given all the factors. |
| 9 | THE WITNESS: Well, as I say, in |
| 10 | Chesterfield it's combined with an agricultural |
| 11 | preservation concept and one unit per acre with |
| 12 | conditional uses allowing subsidized houses. |
| 13 | BY MR. FRIZELL: |
| 14 | Q. What's the size of the project? |
| 15 | A. The original tract is 600 acres and the design |
| 16 | is for 4,000 units. So they will be anticipating the |
| 17 | acquisition of 400 additional acres. I think within |
| 18 | the general context of suburban areas, such as |
| 19 | central Jersey, and for this, three units per acre |
| 20 | and four units per acre would provide that |
| 21 | opportunity; and, provided it's tied within a planned |
| 22 | development concept, mixed housing types and |
| 23 | clustered criteria. |
| 24 | Q. Are you saying three to four units per |
| 25 | acre? |
| | |

`~

6

l. - . .

| , | |
|----|---|
| | Queale - cross 82 |
| 1 | A. Yes. |
| 2 | Q. Well, then you disagree with the Mount |
| 3 | Laurel opinion itself which said that the PUD's at |
| 4 | Mount Laurel, at those densities, were not designed |
| 5 | for low or moderate least cost housing. |
| 6 | MR. MARKS: There's no foundation |
| 7 | to that. |
| 8 | MR. FRIZELL: Mr. Queale has read |
| 9 | the decision. |
| 10 | MR. SAGOTSKY: There's no |
| 11 | testimony that the conditions are the same in Mount |
| 12 | Laurel as they are in the Colts Neck area. |
| 13 | THE CHAIRMAN: Mr. Frizell, I |
| 14 | think I'll have to uphold that objection. Please |
| 15 | rephrase the question. |
| 16 | BY MR. FRIZELL: |
| 17 | Q. Mr. Queale, I'm going to another |
| 18 | question. Mr. Queale, when you testified before |
| 19 | Judge Lane, didn't you indicate that there were no |
| 20 | areas in this town that housing of this type either |
| 21 | should be located or could be located? |
| 22 | MR. SAGOTSKY: I object. The |
| 23 | issues were different in the matter before Judge Lane |
| 24 | than they are before this court. |
| 25 | MR. FRIZELL: I'm merely |
| | |

€ €

Queale - cross 83 1 introducing this, Mr. Sagotsky, to impeach Mr. 2 Queale's testimony. It seems to me that someone who 3 is on record as saying nowhere or anywhere in town 4 and then says there's somewhere but it's not your 5 client's property, I think that's impeachable 6 testimony. 7 MR. SAGOTSKY: I think what you 8 are forgetting is that your question to Mr. Queale 9 today was based upon your preliminary statement, on 10 your part, in view of the present Order of the Court 11 as it now exists by Judge Lane. That was the premise 12 that you based your question on. And that could conceivably, certainly present a different aspect 13 14 than what Mr. Queale was faced with before Judge Lane 15 at which time the decision hadn't yet been rendered. 16 MR. FRIZELL: I suggest to you 17 that the physical characteristics of Colts Neck have 18 changed not much. 19 THE WITNESS: I have no problem 20 responding to that. 21 THE CHAIRMAN: Go ahead. 22 I believe I had THE WITNESS: 23 testified --24 MR. SAGOTSKY: I will withdraw my 25 objection.

Queale - cross

1

THE WITNESS: -- that your

2 characterization of my testimony is reasonably 3 accurate, Mr. Frizell. But I didn't consider the Township at this juncture in attempting to respond to 4 5 the court decision in anticipation of what may or may 6 not happen as any indication of what I would prefer 7 and what I would recommend had I not had those court constraints. I made it clear that I did not feel 8 9 that Colts Neck should have that obligation and 10 spelled out numerous reasons. If we are to 11 anticipate that we must do it, then I find myself in 12 a position as a professional of considering all the ramifications of that decision and making a 13 14 recommendation. 15 BY MR. FRIZELL: 16 Q. Mr. Queale, let me ask you what you 17 would recommend or would you -- what you would 18 recommend if your charge was not to simply engage in 19 some kind of a planning game and say, "Well, it's 20 legislative. It's not quasi-judicial," et cetera, et 21 cetera; and, you had an obligation to encourage these 22 housing types within Colts Neck. Would that change 23 your opinion? I didn't follow the intent of your question. 24 Α. 25 My question was whether or not your Q.

STATE SHORTHAND REPORTING SERVICE, INC.

84

| | , | |
|-----------|------------|---|
| | `` | Queale - cross 85 |
| 1 | 1 | opinion would be changed if your obligation, your |
| | 2 | charge, what you are being paid to do was to |
| | 3 | encourage and bring into the Township of Colts Neck |
| | 4 | the kind of housing types that are the subject of |
| | 5 | this application? |
| | 6 | THE CHAIRMAN: Mr. Frizell, which |
| | 7 | opinion |
| | . 8 | MR. FRIZELL: His opinion about |
| | 9 | whether or not this particular |
| | 10 | MR. SAGOTSKY: Site location. |
| | 11 | MR. FRIZELL: site location is |
| | 12 | appropriate, whether it's better than the eastern end |
| | 13 | whether or not this could be drained. |
| | 14 | MR. SAGOTSKY: Without the |
| | 15 | preliminaries, without your own preliminaries, state |
| | 16 | the question. |
| | 17 | BY MR. FRIZELL: |
| | 18 | Q. The question is, whether or not the |
| | 19 | opinions Mr. Queale has rendered tonight would be |
| | 20 | different if his responsibility was not to discourage |
| | 21 | the development of this housing type within the |
| | 2 2 | Township but rather to encourage that housing type |
| | 23 | within the Township? |
| | 24 | MR. MARKS: I object. The |
| | 25 | question is too vague and the witness has said |

• • • • •

Queale - cross 86 1 himself before that if there was a charge that was --2 that this be done, he would have to go back and study 3 the matter. And I don't think he's here to make any 4 shoot-from-the-hip opinion. 5 THE CHAIRMAN: Maybe if I could 6 help, I think your question is, if Mr. Queale walked 7 into this cold and objective and it was said you've 8 got to zone or you've got to provide for this type of 9 housing for Colts Neck --10 MR. FRIZELL: And encourage. 11 THE CHAIRMAN: -- your question 12 to him, would this be his choice or this or is that? MR. FRIZELL: Yes, whether his 13 د میں استیسینی (از اکثر آباد) سیچانہ استادی ایک ایک ایک 가장 가지 않는 것이 있는 것이 있는 것이 있다. - 이 성장, 가지 순구의 소설과 것은 사이 것이 있다. 1. A. 1. 2. 14 opinions would be different. 15 THE CHAIRMAN: Whether your 16 opinion would be any different in terms of your 17 consideration on the perimeter versus the center of 18 town and so forth? 19 I'm still not sure. I'm trying 20 to restate your question, Mr. Frizell. I'm not doing 21 a very good job. 22 The primary thrust, THE WITNESS: 23 if I were in that situation without any past history, 24 would be to examine the existing land use patterns; 25 as a major input, the physical characteristics as

| | Queale - cross 87 |
|----|--|
| 1 | well. As I indicated earlier, we have identified six |
| 2 | major agricultural areas. In my opinion, a community |
| 3 | such as Colts Neck, where you have such an |
| 4 | identifiable agricultural strength, there is a |
| 5 | justifiable reason to at least pursue the policy |
| 6 | making not to continue in the agricultural program, |
| 7 | but at least to pursue it depending on whether that |
| 8 | decision to preserve or not preserve could result in |
| 9 | two different development regulations concepts. My |
| 10 | preference would be, absent the public input, the |
| 11 | decision and policy makers and so forth, would be to |
| 12 | make an effort to preserve the agricultural industry |
| 13 | that does exist here and seems to be thriving. And |
| 14 | to do so with some type of transfer of credits |
| 15 | project and provide options to the design of the |
| 16 | housing that would result; including planned |
| 17 | development, cluster design, mixed housing types. |
| 18 | Where the densities got sufficiently large and we |
| 19 | would anticipate the need for water and sewer |
| 20 | programs, it would be my intent to encourage that |
| 21 | toward the eastern end so that we could explore or |
| 22 | build upon the infrastructure that's there. |
| 23 | BY MR. FRIZELL: |
| 24 | Q. You had some problems with the number of |
| 25 | houses. Can you tell me, in terms of your |
| | |

٦

à c

Г

5

88 Queale - cross 1 implementation of the decision, do you think that the 2 number of housing units that we've proposed here is 3 too high? 4 MR. MARKS: I'm going to object. 5 I'm going to object, because that's not what the 6 decision stated. The decision of Judge Lane merely 7 stated that the Township would be required to develop 8 areas -- in which will be built houses on small lot 9 areas, in which townhouses, garden apartments, patio 10 housing and zero lot line housing may be placed, 11 areas in which a mix of small houses, multi-family 12 and commercial adjuncts may be and areas -- he didn't 13 say to put it altogether. He didn't say to use your 14 density. 15 MR. FRIZELL: I have a question 16 posed to Mr. Queale, whether he thought the numbers 17 too high. 18 MR. BRENNAN: Judge Lane 19 specifically did avoid the issue of density. 20 MR. FRIZELL: You are correct. 21 Mr. Brennan. But one unit per acre, 1,100 units at 22 one unit per acre is 1,100 acres. What does that do 23 to agriculture -- just to give away my whole line of 24 argument before I ask Mr. Queale a question, what is 25 the implementation of that decision on the smallest

Queale - cross 89 1 possible lot of land consistent with health, safety 2 and welfare? 3 MR. MARKS: Have you been qualified as a planning expert? 4 5 MR. FRIZELL: It is our objective 6 and should be the objective of the Township. So 7 therefore, the total number of units that are being 8 proposed, in terms of what Mr. Queale would be in 9 terms of corss-examining him and impeaching his 10 testimony, is probably the most important question. 11 MR. BRENNAN: Well, I question 12 the relevancy. MR. FRIZELL: If he doesn't argue 13 • 14 that the number of units is improper and then he 15 argues that the density should be reduced, what he's 16 saying is spread the thing around, take up more land, 17 destroy more agricultural uses. 18 MR. HERMAN: Mr. Chairman, I 19 think Mr. Frizell --20 MR. FRIZELL: Are we going to get 4 21 a ruling on this? 22 You are not even involved. 23 MR. HERMAN: I think I am 24 involved. 25 MR. FRIZELL: I have asked a

| | 1 |
|----|---|
| | Queale - cross 90 |
| 1 | question. Mr. Marks has stated an objection. Just |
| 2 | for the purposes of proper procedure, can we get a |
| 3 | ruling on that question? |
| 4 | MR. SAGOTSKY: I think the |
| 5 | Chairman should hear from the representative of the |
| 6 | School Board. |
| 7 | MR. HERMAN: I think that Mr. |
| 8 | Frizell is implying that Mr. Queale has said that for |
| 9 | 1,100 units at one per acre you must destroy 1,100 |
| 10 | acres of agricultural land. I don't think that's |
| 11 | what he said at all. I think specifically he talked |
| 12 | about perhaps innovative planning decisions where the |
| 13 | units whereas they may be at an average density of |
| 14 | one per acre, don't necessarily consume one acre each |
| 15 | I think he talked about preserving agricultural land |
| 16 | and still building one residential unit to the acre |
| 17 | and I think you are misrepresenting about what he's |
| 18 | talking about. |
| 19 | MR. FRIZELL: We can find out if |
| 20 | he answers the question. |
| 21 | MR. MARKS: May I respond further |
| 22 | on that, with the permission of the Board? |
| 23 | THE CHAIRMAN: Yes, please. |
| 24 | MR. MARKS: I would just ask the |
| 25 | Board in the next week to take a look at the last |
| | |

Queale - cross 91 1 three pages -- my copy of the of Judge Lane's 2 decision is light. I believe it's page 25, 26 and 27 3 But I would just like to read a portion, a page and a 4 half, if you permit me. I'm sorry, two pages. 5 MR. FRIZELL: Wait a minute. б Hold it. I have a question. There's an objection. 7 Let's move on it. That's already part of the record. 8 That's all marked in. 9 MR. MARKS: It's germane to your 10 objection, and I think you don't want to hear it. 11 Judge Lane has said: I have heard proofs with 12 respect to Plaintiff's property solely for the 13 purpose of demonstrating the higher density 14 development is feasible in Colts Neck, even though it 15 may not be at the densities talked of by Plaintiff. 16 MR. FRIZELL: What was the 17 density talked of by Plaintiff at that case, do you 18 know? 19 MR. MARKS: No. 20 MR. FRIZELL: Any other questions? 21 Do we still have an objection pending to the question? 22 MR. MARKS: Absolutely, 23 absolutely. 24 MR. FRIZELL: My question to Mr. 25 Queale is, it seems to me for the purposes of

Queale - cross 92 1 cross-examining Mr. Queale's testimony, is whether he thinks that number is too high. I mean, obviously, 2 3 if he thinks that it's only ten percent of the number 4 that should be incorporated, then you can proceed from there. But if he thinks it's too high, then we 5 6 can proceed from that point. 7 THE CHAIRMAN: Maybe we should 8 have the question asked again, Mr. Frizell. 9 MR. FRIZELL: My question was 10 whether or not Mr. Queale felt in terms of the 11 implementation of the units or the number of houses 12 that we have proposed in this particular application 13 is too many. 14 MR. SAGOTSKY: It is my opinion 15 that the question is not relevant. 16 THE CHAIRMAN: Objection upheld. 17 BY MR. FRIZELL: 18 Q. All right. Mr. Queale, in terms of the 19 number of acres that you believe should be dealt with 20 in terms of implementing that decision, can you tell me how many acres you would anticipate rezoning in 21 22 terms of the decision? 23 I don't recall the acreage specifically. I λ. 24 would generalize by saying that it's a larger area 25 than equivalent to your site.

Oueale - cross 93 1 0. Is it less than 400 acres? 2 Well, I just said I couldn't generalize. If Α. 3 it's approximately double the area of your site, then it would be something a little more than 400. 4 5 0. What do you think are reasonable 6 densities in terms of net residential densities. 7 MR. MARKS: I object for the same 8 question that the Chair ruled on. 9 MR. FRIZELL: This is a completely different question. 10 11 In terms of providing least cost housing Q. what do you think are reasonable densities for 12 13 townhouses, net residential densities. 14 MR. MARKS: I object. This 15 question is speculative and the concept of least cost 16 is irrelevant. 17 In today's markets. Q. 18 THE CHAIRMAN: You have an 19 objection, Mr. Marks? 20 MR. MARKS: Yes. 21 MR. SAGOTSKY: Well, the 22 sufficient foundation hasn't been laid; in what 23 location in the same Township. There could be 24 different locations. And I should think the question 25 would have to depend on the specific locations.

Queale - cross 94 1 MR. FRIZELL: The location has 2 very little to do with net densities. Given a 3 developable piece of real estate, my question is in 4 terms of what you are goig to give away -- not in 5 terms of what you are going to give away for whatever 6 reason or you are going to put into green areas or 7 roads. Within a given residential section, what are 8 reasonable and yet least cost densities, net 9 densities. 10 Mr. Queale has answered this 11 question previously. 12 MR. SAGOTSKY: Can you answer 13 that? 14 THE WITNESS: I would say 15 somewheres with the townhouse design, somewheres of 16 four, five or six units per acre and with garden 17 apartments, somewheres eight to the acre. 18 BY MR. FRIZELL: 19 Garden, net eight to the acre, you are Q. 20 saying is least cost? Have you rendered that opinion 21 before? 22 Α. Sure. 23 Where? Q. Well, I can't tell you where. 24 Α. 25 Have you ever heard that opinion by Q.

CTATE CHOOTHAND DEDODTING CEDUTOP THO

| | · · · · · · · · · · · · · · · · · · · |
|----|---|
| | Queale - cross 95 |
| 1 | anyone else besides yourself? |
| 2 | A. I can't recall that. |
| 3 | Q. Have you ever seen garden apartments |
| 4 | developed at eight units per net acre? If you have, |
| 5 | please tell me where they are. I would like to see |
| 6 | them. |
| 7 | A. I can't specify, but I'm sure you know I |
| 8 | can't. I'm sure I could identify some areas. |
| 9 | MR. MARKS: Would you be willing |
| 10 | to supply the Board with that data at a future date? |
| 11 | THE WITNESS: Sure. The |
| 12 | assumption is that it's a two-story unit. If it's |
| | three stories, it's going to be three stories |
| 14 | could be as high as 12, 13 units. It also depends on |
| 15 | one bedroom or two bedroom or three bedroom. |
| 16 | BY MR. FRIZELL: |
| 17 | Q. I asked a net density for garden |
| 18 | apartments. You told me that eight units an acre is |
| 19 | a least cost density for garden apartments, net? |
| 20 | A. But, Mr. Frizell, you are involved enough in |
| 21 | land development to know that there would be |
| 22 | different issues of distribution of bedroom type, |
| 23 | one-story, two-story or mid-rise apartments. I |
| 24 | assumed in that two-story garden apartment structures |
| 25 | Three-story would be more; and, that the bedroom mix |

STATE SHORTHAND REPORTING SERVICE, INC.

| r | |
|-----|--|
| | Queale - cross 96 |
| 1 | could involve different numbers. If you are talking |
| 2 | entirely senior citizen efficiencies and one bedroom, |
| 3 | you are talking high numbers. |
| 4 | MR. SAGOTSKY: Let |
| 5 | MR. FRIZELL: I'll accept the |
| 6 | two-story garden. If you can find a two-story garden |
| 7 | apartment, four units on the ground and four units |
| 8 | one story up, on one given acre of ground and they |
| 9 | call it a garden apartment other than a single, |
| 10 | isolated four unit job, I would like to see it. But, |
| 11 | in any event, let's go on. |
| 12 | BY MR. FRIZELL: |
| 1.3 | Q. What does the current master plan say in |
| 14 | terms of recommendations, in terms of land use plan |
| 15 | for the Orgo Farm? |
| 16 | A. I would have to refresh myself but I believe |
| 17 | the commercial property either stops at the present |
| 18 | line on the district or may go back to the power line. |
| 19 | And then the rest the eastern portion of the power |
| 20 | line is low densities, residential. There is no |
| 21 | non-residential uses around the interchange. I would |
| 22 | have to look at the master plan. I haven't look at |
| 23 | it for some time. |
| 24 | Q. Has the land use plan changed since its |
| 25 | original implementation? |
| | |

¥

| | Queale - cross 97 |
|---------|---|
| 1 | A. No. |
| 2 | Q. Is this a copy of the land use plan? |
| 3 | MR. FRIZELL: I would like to |
| 4 | have a place marked in the record for the master plan |
| 5 | of Colts Neck Township except I would not like to |
| 6 | give you mine at this time. We could mark this? |
| 7 | Can we mark that, Mr. Sagotsky? |
| 8 | MR. SAGOTSKY: Well, at this |
| 9 | point you are engaging in cross-examination. |
| 10 | MR. FRIZELL: Yeah. |
| 11 | MR. SAGOTSKY: It really should, |
| 12 | in order to be in place, it should be when you put in |
| 13 | your case or what affirmative position |
| 14 - 14 | MR. FRIZELL: Perhaps I'll use it |
| 15 | for rebuttal. |
| 16 | Well, I don't think we have to |
| 17 | mark the master plan of the town. I think the Zoning |
| 18 | Board of Adjustment can take judicial notice of it. |
| 19 | BY MR. FRIZELL: |
| 20 | Q. Now, Mr. Queale, does the reference to |
| 21 | the master plan refresh your recollection in terms of |
| 2 2 | the of what the master plan designates for the |
| 23 | Orgo farm? |
| 24 | A. Yes. |
| u 25 | Q. What is it? |
| | |

ueale - cross

1 The power line does become the dividing line Α. 2 between the commercial at the north half of that 3 western fringe. The southern half is low density 4 research and development of office and experimental 5 and similar uses. East of the power line it's -it's low density residential and farm. 6 7 The designation in the present plan for Q. 8 the areas on the other side of the freeway for 9 commercial office type uses is more consistent with 10 the master plan than two acre residential lots, is it 11 not? 12 Well, to the portion that's west of the power Α. 13 line it would be conforming, yeah. 14 If I told you that virtually the entire Q. 15 area -- that almost most of the commercial area is 16 west the power line, all right? Now, in terms of the 17 area on the other side of the highway, does your 18 master plan talk about agricultural uses for the Orgo 19 farm in the areas west of the power line? 20 A. Not for areas west of the power line. 21 Your master plan also anticipates the 0. 22 installation of a municipal police department, 23 doesn't it? 24 λ. There may be some general language in there 25 that same day the Township should anticipate a police

98

Queale - cross

1

department.

2 0. Now, did you discuss in your master plan 3 the possibility or feasibility of a sewer interceptor 4 in the vicinity of the Orgo farm? 5 There was, at one time, some discussion about a Α. 6 sewer interceptor coming up the brook that crosses 7 and runs generally parallel to Route 34. 8 0. And was that the feasibility and the 9 typing of that interceptor dependent primarily upon 10 land use considerations adopted by the Township and 11 the completion of the Route 18 freeway? 12 Α. The anticipation was a service to the 13 non-residential development that was shown around 14 Route 34 and Route 18 interchange; because, I believe 15 there was language in the text referring to 16 development of that sort, dependent on water and 17 sewer service. 18 0. You agree that the commercial areas of 19 Colts Neck as developed and as proposed for 20 development are in the vicinity of Route 537 and 21 Route 34? 22 Yes Α. 23 And you will agree, won't you, in the Q. 24 community that there is a concentration of community 25 facilities in that general area?

99

STATE SHORTHAND REPORTING SERVICE, INC.

•

| | Queale - cross 100 |
|-----|---|
| 1 | A. Well, when you say "community facilities", that |
| 2 | infers to me, public. |
| 3 | Q. Do you know where the post office is? |
| 4 | A. That's in the Village of Colts Neck, west of 34. |
| 5 | Q. Do you know where the Atlantic |
| 6 | Elementary School is? |
| 7 | A. East of 34, abutting the northwest corner of |
| 8 | your project. |
| 9 | Q. And do you know where the firehouse on |
| 10 | Route 537 is? |
| 11 | A. Just west of the village. |
| 12 | Q. Are there any other community facilities |
| 13. | that you that the Township of Colts Neck provides |
| 14 | that are elsewhere in the Township? |
| 15 | A. The Conover school. |
| 16 | A. The conover school. Q. Other than schools? Jobut population |
| 17 | A. The municipal complex, the Department of Public |
| 18 | Works garage, the first aid squad. |
| 19 | Q. Where's the first aid squad? |
| 20 | A. Well, it used to be in the Village of Colts |
| 21 | Neck. I think it just moved to the back of this |
| 22 | municipal complex. |
| 23 | Q. Now, in terms of all those facilities, |
| 24 | you can't really compare in terms of those facilities |
| 25 | community and commercial facilities, you don't mean |
| | |

 $\tilde{\boldsymbol{\zeta}}$

| | Queale - cross 101 |
|----|---|
| 1 | to say that the vicinity on the eastern sector of the |
| 2 | town along Route 537 has as good access to those |
| 3 | facilities as the proposal, do you? |
| 4 | A. If you are talking about existing facilities, |
| 5 | your site is more convenient to some of those |
| 6 | facilities, recognizing that the Atlantic School |
| 7 | last I did research was serving only grades four |
| 8 | and five. So the school system is scattered about |
| 9 | with bus service. We have proposed an additional |
| 10 | school site at the east end, on Hockhockson Road plus |
| 11 | an additional firehouse at the east end. Rescue |
| 12 | squads, municipal buildings and things of that sort |
| 13 | are usually municipal-wide services, in any event. I |
| | don't think they have much bearing. |
| 15 | Q. Access to the post office, access to the |
| 16 | firehouse? |
| 17 | A. Well, the access |
| 18 | Q. You mean access to one school is |
| 19 | better than access to none, is it not? |
| 20 | A. Well, to the extent that you have fourth and |
| 21 | fifth grade students that would be living at the |
| 22 | north end of your project, that might be true. Those |
| 23 | students that live to the south end of the project, |
| 24 | it might be a busing situation. In any event, all |
| 25 | those students that are non-fourth and fifth grades |

STATE SHORTHAND REPORTING SERVICE, INC.

•

| | Queale - cross 102 |
|------|---|
| 1 | students are going to be bused to points where the |
| 2 | school sites are. |
| 3 | Q. You are assuming that that particular |
| 4 | set up continues? |
| 5 | A. That's right. |
| 6 | Q. Let's just go down your list, Mr. Queale. |
| 7 | In terms of access to commercial and community |
| 8 | facilities, you don't deny that the proposal has good |
| 9 | access to commercial and community facilities, do you |
| 10 | A. To the extent that there is the commercial |
| 11 | service on Route 34, it has more convenient access |
| 12 | than a site away from 34. My testimony was directed |
| 13 | toward the limitation of those facilities in a strung |
| 14 | out nature; just to underline the fact that these are |
| 15 | not consolidated services that are within easy |
| 16 | pedestrian walk. They require a vehicle, not |
| 17 | withstanding the fact that your project abuts a |
| . 18 | portion of that business district. |
| 19 | Q. But that business district could be |
| 20 | could continue to be developed with pedestrian access |
| 21 | in mind, could it not? |
| 22 | A. Only portions of it could. The shopping center |
| 23 | that's northwest of the intersection is an emerging |
| 24 | shopping center that would not be conveniently access |
| | to the pedestrian access from your project. |

•

| | Queale - cross 103 |
|-----------|--|
| 1 | Q. Which shopping center? |
| 2 | A. The one that's northwest of the intersection. |
| 3 | Q. In any event, even eliminating those |
| 4 | areas where pedestrian access would not be convenient, |
| 5 | isn't it better, if you have to rely on automobile |
| 6 | transportation, to reduce the number of trips and the |
| 7 | length of trips? |
| 8 | A. The number of trips? I thought that would be |
| 9 | changed. The length of the trips, to the extent that |
| 10 | the services that are of the nature that are going to |
| 11 | be in high demand, your assumption is correct. With |
| 12 | respect to major shopping needs, they're outside of |
| 13 | the Township in any event. |
| 14 | Q. That's number one. In terms of access |
| 15 | to major transportation routes, you'll agree, won't |
| 16 | you, that the Orgo Farm site has good access to major |
| 17 | transportation routes within the Township? |
| 18 | A. Yes. |
| 19 | Q. In terms of potential for water and |
| 20 | sewer, do you disagree that the site has potential |
| 21 | for water and sewer facilities on the site? |
| 22 | A. They have the potential. The area of the site |
| 23 | would indicate to me that it was flexible to be able |
| 24 | to design it. There is not access to existing |
| 25 | services. So it would have to be created services |
| | 1 · · · · · · · · · · · · · · · · · · · |

F

Queale - cross 104 1 and then designed. 2 I understand that. But you don't know, Q. 3 for instance, whether or not on the other end of Route 537 you indicated you don't know if there is 4 5 any capacity in those lines in Tinton Falls; isn't 6 that correct? 7 That's correct. Α. 8 MR. MARKS: I object on the basis 9 MR. FRIZELL: There is no 10 question pending, Mr. Marks. Can we just have some 11 modicum of the decorum --12 MR. MARKS: I'm going to object. 13 MR. FRIZELL: -- so we can object 14 when questions are raised? And other than that, 15 we'll just proceed along. I listened to Mr. Marks' 16 questions and if I missed my objections, I missed 17 them. But can I ask another question? 18 THE CHAIRMAN: I believe the 19 witness answered the last question, no. 20 MR. MARKS: I think Mr. Frizell 21 combined two questions. He talked about water and 22 sewer on the subject parcel and then only related his 23 question to the east to sewer. He was talking about 24 the capacity of the sewer system in Tinton Falls. He 25 did not relate his question, a parallel relationship,

| | | Queale - cross 105 |
|-----------|----|---|
| | 1 | to the water. |
| | 2 | MR. FRIZELL: Excuse me, Mr. |
| | 3 | Marks. |
| | 4 | BY MR. FRIZELL: |
| | 5 | Q. Do you know, Mr. Queale, whether or not |
| | б | there is capacity in existing lines for servicing a |
| | 7 | housing project in the vicinity of the eastern end of |
| | 8 | the Township along Route 537? |
| | 9 | A. There is, I believe, the ten inch main in the |
| | 10 | Swimming River Reservoir. I have assumed that there |
| | 11 | would be capability of tapping that line. I have |
| | 12 | also made the assumption that, you know, worst case |
| \square | 13 | situation and it could not be tapped, that location |
| | 14 | is the shortest distance to the treatment plant; and, |
| | 15 | in a parallel line, would be more feasibly installed. |
| | 16 | Q. Did you explore the capability of any |
| | 17 | water lines in that end of town? |
| | 18 | A. No. |
| | 19 | Q. It wasn't for lack of time, was it, |
| | 20 | since Judge Lane's decision that you didn't explore |
| | 21 | that capability? |
| | 22 | A. Time either was or was not a factor. I am |
| | 23 | resonding to the questions with respect to what I |
| | 24 | would suggest as a planner in a general sense. I |
| | 25 | don't in any municipal plan, whether I have ten years |
| | | |

,

Queale - cross

1

2

3

4

5

to evaluate the system, do that that kind of engineering analysis. But it is my common practice to explore where the utility lines are and what would be a logical extension of the utility infrastructure to provide additional services.

6 Q. Now, in terms of development suitability, 7 I know I only have to ask you because you don't the 8 master plan with you, based on your general knowledge, 9 you don't deny that your own master plan generally 10 refers to the Orgo Farm; and, in fact, the county 11 Natural Features Study refers to the Orgo Farms as an 12 area that is suitable for development? In terms of soils and topo, it is suitable. 13

o de la compañía de l You'll agree generally that the southeaster: 14 15 sector of the Township in the vicinity of Hockhockson 16 brook and south of Route 537 and east of the Earle 17 railrod depot is heavily inundated with wet soil and 18 is -- and that you categorized this area as 19 unsuitable for development within the master --20 I don't believe that that's the case. I did Α. 21 identify the drainage corridors along the tributaries 22 to Hockhockson Brook. And as I indicated earlier, the closer you get to the brook, the category of 23 24 recommended non-development is in the plan. As you 25 get away from the brook, there are wet

STATE SHORTHAND REPORTING SERVICE, INC.

106

| - | |
|----|---|
| | Queale - cross 107 |
| 1 | characteristics that would indicate it can't be |
| 2 | developed with on-site sewers or at least that would |
| 3 | be a potential problem. But I believe it's |
| 4 | identified as being capable of development with |
| 5 | sewers |
| 6 | MR. MARKS: You meant on-site |
| 7 | septic systems? |
| 8 | THE WITNESS: I meant on-site |
| 9 | septics. |
| 10 | Q. Now, you don't disagree with me, Mr. |
| 11 | Queale, that the development pattern of Orgo Farms is |
| 12 | one which is conducive to assemblage of large parcels |
| 13 | of land? |
| 14 | A. As a single large parcel, the same |
| 15 | characteristics exist all along south of 537, east of |
| 16 | the of your property to the boundary of the |
| 17 | Township. |
| 18 | Q. Does it apply down along Water Street |
| 19 | and Hockhockson Road and Ord Road? |
| 20 | A. South of Hockhockson Brook, the parcels do |
| 21 | become smaller although there are some sizable |
| 22 | parcels in there, yes. |
| 23 | Q. Now, you won't disagree with me, will |
| 24 | you, Mr. Queale, and you will agree with Mr. Halsey, |
| 25 | won't you, to the effect that under the general |

6

| _ | |
|-----|---|
| | Queale - cross 108 |
| 1 | guidelines of the county plan and the general |
| 2 | guidelines of Tri-state a higher or what I would call |
| 3 | a medium density project can't be built anywhere |
| 4 | within the Township of Colts Neck? |
| 5 | A. That's the recommended decision. |
| 6 | Q. So that in that aspect all properties in |
| 7 | the entire Township are equal? |
| 8 | A. In terms of the density application throughout |
| . 9 | the Township, that's correct. |
| 10 | Q. Now, in terms of impact on neighboring |
| 11 | master plans, you will agree with me, won't you, that |
| 12 | in terms of not interfering or not adversely |
| 13 | impacting a development pattern which has been |
| 14 | established or preferred by a neighboring town, that |
| 15 | putting a higher density or medium density |
| 16 | development next to a low density, single area in |
| 17 | Tinton Falls would be more incompatible with |
| 18 | surrounding master plans and zone plans than |
| 19 | containing a medium density project entirely within |
| 20 | the or near the center of the Township of Colts Neck? |
| 21 | A. I don't necessarily agree with your full line |
| 22 | of thought or your rationale. |
| 23 | Q. That's number one. Would you answer? |
| 24 | MR. SAGOTSKY: Let him finish. |
| 25 | MR. FRIZELL: Let me ask a |

~

STATE SHORTHAND REPORTING SERVICE, INC.

Queale - cross

question.

1

2 THE WITNESS: I can't answer that 3 yes or no. I'm trying to give an explanation on 4 where your questions may have had some analyses. 5 Number one, we would be talking 6 about putting residential uses next to Tinton Falls, 7 which is also residential in nature. And as I 8 indicated, the density is one and a half units per 9 acre. That does not make it incompatible because of 10 the increased density. The decisions on what that 11 density should be has not yet been achieved. The 12 other implications could be that, again with 13 relationship to the density, to what extent is 14 clustering going to be permitted and how big will the 15 buffer areas be from say 537, from the Tinton Falls 16 boundary. The Tinton Falls boundary happens to back 17 up to a church and vacant land. It has strip 18 frontage and it has the additional frontage. The 19 assumption about your project at six to the acre 20 being -- near the center of town being less an impact 21 because it abuts the business district may be true on 22 that particular boundary. But it is a much more 23 drastic contrast to the farm on the east side and the 24 agricultural areas that abut it, going from six to 25 the acre down to approximately one unit for every 50

109

| | Queale - cross 110 |
|----|---|
| 1 | acres. |
| 2 | BY MR. FRIZELL: |
| 3 | Q. What would you recommend, a gradual |
| 4 | reduction in density into the farmland? |
| 5 | A. No. But I would like to have an overall |
| 6 | agricultural preservation program if that, in fact, |
| 7 | becomes the policy. |
| 8 | Q. What does overall agricultural program |
| 9 | mean, current to density nowhere in the town? Isn't |
| 10 | that the question if you are talking about that type? |
| 11 | You keep making reference to something like a gradual |
| 12 | spreading out of the density. That is, you shouldn't |
| 13 | go from a rural density up to six units per acre. |
| 14 | What's the alternative? The alternative is to have |
| 15 | no higher density development. |
| 16 | MR. SAGOTSKY: May we have a |
| 17 | reframing of that question? I think it has been |
| 18 | the question has been interspersed with testimony. |
| 19 | So perhaps if we could be succinct in reframining the |
| 20 | question we could have a specific |
| 21 | MR. HERMAN: May I be heard for a |
| 22 | minute? I think Mr. Frizell's cross-examination is |
| 23 | going far beyond not only the testimony of Mr. Queale |
| 24 | but the scope of this hearing. Mr. Frizell is |
| 25 | attempting to place on trial other parcels of |

~

.

Queale - cross 111 1 property within the boundaries of Colts Neck which 2 are not the subject matter of this hearing. This is 3 not a Planning or Council meeting to determine what 4 zoning ought to be in Colts Neck. This is not a 5 trial on what is good zoning or good planning. This 6 is a Board of Adjustment hearing on a variance 7 application for a specific piece of property. I've heard more testimony from Mr. Frizell about the 8 9 merits or demerits of other pieces of property that I 10 don't think are relevant. And Mr. Frizell, who is 11 constantly admonishing us about watching the clock and pursuing relevant subjects, I think, is off on a 12 frolic which is not germane to what it is the 1.3 14 obligation of this Board to ascertain. 15 MR. FRIZELL: It appears to me 16 that Mr. Queale testified that one of the reasons 17 that this application should be denied is there are 18 other areas in this town for the development. I 19 think that's a proper subject for cross-examination. If it isn't, I went to the wrong law school. 20 21 MR. HERMAN: The hearing here is 22 with regard to the Orgo Farms property. And Mr. 23 Queale has testified to what he feels are good and 24 bad features of that property and why that property 25 should or should not be granted the variance that you

| | Queale - cross 112 |
|-----|--|
| 1 | are asking for. I don't think the property along the |
| 2 | Tinton Falls line is on trial. |
| 3 | MR. FRIZELL: Why don't you raise |
| 4 | your objection while Mr. Queale is testifying, anyway? |
| 5 | That's his testimony and this is cross. Let's go. |
| 6 | MR. SAGOTSKY: Well, the |
| 7 | objection is based upon the fact in the questions are |
| 8 | now directed to issues beyond the control, shall we |
| 9.5 | say, the proper direction of the Adjustment Board. |
| 10 | MR. HERMAN: Not only control, |
| 11 | Mr. Sagotsky, but this Board isn't charged with |
| 12 | deciding what ought to be next to Tinton Falls. |
| 13 | They're charged with this hearing to decide whether. |
| 14 | or not this Applicant should get this variance on |
| 15 | this piece of property. |
| 16 | MR. FRIZELL: Mr. Herman, I Kohl |
| 17 | suggest you read <u>Cole against Fairlawn</u> , which says |
| 18 | that the relative suitability of a particular site |
| 19 | for the use for which the variance is sought is a |
| 20 | relevant consideration for the Zoning Board of |
| 21 | Adjustment. So let's go. Let's not argue all the |
| 22 | law. That's a relevant consideration. |
| 23 | MR. MARKS: I appreciate Mr. |
| 24 | Frizell's recitation of the law and that may or may |
| 25 | not be so, depending on what his alumni association |
| | |

| | Queale - cross 113 |
|----------|---|
| 1 | feels. It is, nevertheless I think the objection |
| 2 | is a valid one. I think we are getting far afield. |
| 3 | I just note that this cross-examination is lasting |
| 4 | longer than the direct examination. I would like the |
| · 5 · | Chair to rule on the question. |
| 6 | MR. FRIZELL: Mr. Marks, if it |
| 7 | was a valid basis for objection, the Orgo Farms trial |
| 8 | would have taken three days instead of 12; my case |
| 9 | took two days, and the Township's took ten. |
| 10 | THE CHAIRMAN: I think we've been |
| 11 | through that before. I think we would like to try |
| 12 | we keep on chucking away at the clock. I think we |
| 13 13 | would like to try to concentrate this as much as is |
| 14 | feasible and try to keep Tinton Falls and other towns |
| 15 | out of this discussion because I don't think we've |
| 16 | had enough testimony that there hasn't been any |
| 17 | checking as to whatever is going on Tinton Falls and |
| 18 | so forth. I think |
| 19 | MR. SAGOTSKY: I think the ruling |
| 20 | is the objection is sustained. |
| 21 | THE CHAIRMAN: The objection is |
| 22 | sustained. |
| 23 | MR. SAGOTSKY: Carry on from |
| 24 | there, Mr. Frizell. |
| 25 | THE CHAIRMAN: Let's keep it as |
| | |
| | |

~

Г

| | gueale - cross 114 |
|----|---|
| 1 | much to the point to this particular tract of Orgo |
| 2 | Farms as we can possibly do. |
| 3 | BY MR. FRIZELL: |
| 4 | Q. Are there any proposals adopted by the |
| 5 | Township anywhere, Mr. Queale, for the installation |
| 6 | of public utilities anywhere in Colts Neck? |
| 7 | A. Not to my knowledge. |
| 8 | Q. So that in terms of the tenth, so-called |
| 9 | tenth criteria, that we discussed, that is the |
| 10 | provision of future public utilities, there is no |
| 11 | utility service plan adopted in Colts Neck for the |
| 12 | installation of water or sewer facilities? |
| 13 | A. That's one of the issues that is under |
| 14 | consideration on the reevaluation and it has not been |
| 15 | adopted. I merely make the make note the fact |
| 16 | that there are at the eastern end. |
| 17 | Q. When you said it was not in conformance |
| 18 | and impairs the intent of the zoning |
| 19 | A. The existing one. |
| 20 | Q the zoning plan that was found to be |
| 21 | invalid by Judge Lane? |
| 22 | A. Yes. |
| 23 | MR. SAGOTSKY: No, I have to |
| 24 | object to that. That was argued before. It is in a |
| 25 | state of suspension. It is the only one that we have |
| | |

| | Queale - cross 115 |
|--------------|--|
| 1 | to go by. |
| 2 | MR. FRIZELL: If you have to go |
| 3 | by one. |
| 4 | MR. SAGOTSKY: I'm aware. But as |
| 5 | it now stands, that is the only variance you are |
| 6 | seeking from the present zoning law and we have to go |
| 7 | by that. |
| в | MR. FRIZELL: We are also seeking |
| 9 | a variance from the subdivision ordinance and the |
| 10 | site plan ordinance. But, all right. |
| 11 | BY MR. FRIZELL: |
| 12 | Q. Now, in a general planning sense, Mr. |
| 13 - 13 - 13 | Queale, would you agree or not agree that generally |
| 14 | higher density or middle density forms of housing, |
| 15 | patio homes, townhouses, et cetera, should be |
| 16 | clustered around the area within the Township if |
| 17 | there is one which is historically the focus of |
| 18 | community commercial developments and, to that extent, |
| 19 | community residential development? |
| 20 | A. I've had situations which support that theory |
| 21 | and I have had situations which have gone against |
| 22 | that theory. To the extent that where you have a |
| 23 | historic crossroads and a pattern has emerged, some |
| 24 | towns have recognized that as a crossroads locations |
| 25 | and have established their density around an |
| | |

•

STATE SHORTHAND REPORTING SERVICE, INC.

,

| | Queale - cross 116 |
|----|---|
| 1 | expansion of that higher density core. I've had |
| 2 | other situations where they have recognized the |
| 3 | existing land use pattern, but because of clutter |
| 4 | situations felt what was in that crossroads area |
| 5 | should be the limit and for additional development |
| 6 | had gone to other locations. |
| 7 | Q. Let me ask you generally about this |
| 8 | agricultural issue. The Orgo Farm only has one side |
| 9 | which is directly bounded by agricultural uses; isn't |
| 10 | that correct? |
| 11 | A. Yes. |
| 12 | Q. The Orgo Farm is located in an area, |
| 13 | because of the access to major transportation routes, |
| 14 | where one could expect, based not on a detailed |
| 15 | traffic analysis but from a general planning |
| 16 | perspective, where one would expect to minimize any |
| 17 | commuter traffic through existing agricultural areas, |
| 18 | is it not as opposed to, for instance, any other area |
| 19 | of the town where there may be farms and in order to |
| 20 | get to the major transportation routes you would have |
| 21 | to drive through agricultural areas? |
| 22 | A. There is a great deal assumed in your question |
| 23 | that may or may not be relevant to either your site |
| 24 | or any other site. My general comments were that |
| 25 | with the concentration of development in the coastal |
| | |

Г

5

| | Queale - cross 117 |
|----|--|
| 1 | corridor, there are higher concentrations of jobs as |
| 2 | well as shopping; and, by nature of the shopping, |
| 3 | related jobs. That I think there's at least in my |
| 4 | opinion, a higher probability that more people would |
| 5 | go in that direction. So that the eastern end would |
| 6 | result in less traffic along those roads. Now, there |
| 7 | can be unique circumstances by the occupancy of |
| 8 | particular tenants they could throw that out the |
| 9 | window. But your assumption doesn't necessarily hold |
| 10 | true on your property. |
| 11 | Q. Well, did you do a traffic analysis to |
| 12 | determine where traffic would be bound out of the |
| 13 | site and what percentage would be bound out of the |
| 14 | site along 537? |
| 15 | MR. MARKS: I object to the |
| 16 | question. You just asked from a general planning |
| 17 | perspective. |
| 18 | Q. I understand that. I'm just asking if |
| 19 | he did that kind of analysis. |
| 20 | Do I understand that you would expect |
| 21 | more people to go out 537 in an easterly direction? |
| 22 | A. Possibly, to continue north to the same |
| 23 | corridor. |
| 24 | . Q. Can you tell me what you base that on? |
| 25 | A. That's where the jobs are. That's where the |
| | |

Queale - cross 118 1 major shopping is, not east, in that general area to 2 Middletown or east to Eatontown or south to Ocean 3 Township. 4 Q. Do you know how many jobs are east 5 versus how many jobs are north or northwest? 6 No Α. 7 Now, in terms of the reservoir, you'll ο. 8 agree that there's an advantage, will you not, to 9 sewering the project into the Hockhockson Brook? 10 As opposed to sewering it so it would go into Α. 11 the reservoir? 12 Q. Correct. 13 Α. Yes این اینکوری جار ایران در مصنوعی داری ایران کاران در در داران ایران ایران در 14 Now, in terms of that portion which 0. 15 drains into the reservoir, are you familiar with any 16 development techniques which could mitigate any 17 adverse water pollution impacts which have not been 18 0 incorporated into the site design here? 19 MR. MARKS: I'm going to object 20 to that question on the grounds that I think that's a 21 matter of expert testimony. You presented an expert, 22 we'll have someone else. It's beyond the scope of 23 this witness. 24 THE CHAIRMAN: I think I'll 25 uphold that objection.

| | Queale - cross 119 |
|----|---|
| 1 | BY MR. FRIZELL: |
| 2 | Q. Mr. Queale, are you generally familiar |
| 3 | from a planning perspective with techniques to |
| 4 | mitigate adverse environmental impacts from urban |
| 5 | runoff? |
| 6 | A. In a general sense, yes. |
| 7 | Q. What are they? |
| 8 | A. Retention of those in detention and retention |
| 9 | ponds; the filtering of the storm drainage system in |
| 10 | some form before it hits a reservoir, before it hits |
| 11 | a reservoir or some other body of water. |
| 12 | Q. What about the idea of channeling the |
| 13 | water across vegetation as opposed |
| 14 | MR. MARKS: I'm going to object. |
| 15 | It's beyond the scope and competence of this witness. |
| 16 | MR. FRIZELL: Excuse me, Mr. |
| 17 | Marks. Channeling the water into draimage channels |
| 18 | such as pipes and stream culverts. |
| 19 | MR. MARKS: I'd like to renew my |
| 20 | objection. I would like a ruling from the Chair |
| 21 | THE CHAIRMAN: Sam? |
| 22 | MR. SAGOTSKY: Well, it seems |
| 23 | that the question should relate to the particular |
| 24 | site. The present question seems to be directed to |
| 25 | the witness's expertise on the entire subject, shall |
| | |

ς.

Queale - cross 120 1 we say, of drainage. 2 MR. FRIZELL: Well, my only 3 question -- I'm sorry, Mr. Sagotsky. 4 MR. SAGOTSKY: On that basis, it 5 seems that the objection should be sustained. But Mr. --6 7 MR. FRIZELL: My only question to 8 Mr. Queale was whether or not he had overlooked that 9 and he was familiar with it when he told us about 10 detention facilities and filtering devices. 11 THE WITNESS: I have no problem 12 answering it. 13 MR. SAGOTSKY: All right. المحمد مرومید و الاردان. محمول است. مرو 14 THE WITNESS: My concept of 15 filtering was broad enough and I would expect that 16 filtering water through grassed areas and things of 17 that sort of a filtering process together with any 18 man-made mechanical filters that might be included. 19 And, frankly, I don't recall having heard of any 20 where detention basins had had mechanical filters 21 installed. 22 Generally from a planning perspective if Q. 23 you are trying to protect the Swimming River 24 Reservoir, would you recommend the installation of 25 on-site septic systems in the vicinity of the

Queale - cross 1 reservoir?

2 Generally I would like to have no development A. 3 in the vicinity of the reservoir. I don't know 4 offhand what the limits of that boundary should be on 5 lots with septic systems. Under certain soil, 6 conditions as far as the septic effluent is concerned 7 I would expect that there would be minimal or no 8 problem because you are filtering that effluent 9 through the soil.

121

10Q.Did you hear the testimony of Richard11Moser from Monmouth Consolidated Water Company?12A.

13 Q. Did you ever, from any source, learn 14 that the Swimming River Reservoir is being polluted 15 with coliforms?

16 A. That terminology sounds familiar from the case.
17 But I, frankly, don't remember the context and what
18 his conclusions were. It's obvious that if you have
19 a septic system that is overflowing and going
20 directly into the reservoir, you are going to have a
21 problem.
22 MR. SAGOTSKY: Mr. Frizell, are

23 you going to raise the guestion of non-point 24 pollution?

MR. FRIZELL: Yes, I was going to

STATE SHORTHAND REPORTING SERVICE, INC.

25

| | Queale - cross 122 |
|----|---|
| 1 | address that, Mr. Sagotsky. |
| 2 | MR. FRIZELL: I have no other |
| 3 | questions. |
| 4 | THE CHAIRMAN: Any questions |
| 5 | from the Board? |
| 6 | |
| 7 | CROSS EXAMINATION BY MR. SAGOTSKY: |
| 8 | |
| 9 | Q. There was a question on |
| 10 | cross-examination based upon density development |
| 11 | around a crossroad. And the question had some |
| 12 | implications to which you answered in some occasions, |
| 13 | yes; in some occasions, no. Am I on target with you, |
| 14 | Mr. Queale? |
| 15 | A. Yes. |
| 16 | Q. Can you apply your answer to this |
| 17 | particular development where it is requested to be in |
| 18 | its present location? |
| 19 | A. In my opinion, the determination again is a |
| 20 | major policy determination and that there is no |
| 21 | simple answer to that question. In other words, the |
| 22 | answer to that particular question can't be the sole |
| 23 | answer that would control whether this is a good or a |
| 24 | bad project. What I consistently try to do in my |
| 25 | testimony is to identify what I think are advantages |
| | |
| | |

~

STATE SHORTHAND REPORTING SERVICE, INC.

-

| - | |
|--------|---|
| | Queale - cross 123 |
| 1 | at the eastern end of town. Some of the advantages |
| 2 | at the east end of town can also be paralleled on |
| 3 | this site in terms of topography, in terms of roads, |
| 4 | access to the bus service and things of that sort |
| 5 | that might be a wash. Given the total state of |
| 6 | considerations, I would opt to recommend development |
| 7 | of a higher density at the eastern end of town. I |
| 8 | would also opt to attempt to develop an agricultural |
| 9 | program that could involve transfer might involve |
| 10 | development options on-site at different densities |
| 11 | than if the densities of units were transferred |
| 12 | off-site. |
| 13 | MR. FRIZELL: You are rehashing |
| 14 | your entire testimony in response to a fairly simple |
| 15 | question. |
| 16 | MR. SAGOTSKY: He has answered |
| 17 | that was not the only consideration. If I implied |
| 18 | that that was the only consideration, he has answered |
| 19 | it was not the only consideration. |
| 20 | BY MR. SAGOTSKY: |
| 21 | Q. With reference to the Zoning Board of |
| 22 | Adjustment considering this application and the |
| 23 | negative criteria, et cetera, and all the other |
| 24 | matters, is this particularly within the scope of an |
| 25 | Adjustment Board or is it something that's |
| | |

| | <u> </u> |
|----|---|
| | Queale - cross 124 |
| 1 | legislative, in accordance with your opinion? |
| 2 | A. I have to respond to that as a planner. As the |
| 3 | Township's, planner if this variance were granted |
| 4 | this gentleman raised a point a few hours ago. It |
| 5 | would, in fact, have things that I could not ignore |
| 6 | in subsequent recommendations to the Planning Board |
| 7 | and the Township Committee. It's obvious from my |
| 8 | testimony that I feel a project of this size, of this |
| 9 | intensity should not receive a use variance but that |
| 10 | the issues that have to be resolved with respect to |
| 11 | the litigation, to Mount Laurel testing and so forth |
| 12 | should be the subject of a master plan review, |
| 13 | development of a new land uses element and modified |
| 14 | development regulations provisions. |
| 15 | Q. Getting back to your characterization, |
| 16 | it's legislative? |
| 17 | A. Yes. |
| 18 | Q. It's a legislative matter and a solution |
| 19 | by legislation, and the handling the problem by |
| 20 | legislation rather than by the theory of an |
| 21 | application for a particular tract for special |
| 22 | reasons, for certain uses and taking into |
| 23 | consideration the negative criteria? |
| 24 | A. In my opinion, it's a legislative matter. |
| 25 | MR. SAGOTSKY: I have nothing |
| | |

÷---

| | | 125 |
|---|------------------------|--|
| | 1 | further. |
| | 2 | |
| | | THE CHAIRMAN: Are there any |
| - | 3 | questions from the audience? |
| | 4 | MR. RALEIGH: Jim Raleigh, Colts |
| | 5 | Neck. At the time of a consideration of a revised |
| | 6 | master plan in Colts Neck, would you consider changes |
| | 7 | in adjoining township plans since our last plan; for |
| | 8 | example, the incorporation and the impact on Colts |
| | 9 | Neck of the ECOM building and the impact on the |
| | 10 | farmland values or visual impact, highway planning |
| | 11 | impact or perhaps on the other towns, Marlboro's |
| | 12 | industrial park? |
| | 13 | THE WITNESS: Yes. As a matter |
| | | of fact, the revised plan will have a specific |
| | 15 | section in it that evaluates current planning and zoning |
| | 16 | in the adjoining communities and that ECOM building. |
| | 17 | There is a direct change that will have to result in |
| | 18 | the Township's circulation plan because the |
| | . c 19 ⁽ | construction of that ECOM building voids the |
| | 20 | opportunity for the Tinton Falls bypass that is now |
| | 21 | in the Township's plan and had previously been in the |
| | 22 | county plan. That bypass goes right through that |
| | 23 | |
| | | building and obviously cannot be put there. |
| | 24 | MR. SAGOTSKY: That was brought |
| | 25 | out in previous testimony, I believe. |

STATE SHORTHAND REPORTING SERVICE, INC.

.

126 1 MR. RALEIGH: I have another 2 similar question. With respect to the interceptor sewer that was mentioned in the Colts Neck master 3 4 plan as a possibility. And I observe that it is not 5 included in the county 208 study, at all. Is there 6 some reason for the difference? 7 THE WITNESS: The difference in 8 time, I would expect, in the preparation of those 9 documents. But that also would have to be a 10 reavaluation within the new master plan, which will 11 include the utilities services section. 12 MR. RALEIGH: Thank you. 13 THE CHAIRMAN: Mr. Herman, any 14 questions? Anyone else? 15 MR. MARKS: Just request a one 16 minute recess, if I can speak to my witness for a 17 second. 18 MR. FRIZELL: Can I ask one 19 question about that variance question? 20 21 CONTINUED CROSS-EXAMINATION BY MR. FRIZELL: 22 Do you have any problem with developing 23 0. 24 higher density housing for senior citizens by 25 variance?

| | 、 [| |
|-----------|------------|---|
| | | Queale - cross 127 |
| | 1 | A. On 222 acres, yes. I think the magnitude of |
| | . 2 | the project is something that has to be a judgment |
| | 3 | call. And I'm testifying in this instance and not |
| | 4 | only size of the acreage but the number of units. I |
| | 5 | think an individual site, you know, could be a |
| | 6 | different question. |
| | 7 | MR. SAGOTSKY: Well, our Chairman |
| | 8 | has gone through a stressful period and now suffers |
| | 9 | great physical pain from an operation he had recently. |
| | 10 | So for that reason only, I ask all concerned to be as |
| с. - С | 11 | brief as possible and see if we can't take care of |
| | 12 | everyone with his questions, but on the basis as much |
| | 13 | as brevity as possible. MR. FRIZELL: I have no more. |
| | 15 | MR. MARKS: I just want to speak |
| | 16 | to |
| | 17 | MR. SAGOTSKY: Mr. Frizell, would |
| | 18 | you have any objection if our Chairman left? He's in |
| | 19 | great pain and if he left and could fill in his |
| | 20 | presence through reading the minutes and certifying? |
| | 21 | MR. FRIZELL: I have no problem, |
| | 22 | Sam. I have no objection. |
| | 2 3 | MR. SAGOTSKY: There's no |
| 57 | 24 | objection on the part of Mr. Frizell. There are no |
| | 25 | questions by Mr. Herman. The audience, I assume, |
| | | |

STATE SHORTHAND REPORTING SERVICE, INC.

.

. . .

.

128 yueale - cross 1 will forgive us with the situation. I represent to 2 you that our Chairman, he would like to leave 3 momentarily unless there is something urgent? 4 MR. MARKS: No, no. 5 MR. DAHLBOM: Can we continue with three members? 6 7 MR. FRIZELL: The only material I 8 now have is Mr. Kovacs, which would go through the 9 plan and also propose and give to you the written 10 development standard that Mr. Fessler raised as to 11 the setbacks, et cetera, within the site. And it's -12 in other words, it's not opinion testimony. It's simply a description of the plans. So, I don't know. 1.3 14 It's not really hearings. I don't have a problem 15 with it. 16 MR. SAGOTSKY: I would have no 17 objection. Do you? 18 MR. MARKS: No, I have no 19 objection. 20 MR. SAGOTSKY: It would be a 21 fill-in, unless we only have four members. And so, 22 of course, we wouldn't have a quorum if our Chairman 23 left. So that my question to you is to whether there 24 would be any objection by filling in through 25 testimony. If you wanted to go on longer, we may or

| | 129 |
|----|--|
| 1 | may not have a proper it might appear we might be |
| 2 | about finished. |
| 3 | MR. FRIZELL: I would like to do |
| 4 | Mr. Kovacs. That's all. And I have no problem with |
| 5 | Mr. Larkin leaving. |
| 6 | MR. SAGOTSKY: You would have no |
| 7 | problem with the validity of three, of three instead |
| 8 | of four? |
| 9 | MR. FRIZELL: No. |
| 10 | (Whereupon Acting Chairman Larkin |
| 11 | is excused. Mr. Brennan substitutes as Acting |
| 12 | Chairman.) |
| 13 | MR. SAGOTSKY: We have one more |
| 14 | witness, ladies and gentlemen. |
| 15 | |
| 16 | JAMES KOVACS, a witness having been |
| 17 | recalled on behalf of the Applicant, having been |
| 18 | previously sworn according to law, testified as |
| 19 | follows: |
| 20 | |
| 21 | MR. SAGOTSKY: Mr. Kovacs, you |
| 22 | are being recalled. We are waiving the swearing in. |
| 23 | MR. FRIZELL: He was sworn in. |
| 24 | MR. SAGOTSKY: We're admonishing |
| 25 | that you are still under oath. |
| | |

ſ

٦

1 THE WITNESS: Thank you. 2 3 DIRECT EXAMINATION BY MR. FRIZELL: 4 5 Q. Mr. Kovacs, I don't think that we 6 please, very briefly, go through your own educational 7 background and your experience in the field of 8 engineering? 9 Α. I have a Bachelor of Science degree from 10 Rutgers University. I've taken graduate courses at 11 New York University and Cooper-Union. I hold a 12 professional engineer's license in the State of New 13 Jersey since 1963. I also hold a professional وربار المعلقي بالمحمولان (المراجع عليه المار). 4- ماليسمور الفاصل المحمولات السيسانية (14 engineer's license in the States of Massachusetts, 15 Vermont, New York, Maryland, Virginia and I hold a 16 land surveyor's license in the State of New Jersey. 17 I hold at a professional planners license in the 18 State of New Jersey. I am a member of the American 19 Society of Civil Engineers, the National Society of 20 Professional Engineers. 21 MR. SAGOTSKY: You may enter this 22 qualifications, if you have it in writing. 23 I don't have it in THE WITNESS: 24 writing. New Jersey Society of Professional 25 Engineers.

Kovacs - direct

٩,

131

| 1 | In my years of private practice, |
|----|---|
| 2 | I've mostly specialized in development or the |
| 3 | engineering and surveying of large tracts. |
| 4 | Specifically, just to name a few, I was involved in |
| 5 | the engineering of Twin Rivers, East Windsor Township |
| 6 | approximately 2,000 units; Hidden Lake in North |
| 7 | Brunswick, approximately 400 units; Monmouth Heights |
| 8 | in both Manalapan and Marlboro, approximately 500 |
| 9 | units; Yorktowne in Manalapan, approximately eight |
| 10 | hundred units. The only reason I bring up the larger, |
| 11 | because there are slightly different problems |
| 12 | associated with large tracts than there are with 50 |
| 13 | lot subdivision or ten lot subdivision. |
| 14 | In addition to that, I served as |
| 15 | a municipal engineer over a period of years for the |
| 16 | Township of Freehold in Monmouth County, the Township |
| 17 | of Manalapan, the Borough of Englishtown and the |
| 18 | Borough of Sea Bright. While in those years I was |
| 19 | active on the Planning Board, consulting as a |
| 20 | planning engineer. I assisted in the reviewing |
| 21 | variances and zoning subdivision ordinances. I |
| 22 | reviewed plans for the Planning Board. And that's |
| 23 | pretty broad brush, it think. |
| 24 | MR. SAGOTSKY: Now the witness is |
| 25 | qualified. |
| | |

Kovacs - direct 132 1 MR. FRIZELL: Will you please 2 mark that, Mr. Sagotsky? 3 MR. SAGOTSKY: Development Specifications, Colts Neck Village, Colts Neck, New 4 5 Jersey, offered by the Applicant, consisting of eight 6 pages, marked A-49. 7 (Whereupon the Development 8 Specifications of Colts Neck Village is marked A-49 9 for identification.) 10 BY MR. FRIZELL: 11 Mr. Kovacs, did you prepare A-49? Q. 12 Α. Yes, I did. 13 Q. All right. Now, is that based on A-37? 14 Α. That's correct. 15 And was that in response to concerns Q. 16 about whether or not the Board -- in a shortened form, 17 the development standard that had been incorporated 18 into A-37?19 That was in response to that, yes, sir. A. 20 Would you describe for the Board -- I Q. 21 know you described A-37 generally, but would you 22 describe to the Board in somewhat more detail, in 23 terms of what it contains? Is it set up on a section 24 by section basis? 25 A. Partially, yes. The plans themselves were

Kovacs - direct

1 prepared in conjunciton with representatives of four 2 specific firms. Our own firm, Abbington-Ney 3 Associates are the consulting traffic engineers and 4 the general site plan consultants. Pat Gilvary and 5 his firm provided the architecture. Elson Killam б provided environment, hydraulic, sewer and water. 7 John Rahenkamp and his staff were the project 8 planners. So basically we had a design team 9 consisting of four firms, input from Mr. Frizell and 10 Mr. Brunelli. And we would regularly meet about once 11 every week and have an eight or nine man design team 12 review of status of the project. So what you see 13 here is not specifically my idea as a particular 14 project or section but rather it's a distillation of 15 what we feel is the best of a team effort with iputs 16 from four different groups. 17 The first page of the project is a title sheet 18 with space for revision and revision dates, assuming 19 that there is a continuing planning process. The 20 sheets have been set up to be 24 by 46, which is in 21 accordance with the Colts Neck developmental 22 regulations. The rest of the state allows sheets 30 23 by 42. And perhaps 68 sheets we would have got it 24 down to 45. We attempted to comply with the Colts

133

25

Neck regulations.

Kovacs - direct

1 The second sheet is an overall master plan of the entire project. And if you'll view it, there is 2 3 an area map, shows how it fits on the scale, one inch 4 equals 3,500 feet of the surrounding area. The 5 adjoining properties are shown and the specific uses 6 by sections and the streets names are shown 7 throughout the project. By virtue of a key, you 8 would pick up a three-three-story condominium. The 9 area would be five point three acres. We designate 10 the numbers and one bedroom and two and three bedroom 11 and total units. Actually, you got a rundown of the 12 total number of units for the entire project and a 13 general schematic way in which you can pick up the sections and go through them. 14 15 MR. BRENNAN: Is the plan based 16 on the 120 senior citizens or the 90? 17 THE WITNESS: We have -- section 18 12, for example, is subsidized housing and senior 19 citizens with an asterisk, alternate B, subsidized 20 family housing, 90 houses, 1,107 units. In the first, 21 it would be 1,137. If you actually go to the sheets, 22 sheets 11 and 12 are site plans for section 12; 23 alternate A and section 12, alternate B. In one case 24 we have -- the A alternate would be senior citizen 25 mid-rise housing and the other, we have the family

134

| | · · · · · · · · · · · · · · · · · · · |
|----|---|
| | Kovacs - direct 135 |
| 1 | housing. So you pays your money and you takes your |
| 2 | choice. |
| 3 | I'm trying to go through it rather quickly. |
| 4 | You really should sit down and look at them for a |
| 5 | couple of hours. |
| 6 | Sheet three is an outbound survey of the entire |
| 7 | project. We ran the survey in the field set pipes to |
| 8 | the property corners, concrete monuments that were |
| 9 | found and determined the exact acreage of the |
| 10 | property; located the physical features and exits, |
| 11 | Route 18 freeway cutting across and Jersey Central |
| 12 | easement. The property fronts on 537 and Route 34. |
| 13 | MR. TISCHENDORF; Where Slope |
| 14 | Brook is? |
| 15 | THE WITNESS: Right, there. |
| 16 | Then we just go through section |
| 17 | by section. Section one is a site plan sheet for |
| 18 | section 1. It shows 42 patio or zero lot line homes. |
| 19 | We also listed on developmental standards, at the |
| 20 | bottom, of the minimum lot, width 50 feet, the |
| 21 | minimum lot depth, 90 feet. The minimum lot area, |
| 22 | 5,000 square feet. The front yard, 20 feet, backyard, |
| 23 | 25 feet, minimum side yard, zero. We proposed to |
| 24 | have the permitted minimum distance between |
| 25 | structures of 20 feet. Maximum building height would |
| | |

| | Kovacs - direct 136 |
|----|--|
| L | be two and a half stories. The concept here is that |
| 2 | there would be off-street, on-lot parking on each of |
| 3 | the lots. In addition, there would be overflow and |
| 4 | visitor parking in each of the turnaround cul-de-sacs. |
| 5 | We also show a two-acre reservation at the entrance |
| 6 | to 537, which is reserved for bus stop and commercial |
| 7 | uses. It is not intended to seek approval for the |
| 8 | site plan at this time but rather to designate the |
| 9 | area of it, obviously, for anything that is in a |
| 10 | sketchy detail at this time. We would have to come |
| 11 | back to the appropriate board, whether it be the |
| 12 | Zoning Board or Planning Board, with the specific |
| 13 | configuration. But we would |
| 14 | MR. BRENNAN: Mr. Frizell, we had |
| 15 | some problems on that particular |
| 16 | MR. FRIZELL: That's why it's |
| 17 | designated that way. It was shown reserved on the |
| 18 | original plan. It should have more detail. That's |
| 19 | why it's shown that way. The reason that it's not |
| 20 | site planned is because of the problem that we ran |
| 21 | into at the first meeting. |
| 22 | THE WITNESS: We do show the |
| 23 | major collector road with its intersection through |
| 24 | 537, the deceleration-acceleration lanes. And the |
| 25 | road widening has been designed by our traffic |

STATE SHORTHAND REPORTING SERVICE, INC.

Kovacs - direct

| | 1 | department, by Mr. Ney, and has the center lane |
|---|------|---|
| | 2 | island or divider in Village Boulevard, the site |
| | 3 | triangle easement in accordance with the Colts Neck |
| | 4 | developmental regulation, At each of the intersections, |
| | 5 | we spot out the drainage utility easements with the |
| | 6 | standard notations, drainage and utility easement is |
| | 7 | granted to Township of Colts Neck, et cetera, and |
| | 8 | that is standard throughout the tract. The drainage |
| | 9 | is shown, concrete pipes, headwalls and the grass |
| | 10 | swales on each. |
| | - 11 | MR. DAHLBOM: Did you say minimum |
| | 12 | width and length? |
| | 13 | THE WITNESS: Minimum width of 50 |
| | 145 | feet and minimum depth of 90 feet. You don't |
| | 15 | multiply. You can have them a little longer or a |
| | 16 | little shorter. |
| | 17 | THE WITNESS: Like a one acre lot |
| | 18 | for example, you usually maybe 180 foot minimum |
| | 19 | depth and 180 minimum width. And you don't multiply |
| | 20 | them out, those either. |
| | 21 | MR. FRIZELL: You wouldn't have |
| | 22 | them at the same time? |
| | 23 | THE WITNESS: That's correct. |
| F | 24 | Section two then, marching along, is a two-story |
| Ó | 25 | garden apartment is a two-story garden apartment |

and the second second

137

| | Kovacs - direct 138 |
|------|---|
| | condominium. Here we've picked up Slope Brook. |
| 2 | There's an existing structure and the existing farm |
| 3 | road. We've picked that up as our alignment for |
| 4 | Village Boulevard. We propose to increase the size |
| 5 | of the detention pond that presently exists. We were |
| 6 | going to create an island in the center of it by |
| 7 | taking out this area here, just around that contour. |
| 8 | We're also going to bring the pond, the detention |
| 9 | facility, up to the other end of Village Boulevard |
| 10 | where it will be directed to the storm drainage |
| 11 | system. It would be more of a water vista. This |
| 12 | water presently exists. The pond has an elevation of |
| 1.3 | 84.4. It will continue to do that. And it will hold |
| | water at all times, which will be both visually |
| 15 | pleasing and, in addition, it will act as a siltation |
| 16 | basin and also act for storm water control. The |
| 17 | elevation of the pond will rise during periods of |
| 18 | severe rainfall and will fall as the water outlets. |
| 19 | We've placed some standard notations on the plan, |
| 20 | which I would like to call out: These are |
| 21 | preliminary plans and assuming all normal progress of |
| 22 | things, they would be reviewed by the appropriate |
| 23 | officials, engineer, planner and realizing that they |
| , 24 | are preliminary, we're not feeling they are cast in |
| 25 | bronze. They're capable of being built on. |
| | |

STATE SHORTHAND REPORTING SERVICE, INC. .

,

Kovacs - direct

139 1 Going to the next, the finished spot elevations, finished floor elevations, final 2 3 grade and contours are preliminary. Final grades are 4 to be determined after final architecture and final 5 site plan, to maximize number of existing trees. In 6 any event, we've got something here that's workable. 7 But when we get to final, we like the ability to 8 possibly adjust them further specifically to save 9 trees and also assist us in the grading operation, 10 Going along to sheet six, this 11 shows three specific sections, three, four and nine. 12 There's a right-hand turn here. And as we're coming down, this is Village Boulevard. That was the 13 14 detention pond next to it. And now we've got section 15 three, four and nine. You can see here the Jersey 16 Central Power and Light Company easement is shown 17 backing up to section nine and section -- let's take 18 them in order. Section three, for example, has 19 three-story condominiums. There will be 90 two-bedroom 20 units with 165 parking spaces. Access will be from 21 Village Boulevard, a grouped parking system. Section 22 four would contain town, houses 30 two-bedroom, 11 23 three-bedroom, for a total of 42; 82 parking spaces. 24 Section nine is similar, also contains townhouses, a 25 connection from Village Boulevard and one onto Joshua

Kovacs - direct 140 1 Huddy Drive. I would point out that we propose to --2 going back to sheet one -- two rather, we propose to 3 construct Joshua Huddy Drive from Village Boulevard 4 to the end of the property. This has been picked off 5 the Colts Neck master plan for roads in an 6 approximate location. We didn't trace it exactly. 7 But generally it starts at Route 34. It ends at the 8 Stavola common property line, at this location. We 9 just sort of fit it into this project. This is 10 designated on the Colts Neck Township master plan as 11 a connector road. We've incorporated it. While we 12 intend to pave it through this section -- I'm going 13 back once again to the sections three, four and nine. 14 we have reserved the right-of-way through the 15 remainder of the section, so that at any time the 16 municipality desires extending, they have the ability 17 to do that. 18 We've also kept the units a 19 minimum of 50 feet of what would be the right-of-way, 20 also with the road set at pretty much existing grade. 21 we don't foresee a great problem with the extension 22 of the road throughout the project. 23 There are a system of grass 24 roadside swales and they've been carefully designed so that the velocities of the water but we've kept 25

Kovacs - direct 141 1 the velocity of the water in those roadside swales 2 above two and under five feet per second. Two will 3 keep your water moving along without having any 4 problems with sediment or extra siltation, and five 5 will be less than at which it would provide scour. 6 The grass swales, in our opinion, will filter all of the urban wastes, the road tars and the various 7 8 problems, dog droppings and the like, fertilizer for 9 the lawns. So by the time it gets to the detention 10 ponds, the further siltation, what we'll be putting 11 out is as clean a product as leaves the property 12 right now. The roadside swales have been 13 specifically designed in accordance with the 14 recommendation contained in the Delaware and Raritan 15 Canal Commission, which we've been using over in the 16 western side of the state. 17 MR. FRIZELL: Do you know who developed those? General Whipple. 18 19 MR. SAGOTSKY: What page are you 20 on? 21 THE WITNESS: Page seven, which 22 shows -- continuing down -- this is continuing down 23 Village Boulevard. Once again, two more sections of townhouses. Section five would have 81 units with 24 25 162 parking spaces, a double tennis court in the rear

Kovacs - direct

142 1 of the units. 2 Section ten would have 50 units 3 with 100 parking spaces, a connection from Joshua 4 Huddy Drive and Village Boulevard. We've made every attempt to have a small number of communities, a 5 6 number of small units throughout the tract, so that 7 everything is developable. They really are 8 bite-sized and well separated. So you are going to 9 get a different look here. Every section is 10 separated by detention ponds, open space and 11 landscaping so that the distance between units, after 12 you go from one section or the other, is 100 to 120 الربح بجهرين بجحساني الصوار الانترج الي and a second second feet. 13 14 BY MR. FRIZELL: 15 Breaking the project into the six-five Q. 16 versus ten-five would have a different look than ten? 17 That's correct. And also farther away, sheet Α. 18 eight, and see -- section six? But, like, for 19 example, the distance between four and five, the 20 units are 150, 160 feet apart. The same is true from 21 units five to six. You've got a detention pond going 22 across. The general effect here is, you are not 23 going to see one large project. You will see a 24 number of smaller sections with different housing 25 types. And they are all separated from each other by

| F | |
|--------|---|
| | Kovacs - direct 143 |
| 1 | the open space and detention ponds and drainage |
| 2 | swales and the Jersey Central Power and Light Company |
| 3 | Sheet nine, which is the frontage |
| 4 | along Route 537, we show the painted traffic island |
| 5 | here, our deceleration lane. We show a detention |
| 6 | pond which will be a general focal point. It will be |
| 7 | a wet pond. And specifically, if you look at Mr. |
| 8 | Gilvary's rendering, I'm pointing to the one with the |
| 9 | lake on, there is the detention pond as you are |
| 10 | looking across in that rendering, in this direction. |
| 11 | It will contain water. It will rise and fall with |
| 12 | the flood. |
| 13 | Now, against the school site here |
| 14 | we've kept an open space buffer here. We further |
| 15 | kept the buildings away here, approximately 100 feet |
| 16 | with just one end unit here on the condominiums. And |
| 17 | the rest would be further away. We don't we don't |
| 18 | think we're going to have a negative effect in terms |
| 19 | of the school. First of all, we're not going to |
| 20 | touch the first 50 feet or so. |
| 21 | Running back up, sheet ten, |
| 22 | section eight, these are single family lots, average |
| 23 | 7,500, 8,500 square feet, nominally 7,500; site |
| 24 | triangles. The whole scheme is to have everything on |
| 25 | cul-de-sacs so that a person living in the single |
| | |

| | Kovacs - direct 144 |
|----|--|
| 1 | family unit doesn't have cars flipping by his door |
| 2 | every minute, other than lives on the street. The |
| 3 | end unit corner lots have additional frontage so that |
| 4 | they're further away from Village Boulevard. |
| 5 | MR. DAHLBOM: All these streets |
| 6 | is it assumed the Township would be taking over all |
| 7 | of these streets? |
| 8 | THE WITNESS: All of the public |
| 9 | roads, yes. It is our proposal, if you will, that it |
| 10 | is the major boulevards, the major collectors which |
| 11 | are intended to go public and maintained by the |
| 12 | municipality. Single family lots, we feel, are no |
| 13 | different than any other single family lots anyplace |
| 14 | and should be maintained. |
| 15 | MR. FESSLER: Didn't we hear |
| 16 | testimony contrary to that? Only the major would be |
| 17 | Township-owned, the others would be development-owned? |
| 18 | MR. FRIZELL: I don't think you |
| 19 | heard testimony contrary to that. I think what Mr. |
| 20 | Kovacs is saying, where there is a single family unit |
| 21 | development and the street in front of it, that could |
| 22 | be proposed for dedication. When I presented |
| 23 | information about the possiblity of a homeowners |
| 24 | association, we did indicate that all the condo units, |
| 25 | et cetera, would be fronting on condo-maintained , |
| | |

4

roads and they would. These are not homeowners association.

THE WITNESS: Single family lots. BY MR. FRIZELL:

5 I think that's the only distinction? 0. 6 Α. That's correct. For example, referring to 7 sheet 14, which shows the bottom three sections, 8 sections 14, 15 and 16, which are three specific 9 townhouse sections, it is intended that Village 10 Boulevard, shown in this, would be a public road. 11 Greentree Drive, which is the connection out to Route 12 34, be a public road. However, the entrance area and 13 the parking lot and everything shown within a finite 14 section, that is intended to be part and under the 15 maintenance or aegis of a homeowners group. And that 16 maintenance will begin and end there. But the public 17 roads, it has always been my opinion that they would 18 be dedicated to the municipalilty and maintained. 19 MR. FESSLER: The condo roads, 20 would you show us on the original map which roads 21 would not be public and what --22 MR. FRIZELL: These are the 23 single family sections. 24 MR. FESSLER: Where are the ones 25 that are not? Those would be not public?

STATE SHORTHAND REPORTING SERVICE, INC.

145

Kovacs - direct 146 1 MR. FRIZELL: That's correct; 2 and everything in here. 3 THE WITNESS: Everything shown here is intended to be treated as driveways. 4 5 MR. FESSLER: These are to be 6 treated as driveways? 7 MR. FRIZELL: The roads that have 8 names would be dedicated. 9 MR. RALEIGH: One turning 10 direction and turning radii all conform to the Colts 11 Neck? 12 THE WITNESS: Specifically 114 13 feet in diameter, which -- with a 100 foot diameter 14 outside circle. And unless I'm mistaken, I thought 15 the tangents were to be kept. 16 MR. FESSLER: You are right. 17 THE WITNESS: We really weren't --18 MR. DAHLBOM: So you got "Woodland" 19 in there? 20 THE WITNESS: Name changes are 21 subject to further review by the municipality? 22 And then south of Route 18 23 freeway, we do show a couple of items. One is the 24 connection to the offices. 25 MR. BRENNAN: Page what?

STATE SHORTHAND REPORTING SERVICE, INC.

.

Kovacs - direct

1 THE WITNESS: Page 16. We do 2 show a 50 foot right-of-way, minor collector road, 3 into the office-industrial site. And once again, the 4 site plans for the office-industrial have not been 5 prepared other than schematically. And all we're 6 showing here is two alternatives. One has the option 7 of either putting one big use, one big building with associated parking 8 9 MR. DAHLBOM: Page 17? 10 THE WITNESS: -- or on page 18, 11 the possibility of running in a little cul-de-sac and 12 a couple of smaller uses. Once again, anything that 13 is schematic or sketchy, obviously, would have to 14 come back to the Planning Board and/or Zoning Board 15 with the exact details of that.

147

16 The Killam firm is designing the 17 sewerage treatment facility and we just left -- other 18 than the site, we left that entirely to them. 19 Sheet 19 shows a landscaping 20 schedule, the types of shrubs and trees and 21 ornamentals that will be placed throughout the 22 project. And then on each specific section -- in 23 other words, sheet 20 for example, would be the same 24 as sheet four. Where sheet four shows the site plan, 25 sheet 20 shows what we're intending to do in that

| | Kovacs - direct 148 |
|----|---|
| 1 | section in terms terms of planting; nothing within |
| 2 | the site triangle easement heavily planted; in the |
| 3 | buffer, a walking path through the open spaces, a |
| 4 | bicycle path along the Village Boulevard. And we |
| 5 | also show tree save anyplace that we can throughout |
| 6 | the project. We've had our landscape architect |
| 7 | MR. SAGOTSKY: I had to miss a |
| 8 | part you covered street widths, have you? |
| 9 | THE WITNESS: I haven't, but |
| 10 | they're in the specification. |
| 11 | MR. SAGOTSKY: All right. I |
| 12 | don't want to get you off your trend. Continue with |
| 13 | your trend. |
| 14 | MR. FESSLER: Does this meet the |
| 15 | shade tree planning specifications? Was it intended |
| 16 | to meet that? |
| 17 | THE WITNESS: I wasn't aware of |
| 18 | that. My landscape architect handled it. I don't |
| 19 | know. |
| 20 | MR. MARKS: Who is your landscapi |
| 21 | architect, Mr. Kovacs? |
| 22 | THE WITNESS: Guy Leighton, an |
| 23 | on-staff member of Abbington-Ney. |
| 24 | Yeah, we do show we have left |
| 25 | off street lighting in terms of the major streets |

149 Kovacs - direct 1 only because we don't design them. We leave that up 2 to Jersey Central. We have sent plans to Jersey 3 Central for their design. I'm not competent to 4 design lighting for public roads. And no matter what 5 you do, they change it anyway. However, within our б own sections, we set up our lighting interior. We 7 show the standard Clone (phonetic) 81100. That's 8 what they are pushing in some areas of the county. A 9 couple notations on the planning we don't show on 10 here, the individual unit landscaping probably, more 11 commonly called foundation plantings. This is just 12 such a scale, we're showing the major trees, major 13 plantings. Obviously, each unit is going to have 14 foundation plantings. But the plan is so preliminary 15 we can't show it at this scale. And by Jersey 16 Central Power and Light Company we show a bicycle 17 path that will be paved macadam. 18 MR. DAHLBOM: Do you have to get 19 an agreement with the lighting company for that? 20 THE WITNESS: Yes, to put 21 anything on the right-of-way. It's been my 22 experience --23 MR. DAHLBOM: I think you have to 24 get some sort of an agreement. 25 Exactly. I'm just THE WITNESS:

| | Kovacs - direct 150 |
|----|---|
| 1 | spinning through the sheets. Sheet 24, sheet 25, you |
| 2 | can all they do is follow the site plans. We've |
| 3 | tried to save, on sheet 25, a large stand of trees up |
| 4 | near the front. We've actually worked our parking |
| 5 | around it and we've also planted, really loaded up |
| 6 | the planting in this section, because this will be |
| 7 | one of our addresses out on 537. We would like to |
| 8 | have a fairly substantial planting in that area. We |
| 9 | also propose a couple of plantings, berms, out at 537 |
| 10 | to soften the effect of the units against the road. |
| 11 | And the rest of it is purely |
| 12 | engineering details. These are sheets 29, 30, 31, 32, |
| 13 | 33 are all road profiles, which show the cutting and |
| 14 | fill. You will notice that we don't have any street |
| 15 | or significant flat grades throughout the project. |
| 16 | Sheets 34, 35 and 36 are the |
| 17 | cross-sections of Slope Brook. This would be |
| 18 | required for submission to the Department of |
| 19 | Environmental Protection. We have two other unnamed |
| 20 | streams, which we've designated stream "B" and stream |
| 21 | "C". |
| 22 | Sheets 37, 38 and 39 indicate |
| 23 | that the cross-sections on sheet 40 we show the |
| 24 | specifications of the various roadways. For example, |
| 25 | I think the plans kind of speak for themselves, but, |
| | |

| i | |
|-----|---|
| | Kovacs - direct 151 |
| 1 | you know, Village Boulevard is intended to be a four-lan |
| 2 | divided collector road with a shoulder, 80 foot |
| 3 | right-of-way, 18 foot planted median, two ten foot |
| 4 | travel lanes or 20; and a four-foot shoulder. We |
| 5 | have a detail for our swale coming off the end of the |
| 6 | road, which is also shown in the street. We show a |
| 7 | detail for our to the lots of bike path detail, |
| 8 | six feet wide, inch and a half, FABB Course 4, quarry |
| 9 | process stone. That will be throughout the site. A |
| 10 | shoulder detail, it is intended that the shoulders |
| .11 | actually be minimum of six inch crushed stone base so |
| 12 | that we do have some surface there. They will filter |
| | any of the urban runoff impurities through the crushed stone. |
| 15 | MR. MARKS: Is it only one road |
| 16 | that's four lanes, divided? |
| 17 | THE WITNESS: That would be |
| 18 | Village Boulevard to Joshua Huddy Drive. At that |
| 19 | point, our traffic engineers felt that we will still |
| 20 | have it divided. But at that point, we only need two |
| 21 | lanes. We're starting to peel off most of our at |
| 22 | the point the development specifications which I've |
| 23 | handed call out, road by road, what it is intended to |
| 24 | be. I think since they'll be in the record, there's |
| 25 | no point in just reading again. Sheet 41 has some |
| | |

| | Kovacs - direct 152 |
|-------------|--|
| 1 | details on a flared end; section for drainage pipe |
| 2 | will have rip rap to further control erosion; and, a |
| 3 | detail for a drainage manhole. And then on sheet 42, |
| 4 | detention pond details. |
| 5 | The rest were prepared by Killam |
| 6 | Associates. And sheet 43 to and including 65 of 68, |
| 7 | once again, show the outline of the project and on |
| 8 | these it shows the sanitary and water system. We |
| 9 | propose by the way, coming out of our water plant |
| 10 | we're proposing a minimum 12 inch water main. So the |
| 11 | possibility of connecting to anyone else's ten inch |
| 12 | line, it's just not possible. |
| 13 | And the remaining three sheets of |
| 14 | the site are sheets 66, 67 and 68. These are |
| 15 | architectural elevations prepared by Patrick Gilvary |
| 16 | and they show the various what a typical size unit |
| 17 | townhouse would look like, what an eight unit luxury |
| 18 (| townhouse would look like. Section 15 and elevations |
| 19 | garden apartment, condos. Sheet 67, sheet 68, the |
| 20 | front, rear and right side elevation of the least |
| 21 | cost condominiums in section 7. |
| 22 | MR. TISCHENDORF: Did you say the |
| 23 | last 50 feet on the westerly side would be left |
| 24 | untouched or was that just next to the school? |
| 25 | THE WITNESS: Just next to the |

Kovacs - direct 153 1 school. From testimony, I guess that was sensitive. 2 MR. TISCHENDORF: So what does 3 that also mean, a fence would be left untouched? 4 THE WITNESS: We actually wouldn't touch the fence or shrubery there. There 5 6 will be a green space right there and there will be 7 no building in here. And then going back along the 8 trail, single family residential, there will be a 9 green area in there. 10 MR. HERMAN: Do you propose for 11 any of the drainways or any of the recreational 12 facilities, like the tennis or ballfield, to be dedicated? 13 اس معارفا المراجع بالمراجع والمحادي المراجع والمتراجع المراجع المراجع والمراجع والمراجع والمراجع والمراجع والم المراجع والمراجع والم المراجع والمراجع والم ۰۰ ، ۰۰ ، ۰۰ ، ۰۰ ۱۹۹۹ - ۲۰۰۰ - ۲۰۰۰ - ۲۰۰۰ - ۲۰۰۰ 14 MR. FRIZELL: Not dedicated. 15 THE WITNESS: No. That was going 16 to be under the control of a homeowners group for the 17 residents. 18 MR. HERMAN: That's true for both 19 the recreational and the open areas? 20 MR. SAGOTSKY: And the roads. 21 MR. HERMAN: He mentioned some of 22 the roads would be dedicated. 23 MR. FRIZELL: What we proposed is 24 an advantage. If the town wanted to maintain them, 25 they could maintain. Typically this will done by

| | Kovacs - direct 154 |
|----|--|
| 1 | homeowners association. That's what we proposed. |
| 2 | THE WITNESS: I think that's an |
| 3 | overview. |
| 4 | BY MR. FRIZELL: |
| 5 | Q. Would it be in the detail to show any |
| 6 | fencing around the school? |
| 7 | A. We haven't proposed any fencing. Both my site |
| 8 | inspection and our topographic survey indicate that |
| 9 | there is an existing fence right on the property. |
| 10 | Obviously, that wouldn't be touched. And there's an |
| 11 | existing shrubery, a treeline, also on the property. |
| 12 | Once again, that wouldn't be touched. I can't see |
| 13 | the necessity of putting a fence next to a fence. It |
| 14 | would just be wasting money. The school still will |
| 15 | be some significant distance from the closest |
| 16 | building. |
| 17 | MR. TISCHENDORF: This pond that |
| 18 | was mentioned last time, was mentioned as a possible |
| 19 | attractive nuisance. How deep will that be? |
| 20 | THE WITNESS: Normally, four feet |
| 21 | and then it will raise six feet or so when it gets |
| 22 | full of water. |
| 23 | MR. HERMAN: You are saying only |
| 24 | four feet at the deepest point? |
| 25 | THE WITNESS: Four feet, pretty |
| | |

Kovacs - direct 155 1 much flat. We would like to hold that much water all 2 the time. It should be a minimum of four feet deep 3 to retard algae growth. Once you get lower, you get 4 a problem with algae 5 MR. DAHLBOM: What protection do б you have from that to keep the flow from coming 7 across the road? 8 THE WITNESS: Just the 9 calculations. Our calculations are for 100 year 10 storm. After --11 MR. FESSLER: Is this coming in 12 or leaving? THE WITNESS: It will be leaving. 13-14 In other words -- and then it will be going into the 15 culvert under the road. 16 MR. FRIZELL: I think the purpose 17 of this is to prevent that from happening. That's 18 why it's shown that way to prevent from anything 19 getting across the road. 20 Obviously they're THE WITNESS: 21 designed for a certain storm frequency. When they 22 exceed the storm frequency --23 MR. HERMAN: That would be the 24 six foot level? 25 THE WITNESS: And that will Yes.

| - | |
|----|--|
| | Kovacs - direct 156 |
| 1 | be at a 100 year flood. That happens today's, for |
| 2 | example, today's was a lot less. |
| 3 | Now, the question of fencing, we |
| 4 | don't propose them. But I would have no serious |
| 5 | objection to them if the Board felt that the |
| 6 | attractive nuisance thing we do need them for |
| 7 | flood control. We should have them. |
| 8 | MR. FRIZELL: You say "them", you |
| 9 | mean the pond itself? |
| 10 | THE WITNESS: Right, yeah. We |
| 11 | need the ponds. But the fence, if the Board felt |
| 12 | that it should be, I would no objection to it. |
| 13 | MR. SAGOTSKY: Twin Rivers, they |
| 14 | seem to have a problem of providing enough parking |
| 15 | for the respective areas. For example, they provide |
| 16 | sufficient parking for the people who live there but |
| 17 | very little, if any, for guests. |
| 18 | THE WITNESS: I didn't find that. |
| 19 | I'm not sure. |
| 20 | MR. SAGOTSKY: They have some |
| 21 | other problems in Twin Rivers. They find some views |
| 22 | THE WITNESS: This, I would point |
| 23 | out, is a lot nicer in terms of the unit styles and |
| 24 | everything else. I could give you chapter and verse |
| 25 | with what's wrong with Twin Rivers. It's a lot less |
| | |
| , | |

| 1 | |
|----|--|
| | Kovacs - direct 157 |
| 1 | dense. The townhouse units are up around 11, 12 and |
| 2 | the overall on it is probably eight or nine |
| 3 | MR. FESSLER: Do you know what |
| 4 | their ratio of parking was? |
| 5 | THE WITNESS: One, five. This is |
| 6 | two point oh plus. But one thing that I would say, |
| 7 | the item of dentention pond fencing, which I kind of |
| 8 | like, I don't like, you know, the chain link, six |
| 9 | foot high, that type of thing. It looks terrible. |
| 10 | What we found that really seems to work is a standard |
| 11 | three rail, split rail fence that looks good and then |
| 12 | we back it up, put a hog wire or something like that. |
| 13 | It's a one by two wire that is stapled to the fence. |
| 14 | We're not worried about is 12, 13, 14 year olds |
| 15 | scaling a fence. What we're worried about is a $\frac{1}{3}$ |
| 16 | toddler on a bicycle, that type of thing. And that |
| 17 | type of fence can preclude that. It's definitely up |
| 18 | to the Board. The slopes, though, are so gentle of |
| 19 | going in, this it's not a question of someone |
| 20 | tumbling into it, but rather a side slope. |
| 21 | MR. SAGOTSKY: The people at Twin |
| 22 | Rivers are also upset about the the ratio of |
| 23 | commercial and industrial with reference to the |
| 24 | residential. |
| 25 | THE WITNESS: Also, it's two |
| | |

``

158 Kovacs - direct 1 different projects. I was there last night in East 2 Windsor trying to get a Crown Royal gas station in 3 front. The people were up in arms. But, you know, that's entirely different. 4 MR. SAGOTSKY: They feel that the 5 interior commercial became an exterior commercial on 6 7 the main highway, they had intended the commercial to 8 provide for those who live in the area, and that 9 extends. It has come along the area that you are 10 talking about and they're upset about it. You are 11 indicating, without going into detail, that you 12 alleviated many of the problems of Twin Rivers? Is 13 that your general statement? THE WITNESS: Exactly. 14 15 MR. MARKS: Mr. Kovacs, are you 16 the project planner for this? 17 THE WITNESS: It was a team, Mr. 18 Marks. Rahenkamp did the overall planning design; 19 the architect, the building sizes and location; and I 20 actually drafted the locations, the streams, road 21 grading, the storm drainage and the detention bodies. 22 MR. MARKS: So essentially you 23 did the engineering? 24 THE WITNESS: That's correct. MR. MARKS: You didn't do the 25

Kovacs - direct 159 1 architecture and the planning? 2 MR. FESSLER: what is the intent 3 of the industrial zone? Was it to be consistent with 4 our industrial zone regulations in our ordinance? 5 MR. FRIZELL: We would have to 6 look at the site plans I'm not familiar with it 7 MR. FESSLER: What about uses? 8 What uses? Are they assumed to be the uses 9 consistent with the zoning ordinances? 10 MR. FRIZELL: I'm not sure. I'11 11 tell you the truth, Mr. Fessler, it was only today 12 that I think that I realized -- are you talking the industrial zone on the other sides of the road? 13 14 MR. FESSLER: Yeah. 15 MR. FRIZELL: That's the only 16 place. 17 MR. FESSLER: We have Laird's is 18 industrial. 19 MR. FRIZELL: That's not zoned --20 MR. FESSLER: Well, yes, it is. 21 But we have some regulation that states the permitted 22 uses. 23 How about the so-called -- in 24 various places it does not show commercial. In this 25 area this does.

Kovacs - direct 160 1 THE WITNESS: The other side. 2 MR. FESSLER: Would the 3 commercial meet our regulations as to our uses? MR. FRIZELL: Yes, that's correct. 4 5 This will be developed according to the zoning. That 6 would be commercial according to the zoning. 7 MR. FESSLER: Industrial is in 8 the back section, seven, at the very end. The use is 9 permitted. 10 MR. FRIZELL: Offices, office 11 building, research establishments, processing, 12 warehousing and trucking operations. Yeah, I think --13 THE WITNESS: That's pretty broad 14 brush. 15 MR. FRIZELL: We think that we 16 would probably comply with the zoning ordinance, Mr. 17 Fessler. I think if you want to take a closer look 18 at it at leisure, I have no other questions of Mr. 19 Kovacs. 20 MR. SAGOTSKY: I have no 21 questions at this time. 22 MR. BRENNAN: As the Acting ÷ 23 Chairman, does the audience have any questions? 24 MR. MARKS: I was just -- I'm 25 going to have one witness available next time. I

161 1nk Mr. Herman's is going to have something. 2 THE CHAIRMAN: The Chair will 3 entertain a very quick motion to adjourn. 4 MR. TISCHENDORF: So moved. 5 THE CHAIRMAN: Second. 6 (Whereupon the hearing adjourned 7 at 11:35 p.m.) 8 9 CERTIFICATE 10 11 I, KATHLEEN M. SHAPIRO, a Registered 12 Professional Reporter and Notary Public of the State 13of New Jersey, certify that the foregoing is a true 14 and accurate transcript of the proceedings as taken 15 before me stenographically on the date hereinbefore 16 mentioned. 17 18 R.P.R., с. Ρ. 19 20 Dated: August 7, 1980 My Commission Expires on 21 June 7, 1983 22 23 24 25
