10. Brief Description of the Proposed Project and Intended Use:

The existing 0.85 mgd advanced wastewater treatment plant will be expanded to process 1.75 mgd, by constructing an adjacent treatment train using the same process as the existing plant. A new distribution box will split the influent flow to each facility and there will be a common plant outfall. After construction the two facilities will be operated in parallel as one plant. The expanded plant will comply with the same percent removal requirements as those required by the NJPDES permits for the existing plant.

11. I hereby certify that the information furnished on this application (and the attachments) is true. I am aware that false swearing is a crime in this State and subject to prosecution.
